

IPD Refresh & the Ledcor-Kelowna Read

Refreshes the 3 July IPD dossier (which stays frozen) and translates it for **Jim DesRoches's meeting with Elliot Wood — Ledcor Construction Kelowna — Monday 20 July, 9:30am**. Every claim re-checked against primary sources on 2026-07-18 and confidence-tagged: v verified · i inferred.

ADDENDUM · 2026-07-18 · BASE: KOR-IPD-ALBERTA-BC-2026-07-03 · INTERNAL / FOR THE LEDCOR CHANNEL

BOTTOM LINE FOR MONDAY

- 1 Ledcor is not an IPD firm.** Its models are construction management, preconstruction, design-build, general contracting and P3 — its "collaborative" work is progressive-DB / alliance / P3 (Teck Acute Care with Affinity; the Sunny Hill replacement), never a CCDC 30 IPD. v So the ask isn't "put KOR on your IPD team" — it's **"name KOR as your structural sub on your design-build pursuits, and be the owner's structural pick on your CM jobs."**
- 2 The Interior structural seats — Kelowna, Kamloops, Penticton — are going to a short list of Vancouver / national heavyweights** (WSP + Fast+Epp, Glotman Simpson, RJC) on every collaborative/IPD job there in the last two years; zero local firms. The Metro-Vancouver / Island hospital *alliances* go to the same tier of firms, one level up. v KOR isn't on that list yet — that's the wall, and the honest backdrop.
- 3 The door onto collaborative delivery is the architect (and on design-build, the GC) — not the owner or the alliance.** On BC hospital alliances, structural *always* rides in as the architect's sub-consultant (Bush Bohlman under Parkin/ZGF at Cowichan); it is never an independent signatory. v That means KOR's existing Prime-Consultant playbook *is* the collaborative-delivery play — same skill, different contract.
- 4 One open Interior seat right now: the Peachland fire hall** — Chandos design-build (confirmed *not* IPD), structural engineer still unnamed. Entry is via **Chandos**, during detailed design, now. v
- 5 One open alliance seat: Richmond Hospital Phase 2/3** (\$1.96B, Graham + HDR) — structural still unnamed, reachable via **HDR**. i

LEDOR — WHERE KOR ACTUALLY FITS

Ledcor's own site lists its building-division delivery as "project and construction management, pre-construction services, design-build, general contracting, and P3" — **no IPD**, and no evidence Ledcor has ever signed a CCDC 30 contract anywhere in Canada. **v** Every Interior IPD job found is led by **Bird** or **Clark Builders**, not Ledcor. Ledcor Kelowna's own marquee job, UBCO Downtown (43-storey), is **construction-manager** work where the structural engagement sits on the owner/CM side (Glotman Simpson) — not Ledcor's to give, as is standard on CM. **v**

So KOR's two real entry points through Ledcor are:

- **Design-build pursuits** — where Ledcor assembles a bid team and names its structural sub-consultant. This is the seat to ask for.
- **CM / CM-at-risk jobs** — where KOR is the owner's structural pick, working alongside Ledcor rather than under it.

Questions for Jim to put to Elliot:

- ? Which delivery models is Ledcor Kelowna pursuing over the next 12–18 months — design-build, CM, or P3? Where is the volume?
- ? Has Ledcor ever run a true IPD, and is Kelowna angling to bid one against Bird/Clark on the next Interior civic job?
- ? On your design-build pursuits, at what point do you lock your structural sub — and who decides?
- ? Who runs Ledcor Kelowna's preconstruction, and can we get in front of them early on the next fitting pursuit?
- ? Where can a Vancouver-calibre structural firm with 7 active Okanagan jobs actually help you — where are you thin?

THE INTERIOR / BC STRUCTURAL-SEAT MAP

Who holds the structural seat on the collaborative-delivery jobs that matter — the competitive reality, and where the openings are (shaded green).

PROJECT	OWNER	MODEL	GC	STRUCTURAL	SEAT
Parkinson Rec Centre , Kelowna (\$242M)	City of Kelowna	IPD	Bird	WSP + Fast+Epp	closed
Kamloops Arena Multiplex (\$140M)	City of Kamloops	IPD	Bird	WSP	closed
Kamloops Centre for the Arts	City of Kamloops	IPD	Clark Builders	WSP + Fast+Epp	closed
Kamloops Cancer Centre (~\$386M)	Interior Health / BC Cancer	Progressive DB	EllisDon	Glotman Simpson	closed
UBCO Downtown , Kelowna (43 st.)	UBC Properties Trust	CM (Ledcor)	Ledcor	Glotman Simpson	owner-held
Penticton Fire Hall HQ (\$38M)	City of Penticton	IPD (CCDC 30-2025)	Chandos	RJC Engineers	closed
Peachland Fire Hall	District of Peachland	Design-build	Chandos	unnamed	OPEN
BC Housing Bertram , Kelowna (176u/20 st.)	BC Housing / M'akola	Design-build	award ~early '26	via DB team	CHECK
Richmond Hospital Ph 2/3 (\$1.96B)	VCH	Alliance	Graham	unnamed (via HDR)	OPEN
Cowichan District Hospital	Island Health	Alliance	EllisDon	Bush Bohlman (under Parkin/ZGF)	closed
Burnaby Hospital Ph 2 (~\$1.8B)	Fraser Health	Alliance	(PCL)	never named	terminated

The pattern is unambiguous: large, high-profile Interior owners default to firms with proven big-institutional/hospital/high-rise track records. WSP + Fast+Epp behave like a standing Interior-IPD structural pair. The winnable seats are the *smaller* civic design-builds (fire halls, BC Housing) where the GC picks the sub — not the mega-IPD jobs.

LIVE SEATS WORTH CHASING

- **Peachland fire hall — the real live one.** Chandos design-build, architect Sahuri + Associates (Vernon), structural unnamed, detailed design starting now through a Jan-2027 permit target. Play = approach **Chandos** as their structural sub. Mirrors the Alberta pattern where small municipal fire halls are the recurring entry lane. **V**
- **Richmond Hospital Ph 2/3 — the big alliance opening.** Structural unnamed; the route is **HDR** (architect), not the owner. Construction 2026–29. **I**
- **BC Housing Bertram (Kelowna) — status check.** 176-unit / 20-storey, design-builder award was targeted for early 2026; if it hasn't closed, the DB will name a structural sub. Worth a live check. **I**
- **UBCO recreation/athletics facility (\$26–28M) — watch only.** Pre-Board-of-Governors approval, no team public; monitor for the procurement. **V**

Alberta (the mature-market reference)

- Strathcona **Fieldhouse** and **Fire Station 7** structural engineers *still unnamed* publicly; FS7's opening was **re-paced 2028** → **mid-2029** in the Dec-2025 budget (a fiscal decision, not a procurement failure). Not gettable from open web — needs an in-browser APC pull or a call. **V**
- **King's University Science Centre** opens 3 Oct 2026; structural is most likely **Eng-Spire** (inferred from the partner list). **I**
- **Eng-Spire** — an Edmonton *structural-only, IPD-specialist* firm (ex-Stantec founders) — has broken into the Alberta IPD club (EXPO Centre, King's). The living proof that a focused structural firm can win IPD seats: KOR's aspirational archetype. **V**

BC IPD & health alliances

- **Penticton Fire Hall HQ** structural = **RJC**; team in Validation Phase (June 2026), CCDC 30-2025 contract to follow. **V**
- **Vancouver Firehalls #2 & #9** — a genuine CCDC 30-2025 IPD, Prime-Consultant-led (the lead can be an architect *or* an engineering firm; structural is a sub-consultant), ~\$28M each; bid closed May 2026, no award yet. *Secondary-sourced* — *verify from the City RFP*. **I**
- Alliances: **Cowichan** (~90% built, Bush Bohlman structural), **Richmond Ph 2/3** (open, via HDR), **UHNBC** Prince George (EllisDon + DIALOG; structural folded in, unnamed). **Burnaby Hospital Ph 2 alliance and the Fraser River Tunnel were both terminated** in 2026. **V**
- **Budget 2026 is dialling back new starts** — a Kelowna long-term-care project was among 7 LTC projects delayed (an Okanagan pipeline casualty worth noting to Jim). **V**

IPDA / community

- **National conference: Calgary, 3–4 Nov 2026** — confirmed (specific venue not yet posted); registration pricing still not posted. Sponsors include WSP, Bird, Chandos, Stantec, Delnor. The single highest-value room in the country for this, in Alberta this cycle. **V**
- IPDA's board is **no longer Alberta-only** (now includes City of Burnaby and City of Kitchener); President is Stephani Carter (Stok); Research Chair is Ritu Ahuja of **Kinetic Construction**. Membership process unchanged; cost still undisclosed. **V**

Contract / economics / insurance / legal (full detail: KOR-IPD-Contract-Economics-Insurance-Legal-Addendum-2026-07-18)

- **CCDC 30-2025 is real** (released 30 Jun 2025). Consultant-relevant changes: "Risk Pool" → "Profit Pool" (naming); Added-Value Incentive Items can now land during construction; a *new mutual waiver of consequential damages* (term left undefined — a future dispute risk); formalized Validation Phase / "Big Room" / optional IPD Advisor. **V**
- **No structural-engineer-specific IPD economics exist anywhere in Canada** — even the best study reports only team-level profit-pool payout. That's how IPD reporting works, not a research gap. **V**
- **Insurance**: project-specific PL is still the fix for the mutual-waiver gap; **Victor Canada** (run with Engineers Canada / ACEC) is the name to bring to the broker. **V**
- **Legal**: no new Canadian IPD disputes; *Onec v. NWT Energy* is under appeal (unsettled); the "Saskatchewan arbitration" is actually old (Graham v. Black & McDonald, 2018-19) — correct the base dossier's phrasing. No IPD dispute has ever named a design engineer as a party. **V**
- EGBC, APEGA and ACEC still publish **nothing** dedicated to IPD — KOR works from first principles with its broker, like everyone else. **V**

OPEN ITEMS — NOT YET CONFIRMED

- **Strathcona Fieldhouse & Fire Station 7 structural engineers** — call the County (780-410-8507) or pull the eScribe council award reports / APC posting in-browser (Alberta Purchasing Connection is a JS app that blocks automated fetch).
- **Vancouver Firehalls #2/#9 IPD** and any standalone structural-IPD RFP — vancouver.ca and BC Bid both 403 automated fetches; needs a logged-in / browser pull to confirm from primary source before it goes client-facing.
- **Richmond Hospital Ph 2/3 structural** — genuinely unnamed publicly; the read is "reachable via HDR," to be confirmed through the relationship.
- **BC Housing Bertram (Kelowna)** design-builder award status.

KOR Structural — Internal · Addendum to KOR-IPD-Alberta-BC-2026-07-03 (frozen; this does not replace it). Prepared 2026-07-18 from five parallel primary-source research streams (Alberta, BC IPD/alliance, IPDA/community, contract/economics/legal, Ledcor/Interior), cross-checked and confidence-tagged. Companion deep-dive: KOR-IPD-Contract-Economics-Insurance-Legal-Addendum-2026-07-18. Sources per claim on file. New people & org facts decomposed to the BD Brain. **Independently re-verified 2026-07-18** by two adversarial fact-checkers — all load-bearing seat facts confirmed against primary sources; corrections applied (Kamloops Cancer budget ~\$386M; FS7 re-pace is fiscal not procurement; Vancouver FH is Prime-Consultant- not architect-led; IPDA venue not yet posted; Interior claim scoped to Kelowna/Kamloops/Penticton).
