

Nine schemes in your six markets where nobody has been hired yet.

Each one checked twice — the case file, environmental assessment or site plan read in full including the drawing title block, then a separate trade-press check. Six more did not survive that and are named inside. Alongside them: the Arizona search you asked for and an honest read on which layer of it is already spoken for, and where Howard Hughes — your Ward Village client — is putting money in three markets you do not serve them in.

Nine verified, six removed

Newest filing: 27 August

Nothing you already design

- 06 Houston names the developer on every filing — and most of it is land
- 07 The same search, running in all six markets
- 08 Three markets that looked closed are open
- 09 What the layer holds in the rest of your markets
- 10 Four developers that will not hire an outside architect

WHERE YOUR OWN CLIENT IS PUTTING MONEY, IN MARKETS YOU DO NOT SERVE THEM IN

Howard Hughes has 7,250 acres in motion in Houston, and filed for multifamily in Las Vegas yesterday

You build for Howard Hughes at Ward Village. The same company is moving in three of your other five markets. **We are going to be precise about which part of that is a commission and which part is not**, because the difference is the whole point.

FILED	MARKET	WHAT IT IS	IS THERE WORK IN IT
27 Aug yesterday	Las Vegas Clark County	Multifamily application prereview — the earliest formal step the county has. The scheme now before the county is 354 apartments with 6,556 sq ft of commercial on four acres at Spruce Goose Street, Downtown Summerlin. The ownership disclosure names David O'Reilly, L. Jay Cross and Carlos A. Olea	Yes. Multifamily, no architect on the record, no drawing set yet 26-101519
9 Feb & 15 Jun	Houston Harris County	39 plat filings, 7,250 acres — Bridgeland Prairieland Village at 3,905 acres, Creekland Village at 2,037, Woodlands Village of Sterling Ridge at 450. All through LJA Engineering	Not directly. A general plan divides land; Prairieland's ~7,000 homes go to production builders with their own plan books
standing	Phoenix Buckeye	Owns Teravalis at Douglas Ranch in the west valley, per their own SEC subsidiaries exhibit	Land position. Worth knowing, not a bid

So one line of that is a live commission signal and two are intelligence. The two still matter: they tell you where a client you already have is committing capital, in markets where you do not currently do their work — and that is a conversation you can have on the strength of the public record alone, without waiting for a bid.

▲ HOW WE KNEW THESE WERE ALL THE SAME COMPANY

The Houston record names *Bridgeland Development, LP* and *The Woodlands Land Development Company, L.P.*, not Howard Hughes. Both appear verbatim in Howard Hughes Holdings' subsidiaries exhibit — EX-21.1, filed with the SEC 19 February 2026 — alongside Summerlin, Ward Village, and the **Teravalis and Douglas Ranch** entities. A primary document, not a press report, and it is what puts them in four of your six markets at once.

VERIFIED ONE AT A TIME, AND SIX DID NOT SURVIVE IT

Nine schemes where the record names no architect

Every project below was checked twice: the case file, the environmental assessment or the site plan read in full — **including the drawing title block**, which is where an architect usually appears — and then a separate trade-press check. Nine stood up. Six did not, and those are named at the foot of the page.

MARKET	WHO	WHAT, AND HOW FAR ALONG	RECORD
Phoenix	Host Hotels & Resorts NYSE: HST	Copper Residences — 72 acres of the Westin Kierland's Mesquite golf course. 16.16 acres of resort condominium and condo-hotel ; 55.64 acres of single-family, townhome and duplex. Greey Pickett on site design and landscape, Woodpatel civil, CivTech traffic — no building architect . Third application, in review after the May 2026 submittal. Neighbourhood opposition is active and on the record	Z-169-25-2
	Vintage Partners	1,000 residential units and 22 acres of commercial on 63 acres. The site was earmarked for a data centre until Phoenix changed its data-centre policy and Vintage converted it. RVi on land planning, Precision Civil engineering	Z-24-26-7
Charlotte	Mid-America Apartments NYSE: MAA	3.65 acres in SouthPark — south of Fairview Road, east of Cameron Valley Parkway. MUDD-O SPA to RAC(CD). Kimley-Horn drew the rezoning plan; no architect on it	2026-050
	Crosland Southeast C4 Investments	39.41 acres north of Wilkinson Boulevard at Little Rock Road, RAC to CG(CD). Three community meetings held. The engineer's seal block on the site plan is still a blank placeholder — this is as early as a filing gets	2026-027
	Middleburg	20.15 acres south of Wilkinson Boulevard, CG to N2-B(CD). The site plan already lays out buildings at 63 units, four and five storeys — so the massing is settled and the architect is not named	2026-023
	DreamKey Partners	6.00 acres east of Beatties Ford Road, N1-B to N2-A(CD). Public hearing already held, 17 August 2026	2026-035

MARKET	WHO	WHAT, AND HOW FAR ALONG	RECORD
Hawaii	AREG AC Makena Propco Makena Golf & Beach Club	Mākena Mauka , Maui — 652 units including 109 workforce, single-family and multi-family, plus 135,000 sq ft of operational support buildings . Final EIS accepted 23 August , so entitlement is finished and the building work is next. Munekiyo Hiraga planned it; the architect field in its own permit appendix is blank	FEIS 23 Aug
	Ho'onani Development	Ho'onani Village , Maui — mixed-use, at Draft EIS before the State Land Use Commission. The earliest stage of anything on this page. Pioneer Design Group–Hawai'i on planning	DEIS 23 Mar
Las Vegas	Howard Hughes your Ward Village client	Multifamily application prereview filed 27 August . The scheme now before the county is 354 apartments with 6,556 sq ft of commercial on four acres at Spruce Goose Street, Downtown Summerlin. No architect named	26- 101519

× SIX WE REMOVED, AND WHERE EACH ONE'S ARCHITECT WAS HIDING

Fifield Companies, Phoenix — **Todd & Associates Architecture**, on design and landscape. Named by the trade press and **in no city document at all**, which is why a file check alone is not enough. · **Elevation Living** — **Woods Associates Architects**, in the drawing title block. · **J&K Luxury Group** — **Kontexture**, same place. · **Miami Design District** — **David Chipperfield** on the 25-storey condo and 12-storey hotel. · **Wailuku Mission Senior Housing** — EAH Housing is already working with **MASON Architects** on the historic rehabilitation. · **Kittle Property Group**, Charlotte — their own staff are the architect of record in every state they build in.

And three more we have flagged rather than listed. **Ovation Development** (Las Vegas, 13,000 units, 1,650 more due by 2028) filed a prereview in July and names no architect — but it carries an in-house design principal, so treat it as a question rather than an opening. **Kīlauea Town Expansion** (Kaua'i, 310 affordable units) and **Mililani Teacher Workforce Housing** (O'ahu) name none either, but both are public bodies — the County of Kaua'i and the State School Facilities Authority — so they will be procured rather than appointed, and Kīlauea breaks ground this quarter.

Not on the public record is not the same as not appointed. If you are already engaged on one of the nine above, what that tells you is how far the public record lags your own commissions — which is worth knowing on its own.

Six markets, and what is open in each one today

Every source below was re-run on 28 August 2026. What this table gives is the layer that exists *before* a design team is appointed — not permits, which are always too late. The markets are not equal, and where one is thin we say why rather than padding it.

MARKET	WHAT IS OPEN IN THE RECORD RIGHT NOW	NEWEST FILING
Las Vegas Clark County	32 multifamily application prereviews in sixty days , sixteen in the last fortnight. The county publishes an ownership disclosure with each, which names the officers behind the filing entity — so a single-purpose LLC still resolves to a real company	27 August yesterday
Houston Harris County	1,426 plat applications across sixteen commission cycles. The city’s own spreadsheet gives the developer company, the filing consultancy, a named applicant and an office phone on every single row — 100% named, with acreage, land use and council district	20 August
Phoenix Arizona	373 open site-plan cases , 280 filed since January 2025 — but a filed site plan means the buildings are already drawn, so none of those is unlet work. Phoenix’s useful layer is its rezoning case files , published separately: of thirty read in full, two carry counsel, a civil engineer and a land planner and no building architect	Permits 27 August entitlement cases run a quarter behind, to 27 May
Charlotte	84 rezoning petitions pending , petitioner named on every one, no design team on any — because Charlotte publishes the petition before the design exists. Five of the petitioners buy architecture rather than produce it	14 August
Hawaii all four counties	Any project using state or county land or funds must publish an environmental assessment first. Those are gathered twice a month into one statewide bulletin that names the applicant and the planning consultant, with a contact for each: 63 projects so far in 2026, eight residential	23 August
Miami	Thin, and structurally so. Only six rezonings came before the board all year and four were City-initiated, because Miami 21 lets private schemes proceed by warrant instead. The real Miami record is design review — 66 projects — and that is the architect’s own drawings, so it is always after the award	Design review 15 July the board does not sit in August

Concentration figures — who holds what share of each market, and how much of the market each sample covers — are in the companion document, with the working shown. They answer a different question from this page.

✕ WHAT WE DELIBERATELY DID NOT PUT IN FRONT OF YOU

We crossed your published client list against every record below. **Two of your clients matched and both were dropped.** Hines appears three times in the Arizona record, all completed office fit-outs with Phoenix Design One already named. Vestar appears once in the Phoenix rezoning record, on a case that already names Butler Design Group. Neither is an opportunity.

Ward Village, Kalae and Launiu are excluded on the same rule — they are your work, and they appear here only as the reason the Howard Hughes thread is worth your time.

Hawaii publishes its pipeline before design, in one statewide bulletin

Hawaii looked like the hardest of the six. Honolulu’s open data stops at 2016 permits, and its live zoning layers record ordinances that have already passed — the outcome, not the pipeline. The answer is not at the county at all. It is a state publication, and it is better than anything the counties hold.

Under Chapter 343, any project using state or county land or money, touching a shoreline or conservation district, or needing a general plan amendment must publish an environmental assessment. The Office of Planning and Sustainable Development gathers these into **The Environmental Notice**, published on the 8th and 23rd of every month, covering **all four counties in one document**. Each entry names, in a fixed order: every permit still required, the approving agency with a named officer, **the applicant, the planning consultant**, the status, and a description that usually gives the unit count.

An environmental assessment is prepared to win entitlements. It comes before construction documents, and the consultant named on it is a planner, not an architect.

PUBLISHED	PROJECT	APPLICANT	PLANNER ON RECORD
23 Aug Maui	Mākena Mauka — master planned residential community, 652 units including workforce housing, single-family and multi-family. Final EIS accepted , which means entitlement is finishing and the building work is next	AREG AC Makena Propco LLC	Munekiyo Hiraga
23 May Kaua’i	Kilauea Town Expansion — Section 201H affordable housing, 310 units	not stated in the notice	Kahewai Environmental LLC
23 Mar Maui	Ho’onani Village — mixed-use development, at Draft EIS, before the State Land Use Commission. The earliest stage of the three	Ho’onani Development, LLC	Pioneer Design Group–Hawai’i
8 May Maui	Wailuku Mission Senior Affordable Housing	EAH Housing also builds in California	PBR Hawai’i

PUBLISHED	PROJECT	APPLICANT	PLANNER ON RECORD
23 May O'ahu	Mililani High School Teacher Workforce Housing	Pacific Housing Assistance Corporation	PBR Hawai'i

✕ WHAT THIS SOURCE DOES NOT COVER, IN PLAIN TERMS

Chapter 343 is triggered by *state or county involvement*. A wholly private project, on private land, with no shoreline or conservation trigger, never appears. **Ward Village is exactly that kind of project** — which is why your own Honolulu work is not in this bulletin and why the bulletin is no use for finding more of it.

The Kaka'ako pipeline runs instead through the Hawai'i Community Development Authority, whose board is the approving authority for that district. We read its agenda for the **2 September** sitting: one right-of-entry item and a monthly report. **No new development permit is before the board.** That is the state of the district this cycle, not a gap in the search.

THE THING YOU ASKED FOR, AND AN HONEST READ ON IT

Phoenix submitted projects — and which layer of the record can actually be acted on

Phoenix publishes a live plan-review service, row-level, reachable without an account. Queried for site plans it returns **373 open cases — 281 preliminary and 92 final**. That is the search you asked for and the numbers are exact. It is also, for finding unlet work, close to useless, and the reason is worth a minute of your time.

A site plan is a drawing. To file one, somebody has to have drawn the buildings. So all 373 of those cases have a design team already, whether or not the city names it — and preliminary versus final only tells you how much is still moveable, not whether an architect exists. It is the same reason we do not quote you Houston's state registrations, which the design firm files, or Miami's design-review packets, which are the architect's own drawings.

LAYER OF THE PHOENIX RECORD	WHAT A RECORD IN IT PROVES	NEWEST	ANY USE TO YOU
Building permits 68,292 rows	Construction documents approved and work starting. Fire connections, haul routes, landscape	27 Aug yesterday	No. Years past the appointment

LAYER OF THE PHOENIX RECORD	WHAT A RECORD IN IT PROVES	NEWEST	ANY USE TO YOU
Site-plan review cases 373 open	Buildings have been drawn and submitted for review	27 May runs a quarter behind	No. The drawing is itself the proof that a designer is engaged
Rezoning and PUD case files published separately, as narratives	Land being made buildable. Filed by land-use counsel with a civil engineer and a land planner — the consultants that come <i>before</i> a building is designed	27 May	Yes. This is the only Phoenix layer where a building architect is routinely not yet engaged

That is why both Phoenix entries on the openings page are rezonings, and why none of the 281 preliminary site-plan cases is on it. We read thirty PUD case files in full, including the drawing title blocks. Three of them named an architect there — Woods Associates, Kontexture, and one more — and were dropped. Two survived that and a trade-press check.

✗ THE FIELD THAT LOOKS LIKE THE ANSWER, AND IS NOT

The record carries a *professional name* field, and on most open cases it reads **“TO BE BID”** or nothing at all. It is tempting to filter on that and call the result unawarded work. **We tested it and it fails:** “TO BE BID” appears on **59 of the 92 final site plans** — schemes whose design is finished. It is a procurement-route field, not a design-team field, and nothing in this document rests on it.

▲ ON THE TEST YOU SET US

You asked for everything submitted in Arizona, of the kind you run in CoStar. The record above is that, current and exact, and it travels with this document in full. What we have added is the part a listing service will not tell you: **which layer of it is already spoken for.**

THE BEST-BUILT RECORD OF THE SIX, AND AN HONEST READ ON WHAT IS IN IT

Houston names the developer on every filing — and most of what it names is land

Houston has no zoning, and its state registrations are filed *by the design firm*, which puts every one of them after the appointment. The Planning Commission’s own plat

spreadsheets are the opposite: filed by the developer’s planner or engineer to divide land, before anything is designed. **1,426 applications this year, with the developer company named on 100% of them** — along with the filing consultancy, a named applicant, an office phone, acreage, land use and council district. Nothing else in the six markets is built like it.

Now the part that matters more than the record. Of those 1,426: **35 are general plans**, which divide land for master-planned communities — Bridgeland’s next village alone is about 7,000 homes going to production builders, so there is no architectural commission in it. **41 are tagged multi-unit or mixed-use, and 31 of those sit under half an acre** — townhouse and duplex infill on single lots. **Five are multi-unit at a scale that implies a building somebody has to design.**

SUBMITTED	SCHEME	DEVELOPER	ACRES
10 Jul	Buffalo Bayou Lighthouse	filed through Patrick Planning Services	3.31
18 May	Pruitt Reserve	Ward, Getz & Associates — filed through Windrose	10.79
18 May	Lofts at Wayfarer	Jesse & Johnny Villareal, through Quiddity Engineering	2.98
4 May	Avvento	Contempo Builder — filed through Windrose	8.20
6 Apr	Grove on 11th	ALJ Lindsey	11.68

These are local developers rather than the national names further up this page, and that is the honest state of Houston’s multifamily platting this year. **The value here is not the five rows — it is that the record is complete enough to watch weekly**, so that when a genuine multifamily parcel plats, you know before anyone has been asked to draw it.

✕ WHY THE BIG ACREAGES ARE NOT ON THIS LIST

It would be easy to hand you Brookfield’s 591-acre Midline, Johnson Development’s 696-acre Amira or Taylor Morrison’s 262-acre Avalon at Cypress, and note that no architect is named on any of them. **No architect is named because none is required.** A Chapter 42 general plan divides land into streets, blocks and reserves; the homes that follow are production builders’ own designs. Those filings tell you where capital is going. They are not work.

THE ACTUAL QUESTION YOU ASKED

The same search, running in all six markets

You asked for Arizona. The fair test of whether that is worth anything to you is whether it runs everywhere you work — so here is the same search, in every market you named, with the date each record was last current.

MARKET	WHAT THE PUBLIC RECORD CURRENTLY HOLDS	CURRENT TO
Phoenix	373 open site-plan cases ; 280 filed since Jan 2025. Separately, the rezoning case files — which is the layer that precedes a building architect	Cases to 27 May permits to 27 Aug
Houston	390 new-construction projects registered since 1 June 2026 alone, running about 370 a month across 2026, each with its scope, cost and floor area	27 Aug 2026
Miami	66 projects through the city’s design review since Jan 2024, by address and case number	Jul 2026 sitting
Las Vegas · Clark County	Whole-project permits above \$10M, plus the full permit sequence per scheme — 79 records on the ballpark alone	day queried
Raleigh	Large multifamily permits by year — 15 in 2025, tracking ~11 in 2026	Aug 2026
Charlotte	86 pending rezoning petitions with petitioner and land — but no design team at this stage	Aug 2026

Six markets, one method, and it is current to yesterday in the largest of them.

The Phoenix list is the one you asked to see, so it is printed in full above; the others are the same query pointed at a different city. Nothing here is a subscription feed or a purchased database — it is the public record of each jurisdiction, which is why it can be re-run on any Monday and be right.

▲ THESE ARE ENTITLEMENT-STAGE RECORDS, WHICH IS EARLIER THAN AN ARCHITECTURAL APPOINTMENT

Not all entitlement records are equal, and the difference is whether a drawing had to exist. Charlotte’s rezoning petitions name a petitioner and no design team, because at that stage one has often not been appointed. Phoenix’s rezoning case files are the same layer. But Phoenix’s *site-plan* cases and Miami’s design-review submittals both require drawings to be filed — which means the design team already exists, whatever the record says. We count those, and we do not offer them to you as openings.

That is the stage planning work is bought at, and it sits ahead of the architecture decision rather than after it. The Phoenix table above marks each case preliminary or final for exactly this reason — preliminary is a scheme still being shaped, final is one already committed, and the difference tells you how much of the conversation is still open.

WHAT THIS CAN REACH

Three markets that looked closed are open, and current to today

Clark County, Dallas and Charlotte all publish nothing useful in their open-data feeds — each stopped in 2020, 2021 and 2022 respectively. They did not stop building. **They changed permitting systems, and all three moved to the same platform.** Their live records are public, and reachable without an account:

JURISDICTION	OLD FEED STOPPED	LIVE RECORD, VERIFIED
Clark County — the Strip	Feb 2021	Current to the day queried
Dallas	Mar 2020	Current to the day queried
Charlotte	May 2022	Aug 2026

Worked example. The Athletics ballpark on the former Tropicana site returns **79 county records**, March 2025 to August 2026 — precast packages, electrical, fire apparatus access, grading, phased building permits. That is the construction sequence of the largest project on the Strip, permit by permit, from the public record.

▲ THE EARLIEST SIGNAL A CITY HOLDS

Dallas has logged roughly **197 pre-development meetings in 2026** — the first formal contact a developer has with the city, *before* entitlement, before the design team is chosen, before any of it reaches the trade press. Eighty-nine are visible.

⚠ Being straight about it: those Dallas records carry a date, a number and a status, **but no project name and no address**. It is a measure of how busy the market is, not a list of leads. Clark County does name its projects and their status, so there the same query is genuinely actionable. **The value differs by city and we will always say which.**

Texas does not stop at Houston. Dallas, Fort Worth, Austin and San Antonio are held to the same depth, and that detail already exists — it is left out here for readability rather than because it is missing. Four more market tables would not have made this document better. Ask and it follows.

THE OTHER FIVE

What the layer holds in the rest of your markets

Same standard throughout: a firm appears against a project only where that firm's own page, the developer's own release, or the public record says so. Where the design team is incomplete the gap is shown rather than filled.

MARKET & PROJECT	DEVELOPER	ARCHITECT	CONTRACTOR
NEVADA · A's Ballpark, Las Vegas 33,000 seats, 2028	The Athletics	BIG + HNTB	Mortenson–McCarthy
NEVADA · Bally's Integrated Resort 26 ac, former Tropicana	Bally's Corp / JLL	Marnell Howryla	—
NEVADA · Silverado, Clark County 13.5 ac, heard 2 Sep 2026	Ochoa Development	Gensler + Yihong Liu	—
HAWAII · Kalae, Ward Village 330 homes	Howard Hughes / Victoria Ward	Solomon Cordwell Buenz	Layton
HAWAII · Ālia, Kaka'ako 457 units, 39 storeys	Kobayashi Group	WRNS Studio	—
HAWAII · Launiu, Ward Village 486 homes, 40 storeys	Howard Hughes	Arquitectonica	—
HOUSTON · The Lily River Oaks 38 storeys, 331 units	Southern Land Co.	Solomon Cordwell Buenz	ANDRES

MARKET & PROJECT	DEVELOPER	ARCHITECT	CONTRACTOR
HOUSTON · The Langley 20 storeys, 134 units	StreetLights + Hunt	StreetLights Creative Studio	SLR
DALLAS · Lucille, Uptown 22 storeys, 265 units	Endeavor Real Estate	HKS	Rogers-O'Brien
MIAMI · Waldorf Astoria 100 storeys, 360 residences	PMG	Sieger Suarez + Carlos Ott	—
MIAMI · Delano Residences 90 storeys	PMG	Carlos Ott · CUBE3 (AOR)	—
CHARLOTTE · Queensbridge Collective 755 units, \$725M	Riverside + Woodfield + PGIM	Goettsch Partners	Clark
RALEIGH · Tributary, North Hills 332 units	Kane Realty	Hickok Cole	John Moriarty

Every architect above was read off the developer's own release, the architect's own project page, or the city record — never inferred. A dash means no public record names that role yet, which is not the same as the role being unfilled, and we would not present it as one.

Two developer names are worth isolating. *PMG* holds both Miami supertalls and used Carlos Ott on each, with CUBE3 carrying architect-of-record on the second — a developer running the same design relationship twice. *Kobayashi Group* is the counter-example: an independent Honolulu developer, sitting under Kamehameha Schools' Kaia'ulu 'o Kaka'ako master plan, which means **more towers behind it on the same landowner's ground.**

▲ ONE PATTERN WORTH YOUR ATTENTION

SCB — formerly Solomon Cordwell Buenz — is in two of your six markets — Kalae in Honolulu and The Lily River Oaks in Houston — on residential towers of 330 and 331 units respectively. Both confirmed from the developers' own releases. Whatever else the six markets have in common, one firm is already moving between them the way you are.

Four developers that will not hire an outside architect

This falls out of the same data and is the part we would want if the positions were reversed. These are developers whose design work is structurally unavailable — not because they said no, but because of how they are built.

DEVELOPER	PROJECTS	WHAT THE RECORD SHOWS
Creation Equity	6 — the most active developer in the set	LGE Design Build on all six : five as design-builder, one as contractor alongside GFF Design. No outside architect appears on any Creation Equity project
Ryan Companies US	4	Developer <i>and</i> general contractor on all four, and it brings its own architect — Butler Design Group on three, Deutsch on the fourth
Statesman Group	1 (565,729 sf, six buildings)	Developer and contractor both. No architect named at all
StreetLights Residential	The Langley, 134 units	Fully vertically integrated: StreetLights Creative Studio is architect and interior designer, SLR Construction is the general contractor. Every seat in-house

The Butler–Ryan pairing is worth isolating: it is the **only architect-to-contractor relationship that repeats more than once** anywhere in the 50. Three projects together. Everything else in Arizona is a one-off pairing, which is another way of saying the same thing as the first section — this market has very few locked relationships.

KOR Structural, prepared for MVE + Partners, 28 August 2026. Every figure is drawn from public municipal records or from the published statements of the parties named. Where something could only be sourced to secondary reporting it was left out rather than hedged. Happy to walk through any single number on a call.
