KOR STRUCTURAL · BUSINESS DEVELOPMENT · OKANAGAN

Bridgestar, Team, Ironclad: where to spend the time

Prepared for Conor Murtagh, 4 November 2026

THE ANSWER

Put the effort into Bridgestar, and start with Graham Chatwin this month.

Bridgestar hired its senior team in the last eight months, and its new Director of Construction is someone you already know: Graham Chatwin, who worked directly with you on Timmins at Mission. Its next building, 64 homes in Penticton, is still in planning. The catch is Stretch Construction, the contractor on its last two buildings, which may bring its own engineer. Keep Team warm with one coffee. Treat Ironclad as a closed door until proven otherwise: it lists its own Lead Structural Engineer.

FIRM	NEXT SEAT	KOR'S WAY IN	MAIN OBSTACLE	CALL
Bridgestar	64 homes, Penticton, planning	Strong: you worked with Graham	Stretch's existing team	Pursue now
Team	None visible	None yet: no history	Owners usually pick the engineer	One coffee
Ironclad	Unknown	None: no history	In-house structural engineer	One question

KOR history with the firms: none of the three, nor Stretch or Sherri Turpin, has a client record in Deltek under these names or a CRM pursuit. No filed email in KOR's 378,146 has their email domains or names them. Unfiled mail isn't covered, so you may know more.

1 · BRIDGESTAR: WHY NOW

A small owner has just built a professional bench. Founded in 2020 and led by President Gurupdesh Dhaliwal, it now has about 6 staff (Apollo estimate). Four of its five senior people below arrived in 2026, so consultant choices are likely being looked at fresh. That last part is my read, not a fact.

PERSON	ROLE, SINCE	CAME FROM	EMAIL
Graham Chatwin	Director of Construction, Oct 2026	Sureway; Mission Group 2016-25	gchatwin@bridgestar.ca
Melissa Bell	Director of Operations, Jun 2026	Stober Group 2022-26	mbell@bridgestar.ca
Scott Wandler	CFO, Mar 2026	MBA CPA; Stober Group 2013-24	swandler@bridgestar.ca
Rashmeen Malhotra	Technical PM, Mar 2026	Hewlett Packard Enterprise	rmalhotra@bridgestar.ca
Gurupdesh Dhaliwal	President, 2020	Maverin; Suncor project controls	gdhaliwal@bridgestar.ca

The way in is your own job. Graham was Mission's Preconstruction Manager on Timmins, and filed email shows you working with him directly. He sent you the lobby sketches on 14 January 2025, you sent him the revisions, and on 21 January 2025 he wrote to you: **"The structure looks very good from the construction perspective."** Jeremy Atkinson dealt with him from October 2023. You are project manager and principal on the job in Deltek (955 Timmins St; Mission's emails call it 1001 Timmins), with 426.5 hours. KOR has invoiced Mission about $205K across two jobs. Melissa is worth meeting, but consultant choices more likely sit with Graham and the President (my read).

PROJECT	SIZE	STATUS	TEAM ON PUBLIC RECORD
Backstreet, 32 Backstreet Blvd, Penticton	64 homes proposed	Planned; no permit file found	None found
Nova on the Park, 681 Wardlaw Ave, Kelowna	45 rentals, 5 storeys	Building; due winter 2026-27	Stretch (GC), Maise (interiors)
Astra, 123 Front St, Penticton	48 homes + retail, 5 storeys	Bridgestar lists as existing	Stretch, Sherri Turpin Architect, WSP (landscape)
Sutherland, 598 Sutherland Ave, Kelowna	16 units	Not stated	None found
Chelmsford Plaza, Chelmsford, ON	Retail plaza	Not stated	None found

The real competition is the existing team. The Front St permit drawings, dated April 2024, name Stretch Construction as client and copyright holder, and Sherri Turpin (Penticton) as architect. Stretch sells "design to delivery". So the question that decides this pursuit is who engineered Front St and Wardlaw, and whether they come with Stretch. No public document I could read names them; Kelowna's permit files block automated reads. Nothing yet ties Stretch to Backstreet, either.

Size of the prize. A guide only: KOR has invoiced $64K to $90K on each of Nancee Way, Sadler Road and 955 Timmins. Scope and building size differ, and I have not compared them. The larger prize is repeat work from a growing owner, though nothing beyond Backstreet is public.

Credentials to lead with: 955 Timmins and Sokana in Penticton; Sadler Road, Nancee Way and Saucier Avenue multi-family; Dilworth Centre, where you have 783 hours. Check the building types before citing them as like-for-like; Deltek doesn't record them.

```
Bridgestar: 520–1628 Dickson Ave, Kelowna · 778–760–8686 · bridgestar.ca
Stretch: Geoff Stretch, President, geoff@stretchconstruction.ca · Justin Perrin, Senior PM,
justin.perrin@stretchconstruction.ca · 250–980–2405
Sherri Turpin Architect: turpinarchitect@outlook.com · 587–876–7616
```

NEXT 30 DAYS

BY	ACTION	DONE WHEN
Fri 6 Nov	Ask Jeremy how Timmins went with Graham, and whether anything was left open. Ask John about 32-56 Backstreet: he logged 1 hour there for Wardman Group in 2017, on a $200 invoice. Nothing links Wardman to Bridgestar.	You go into the call with no surprises
Fri 13 Nov	Call Graham (his cell on Timmins, January 2025: 778-214-5645). Three questions: where Backstreet stands; who is engineering it; how Bridgestar will pick consultants from here.	Conversation held, engineer named or seat confirmed open
Fri 20 Nov	See Geoff Stretch and Sherri Turpin. Ask who they use for structural and what is next. Meet Melissa if the door is open.	Stretch's engineer is known
Fri 27 Nov	**Decide.** Seat open: put in a fee proposal and log the pursuit. Seat taken: offer to be the alternative on the next one, and check back quarterly.	Decision logged in the CRM
Mid-Dec	Coffee with Chad Gould (Team). One email to Janet Sokolowski (Ironclad) on who seals BC structural.	Both answered; stop if the answer is no

> **Opening note, if a call doesn't land:** "Graham, congratulations on the move to Bridgestar. I enjoyed working with you on Timmins, and I see you have 64 homes planned on Backstreet. Could I buy you a coffee and hear where that stands and how you're approaching consultants?"

2 · TEAM CONSTRUCTION: USEFUL, BUT A CHANNEL

What it is. Kelowna construction manager, founded 1981, about 16 staff (Apollo). Offers design-build, construction management, GMP and stipulated sum across multi-family, commercial, institutional and wineries. Apollo reports it has its own framing and concrete crews.

Why it ranks second. It doesn't own the buildings, so on most jobs the owner chooses the engineer. Design-build and development management are the exceptions, where Team could bring its consultants (my read). Its "latest venture" is a six-storey building near Kelowna General Hospital: 40 rentals and about 6,500 sq ft of medical office, status and team unstated.

Chad Gould, President since 2018, at Team since 2011: cgould@teamconstruction.ca · Gord Wilson, Founder · Logan Simpson, Project Manager · 200–860 McCurdy Rd, Kelowna · 250–868–8326

3 · IRONCLAD: ASSUME THE SEAT IS CLOSED

Why. It runs land, design, engineering, construction and rentals itself, and says its buildings are designed by its "technicians and engineers". Apollo lists Andrew Meads as Lead Structural Engineer since 2022 in Winnipeg, about 6 people in engineering, and about 130 staff. Founder Ryan Van Damme and VP Steve Van Mil both came from Seymour Pacific.

What could change that. Apollo also lists Meads as current at DGH Engineering, and I could not confirm who seals BC buildings. If it is an outside BC engineer, there may be an opening. That is the one question worth asking, and Janet Sokolowski, COO and a P.Eng, formerly its VP of Pre-Construction and Design, is the person to ask.

Scale and local work. About 5,000 units across five provinces (press, October 2025). Okanagan projects on its site: 2241 Springfield Rd (401 units, six storeys) and The Aurora in Kelowna; Lakeview Pointe in West Kelowna; Rockwood Landing and The Highland in Vernon. Sources conflict on status, so confirm before citing.

Be aware. A worker died at 2241 Springfield Rd on 14 June 2024. RCMP and WorkSafeBC investigated; I found no published outcome.

Janet Sokolowski, COO: jgauthier@icdev.ca · Michal Kubasiewicz, VP Land and Development: mkubasiewicz@icdev.ca · Andrew Meads: ameads@icdev.ca · Ryan Van Damme: rvandamme@icdev.ca · 204–777–1972

HOW FAR TO TRUST THIS

- **Confirmed from the source:** KOR's Deltek figures; KOR's filed email with Graham; the Front St permit drawings; Bridgestar, Stretch, Team and Ironclad's own sites; Castanet and Global News reports.
- **Reported by Apollo, refreshed mostly October 2026:** people, titles, start dates, staff counts, emails. Confirm on first contact. Melissa's title matches what you heard.
- **My read:** anything marked so, including who picks consultants and why the timing helps.
- **Still unknown:** who engineered Front St and Wardlaw; who owns the Backstreet process; who seals Ironclad's BC work; any contact in mail that was never filed.
