

Graham & Gracorp

Graham turns **100 this year** — 3,000 people, 100% employee-owned, a backlog near \$6B. We have never billed them a dollar. But **three of the six people running Gracorp's Vancouver development desk came out of Anthem, Wesgroup and Bosa** — and we invoiced Anthem two days ago and Wesgroup yesterday. That, not a hospital, is the evening.

SUMMARY

Summary and what to do

Graham Construction and Gracorp are one group with two completely different procurement realities. Graham the contractor wins BC's largest healthcare work through alliance and progressive design-build, where the structural seat is locked at team selection — Richmond Hospital's is already Entuitive's. Gracorp the developer builds market rental high-rises and procures structural itself, project by project. The second is the lane KOR actually wins in, and it is won on relationship.

So the evening is a Gracorp evening. We have **zero history** with Graham — no projects, no contacts, nothing — but we are currently the structural engineer for the firms that three of Gracorp's Vancouver team just left, and for the architect on two of Gracorp's biggest BC projects.

► IF YOU ONLY GET FIVE MINUTES

Congratulate them on **100 years** and on **Sunday's two VRCA Silver Awards**. Then ask about the **Edmonds groundbreaking** — it was 18 September, thirteen days ago. Then find **Adrien Rahbar** and open on Anthem, where you personally have **1,235 hours across six of their projects**.

ACTION ITEMS

1. **Open on the centennial and the VRCA Silvers.** Graham's theme is "Defining a Century". On 28 September they took two Silver Awards at the VRCA 2026 Awards of Excellence — Vancouver Transit Centre Skybridge Rehabilitation and the OMD Tank Farm. Three days ago, local, and theirs. \$07
2. **Lead with Edmonds, not with hospitals.** Gracorp broke ground on the 480-home Edmonds Community Hub in Burnaby on 18 September 2026. \$05
3. **Find Adrien Rahbar, VP Real Estate.** He ran development at **Anthem** before Gracorp. We have 31 Anthem projects and \$4.36M billed, last invoiced **29 September 2026**. You have 1,235 hours on six of them. \$04
4. **Find Sean O'Flynn, Senior Development Manager.** He came from **Wesgroup** in October 2025. Open on **ACE at 1650 E 12th** — you have 548 hours on it and the work spans his entire Wesgroup tenure. \$04
5. **Ask who carries structural on the Gracorp towers, and whether it is per-project or standing.** No structural engineer is publicly named on any of them. For a developer that is a real question; for an alliance it would not be. \$05
6. **Mention MCMP, in the present tense.** Musson Cattell Mackey is the architect on both the Broadway tower and Edmonds. We have been the structural engineer on seven projects with them, \$3.03M billed, and **Bridge & Elliot was invoiced on 3 September 2026**. \$03

7. **Find Jennifer Scott, Manager of Major Project Development.** She was a structural EIT at Wicke Herfst Maver. She is the one person in the room who will follow a structural argument without translation. \$04
8. **On the Graham side, ask Lee Holland or Jordan Hood about upcoming design-build procurements and the pre-approved structural sub list.** Getting on the list before a bid is the legitimate ask. Asking for a seat on a live alliance is not. \$07
9. **Say "we've worked alongside", never "we've worked for".** We have no Graham history at all, and the MCMP and Anthem work was invoiced to developers. \$02
10. **Do not raise 1045 Burnaby Street, and do not ask for the Richmond Hospital structural seat.** One is in litigation, the other is taken. \$06

SECTION 01

Two companies, two conversations

Graham began in 1926 as a family contractor working on the Saskatchewan railway. It restructured during the early-1980s downturn and offered employees shares; it is now **100% employee-owned** — which is the thing to compliment, because almost nobody their size is. Today: more than 3,000 people, 29 permanent offices across Canada and the US, a project backlog approaching **\$6 billion**, and 2024 revenue of **CAD \$4.3 billion**, placing them among Canada's three or four largest contractors. President and CEO is **Andy Trewick**. They have been named one of Canada's Best Managed Companies for 26 consecutive years and a Top 100 Employer for 2026.

♦ CORRECTING OUR OWN FILE

Our BD record described Graham as a "family-owned GC". That is how it started and it is wrong now — they have been employee-owned for forty years, and a second record in the same system already said so. Calling them family-owned tonight would land badly. The record is being corrected.

The distinction that matters for structural work:

Graham Construction	General contractor. Its big BC work is healthcare and institutional, delivered by progressive design-build and competitive alliance. In that model the design-builder assembles the whole consultant team — architect and engineers — at team selection, and the structural seat is filled then. It is not re-tendered later, and alliances do not announce their subs. "No structural engineer is named publicly" is the normal state of a closed team, not evidence of an opening.	Gracorp	The group's real estate development arm, founded 2008, about 35 people, Vancouver head office shared with Graham BC at Suite 700, 700 West Pender. It develops purpose-built rental, mixed-use, office and industrial across BC, Alberta and Washington State, and it hires its own consultants per project. Market residential developer work won on relationship is precisely KOR's demonstrated lane.
----------------------------	--	----------------	--

Spend the evening on the second one.

SECTION 02

What we have done together: nothing

This needs saying plainly so it is not accidentally overstated. Graham Construction exists in our Deltek as an *active client record*, so it will autocomplete and look like a relationship. It is not one.

TEST	RESULT
Projects billed to Graham	0 of 37,036 project records
Projects Graham is associated with in any role	0 of 14,985 associations
Contacts on the Graham record	0
Gracorp in Deltek	No client record at all

The three "Graham" project names in our system are a private residence and a street name — Graham Crockart Residence, and Sixth St Villa at 6th & Graham. Unrelated.

So there is no shared-history card to play with Graham itself. Every warm thread below runs through somebody else.

SECTION 03

The bridge nobody noticed — MCMP

Musson Cattell Mackey Partnership is the architect on **both** Gracorp's South Granville Station tower at 1470 West Broadway and the Edmonds Community Hub in Burnaby. MCMP has been the architect on seven KOR projects, and we are on one with them right now.

PROJECT	BILLED	LAST INVOICED	CLIENT OF RECORD
Hudson Place One	\$1,170,466	15 Oct 2024	Townline
Luxe, No. 3 Rd Richmond	\$835,162	21 May 2026	Townline
Park Royal Cinemas	\$410,653	21 Sep 2020	Larco Investments
1111–1113 Kingsway & Glen	\$297,998	12 Sep 2025	Peterson Group
Bridge & Elliot, Delta	\$199,500	3 Sep 2026	Headwater Projects
W2ND, 336–302 West 2nd St	\$104,774	4 Aug 2020	Strand Development
1151 West Georgia	\$14,493	28 Feb 2024	Holborn Developments
Total	\$3,033,046		Seven projects

✕ THE WORDING TRAP

All seven were **invoiced to the developer, never to MCMP**. MCMP is a client record in our system but has never been the paying client. Say *"we've been the structural engineer on seven projects with MCMP"* or *"we've worked alongside them"*. Do not say *"MCMP is our client"* — if it gets repeated back to MCMP it is wrong, and they would know.

The useful sentence is the live one: *"We're on Bridge & Elliot in Delta with MCMP right now."* It is true as of 3 September, it is checkable, and it tells a Gracorp development manager that their architect already knows how we work.

SECTION 04

Three of their team came from our clients

Gracorp's Vancouver desk has been built largely by hiring out of the Vancouver developer bench — and that bench is our client list. This is the strongest thing in the file, because it is personal to you rather than institutional.

PERSON	ROLE AT GRACORP	CAME FROM	KOR'S STANDING THERE
Adrien Rahbar	VP, Real Estate · Vancouver · since May 2023 (at Gracorp since 2017)	Anthem Properties, May 2022 – May 2023	31 projects · \$4.36M billed · last invoiced 29 Sep 2026
Sean O'Flynn	Senior Development Manager · Vancouver · since Oct 2025	Wesgroup 2023–25 · Amacon 2021–23 · Beedie 2019–21	Wesgroup 54 projects · \$7.37M · last invoiced 30 Sep 2026
Josh Guy	Senior Construction Manager · Vancouver · since Dec 2024	Bosa Properties 2021–24 · Starlight 2018–20	Bosa 78 projects · \$3.11M · last invoiced 31 Aug 2026
Bruce Black	President · Vancouver · since 2023, at Gracorp since 2009	TD Securities, Great Canadian Gaming	No overlap

PERSON	ROLE AT GRACORP	CAME FROM	KOR'S STANDING THERE
Derek Steven	VP, Capital Markets · Vancouver · since 2023	BMO Financial Group, 2010–20	No overlap
Jennifer Scott	Manager, Major Project Development · Vancouver	Structural EIT, Wicke Herfst Maver ; then Bilfinger P3	A structural engineer by training

YOUR OWN HOURS

From our labour ledger, against the firms those three came from. These are your hours, not the firm's:

FIRM	YOUR HOURS	PROJECTS	SPAN	OVERLAPS THEIR TENURE?
Anthem	1,235.0	6	Jul 2020 – Aug 2026	Yes — Rahbar's whole year
Bosa	968.0	1	Jun 2016 – May 2019	No — before Guy
Wesgroup	550.0	2	Sep 2021 – Mar 2026	Yes — all of O'Flynn's
Amacon	174.5	1	Jul 2020 – Jun 2025	Yes — O'Flynn 2021–23

The Anthem six, by name, so you can drop one: **Jinju at 537 Cottonwood Ave** (389.5 h), **NUVO at Wilson & Central, Burnaby** (242 h), **SOCO Phase 2 at 520 Young Dr, Coquitlam** (226.5 h), **6444 Willingdon Ave Market Tower** (216 h), **137 Keefer St** (160 h), and 5630–5668 Heather St (1 h, this August). The Wesgroup one to name is **ACE at 1650 E 12th, 12th & Commercial** — 548 hours from September 2021 to December 2025. Amacon's is **Vue at 500 Foster Ave**.

× DO NOT OVERCLAIM BOSA TO JOSH GUY

Your 968 Bosa hours are all on 1002–1012 Pandora Ave, 2016–2019. Guy was at Bosa 2021–2024. Same client, different era — "we've done a lot of Bosa work" is true, "we worked together" is not.

Two senior Gracorp people are **not** in Vancouver and probably not in the room: Giuseppe Augello, VP Real Estate, is in Seattle, and Nate Hickey, Senior Development Manager, is also Seattle. Adrien Rahbar is also **Chair of the City of North Vancouver Advisory Planning Commission** and was Vice-Chair of Vancouver's Urban Design Panel — he reads drawings for a living on both sides of the table.

SECTION 05

Gracorp's BC pipeline

Six active BC projects, roughly 1,500 residential units. Rahbar is reported to have tripled the BC portfolio in three years using standardised building prototypes — which matters commercially: a repeatable prototype means one structural appointment can carry across several towers.

PROJECT	SCALE	STATUS	NOTES
Edmonds Community Hub, Burnaby	50 storeys · 480 rental (384 market + 96 below-market)	Under construction	Groundbreaking 18 Sep 2026. \$90M BC Builds grant; with BC Builds and The Neighbourhood Church; auditorium, food bank, arts space. Architect MCMP . Our file values it at \$330M.
1470–1476 W Broadway (South Granville Station)	34–39 storeys · 300–337 rental, 20% below-market	In application	Transit-integrated, includes a second entrance to the future South Granville SkyTrain station. Architect MCMP , art-deco treatment. Council referral report Jan 2026; DP-2026-00072. Storey count has moved — ask, don't assert.
Kits East, 2175 W 7th Ave	20 storeys · 183 units (35 below-market)	Approved / proceeding	Replaces an ageing 35-unit building. 100% purpose-built rental.

PROJECT	SCALE	STATUS	NOTES
Kits West	20 storeys · 182 units	Reported 2026	Not previously in our system. A second Kitsilano tower alongside Kits East.
Oakridge, 427– 449 W 39th Ave	18 storeys · 176 units (142 market + 34 below- market)	In application	Joint venture with Minto Group . We hold Deltak history with two Minto entities — M4 at Lonsdale Square and 5350–5430 Heather St.
1045 Burnaby St, West End	16 storeys · 170 units (37 below- market)	Do not raise	In litigation with the JV partner — see §06.

In Calgary, Gracorp is three projects deep into University District student and young-professional rental with Harrison Street Asset Management: Encore / Block 15 (303 units, 440 beds, substantially complete August 2025) and Block 22 (322 units, 645 beds, under construction, occupancy ahead of the Fall 2027 semester). If the BC conversation stalls, "what's next after Block 22?" is a genuine question.

■ THE ONE QUESTION WORTH ASKING

No structural engineer is publicly named on *any* of the six BC projects. For an alliance that would mean nothing. For a developer procuring its own consultants it is a real question: "*Who carries structural across the BC towers — is that a standing appointment or per project?*" The answer tells you whether there is a seat at all, and the prototype strategy tells you it is worth more than one project.

Two landmines

× 1045 BURNABY STREET IS IN LITIGATION – DO NOT MENTION IT

Gracorp Properties sued **Fiera Real Estate** in the Supreme Court of British Columbia in **August 2024** over the 16-storey West End rental project. Fiera held 90% and Gracorp 10% as development and construction manager. Gracorp entered a \$200,000 crane-swing easement with a neighbour in April 2024; Fiera issued default notices in June, terminated both agreements in July, and invoked a buyout of Gracorp's stake at 90% of fair market value, with closing expected 7 November 2024. Gracorp alleges there was no valid basis for termination. **The outcome is not verified.** It is a live legal matter at a party — leave it entirely alone, including the address.

× DO NOT ASK FOR THE RICHMOND HOSPITAL STRUCTURAL SEAT

ReNew Canada's project record for the \$1.96B Richmond Hospital Redevelopment lists the **Engineer as Entuitive**, with HDR Architecture as architect and **Graham Design Builders LP** as Phase 2 alliance partner. The seat is filled. Asking for it would signal that we do not understand how alliance teams are assembled — the opposite of the impression we want on a first meeting.

⚠ Our own BD system still carries a February 2025 note saying the structural slot "may be open" and telling us to phone Graham BC immediately, and a June 2026 note telling us to ask Graham whether their structural position on Richmond is open. Both are wrong, both are being corrected, and neither should reach a conversation.

SECTION 07

The Graham side, for conversation

You will meet contractor people as well as developers. Be able to talk about their work without asking for anything:

- ◆ **Cloverdale Sport & Ice Complex, Surrey** — \$132M, 95,000 sq ft, two NHL-sized sheets usable for ice and dry floor. Started summer 2022, completed on schedule and on budget, opened early 2026. A clean compliment.
- ◆ **Cameron Community Centre and Library, Burnaby** — 213,000 sq ft, construction management, 27-month contract, the civic heart of the Lougheed District Town Centre, and mass timber. Our file values it around \$80M.
- ◆ **Douglas College** — student housing plus a new academic building. Our file values it around \$150M.
- ◆ **Richmond Hospital Yurkovich Family Pavilion** — \$1.96B, four phases 2022–2031, currently Phase One decant and demolition of Park Centre and the Rotunda. Nine-floor acute-care tower. Talk about it; don't fish in it.
- ◆ **Stuart Lake Hospital Redevelopment** — progressive design-build, their first major BC healthcare win, 2022.
- ◆ **B6 office tower** (downtown Vancouver, WELL Core Platinum), **Granville Bridge south approach**, and nine or more projects on ReNew Canada's Top100 Infrastructure Projects 2026 list.
- ◆ **VRCA 2026 Awards of Excellence, 28 September** — two Silver Awards, for the Vancouver Transit Centre Skybridge Rehabilitation and the OMD Tank Farm. Three days old and the most current thing you can congratulate them on.

Lee Holland Vice President, Buildings – British Columbia. On Graham's own Vancouver office page and on LinkedIn. His base is reported inconsistently — Calgary in one source, Greater Vancouver in another — so don't assume he is local.

Jordan Hood District Manager, Buildings – British Columbia. Also on Graham's Vancouver page.

Tyler Johnston-Watson District Manager, Infrastructure & Industrial – British Columbia. New to our records.

Tim Heavenor Chief Financial Officer, EVP Development — the group-level name that bridges contractor and developer.

Andy Trewick President and CEO, Calgary.

♦ OFFICE AND SWITCHBOARD, VERIFIED

Graham BC and Gracorp share **Suite 700, 700 West Pender Street, Vancouver V6C 1G8**; Graham also has 7216 Brown Street, Delta. Switchboard **604.940.4500**, confirmed on Graham's own site today. The shared address is itself useful — both teams are one organisation in one office, so a Gracorp conversation is overheard by the contractor and vice versa.

× TWO EMAIL ADDRESSES IN OUR SYSTEM ARE WRONG

Our BD records list Lee Holland and Jordan Hood with **@vch.ca** addresses — that is Vancouver Coastal Health, not Graham, and almost certainly a bad derivation from the Richmond Hospital work. **Do not use them.** Graham's verified pattern is **firstname.lastname@graham.ca** (confirmed on two records), so **lee.holland@graham.ca** is the likely form — but that is derived, not verified. Use the switchboard, or ask for a card.

Gracorp addresses are verified: **adrien.rahbar@gracorp.com**, **bruce.black@gracorp.com**, **sean.oflynn@gracorp.com**, **josh.guy@gracorp.com**, **derek.steven@gracorp.com**, and

SECTION 08

What our award data does and does not show

Our system holds **204 public contract awards** to Graham group entities totalling **\$1.37 billion**, of which 93 carry a disclosed price. The shape of it is Alberta infrastructure, not BC buildings: Graham Infrastructure LP alone accounts for 60 awards and \$626M, mostly City of Calgary and Alberta Transportation interchanges, wastewater plants and pump stations.

In British Columbia the same corpus holds only **two** Graham awards:

AWARD	BUYER	VALUE	DATE
Agassiz-Rosedale Bridge No. 1287, steel and concrete repairs	Ministry of Transportation and Transit	\$32,960,000	15 Jul 2026
Newell Substation Upgrade Project	BC Hydro	\$25,149,213	23 Apr 2026

▣ READ THIS CORRECTLY

Two BC awards is **not** a measure of Graham's BC book — it is a measure of what public award feeds publish. Their BC buildings work arrives through P3, alliance and private channels those feeds never carry, which is exactly why the relationship route matters more than the tender route here.

SECTION 09

Provenance and what is unverified

From our own ledger (Deltek, queried today): the zero Graham history; the seven MCMP projects and \$3,033,046; the per-firm project counts, billed totals and last-invoice dates for Anthem, Wesgroup, Bosa, Beedie, Amacon and Starlight; and your own hours. Billed figures are invoiced amounts, and the per-firm numbers were recomputed after a first pass double-counted them through a join — the figures above are the corrected ones.

From named public sources: Graham's centennial, ownership, headcount, offices, backlog, revenue and CEO; the VRCA Silver Awards of 28 September; the Edmonds groundbreaking of 18 September; Gracorp's project scales; the Fiera litigation; MCMP's role on Broadway and Edmonds; Entuitive as engineer on Richmond Hospital; and Graham's Vancouver address, switchboard and BC leadership from Graham's own site.

From our BD system, and treated as unverified: the "\$5.9B active BC portfolio" figure, which carries no source; the "~\$1.3B BC portfolio" figure for Gracorp; and the \$80M / \$150M values for Cameron Community Centre and Douglas College.

✗ DO NOT ASSERT THIS, HOWEVER TEMPTING

We do not know who holds structural on any Gracorp BC tower. None is publicly named. WHM Structural Engineers surfaced adjacent in searching, and Jennifer Scott trained at WHM — that is suggestive and it is not evidence. If anyone asks what we think, the honest answer is that we are asking, not telling.

KOR Structural — Confidential / Internal · Prepared for Conor Murtagh · 1 October 2026

Ledger figures are billed work only: a project record is not a job unless money or time moved against it. Graham passes neither test, which is why §02 says so plainly.
