

KOR / ITC Construction Group - Collaboration Dossier

BC Housing teaming pursuit | KOR Structural | 19 Jun 2026 | Prepared for the John Markulin to Brad Burnett outreach

Bottom line

- KOR is not cold with ITC - it is a warm, multi-project relationship with two ready inroads. Lead the outreach with the shared Arbutus Village / Burrard Gateway history and KOR's deep Larco book, then ask to be ITC's structural partner on BC Housing bids.

1. Two warm inroads (now in the graph)

KOR contact	ITC contact (email)	Why it matters
John Markulin	Brad Burnett - President & CEO (bburnett@itc-group.com)	The relationship to activate - JM knows him; ITC's top decision-maker.
Omar Alcazar (Sr SE)	Manit Saiyadh - Construction Manager (msaiyadh@itc-group.com)	Live thread - took Omar's call re: BC Housing teaming, Jun 2026.
(engage for bid mechanics)	David Carlton - SVP Preconstruction (dcarlton@itc-group.com)	Preconstruction assembles the consultant team incl. the structural engineer on bids.

2. Shared track record (Deltek-verified)

- Billed directly to ITC (Deltek client CL00209): Arbutus Block C & D (basement wall + public-art pedestal) and Burrard Gateway Tower B - KOR was ITC's structural sub.
- With Larco Investments (client CL00236): KOR's deepest BC relationship - 186 projects - including the Arbutus Village development (Buildings A, C & D) that ITC is building now. Arbutus Village is the shared ground: Larco (owner) + ITC (GC) + KOR (SE).
- Collaboration context already in the graph on Little Mountain (Holborn / BC Housing) and the Burnaby Lake Recreation Centre.

3. ITC company profile

Founded 1983; HQ 564 Beatty St, Vancouver; offices in Calgary, Edmonton, Toronto and Victoria; ~250+ staff. Now owned by Pomerleau (Canada's largest private GC), giving national scale and bonding. 250+ completed projects, \$1M-\$600M. Delivery modes: General Contracting, Construction Management, Design-Build / Design-Assist, Tenant Improvement. In Aug 2025 ITC acquired Farmer Construction (Victoria), expanding onto Vancouver Island (Harris Green Village, 526 units).

- Leadership: Brad Burnett (President & CEO, since 2025) | Doug MacFarlane (elevated to CEO / Vice-Chair, Pomerleau West) | Mathias Graf (SVP Operations) | David Carlton (SVP Preconstruction - the SE-team decision-maker) | Tom Gevatkoff (VP General Superintendent).

4. ITC's active BC Housing pipeline - the teaming bullseye

Project	Location	Units	Owner / Developer	Status
ALT Housing & Healing Centre (Lu'ma)	52-92 E Hastings, Vancouver	111	BC Housing / Terra / ALT	U/C 2026
Little Mountain EA	Vancouver	70 non-market	Holborn / BC Housing	U/C 2026
Little Mountain AB (Neighbour House)	Vancouver	48 + daycare	Holborn / City of Vancouver	U/C 2026
ALT Jackson	401 Jackson Ave, Vancouver	172 social (\$60M)	Lu'ma Native Housing	U/C 2026
First United Church Redevelopment	320 E Hastings, Vancouver	100+ below-market	First United / Lu'ma	U/C 2026
Arbutus Village Blocks C & D	4255 Arbutus St, Vancouver	266 (KOR = SE)	Larco Developments	U/C 2026
Landmark on Robson	740 Nicola St, Vancouver	319 (83 social)	Asia Standard	Done 2024

Highlighted: KOR is already the structural engineer on Arbutus Village Blocks C & D - a live ITC project - the strongest possible opener.

5. How ITC picks the structural engineer (KOR's entry point)

- Design-Build / Design-Assist (private developer work - Larco, Tien Sher, Chard): ITC picks the SE as part of its team. Primary entry - be ITC's named SE on DB/DA pursuits before RFQ.
- BC Housing / stipulated-sum GC: owner and architect appoint the SE, but ITC's bid team lobbies for familiar subs and informally recommends the SE during pursuit.
- No public preferred-SE partner is credited for ITC (no Fast+Epp / Glotman / RJC / Bush Bohlman) - open field. The person to land is David Carlton, SVP Preconstruction.

6. The pitch KOR leads with

1. **Proven team.** 'We're your structural engineer on Arbutus Village right now, did Burrard Gateway with you, and we're Larco's SE - let's run that team on BC Housing.'
2. **BC Housing fit.** KOR just delivered the Burnaby Lake Recreation Centre (public / institutional) - directly relevant to BC Housing and public-sector bids.
3. **Value engineering.** Structural cost-optimization to help ITC's bid budgets pencil (Omar's offer).
4. **The ask.** Get KOR onto ITC's BC Housing bid teams as the structural partner: JM to Brad Burnett, Omar to Mani Saiyadh, and into David Carlton (SVP Preconstruction) for the bid-team mechanics.

7. Do we already have this information?

- Yes - more than expected. KOR's graph already held ITC's senior leadership (Brad Burnett, David Carlton, Mathias Graf, with emails) and already mapped ITC to its parent Pomerleau, from a prior research pass. This dossier added the other seven contacts (Manit Saiyadh + the preconstruction and project directors) and the connective tissue.
- The shared-project history was verifiable in Deltek (ITC = client CL00209; Larco = CL00236, 186 projects). The only real gap was pulling it together plus the live ITC pipeline - now closed.
