

Vancouver Coastal Health (VCH) — Pursuit Dossier

Prepared: 2026-06-24 · **For:** KOR Structural — Business Development · **Source:** KOR BD platform (CanonicalOrg #18917), refreshed + competitively verified 2026-06-23.

VCH is a Lower-Mainland health authority running **one of BC's largest active hospital capital programs** (\$4B+ in flight). KOR is a **challenger** here — strong seismic heritage, but no acute-care hospital credit yet, against entrenched healthcare SEs (Glotman Simpson, RJC, Bush Bohlman). This dossier is the full picture: the pipeline, who holds structural, our realistic path in, and the 19 named VCH capital decision-makers with how to approach each.

1. Bottom line

- **The marquee acute-care towers are not winnable cold.** Richmond Hospital's \$1.96B Yurkovich Pavilion structural is **captive to Entuitive** in the Infrastructure-BC alliance (the "Yurkovich" lesson — "no public SE" ≠ open seat). VGH and Lions Gate are early/locked.
 - **KOR's realistic entry, in order:** (1) **build a first BC healthcare credit** via a LTC or smaller LMFM-prequalified job; (2) **get onto the VGH Campus Redevelopment pre-design via Kasian Architecture now** — before that program procures and locks its team the way Richmond did; (3) **activate the 19-person contact set** so KOR is "known" when a genuinely-open seat appears.
 - **Credential gate:** VCH acute-care buildings are post-disaster (BCBC Part 4, importance factor 1.5). VCH will ask for EGBC post-disaster (PDC-3/4) healthcare experience. KOR is an EGBC Accredited Employer with BCBC-2024 seismic fluency, but **zero publicly-listed acute-care credits** — close this gap (LTC first, or a JV with a healthcare SE) before pursuing acute-care as prime.
-

2. Capital pipeline

Project	Value	Stage	Architect	GC / builder	Structural	KOR read
Richmond Hospital Redevelopment — Yurkovich Family Pavilion	\$1.96B	Design → construction 2026, complete ~2029	HDR Architecture	Graham Design Builders (alliance)	Entuitive (captive at team selection; not public)	CLOSED — Yurkovich trap. MONITOR only.
VGH Campus Redevelopment (10-phase master plan; ED + inpatient towers)	tens of \$B over 30 yrs	Concept / planning; rezoning 2026; Phase 1 construction 2027+	Kasian Architecture (+ Durante Kreuk)	not engaged	not yet assigned	Best long-game — get on Kasian's pre-design bench before it locks.
Lions Gate Hospital Redevelopment — future phases	TBD	Planned / concept (Phase 2 community engagement 2026)	IBI Group (master plan)	—	unassigned	Watch; SE procurement ~12–18 mo before construction.
Richmond Long-Term Care Home (Lions Manor-Fentiman)	\$178M	Planned / pre-construction 2026	unconfirmed	CM (likely selected)	unconfirmed	Verify if CM has locked structural before investing.
West Vancouver LTC (525 Clyde)	min 210 beds	Funding-approved / re-paced	not selected	—	—	Monitor Infrastructure BC; RFP timing TBD.
VCH LTC New Sites (Squamish + W. Van)	—	Planning	—	—	—	Tied to the halted Squamish program — see below.
Squamish LTC (Hilltop House)	\$286M	HALTED indefinitely (Feb 2026)	—	—	—	Do not pursue — province paused alongside 6 other LTC projects (\$1.8M/bed).

(Also recently completed/closed: Lions Gate Paul Myers Tower — HDR/PCL, opened Mar 2025; VGH OR Renewal Ph2 — PCL, in construction; VGH Cyclotron — complete.)

3. Competitive reality — who holds structural at VCH

- **Glotman Simpson** is the only confirmed VCH acute-care SE incumbent — but both confirmable credits (Diamond Health Care Centre at VGH; HOpe Centre at LGH) are **pre-2018**. On the *recent* towers (Paul Myers, VGH OR Ph2) **no SE is publicly named** — which, per the Yurkovich correction, is the normal state of an alliance (subs locked at team selection, never announced), **not** an open seat.
 - **Richmond Yurkovich = Entuitive** (KOR-internal finding; not web-confirmable because alliances don't publish subs).
 - Statewide healthcare-SE context: **Bush Bohlman** (Royal Columbian, Cowichan, w/ Parkin), **RJC** (Burnaby Hospital, New St. Paul's, works with DYS), **Fast+Epp**.
 - **Implication:** the qualified pool is small and credentialed (post-disaster PDC). KOR breaks in through a *relationship* (architect/GC) + a *first credit*, not a public RFQ.
-

4. The decision-maker map (CanonicalOrg #18917 — all 19, @vch.ca)

Procurement reality: SE selection on major VCH projects runs through the **Capital Projects directors** (owner side) and, on alliances, the architect/GC. The Contract/Finance roles are *not* SE-selection contacts.

Tier 1 — Capital Projects leadership (primary SE-selection influence)

Name	Role	Email	Approach
Susan Luckey	Director, Major Capital Projects & Strategy	susan.luckey@vch.ca	Top director-level target — one level above the PM team. LinkedIn first touch.
Behnaz Sanei	Director, Major Capital Projects	behnaz.sanei@vch.ca	Highest-priority operational contact. Ex-Turner Construction — speaks delivery/structural-package language. Warm intro via Turner if KOR has a connection.
Sam Samsami	Senior Director, Capital Projects	sam.samsami@vch.ca	Senior capital-delivery lead; manages the PM team (Sanei, Yoon, et al.).
Belinda Graham	Sr. Director, Capital Projects, Coastal	belinda.graham@vch.ca	Coastal-region capital portfolio.

Tier 2 — Chief Project Officer tier

Name	Role	Email / phone	Approach
Lorne Mack	Chief Project Officer & ED, Capital Planning	lorne.mack@vch.ca	Retired (CPO role posted Dec 2025). Prior UVic capital lead — warm intro if KOR has UVic ties. New CPO arriving = relationship-building window.
Richard Gage	Executive Director & Chief Project Officer	richard.gage@vch.ca · +1 778-872-2087	⚠ name not publicly verifiable — confirm internally before outreach.
Jill Brimacombe	Deputy Chief Project Officer	jill.brimacombe@vch.ca	GC background — frame KOR around on-time structural-package delivery.
Susanna Ko	Deputy Chief Project Officer, Capital Projects	susanna.ko@vch.ca	High-priority; oversees Richmond delivery. CCHL conference touchpoint — warm intro if Jim/JM have CCHL ties.

Tier 3 — Project-specific

Name	Role	Email	Approach
Kristalina Dinovsky-Kutev	RHR Project Director, Design & Construction (Richmond)	kristalina.dinovskykutev@vch.ca <i>(verify on bounce: kristalina.dinovsky@vch.ca)</i>	VCH-side Richmond PD. Prior Fraser Health + Kasian — warm intro via Kasian. Richmond SE is locked, but a relationship now seeds future work.
Samuel McLeod	Senior Project Manager (Richmond)	samuel.mcleod@vch.ca	Reach via Luckey/Sanei first.
Jenny Yoon	Project Manager, Capital Projects	jenny.yoon@vch.ca	Project-level; ask about active projects needing structural subs.
Gail Malenstyn	Vice-President, Richmond Acute	gail.malenstyn@vch.ca	<i>Clinical VP — not an SE contact. Context only.</i>

Tier 4 — Community capital & facilities

Name	Role	Email	Approach
Elizabeth Dier	Director, Real Estate, Community Capital Projects	elizabeth.dier@vch.ca	Community health centres / primary-care sites = smaller, more accessible scope. Good first-credit territory.
Mauricio Acosta	Executive Director, Facilities Management	mauricio.acosta@vch.ca	Entry for seismic reviews / facility assessments / renovations on existing buildings — a credible first-credit path.

Not SE-selection contacts (context only)

Fernando Pica (CFO & VP), **Amit Sobti** (Sr Dir, Contract Management), **Leon Poznanski** (Sr Dir, Contract Advisory) — relevant at contract execution, not SE selection.

5. The play (next 2 quarters)

1. **Get on the LMFM “Pre-Qualified Professional Engineers” list — Structural.** This is now confirmed and concrete (full detail: KOR-VCH-Prequalification-Briefing-2026-06-24). LMFM runs the shared engineering prequal roster for VCH + Fraser Health + PHSA + Providence; the live list is **RFPQ26-PE, effective 29 May 2026**, and **KOR is not on it** while every named competitor is (Bush Bohlman, Glotman, RJC, Fast+Epp, Entuitive, DIALOG, Stantec, WSP). Passive BC Bid watching ≠ being on the roster.
 - **Mechanism:** annual refresh. The 2025 cycle closed **31 Oct 2025** → list effective 29 May 2026; the **2026 refresh should post ~Sept–Oct 2026** on BC Bid + Bonfire. The refresh is also when listed firms must re-apply, so it’s the universal entry point — *watch for it now*.
 - **How to apply:** monitor BC Bid + the Fraser Health Bonfire portal (fraserhealth.bonfirehub.ca); contact **FMP@fraserhealth.ca**.
 - **Tiers:** firms qualify cell-by-cell by **Acute vs Non-Acute** × fee band (<\$150K / \$150K–1M / \$1M–5M / >\$5M). EGBC licensure is the hard gate (KOR clears it). **KOR’s realistic entry = Non-Acute + lower fee bands** (small firms like Equilibrium, Sense, Wicke Herfst Maver sit in just 1–2 cells) — exactly the first-healthcare-credit play, e.g. via **Elizabeth Dier / Mauricio Acosta**.
2. **VGH Campus pre-design via Kasian** — engage Kasian’s engineering team now, before the program procures and locks like Richmond did. This is the highest-value pre-lock window.
3. **Activate the contact set** — open relationships with **Susan Luckey** and **Behnaz Sanei** (Tier 1) and the new CPO once named, so KOR is known when a seat opens.
4. **Do NOT** chase Richmond Yurkovich as an open SE seat (Entuitive holds it). HDR/Graham are worth a relationship for *future* work — not a Richmond-SE pursuit.

Infrastructure BC project director on Richmond: **Matthew Binning** (matthew.binning@infrastructurebc.com).

6. Accuracy notes

- **Richard Gage** — title/role not confirmable from public sources; confirm internally before outreach (the only contact with that flag — the other 18 are corroborated).
- **Squamish LTC** — halted indefinitely Feb 2026; the dossier keeps it for context but it is not a live pursuit.
- All emails follow VCH's `first.last@vch.ca` pattern; the Dinovsky-Kutev address has a hyphenation variant noted above (verify on bounce).
- Structural-engineer attributions are MONITOR/locked reads, not open seats — see §3.
