

RWA Group Architecture

A Vancouver multifamily architect with no house structural engineer, a blue-chip developer stable — and one seat deciding right now.

01 · THE PICTURE

Five things that matter

- **Their work is KOR-shaped.** Purpose-built rental and strata from 4–6 storey wood-frame to 18–31 storey concrete, plus a real mass-timber credential (Timber House, New Westminster — 2024 UDI award). One office, ~27 staff.
- **KOR opened this door once and never walked through.** Deltek client **CL00501** exists with zero projects ever booked. No CRM history.
- **No incumbent wall.** Across five-plus developers, the only confirmed structural engineer on any RWA project is Fast+Epp — once, for CLT. Selection looks developer-driven.
- **The live seat: 453–461 E 10th Ave.** Qualex-Landmark, 18 storeys, 172 rental units — **approved February 17, 2026**. The design-development team is forming now.
- **The relationship map is short:** Qualex-Landmark (anchor — four projects), British Pacific Properties, Intracorp. Two of the three are already in KOR's world.

A dormant client record and two bridges

FROM DELTEK & THE BD PLATFORM

Client **CL00501 – Ramsay Worden Architects (RWA)**: opened, never used. Zero projects, zero billing. Someone saw this opportunity before; find out who and why.

Inventory holds two RWA-architect projects: **Courtenay Condominiums** (West Vancouver, British Pacific Properties — completed and sold out 2023; our record was stale and has been corrected) and **Arbutus & West 34th** (Vancouver, Intracorp — rezoned 2023, in permitting, structural engineer not recorded).

03 · WHO THEY ARE

Ramsay Worden, rebuilt as RWA Group

Founded 1989 by Bob Worden and Doug Ramsay; rebranded **RWA Group Architecture Ltd.** in 2018 under principals Bruce Ramsay, Allan Seppanen, and Stanley Hsu.

Office	355 Kingsway, Vancouver · ~27 staff	Sectors	Multifamily rental + strata; mixed-use; mass timber niche
Scale	4–6 st wood-frame → 18–31 st concrete	Footprint	Vancouver, Burnaby, Coquitlam, New West, North Van, West Van

DON'T CONFUSE

An unrelated Cincinnati firm also brands as "RWA Architects." And rwa.ca runs stale — it still shows 701 Kingsway at permit stage though it broke ground in March 2026.

04 • THE PIPELINE

Where the structural seats are

PROJECT	DEVELOPER	STATUS	SEAT
453–461 E 10th Ave	Qualex-Landmark	Approved Feb 17, 2026 — 18 st, 172 rental	DECIDING NOW
Arbutus & W 34th	Intracorp	Rezoned 2023 · permitting	UNKNOWN — ASK
701 Kingsway	Qualex-Landmark	Broke ground Mar 9, 2026 — 24 st	DESIGNED
Botanica, W Coquitlam	Qualex-Landmark	Completing ~2025	STAFFED
Timber House, New West	Aragon	Complete 2023 · UDI award	FAST+EPP
Courtenay, West Van	British Pacific	Complete, sold out 2023	HISTORY

Understated on purpose: 33 of RWA's 41 portfolio pages weren't individually verified in the research window — the true forward pipeline is probably longer.

05 • THE PLAY

Two doors, one clock

THE VERDICT — HELD LOOSELY

No house SE means no displacement fight at the architect. The seats are won through **the developers** — Qualex-Landmark first — with RWA itself as the direct door only on **mass timber**, the one scope where the architect demonstrably picks the specialist.

1

Qualex — this month

E 10th approved Feb 17; the consultant team is forming. Any Qualex relationship gets used now.

2

RWA — timber lane

Introduce KOR to the principals on the CLT/mass-timber story, referencing the BPP and Intracorp bridges.

3

Intracorp — ask

Arbutus & W 34th is permitting with no engineer recorded. One question could open it.

CHEAP AND DECISIVE

A manual permit-records pull (Vancouver, Burnaby, Coquitlam, New West) would name the engineer of record on every built RWA project and turn Section 05's inference into fact.

Call list

PERSON	ROLE	EMAIL
Bruce Ramsay	Principal / Partner	bramsay@rwa.ca
Allan Seppanen	Principal / Partner	aseppanen@rwa.ca
Stanley Hsu	Principal / Partner	shsu@rwa.ca
Connely Farr	Assoc. / Contract Admin Lead	cfarr@rwa.ca
Bev Holmes	Project Team	bholmes@rwa.ca — found, highest confidence

EMAIL HONESTY

rwa.ca's format ({first initial}{last}) is confirmed by a found address, but the domain accepts all mail — pattern addresses are very probably right, not proven. Don't hang a first impression on one.

07 · WHAT WE COULD NOT VERIFY

Said plainly

- The engineer of record on every RWA project except Timber House (permit pull resolves).
- Whether founders Worden and Doug Ramsay remain active in practice.
- The exact 2026 permit stage of Arbutus & West 34th; 33 of 41 portfolio pages; one secondary-source SE attribution (TLSE) left out of the tables above.

Method: KOR's internal records first · two independent research passes · independent fact-check of the load-bearing claims (four confirmed, two corrected — Timber House's city, Courtenay's status — one honestly unconfirmable). Every figure traces to the source list in the companion document.
