

KOR × Arcadis

A warm, active contact inside Arcadis—via Omar Alcazar—opens two concrete plays: joint business development in Alberta, and a structural-stamping role with Arcadis’s Mexico City team.

Prepared 2026-07-15 Source spine Omar ↔ Terry Gray email thread, Jun 24–Jul 15 2026

⚠ Stale / flag — do not repeat

THE RELATIONSHIP

Omar Alcazar met **Terry Gray** of Arcadis Architects Canada at a Ledcor client event on **June 24, 2026** **PRIMARY**. Over the following three weeks they traded a genuinely warm thread: Terry wants KOR on his teams. Internally, **Jim DesRoches: “we should agree to work with them.”** The plan Omar set was to send Terry a portfolio of the work KOR has done with IBI over the years, with **Islam Shabana** owning the BD follow-through.

The history behind the warmth is real: **Arcadis acquired IBI Group in 2022** **WEB 2022**, so KOR’s long working relationship with the old IBI Group is its relationship with Arcadis today. Our own records bear this out—**17 Arcadis/IBI projects** sit in KOR’s pipeline graph (mostly Vancouver residential and commercial), and Deltek holds a direct engagement, **Station Square Site 6 BMO Build-Out (2022)**, billed to Arcadis IBI Group **OUR BOOKS**. This is not a cold introduction—it is reactivating a firm we already know.

PLAY A

Alberta — joint business development

Terry's lead · KOR now present in AB

WHAT TERRY PROPOSED PRIMARY

Package the work KOR and IBI/Arcadis have done together, and pursue Alberta civic/government building work jointly now that KOR has an Alberta presence.

WHAT THE PUBLIC RECORD ACTUALLY SHOWS

- Arcadis's Alberta civic/architecture pipeline reads **thin or dormant** in public sources right now. The only confirmed current Alberta civic engagement is a **non-architectural** digital asset-analytics contract with the City of Calgary (June 2025). WEB Jun 2025
- The Edmonton Co-Located Dispatch & Emergency Operations Centre—which IBI once led—was **cancelled in 2020**. STALE 2020 (Note: our own pipeline data wrongly still shows this as "Announced"—flagged for correction; do not cite it as live.)

THE HONEST READ — ARCADIS IS NOT STRUCTURALLY TOOTHLESS HERE

Arcadis runs an **in-house Building Structural Group in Western Canada** and is actively hiring senior APEGA-registered structural P.Eng.s in **Calgary** WEB 2026. So on some pursuits Arcadis is a structural **competitor**, not a guaranteed clean lane for KOR-as-sub. A joint-BD opening most plausibly means **overflow/capacity, Edmonton-specific** work (their structural bench looks Calgary-weighted), or **seismic/heritage specialty** KOR is known for — but that is ours to confirm, not assume.

⚠ DO NOT ASSUME THE SUB ROLE — ASK TERRY DIRECTLY

"Which specific Alberta projects would you route to KOR, versus keep inside Arcadis's Calgary structural group? And what's actually active in your Edmonton civic/gov pipeline right now?"

NEXT STEP

Omar sends the KOR×IBI portfolio; Islam arranges the BD conversation. Peer to know: **Brad Kimball**, Arcadis Practice Group Manager, Government & Civic (Canada West), Edmonton — likely Terry's counterpart. WEB ~snippet

Mexico City — Omar as licensed structural EOR

Terry offered introductions

WHAT TERRY PROPOSED PRIMARY

The Arcadis Mexico team is building a project team; Terry offered to introduce KOR — “I’ll dig up the names and do some introductions.” Omar is Mexican and, per KOR, licensed to stamp structural drawings in most regions of Mexico ~ scope unconfirmed.

WHY THIS IS A REAL, SCARCE ASSET — THE LICENSING GATE

Mexico City construction runs through a closed local registry administered by the **Instituto para la Seguridad de las Construcciones (ISC)**. Structural drawings cannot be legally permitted without the stamp of a **Corresponsable en Seguridad Estructural (CSE)** — the Mexican structural engineer-of-record role — which requires a Mexican professional license, a 5-year experience floor, and local references. WEB ISC A firm without an already-registered CSE **cannot self-stamp** and must partner locally or hire in. That is exactly the gap a licensed Omar fills.

MARKET CONTEXT — DEMAND IS REAL, TALENT IS THE BOTTLENECK

- Mexico’s construction market is forecast to grow **~5.5% to MXN 2.04 trillion in 2026**, led by industrial/nearshoring build-out with genuine structural scope (heavy-machinery foundations, tall clear heights). WEB 2025-26
- The explicitly-flagged constraint on the next growth phase is **bilingual, licensed technical talent—not capital**. That makes a Mexican-licensed, bilingual structural engineer a scarce asset independent of Arcadis. WEB 2026
- Arcadis has a live **Mexico City office** (legacy IBI, Col. Juárez / Condesa) and is hiring there, but its **in-country structural depth is unconfirmed** — consistent with why Terry reached out.

WEB ~snippet

NEXT STEP

Terry is digging up Arcadis Mexico names for an intro (awaiting). Internal to-do: confirm Omar’s exact Mexican registration — is he CSE/DRO-registered, and in which jurisdictions? That answer is the whole play.

WHO’S WHO

⚠ **Route everything through Terry.** Except where marked PRIMARY or Apollo-verified, the Arcadis names and emails below are pattern-inferred or search-snippet — useful for orientation, **not** for cold outreach. Terry is the one verified, warm door.

PERSON	ROLE	CONTACT	CONFIDENCE
Terry Gray	Arcadis Architects Canada — Assoc. Principal / Market Leader, Government & Civic; Edmonton	terry.gray@arcadis.com +1 780-965-9260	PRIMARY Title from the email; not publicly corroborated—confirm on LinkedIn
Brad Kimball	Arcadis PGM, Government & Civic (Canada West); Edmonton — likely Terry's peer	via Terry	WEB ~snippet
Ryan Tomas	Arcadis Director, Sr. Practice Lead, Engineering; Edmonton	via Terry	WEB ~snippet
Bernardo Ortiz	Arcadis / IBI Director, Latin America; Mexico City — possible Mexico lead	via Terry's intro	~ needs verify
Omar Alcazar	KOR — Senior Structural Engineer; the warm node; Mexican-licensed	omara@korstructural.com	KOR
Islam Shabana	KOR — owns the BD follow-through with Terry	islams@korstructural.com	KOR
Jim DesRoches	KOR — principal sponsor ("we should agree to work with them")	principal	KOR

WHAT WE KNOW VS. WHAT TO CONFIRM

The relationship and both openings are real. These are the open questions—take them into the next conversation rather than filling them with assumption.

1 Which Alberta projects would Terry actually route to KOR?

Arcadis self-performs structural in the west—pin down overflow vs. Edmonton-specific vs. seismic/heritage before pitching a sub role.

2 What's live in Arcadis's Edmonton civic/gov pipeline right now?

Public record is thin; the real pipeline is likely private. Ask Terry plainly.

3 Who on the Arcadis Mexico team, and what project?

Terry offered names—get the specific team, the specific pursuit, and whether they lack local structural.

4 Omar's exact Mexican registration — CSE? DRO? which states?

Internal to KOR. This is the asset the entire Mexico play rests on; confirm it before we represent it.

5 Terry's exact title and remit.

Stated in the email, not publicly corroborated—confirm so we route to the right decision-makers.

NEXT ACTIONS

OMAR

Send Terry the portfolio of KOR×IBI/Arcadis past work.

Open · the agreed first move

ISLAM

Own the BD follow-through with Terry; set the Alberta joint-BD conversation.

Open

JIM

Principal sponsor — already endorsed the partnership.

Done

TERRY

Digging up Arcadis Mexico names for introductions.

Awaiting his reply

KOR

Confirm Omar's Mexican license scope; confirm Terry's role via LinkedIn.

Open · internal verification

Sources. Primary: Omar Alcazar ↔ Terry Gray email thread "RE: KOR/Arcadis Edmonton and Mexico Collaboration," Jun 24–Jul 15 2026. Our books: KOR pipeline graph (17 Arcadis/IBI nodes) + Deltek client CL00483 (Station Square BMO, 2022). Web (accessed 2026-07-15): Arcadis—IBI acquisition 2022; Arcadis Calgary structural-engineer posting & national structural practice; City of Calgary digital analytics contract (Jun 2025); Alberta Major Projects registry (EOC cancelled 2020); Instituto para la Seguridad de las Construcciones (ISC, CDMX) DRO/CSE registry; Mexico construction-market 2026 outlook & nearshoring FDI reports; Arcadis Mexico City office & hiring.

Confidence discipline. Every claim is tagged with its source and date. Contacts are marked verified vs. inferred; inferred contacts are for orientation only. Where the record is thin or a fact is stale, this dossier says so rather than guessing — the openings are strong enough to stand on the truth.
