

Islander Engineering Ltd.

Civil engineering, clean energy & land development - Victoria, BC - islanderengineering.com

Founded 2016; approximately 11-50 staff at 2031 Store St, Victoria. CEO & co-founder Josh Bartley, P.Eng.; co-founder Corey Brown, P.Eng. (now Managing Director of sibling firm Gwaii Engineering). Turnkey civil practice from feasibility and zoning through detailed design and construction, with a sustainability focus.

What they do (full civil scope)

- Land development & subdivisions: zoning reviews + summary reports, land-use feasibility, conceptual site planning, site-impact analysis, quantity take-offs.
- Missing-middle / SSMUH: houseplex + small-scale multi-unit evaluations aligned to BC's SSMUH legislation - a current high-demand Vancouver Island niche.
- Municipal & public works: road & sidewalk design, stormwater / drainage modelling & design, sanitary sewer design & modelling, water-service analysis & sizing, vehicle swept-path studies, Fire Underwriters Survey (FUS) analysis.
- Clean energy & carbon solutions; blue / waste-to-energy; engineering surveys; feasibility-through-construction project management.

Sectors & service area

Land development, municipal infrastructure, commercial, residential communities & subdivisions, mixed-use, and public works - serving Victoria, Greater Victoria and Vancouver Island (2031 Store St, Victoria; 250-590-1200; info@islanderengineering.com).

Leadership & verified contacts

Name	Title	Email (verified)
Josh Bartley	CEO & Co-Founder, P.Eng.	jbartley@islanderengineering.com
Corey Brown	Co-Founder, P.Eng. (now MD at Gwaii)	cbrown@islanderengineering.com
Davide Cuzner	Engineer	dcuzner@islanderengineering.com
Mike Achtem	Principal (also at Gwaii)	machtem@islanderengineering.com
Jared Smylie	Engineering staff (also at Gwaii)	jsmylie@islanderengineering.com

KOR relationship & relationships in common

- No prior KOR contractual history (not in Deltek; no contact on file) - net-new teaming relationship.
- Sibling firm to Gwaii Engineering - shared founder Corey Brown plus shared staff (Achtem, Smylie). Treat Islander + Gwaii as one relationship cluster centred on Corey Brown.
- DATA NOTE: Islander was mis-classified as a 'Competitor' in KOR's graph. It is a CIVIL firm and a teaming partner, not a structural rival - re-kind to Vendor/partner recommended (it was distorting the competitor-footprint report).

Defence Canada proposal - team & KOR past-performance check (for Rory)

A Defence Canada / DCC proposal is forming with Yellowridge Construction (GC) and DHK Architects - likely Vancouver Island (CFB Esquimalt). Past-performance check from KOR's Deltek:

- KOR has NO completed or active jobs with Islander Engineering - confirmed absent from Deltek. Islander CANNOT be cited as KOR past-performance.

- KOR HAS active jobs with the OTHER team members: Yellowridge Construction (611 Brunswick St, Prince George) and dHKarchitects (All Clan House, Stellako BC). Those are the citable KOR-team references for the proposal.

Talking points for Rory

- Complementary disciplines: KOR structural + Islander civil on Vancouver Island land development, missing-middle and municipal work where Islander leads the civil scope.
- Opener to Josh Bartley (jbartley@islanderengineering.com): complementary structural capacity for Islander's land-development pipeline.
- One conversation covers two firms - reference the Gwaii relationship via Corey Brown.

Strategic note - the two-firm cluster

Treat Islander + Gwaii as ONE relationship centred on Corey Brown. Islander is the conventional / open-market Vancouver Island civil practice; Gwaii is the Indigenous-focused (Haida-owned, CCAB-certified) sibling. Together they cover both the open-market land-development lane (Islander) and the First Nations / BC Housing / Indigenous-participation lane (Gwaii) - so a single KOR teaming relationship reaches across KOR's entire Vancouver Island pursuit base. See the Gwaii dossier for the named live teaming triggers.

How this intelligence was gathered (2026-06-23)

Web research (islanderengineering.com, LinkedIn, Business Examiner); Hunter.io domain-search (email pattern {f}{last}); Apollo.io people/match; Deltek linked-server check (no KOR client/vendor/contact history); cross-reference of KOR's pipeline. Ingested + deduped into the BD graph (CanonicalOrg 69527). DATA NOTE repeated: re-kind from Competitor to Vendor recommended.
