

PARTNERSHIP PORTFOLIO · PREPARED FOR ARCADIS · JULY 2026

Building together, **for over a decade**

Eleven landmark projects delivered with IBI Group — now Arcadis — across British Columbia and Alberta. This is the work, and the team, behind the partnership.

WE ARE KOR

Headquartered in Vancouver with offices in **Kelowna, Nanaimo and Edmonton**, KOR Structural provides structural engineering, consultation, design and inspection services across BC, Alberta and North America. Founded over 25 years ago by three seasoned professional engineers, KOR has grown into a team of 40+ professionals — with over **250 high-rise towers** delivered, including 28 in Alberta and 24 in California, and a dedicated wood-frame and mass-timber team with 200+ projects.

“Like a hive, we build strength through collaboration.”

— John Markulin, Managing Principal

CORE COMPETENCIES

- Structural engineering across reinforced concrete, structural steel, wood-frame & heavy timber, tilt-up and masonry
- High-rise reinforced concrete design
- Performance-based structural analysis and design
- Mass timber, with a dedicated wood-frame department
- Plan checks, peer reviews, expert opinions and assessments

QUALITY & TECHNOLOGY

- Organizational Quality Management Policy structured on EGBC guidelines, extended to Alberta standards
- Independent Engineering Check of every design by an engineer outside the original design team
- ETABS & PERFORM3D non-linear time-history seismic analysis; RAM Concept, SAFE, STAAD Pro
- Revit/BIM & Dynamo workflows, with in-house tools and a dedicated IT department

WHAT WE’VE BUILT TOGETHER

KOR’s relationship with **IBI Group — today Arcadis** — spans more than a decade of collaboration on some of Western Canada’s most ambitious residential and mixed-use developments: eleven projects, from Coal Harbour and Metrotown to Calgary’s Beltline and Bow River.

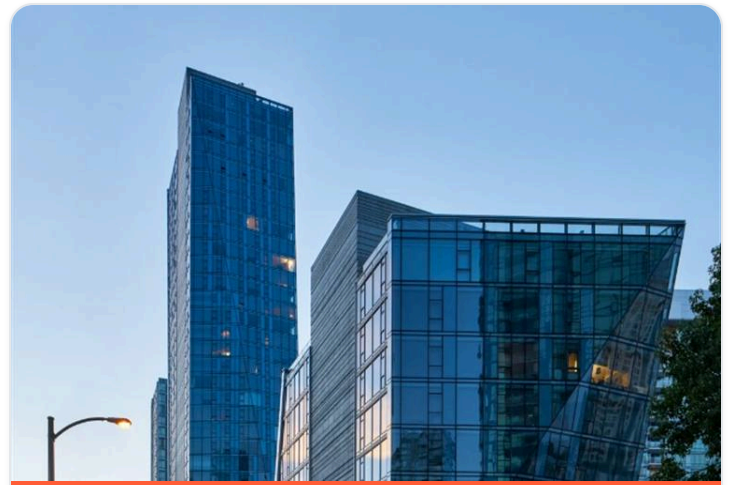

One Burrard Place

MIXED-USE · 55 STOREYS

Vancouver, BC · Developer: Reliance Properties · Architect: **IBI Group / Arcadis**

A 55-storey landmark at the gateway to downtown Vancouver — 444 homes with three levels of office above eight levels of below-grade parking. LEED Gold, and the city’s third-tallest building at completion. KOR’s structural design supported the complex architectural form from foundation to crown.

West Pender Place

MIXED-USE · 37 + 11 STOREYS

Vancouver, BC · Coal Harbour · Developer: Reliance Properties · Architect: **IBI Group / Arcadis**

A 37-storey tower with an 11-storey mid-rise on one of Coal Harbour’s last development sites. Floor-to-ceiling glazing, LEED Silver, and unobstructed views to the North Shore — KOR served as structural consultant for the full development.

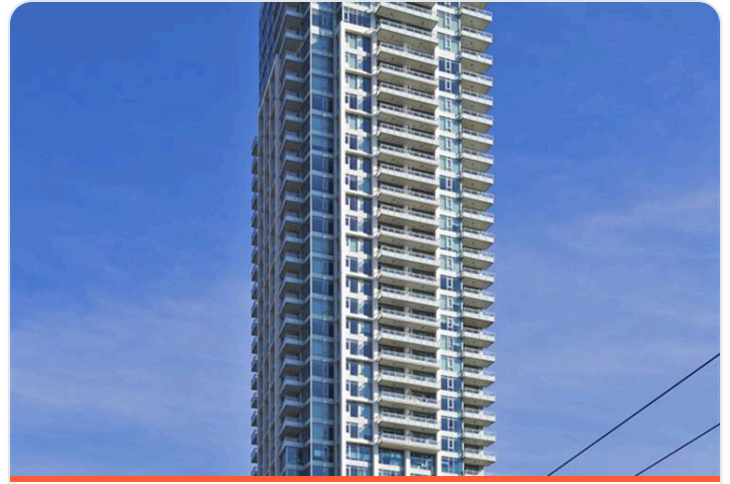

564 Beatty Street

HERITAGE · AWARD-WINNING

Vancouver, BC · Crosstown · Developer: Reliance Properties · Architect: **IBI Group / Arcadis**

A 100-year-old brick-and-timber building seismically upgraded and topped with four levels of clear-span office — old meets new. Winner of UDI “Best in Show” and “Best Heritage,” a VRCA Gold Award of Excellence, and a Vancouver Urban Design Award. Designed with IBI Group.

The Sovereign

MIXED-USE · 45 STOREYS

Burnaby, BC · Metrotown · Developer: Bosa Properties · Architect: **IBI Group / Arcadis**

A 45-storey hotel-and-residential tower at 4501 Kingsway — 202 luxury homes over a hotel podium and retail, rising 155.9 m and briefly Burnaby's tallest. KOR engineered the high-performance structural systems across the mixed program, completed 2014.

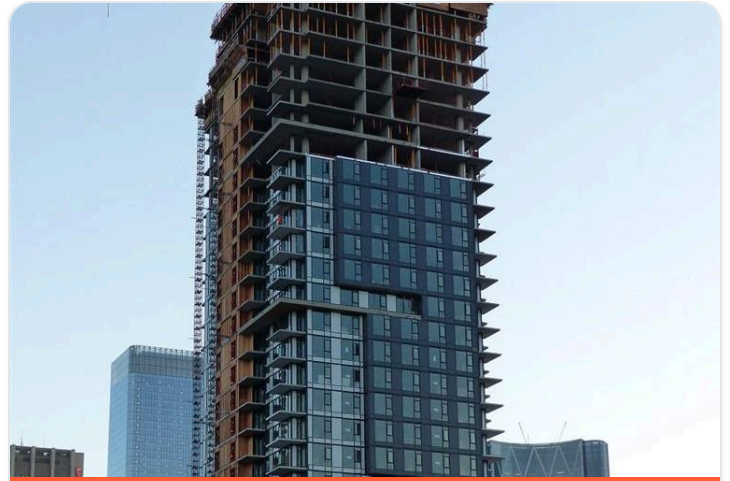

Kings Crossing

MASTER-PLANNED COMMUNITY

Burnaby, BC · Edmonds · Developer: Cressey Development · Architect: **IBI Group / Arcadis**

An office tower, ~70,000 sq ft of grocery-anchored retail, and three residential towers with nearly 800 homes at Kingsway & Edmonds. KOR carried the structural design across every component — towers, podiums and office — plus years of tenant improvements since.

Park Point

RESIDENTIAL · 34 STOREYS

Calgary, AB · Beltline · Developer: Qualex-Landmark · Architect: **IBI Group / Arcadis**

A 34-storey, ~288-home tower steps from Central Memorial Park, completed 2018. Concrete framing tuned for high residential loads and long podium spans, with shear walls and transfer slabs placed for durability, seismic compliance and constructability.

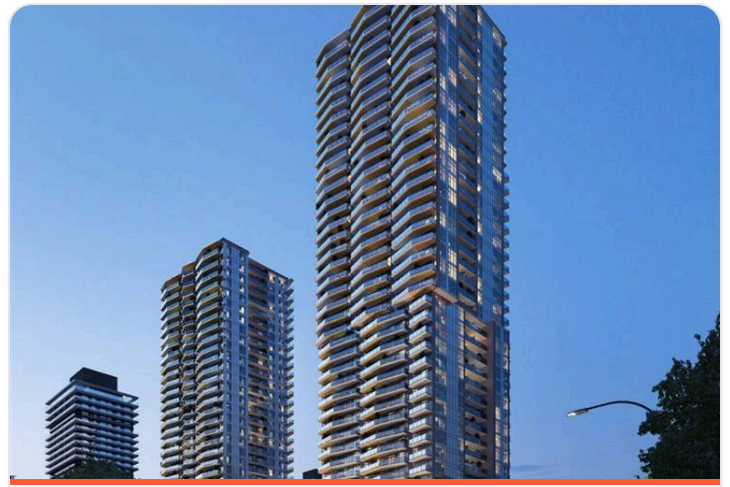

Parkside at Waterfront

MASTER-PLANNED · 1,000+ HOMES

Calgary, AB · Bow River · Developer: Anthem Properties · Architect: **IBI Group / Arcadis**

A multi-phase riverside community in downtown Calgary — nine buildings over three underground parkades, with three landmark towers on an integrated mid-rise podium. Terraced massing and phased delivery demanded close structural collaboration across the team.

South Yards

MASTER-PLANNED · 2,567 HOMES

Burnaby, BC · Brentwood · Developer: Anthem Properties · Architect: **IBI Group / Arcadis**

An 8.3-acre transit-oriented community — five high-rise towers including two at 43 storeys, a one-acre central park and 60,000 sq ft of retail. KOR's post-tensioned transfer slabs limited transfer depth between podium and towers while managing the seismic response.

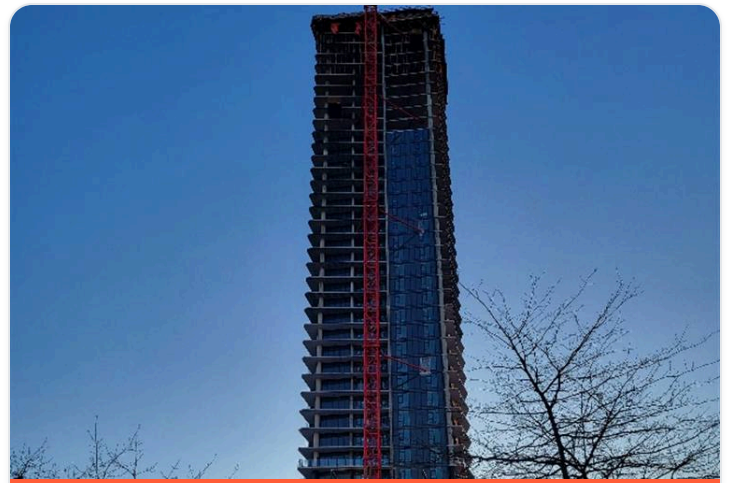

SOCO

TWIN TOWERS · ~700 HOMES

Coquitlam, BC · Burquitlam · Developer: Anthem Properties · Architect: **IBI Group / Arcadis**

Twin ~30-storey concrete towers beside Burquitlam SkyTrain, delivered across multiple phases. Efficient transfer strategies, core-wall optimization, and a complex diaphragm design that carries lateral load around large core openings under seismic and wind.

The Grand on King George

MIXED-USE · 46 STOREYS

Surrey, BC · City Centre · Developer: Allure Ventures · Architect: **IBI Group / Arcadis**

One of Surrey City Centre's tallest towers — ~341 homes over a commercial podium with 23,000+ sq ft of amenity. A slender reinforced-concrete high-rise with a rooftop sloshing-tank damper engineered by KOR to control wind-induced motion.

Avalon 3

RESIDENTIAL · 329 HOMES

Vancouver, BC · River District · Developer: Wesgroup Properties ·
Architect: **IBI Group / Arcadis**

A 26-storey tower, 6-storey mid-rise and townhomes on a reinforced-concrete flat-plate system, with long-span framing under a 20,000 sq ft courtyard and 10,000 sq ft rooftop amenity podium — structural efficiency across three building scales.

OUR LEADERS

John Markulin

M.Eng., P.Eng., Struct.Eng., PE, SE — Managing Principal

Leads delivery on KOR's most prominent projects, with deep expertise across reinforced, precast and post-tensioned concrete, steel, wood-frame and masonry — from tall towers to institutional and LEED-certified work, San Diego to Whistler.

Jim DesRoches

BASc., P.Eng., PE — Principal

Manages KOR's U.S. practice. Since 1988 he has designed 50+ high-rises across BC, Alberta, Ontario, Washington, Oregon, Nevada and California, and heads KOR's Systems Department and Operational Quality Management Policy.

Rory Beirne

M.Eng., P.Eng., Struct.Eng., C.Eng., MStructE — Principal

Leads Vancouver Island operations from Nanaimo, with two decades across residential, commercial and mixed-use work and dual structural-geotechnical expertise suited to coastal BC's most challenging sites.

Omar Alcazar Pastrana

M.Sc., P.Eng. — Associate Principal

Over 12 years in reinforced-concrete design and analysis with a specialty in seismic design — licensed to practice in both **British Columbia and Mexico**, bridging design and construction across complex high-rise projects.

Conor Murtagh

BASc., P.Eng. — Associate Principal

20+ years of structural practice and a reputation for excellence in wood design — mid-rise buildings and custom homes that combine functionality, sustainability and enduring aesthetics.

Islam Shabana

Ph.D., P.Eng. — Senior Structural Engineer

A decade-plus on complex high-rise and tall-building projects across Toronto, Vancouver and Alberta, with a PhD in seismic engineering and journal peer-review credentials grounded firmly in industry practice.

RECOGNITION

- **2024 ACI San Diego Chapter Award — Best Residential Structure** · Simone Little Italy, a 36-storey high-rise with a raft foundation over a major sewer interceptor and performance-based seismic design.
- **ACI Multi-Family Residential Award** · The Grande, San Diego — landmark twin towers on the downtown waterfront.
- **UDI “Best in Show” & “Best Heritage” (2014), VRCA Gold Award, Vancouver Urban Design Award (2016)** · 564 Beatty Street — heritage seismic upgrade designed with IBI Group.
