

Microsoft 365 Licence Report

Tenant licence position, per-user assignment, and machine reconciliation
— pulled live from Microsoft Graph and the workstation fleet.

BOTTOM LINE

Five findings, in order of cost

1 · NO ENDPOINT SECURITY IS LICENSED ANYWHERE IN THE TENANT

`0365_BUSINESS_PREMIUM` is Microsoft's legacy SKU name for **Microsoft 365 Business Standard**. Business *Premium* — the edition that bundles Defender for Business — is `SPB`, and it is **not present**.

Neither Business Standard nor Office 365 E3 includes endpoint protection.

`ATP_ENTERPRISE` is Defender for *Office 365* — email only. **Endpoint defence rests entirely on the third-party Webroot/OpenText agent billed through the MSP.**

2 · BUSINESS BASIC IS OVER-ALLOCATED - 3 PURCHASED, 4 ASSIGNED

A negative balance that Microsoft will eventually enforce. One of the four holders (`vgoltes@`) is a **disabled account**; removing it resolves the violation at no cost.

3 · DISABLED ACCOUNTS STILL CONSUMING LICENCES

`mli@` and `vgoltes@` are disabled yet hold full licence bundles. `tuser@` — disabled last week — still holds an **Entra ID P1** seat, and P1 is at **28 of 28 with zero spare**. A new hire currently requires a purchase.

4 • THE OUTGOING MSP HOLDS LICENCES INSIDE YOUR TENANT

tadmin@bmzse.com (Tenacious / T-Net) holds a Business Basic seat **and the tenant's only** ADALLOM_STANDALONE (Defender for Cloud Apps) licence — 1 of 1. You are paying for a security product that only your MSP can use.

5 • THREE WORKSTATIONS BELONG TO USERS WITH NO LICENCE AT ALL

KOR-101 (carmstrong , departed Global Admin), **KOR-320** (mgosal), **KOR-314** (tverkerk). If those staff have left, these are idle machines still domain-joined, still carrying agents, and still billing per endpoint.

TENANT POSITION

Purchased versus consumed

Ordered by exposure. **over** means more seats assigned than purchased; **idle** means paid-for and unused.

SKU	PRODUCT	BOUGHT	USED	SPARE
0365_BUSINESS_ESSENTIALS	M365 Business Basic	3	4	-1
ATP_ENTERPRISE	Defender for Office 365 P1	32	30	2
EXCHANGESTANDARD	Exchange Online P1	1	0	1
0365_BUSINESS_PREMIUM	M365 Business Standard	19	18	1
MCOMEETADV	Audio Conferencing	4	3	1
AAD_PREMIUM	Entra ID P1	28	28	0
ENTERPRISEPACK	Office 365 E3	13	13	0
MCOEV	Teams Phone	3	3	0
ADALLOM_STANDALONE	Defender for Cloud Apps	1	1	0
VISIOCLIENT	Visio Plan 2	1	1	0
STANDARDPACK	Office 365 E1	1	1	0
TEAMS_ESSENTIALS_AAD	Teams Essentials	1	1	0
POWERAUTOMATE_ATTENDED_RPA	Power Automate Premium	1	1	0

Free/unlimited SKUs omitted: FLOW_FREE, POWER_BI_STANDARD, MCOPSTNC, Teams_Premium_(for_Departments) (0 purchased).

THE SHAPE OF IT

Two parallel productivity estates. 13 users on Office 365 E3 and 18 on Microsoft 365 Business Standard, doing broadly the same work. That split is historical rather than designed, and it complicates every subsequent decision — including endpoint security, since remediation differs by base SKU.

RECONCILIATION

Workstation → user → licence

Primary profile per machine, matched against assigned licences.

MACHINE	PRIMARY USER	BASE LICENCE	ENTRA P1	STATUS
KOR-101	carmstrong	— none —	—	Departed Global Admin. Machine idle?
KOR-104N	dsingh	Business Standard	yes	OK
KOR-202	jmarkulin	Office 365 E3	yes	OK
KOR-204	ilalonde	Office 365 E3	yes	OK
KOR-205	jstuart	Office 365 E3	yes	OK
KOR-206	omara	Office 365 E3	yes	OK
KOR-206-N	kevinw	Office 365 E3	yes	OK
KOR-207	markb	Business Standard	yes	OK
KOR-208-N	rbeirne	Office 365 E3	yes	OK
KOR-210	jatkinson	Office 365 E3 + Phone	yes	OK
KOR-213-N	ilalonde	Office 365 E3	yes	2nd device
KOR-216	gdow	Business Standard	yes	OK
KOR-217	andrean	Business Standard	yes	OK
KOR-223N	kreid.kor	Business Standard	yes	OK
KOR-224	simons	Office 365 E3	yes	2 machines
KOR-302N	mli	Business Standard	yes	Account DISABLED — licence still assigned
KOR-304	simons	Office 365 E3	yes	2 machines
KOR-305	cford	Office 365 E3	yes	OK
KOR-306	lfinnigan	Business Standard	yes	OK
KOR-307-N	nyu	Business Standard	yes	OK
KOR-308	szheng	Business Standard	yes	OK
KOR-310	sacosti	Business Standard	yes	OK
KOR-314	tverkerk	— none —	—	No licence. Departed?
KOR-320	mgosal	— none —	—	No licence. Departed?
Kor-RDS01	ilalonde	—	—	Server (RD Gateway)

COVERAGE GAPS

Users outside the security baseline

Entra ID P1 is what makes Conditional Access enforceable. Defender for Office 365 P1 is what filters mail. Not everyone has both.

PRINCIPAL	HOLDS	MISSING
Henry Xu	Office 365 E3 only	No Entra P1, no Defender for O365
Mobile User	Business Standard	No Entra P1, no Defender for O365
Field Reviews	Business Standard	No Entra P1, no Defender for O365
Deltekt Vision	Business Basic + ATP	No Entra P1
General Inbox	E3 + ATP	No Entra P1
Tenacious Admin (T-Net)	Business Basic + Defender for Cloud Apps	No Entra P1 — and holds your only ADALLOM seat

WORTH VERIFYING

Henry Xu is a human user with no Entra ID P1. Conditional Access policies are licensed per-user on P1 — confirm whether he falls in scope of `MFA_All_Apps` and the rest of the CA set, because an unlicensed in-scope user is both a compliance question and a potential coverage hole.

ACTIONS

What to do, in order

- **Strip licences from** `mli@`, `vgoltes@` **and** `tuser@`. Free, immediate, and it clears the Business Basic over-allocation plus an Entra P1 seat you currently have none spare of.
- **Confirm the employment status of** `mgosal`, `tverkerk` **and** `carmstrong`. Three workstations with no licensed user. If they've gone, the machines come off the MSP endpoint bill too.
- **Reclaim** `tadmin@` **at handover** — the Business Basic seat and, more importantly, the sole Defender for Cloud Apps licence.

- **Decide the endpoint-security replacement deliberately.** Nothing in the tenant covers endpoints today. Defender for Business is a purchase (~\$3/user/month), not an entitlement you already hold — but it is materially cheaper than the MSP's AV-bundled line and, critically, you would administer the console yourself.
- **Rationalise E3 versus Business Standard** when the MSP contract is next reviewed. Two estates doing one job makes every future licensing decision twice as expensive to reason about.

APPENDIX

Installed Office edition per machine

Pulled from `ProductReleaseIds` in each machine's Click-to-Run configuration.

`0365ProPlusRetail` = M365 Apps for **enterprise** (rides on E3);

`0365BusinessRetail` = M365 Apps for **business** (rides on Business Standard).

CONSUMER OFFICE IS PROVISIONED ON 15 OF 25 MACHINES

`0365HomePremRetail` — **Microsoft 365 Personal/Family, a consumer SKU** — is registered alongside the business edition on 15 workstations. This is OEM factory residue that survived imaging: Lenovo ships a Microsoft 365 consumer trial, and it stays in the Click-to-Run configuration forever unless explicitly removed.

It costs nothing directly, but it is a **known cause of Office activation prompts and "which account do I sign in with" confusion** — the client can offer a consumer licence path alongside the work one. Worth stripping as part of a standard image cleanup.

MACHINE	USER	ASSIGNED	INSTALLED EDITION	MATCH
KOR-101	carmstrong	— none —	ProPlus + HomePrem	Office installed, no licence
KOR-104N	dsingh	Business Std	Business + HomePrem	✓
KOR-202	jmarkulin	E3	ProPlus	✓
KOR-204	ilalonde	E3	ProPlus + HomePrem	✓
KOR-205	jstuart	E3	ProPlus	✓
KOR-206	omara	E3	ProPlus	✓
KOR-206-N	kevinw	E3	ProPlus + HomePrem	✓
KOR-207	markb	Business Std	Business + HomePrem	✓
KOR-208-N	rbeirne	E3	ProPlus + HomePrem	✓
KOR-210	jatkinson	E3	ProPlus	✓
KOR-213-N	ilalonde	E3	ProPlus	✓
KOR-216	gdow	Business Std	Business	✓
KOR-217	andrean	Business Std	Business + HomePrem	✓
KOR-223N	kreid.kor	Business Std	Business + HomePrem	✓
KOR-224	simons	E3	Business	Edition ≠ licence
KOR-302N	mli	Business Std (<i>disabled</i>)	Business + HomePrem	Licence on disabled account
KOR-304	simons	E3	ProPlus	✓
KOR-305	cford	E3	ProPlus + HomePrem	✓
KOR-306	lfinnigan	Business Std	Business	✓
KOR-307-N	nyu	Business Std	Business	✓ (<i>build 20158</i>)
KOR-308	szheng	Business Std	Business + HomePrem	✓
KOR-310	sacosti	Business Std	Business + HomePrem	✓
KOR-314	tverkerk	— none —	Business + HomePrem	Office installed, no licence
KOR-320	mgosal	— none —	Business + HomePrem	Office installed, no licence
Kor-RDS01	—	—	(none)	No Office on RD Gateway

What the machine data adds

- **The E3 / Business Standard split is real and physical** — 12 machines run the enterprise client, 12 run the business client. It isn't a billing artefact; two different Office products are deployed across one office.

- **KOR-224 is the one genuine mismatch.** Simon Szarkiewicz holds Office 365 E3, but KOR-224 has the *business* client installed while his other machine (KOR-304) has the enterprise one. The business client cannot activate against an E3 entitlement — worth checking whether Office on that machine is actually activated.
- **Three machines run Office with no licensed user behind them** — KOR-101, KOR-314, KOR-320. Same three flagged earlier as having departed or unlicensed primary profiles.
- **Client build is uniform** at `16.0.20228.20124` across 24 of 25, with KOR-307-N one revision ahead. Office updating is healthy and needs no intervention.
