

You were right about the proposals

Every count we have put in front of you was **Deltek project records, not won jobs**. Deltek knew the difference and we read the wrong column. Part one corrects each point; part two is the Island list with the single-family and tenant-improvement noise stripped out — **3,020 applications down to 1,156**.

ON THIS PAGE

- 01 Proposals counted as jobs — the whole picture
- 02 Nanoose, and what it cost
- 03 Sense — North Vancouver
- 04 The architect on every job
- 05 Proposals to jobs, by client
- 06 The Island list, small stuff removed
- 07 What is actually open

PART ONE · THE CORRECTION

Proposals counted as jobs

You said you suspected the PO we set up to track proposals was skewing the data. It is, and worse than that — it has skewed **every job count in every document we have sent you**.

× WHAT WE WERE COUNTING

A Deltek project record gets created when we decide to *chase* something. Our counts read those records. Across all **10,017** top-level projects in Deltek, only **2,411 have ever been billed**.

Deltek already tracks this properly in a field called Stage — **179 In Pursuit, 86 Lost, 8 Did Not Pursue** — and we were reading a different field that lumps all of them in with real work.

So when a document said "369 projects", it meant 369 records. The honest number is the one where money moved.

PART ONE · THE CORRECTION

Nanoose, and what it cost

You said we did not get Westmark's Gracewood at Fairwinds. You are right, and the file said so all along.

DELTEK 20330-01	VALUE
Stage	In Pursuit
Contract fee	\$0
Ever billed	\$0

The last document told you we had taken a job off Herold on their home turf. **We had not.** Herold is still the mid-Island incumbent, now with Englobe behind them since May 2025, and we have not displaced them anywhere.

► WHY IT SLIPPED THROUGH

There are two definitions of "won" inside our own systems — one counts any regular project record, the other only counts a project once money has moved through accounts receivable. The first one is what fed the dossier. That is now written down, and the corrected counts below all use money-moved.

PART ONE • THE CORRECTION

Sense — North Vancouver

Corrected. Sense Engineering is headquartered in **North Vancouver**, not Victoria.

Their own website lists the Victoria address first, which is what we took for a head office — but that address is a residential-style terrace in the Colwood area, while North Vancouver is a commercial suite. Twelve offices in total.

Everything else about them stands, and it is the part that matters: not a direct competitor today — envelope, restoration, inspection, capital planning, small jobs, working the relationships on projects we are already on — but recruiting a **Structural Engineering Group Lead at \$150–175k** to expand into new construction, with BC work aimed at **mass timber and hybrid structures**.

PART ONE • YOUR QUESTION

The architect on every job — yes, and it is better than expected

You asked whether we could review previous jobs to see the architect on each. **DelteK** has been recording it all along, in a field nothing we have built reads.

743 projects carry a named architect. The firms we have actually worked alongside, by project count:

ARCHITECT	PROJECTS	ARCHITECT	PROJECTS
Arcadis IBI Group	81	Ramsay Worden	19
DIALOG	68	Keystone Architecture	17
Chris Dikeakos Architects	61	NSDA Architects	15
GBL Architects	48	CEI Architecture	14
Pacific Coast Architecture	44	Chandler Associates	14
Musson Cattell Mackey	29	Integra Architecture	13
Rositch Hemphill	28	JWDA · Christopher Bozyk · VIA	11 each
Yamamoto Architecture	26	Perkins&Will · Buttjes · Focus	9 each

This is exactly the reference-job list you described — **"we worked with you on 81 projects"** is a different opening line from a cold call. And it is nothing like the client-side counts we have been quoting: **Arcadis shows as 2 projects in our BD system and 81 here**, because Arcadis was the architect, not the payer.

× THE CATCH, STATED PLAINLY

743 of 10,017 projects — about **7%** — have the architect filled in. The field exists on every project; it has been populated on a fourteenth of them. So this list is real but partial, and the older the job the likelier it is blank. Backfilling it is a decision about how much it is worth, not a technical problem.

Proposals to jobs, by client

You asked to see the ratio. Records is what we were calling projects; billed is what we actually did.

CLIENT	RECORDS	BILLED	TOTAL BILLED
Northland Properties	373	239	\$2,459,145
Reliance Properties	83	50	\$1,089,742
Townline	41	26	\$2,236,710
Intracorp	54	17	\$1,478,742
Pennyfarthing	13	10	\$264,446
Primex Investments	10	8	\$50,643
NSDA Architects	47	6	\$210,134
Mallen Gowing Berzins	6	5	\$21,149
Aragon · Ridge North America	5 · 3	2 · 2	\$85,806 · \$56,000
Radcliffe · Three Dog · Sakura	2 · 3 · 4	1 · 1 · 1	\$53,000 · \$151,701 · \$117,537
Starlight	12	0	\$0 — two contracts signed
D Akers Property Solutions	9	0	\$0
Ledcor · Greystar · M'Akola · dHK	6 · 2 · 2 · 2	0	\$0

× THREE THAT WERE BADLY WRONG, AND ONE OF THEM IS THE ONE YOU FLAGGED

- ♦ **D Akers Property Solutions — nine records, none billed.** The last document called them "our deepest mid-Island relationship". They are our *most-pursued mid-Island prospect*. Consistent with the \$5K Lantzville bid you lost.
- ♦ **Starlight — twelve records, none billed.** Two carry signed contracts, \$145,000 at 7376 Halifax St Burnaby and \$180,000 at Quadra East Victoria, with time charged against the Burnaby one. Real wins in progress, not six completed jobs.
- ♦ **NSDA Architects — 47 records, 6 billed.** We said 28.

And the whole mid-Island picture changes. Across all eleven mid- and north-Island communities — Campbell River, Parksville, Qualicum Beach, Comox, Courtenay, South Courtenay, Duncan, North Cowichan, Nanoose and Chemainus — we hold **34 project records and eight have ever been billed**: West Wave Parksville \$151,701 · Gibbins Rd North Cowichan \$70,000 · Rowan Parksville \$53,000 · Paddle Rd North Cowichan \$40,000 · Chemainus \$4,125 · Courtenay \$3,750 · South Courtenay \$1,733 · Duncan \$1,125.

Campbell River: eight records, nothing ever billed. Not a foothold — a market we keep bidding into and not winning.

PART TWO · THE LIST

The Island list, small stuff removed

You asked to weed out single-family and tenant-improvement work. Done — and it removes nearly two-thirds of the file.

REMOVED	APPLICATIONS
Single-lot residential permits	1,003
Single-family dwellings	360

REMOVED	APPLICATIONS
Decks, fences, garages, retaining walls	213
Tenant improvements	116
Suites and accessory dwellings	93
Alterations	74
Demolitions · signs · servicing	31
What is left	1,156

1,156 big-ticket applications. By market: Nanaimo 388 · Langford 193 · Saanich 191 · Victoria 92 · Courtenay 85 · Qualicum Beach 78 · Parksville 44 · Campbell River 31 · Colwood 27 · Comox 19 · RDN 8.

× READ THE DATE FIGURE CAREFULLY

Of the 1,156, **438 carry no date at all** — Nanaimo publishes none for any of its 388, and neither does Campbell River (31) or Comox (19). So **270 filed in the last twelve months is 270 out of the 718 that are dated**, and it tells you nothing about the other 438.

Nanaimo is a third of the big-ticket list and cannot be aged.

The filter is now a single definition inside the database rather than a query someone rewrites each time, so a count here, a count in the app and a count in the next document cannot drift apart. It has limits worth knowing: only Langford publishes a construction value, so "big ticket" means "not obviously small" rather than "over \$X"; and a multi-unit building described only as "RESIDENTIAL BUILDING PERMIT" is removed along with the single lots, because Saanich gives nothing to tell them apart.

What is actually open

Big-ticket only, most recent first, with the applicant where the city publishes one.

- ♦ **Langford, 3 Sep 2026 — three six-storey buildings, approximately 154 units.** The largest thing on the Island file right now.
- ♦ **Saanich, 9 Jul 2026 — Continuum Architecture**, rezoning for a **6–8 storey mixed-use with 134 units**.
- ♦ **Colwood, 19 Jun 2026 — a 112-unit apartment building.**
- ♦ **Saanich, 10 Jun 2026 — 6-storey, 113 dwelling units with two levels of underground parking.**
- ♦ **Langford — 80 units** (six-storey mixed use, 19 Aug), **78 units** (six-storey multifamily, 30 Jun), **76 rental units** (six-storey, 28 Jul). Three separate six-storey buildings in one summer.
- ♦ **Saanich, 10 Aug 2026 — hcma architecture**, a **new K-12 Francophone school**. Institutional, and hcma is on our list already.
- ♦ **Saanich, 14 Aug 2026 — Francl Architecture**, a **new parks facility**.
- ♦ **Saanich, 13 Jul 2026 — Island View Land Management**, rezoning for a comprehensive mixed-use development with **eleven buildings**.
- ♦ **Saanich, 26 Aug 2026 — Alan Lowe Architect**, rezoning C-2 General to a mixed-use zone.
- ♦ **Saanich, 31 Aug 2026 — Abstract Developments**, amending a development permit on site layout and building construction.
- ♦ **Colwood — a 20-unit townhouse** development (25 Aug) and a three-storey (12 Aug).
- ♦ **Victoria, 2 Sep 2026 — Island Health** proposes a covered secure bike facility. Small, but it is the health authority buying directly.

► WHERE THIS LEAVES THE MID-ISLAND

Campbell River, Comox and Qualicum publish 128 big-ticket applications between them and we have never billed a dollar in any of the three. That is not a relationship problem — **we are already bidding there and losing.** The useful question is not who to call but why the bids are not landing, and the Akers Lantzville result at \$5K suggests we may be aiming at the wrong end of the market in exactly the way you describe.

KOR Structural — Confidential / Internal · Prepared for Rory Beirne, Principal Vancouver Island · 8 September 2026

All counts here are money-moved, not project records. Every correction has been written back into our systems.
