

Bosa Development Corp — Developer Pursuit Dossier

Prepared for: Jim DesRoches, KOR Structural — San Diego trip June 29–July 1, 2026 **Date:** June 26, 2026 **Author:** KOR BD Research

NOTE: This dossier is exclusively about Bosa Development Corp (Nat Bosa / Ryan Bosa, bosadevelopment.com / Embassy BOSA). It explicitly excludes Bosa Properties (Colin Bosa, bosaproperties.com) and Bosa Construction — separate companies with different leadership.

1. Snapshot

Item	Detail
Company	Bosa Development Corp
Founders	Natale “Nat” Bosa (Founder), Ryan Bosa (President since 2017)
Headquarters	2920–320 Granville St, Vancouver BC V6C 1S9
San Diego Office	121 West Market St, San Diego CA 92101
Website	bosadevelopment.com
Portfolio Scale	20,000+ homes delivered; 9,000+ in development
US Brand	Embassy BOSA (Ryan Bosa founded “Embassy Development” 2003; merged into Bosa Dev 2017)
KOR History	20+ year relationship — Ryan Bosa testimonial on KOR’s website
Incumbent SE	Glotman Simpson (confirmed on every US project; displacement target)
SD Projects	Pacific Gate (done), Savina (done), Andia (under construction), First & Island (planned)
Why Now	Andia under construction (GS locked); First & Island + future sites = open competition

Why Bosa Development matters to KOR: They are the most active high-rise condo developer in downtown San Diego, with a confirmed pipeline of multiple additional towers on land they already own. KOR has a 20-year established relationship that has gone dormant at the US project level — reactivating it is the mission for this trip.

2. Business & Footprint

Origin. Nat Bosa started as a construction labourer in the 1960s, co-founded Bosa Brothers (1966) as a GC, then pivoted to development through the 1980s. He is credited with pioneering downtown San Diego’s residential condo revival beginning in 1998, expanding Whistler into an international resort destination, and reshaping downtown Vancouver and Calgary. Inducted into the Urban Development Institute Hall of Fame (2016); 2013 Alonzo Award recipient.

Ryan Bosa. Nat’s son. Grew up on construction sites, ran construction through his mid-20s, then led the California expansion. In 2003 he separately founded Embassy Development (master planning, Vancouver/Seattle/Calgary), which merged back into Bosa Development in 2017 when he assumed the presidency. The “Embassy BOSA” branding appears on US condo projects.

What they build. High-rise concrete residential condos (35–53 storeys), mixed-use podium towers, and multi-phase urban master plans. Bosa builds its own projects — they are their own general contractor, which means they control the entire design-engineering team selection process internally.

Geographic footprint (active): British Columbia (Vancouver, West Vancouver, New Westminster, Victoria), Alberta (Calgary), Washington (Bellevue/Seattle), California (San Diego). Also historical/complete projects in Oregon, Hawaii, Arizona, San Francisco.

Family company separation. In 2022 Bosa Development (Nat/Ryan) sued Bosa Properties (Colin — Nat’s brother’s side of the family) over US trademark use of the Bosa name, resulting in Bosa Properties renaming its US subsidiary. The two companies operate completely independently. KOR’s contact data has historically included Bosa Properties personnel — those contacts (including any @townline.com emails) are not Bosa Development and have been excluded from this dossier.

3. Active Pipeline in KOR's Markets

Project	Location	Status	Scale	SE of Record	Notes
Andia	Downtown San Diego (8th–9th & B–C)	Under construction	40 floors, 399 units, 787,611 SF	Glotman Simpson	Completion 2027; floor 3 reached March 2025; sales gallery open, 50+ sold
First & Island	Marina District, San Diego	Planned / permits active	35 floors, ~215 units	TBD	Nat Bosa's next SD priority; permit filed; no GC/SE announced publicly
Park Row	215 Bellevue Way NE, Bellevue WA	Demo complete Apr 2026; construction start TBD	22 floors, 143 units	Glotman Simpson	No construction loan announced as of Apr 2026; pre-sales 2026
Main & Bellevue	Bellevue WA (nearby Park Row)	Phase 1 design; construction start ~mid-2026	3 towers × 26 floors, 449 total units	Glotman Simpson	Architect: Amanat; KPFF for civil
Pier West	New Westminster BC	Under construction / late stage	2 towers, 53 storeys tallest, 665 units	Glotman Simpson (confirmed)	Metro Vancouver's tallest waterfront building
Arris Residences	Calgary (East Village)	Phase 1 complete; Phase 2 ongoing	41 floors, 600+ total units	Not publicly confirmed	KOR did Evolution Calgary (a related Bosa Calgary project)
Trestle Rise	West Vancouver BC	Active	Single-family, smaller scale	Not public	Above Trestle Bridge; boutique product
Dockside Green	Victoria BC	Active	15-acre mixed-use master plan	Not public	Upper Harbour; multi-phase

Future SD pipeline. Nat Bosa said publicly that Andia will be his “last San Diego project until there is more certainty” on tariffs, interest rates, and the economy (statement circa 2025). However, Bosa Development has confirmed landownership at multiple additional downtown SD sites, including the First & Island parcel and sites at Pacific Highway/Broadway North (Columbia District). First & Island permit activity in late 2025 indicates it is the company's next concrete move.

KOR market focus: Andia (GS locked), **First & Island** (open — immediate opportunity), and future SD towers. Park Row and Main & Bellevue in Bellevue WA are adjacent opportunities if KOR wants to extend WA reach.

4. Who to Know

Approach Paul Lamme (San Diego) first. He controls development from the SD office and has been Bosa's on-the-ground decision-maker in California since 2016.

Name	Role	Email	LinkedIn / Phone
Paul Lamme	VP Development — San Diego	Not publicly verified	linkedin.com/in/paul-lamme-8556a672
Ryan Bosa	President, Bosa Development	Not publicly listed	ZoomInfo — p***@thinkbosa.com (verify domain)
Nat Bosa	Founder (active)	Not public	—
Cheryl Eimer	Senior Director, Sales & Marketing US	ceimer@bosadevelopment.com	—
Priscila Andrade	Project Manager — San Diego	Not public	San Diego-based

Background on Paul Lamme. Architecture degree (BArch, University of Arizona). Previous roles at Carrier Johnson + CULTURE (SD architecture firm) and Intergulf Development Group (Vancouver developer). He bridges both the architecture/design side and the development side — he speaks structural. At Bosa Development since November 2016; connected to at least 22 San Diego properties in public records. He is likely involved in assembling the consultant team for First & Island.

Corporate contacts in Vancouver (for Jim to be aware of): The head office phone is 604-294-0666. Additional staff at bosadevelopment.com include Jason Koverchuk, Chelsea Virji, and Anthony Moussa (roles not fully verified in public sources; treat as secondary contacts until confirmed).

5. Competitive Reality — Glotman Simpson Incumbency

The full picture. Glotman Simpson (Vancouver-based SE, ~90 staff) is Bosa Development’s structural engineering firm across virtually every major project:

GS Project for Bosa Development	Market	Status
Pacific Gate (888 W E St, 41 floors, 232 units)	San Diego	Completed
Savina (720 W Ash St, 36 floors, 285 units)	San Diego	Completed 2019
Andia (40 floors, 399 units)	San Diego	Under construction
Main & Bellevue (3 towers, 449 units)	Bellevue WA	Design / start 2026
Park Row (22 floors, 143 units)	Bellevue WA	Demo done, start TBD
Pier West (2 towers, 53 storeys)	New Westminster BC	Under construction
Madrone (2 × 16-storey + 9-storey mid-rise)	San Francisco	Completed

GS followed Bosa from Vancouver to every US market they entered. This is a deep, trust-based, multi-decade relationship — not a transactional one.

GS’s structural weakness for Bosa’s SD work: Glotman Simpson’s US offices are Vancouver (HQ), Los Angeles, and Calgary. **They have no San Diego office.** Their SD work is serviced from the LA office (1990 S Bundy Drive, Suite 375, Los Angeles CA 90025). Their California SE license is held by Chris Smith (LA office; peer-review/plan-check experience with City of SD but based in LA). That is a local-presence gap KOR can exploit.

What KOR has that GS does not (in San Diego): KOR has an active, multi-project SD portfolio (Simone Little Italy — 2024 ACI SD Award for Best Residential Structure; The Grande SD; 800 Broadway; 6th & Olive; The Lindley; The Quince; Bayside; The Fellow; and others). KOR is a known firm with established SD relationships. GS runs SD remotely.

KOR’s existing Bosa Development relationship. This is not a cold call. Ryan Bosa’s testimonial appears on KOR’s website: *“For a business relationship to last decades there must be trust and respect”* — attributed to Ryan Bosa, President, Bosa Development. KOR is confirmed SE on Evolution (Calgary — 474 units, 8-to-33 storeys). The 20+ year relationship exists; it has not extended to US high-rise projects. The ask is to change that.

6. KOR Angle & How to Win

Why KOR’s position is actually strong

- Warm relationship, not cold approach.** Ryan Bosa knows KOR. Jim is not walking in as a stranger — this is a re-engagement of a documented long-term client.
- Local presence = real advantage on First & Island.** GS services San Diego from LA. KOR has local engineers who can be on-site for concrete pours, RFI turnarounds, and pre-pour inspections without travel overhead. On a 35-floor tower with a tight budget and tariff risk, that matters.
- SD portfolio credibility.** Simone Little Italy (2024 ACI award) is a direct comparable to Bosa’s product type — high-rise residential concrete podium tower in downtown SD.
- The window is First & Island.** Andia is fully underway with GS locked in. First & Island is the next SD tower — permit filed, no SE publicly announced. This is the entry point.
- Bosa is its own GC.** They don’t go through a GC to select the SE — Paul Lamme and the development team choose structural directly. Jim can talk directly to the decision-maker.

Talking points for Jim

- *"We've worked with Bosa Development for 20+ years — Ryan's testimonial is on our website. We know how you build. Let's talk about what's next in San Diego."*
- *"Our team is based in San Diego — when your concrete inspector needs us at 6am before a pour, we're 20 minutes away, not flying from Vancouver or driving from LA."*
- *"Simone Little Italy won the 2024 ACI San Diego Best Residential Structure award — same product type as your towers. We know how to do this work here."*
- *"First & Island is the obvious next step — we'd love to be part of your team for that."*

Four concrete asks for the SD meeting

1. **Ask for a pre-design meeting on First & Island** — not to pitch, but to understand the program and offer preliminary thoughts. Structural engineers who engage pre-permit have a structural advantage in selection.
 2. **Request an introduction to Nat Bosa** through Ryan or Paul Lamme — Nat is still active and his blessing matters for major consultant decisions.
 3. **Offer a local site walk on Andia** (even if GS is the SE) — just to demonstrate SD presence and build the relationship for the next project. Ask to meet Paul Lamme at the Andia site.
 4. **Leave a one-page KOR SD credentials sheet** tailored to Bosa: SD project photos (Simone, Grande, Bayside), ACI award mention, and the explicit note that KOR has been working with Bosa Development for 20+ years in BC and Alberta.
