

Who's who: Greater Victoria & Nanaimo

v2 was researched. **v3 is measured.** Every architect, developer and contractor below was found by reading the cities' own development-application files — **116 live applications in Victoria**, each with the applicant's own agent named, and **877 in Nanaimo** — then matched against our billing ledger. **Ten of these firms are already KOR clients.** Prepared for Rory Beirne, Principal, Vancouver Island.

START HERE

What changed in v3 — and why it matters

v2 answered "who are the significant firms on the Island?" from public research. v3 answers a harder and more useful question: **who is filing an application in Victoria this month, who is acting for them, and do we already bill that client?**

► THE FINDING

The most active applicants in Victoria right now are already KOR clients. Not prospects — clients, with Deltek IDs and project history. Northland Properties has **369 KOR projects**, the most recent dated **26 August 2026**, and is named on two live Victoria applications. Reliance Properties: 82 projects. Intracorp: 46. Townline: 36.

v2 called Townline "the one real door." It was right that it was a door. It was wrong that there was one.

Three things are new and none of them existed in v2:

- ♦ **Named agents, not firm switchboards.** Every Victoria application names the applicant's own contact — the developer, their architect, or their planning consultant. 47 named people across 42 firms, with direct email. These are not Apollo guesses; the city publishes them.
- ♦ **Firms v2 never surfaced.** Islandview Group is the single most active applicant on the file and does not appear in v2 at all. Nor do MJM Architect, Wiser Projects, Bayview Place or Fold Architects — all of them filing now.
- ♦ **Nanaimo has a file too.** 877 applications, including 217 commercial / multi-family / industrial. v2 could only describe Nanaimo from press coverage.

THE DOOR LIST

Where we already have a door

Ranked by our own ledger, not by prominence. "Live apps" means development applications open with the City of Victoria as at 27 August 2026.

FIRM	KOR HISTORY	LIVE APPS	WHO IS ACTING
Northland Properties CL00299	369 projects last 26 Aug 2026	2	Scott Harwood · sharwood@northland.ca Hotel work — the six-storey hotel at 2706 Government St is theirs.
Reliance Properties CL00356	82 projects last 19 Jan 2026	1	Juan Pereira · juanp@relianceproperties.ca Heritage restoration specialists — multiple heritage awards.
Intracorp Projects CL00205	46 projects last 25 Jun 2026	1	Matt Kolec · mkolec@intracorphomes.com
Townline 7A3C11F3	36 projects last 5 Feb 2026	2	Devin Spence · devin.spence@townline.com v2's "one real door" — still a door, no longer alone.
Primex Investments CL00337	9 projects last 25 Jul 2025	2	Gregory Mitchell · greg@primexinvestments.com \$500M+ AUM, large-scale BC rental.
Sakura Developments 42B07C0E	3 projects last 24 Nov 2024	3	Dan Robbins · dan@sakuradevelopments.com Cooling relationship, warming pipeline — worth a call on that basis alone.
M'Akola Development Services	1 project last 20 Oct 2025	3	Holly Pridie · hpridie@makoladev.com Bronwyn McLean · bmclean@makoladev.com Including a 22-storey at 3075 Douglas St.
GWL Realty Advisors CL00167	2 projects last 11 Oct 2023	2	Michael Reed · michael.reed@gwlra.com 617 Broughton St — a twelve-to-thirteen storey mixed-use rezoning.
Ledcor Construction CL00238	DelteK client, no job yet	1	Maria Pawluczuk · maria.pawluczuk@ledcor.com

FIRM	KOR HISTORY	LIVE APPS	WHO IS ACTING
D'Ambrosio / DAU Studio f147c32b	In Deltek, no job yet	4	Erica Sangster · esangster@daustudio.ca Michael Barros · mbarros@daustudio.ca

× CARRIED FORWARD FROM V2 — STILL TRUE

Starlight. David Woo (dwoo@starlightinvest.com) is filing the six-storey heritage-retention building at 350 Douglas St. He is **Starlight Investments**, the Toronto REIT behind Harris Green — **not** our client Starlight Development, the luxury-retreat fund. Same first word, unrelated firms. The permit file confirms v2's correction rather than undoing it.

THE THREAD

The Island's institutional pipeline is mass timber

Unchanged from v2 and still the single most actionable pattern in the market. It maps directly onto KOR's CLT and hybrid-timber capability.

- ♦ **VIU Nanaimo student housing** — 10-storey hybrid CLT, 266 beds, BC Energy Step Code 4, on VIU's district geo-exchange. Opens summer 2027.
- ♦ **Camosun Lansdowne student housing** — six storeys, 423 beds, mass timber targeting LEED Platinum. \$154.7M (\$151.7M province, \$3M college). Ready early 2029.

Both flagship post-secondary projects on the Island are timber. **The permit file now corroborates this from the private side too:** Studio 531 Architects lists mass timber as a core capability and has grown headcount 75% in twelve months; Cascadia Architects and Fold Architects both file as Passive House specialists. The Island's design bench is being rebuilt around performance and timber, and that is the conversation to walk in with.

COMPETITIVE

Who holds the structural seats

- ♦ **Fast + Epp** — structural on VIU's 266-bed hybrid CLT student housing (architect hcma). The flagship Island mass-timber institutional job, and a competitor has it.
- ♦ **Herold Engineering** — Nanaimo civil and structural; the recurring structural partner on Westmark projects, and works with Raymond de Beeld Architect on that team.
- ♦ **RJC Engineers** — maintains a Nanaimo office. A local presence, not a Vancouver firm flying in.
- ♦ **EVOKE Buildings Engineering** — *new in v3, and found in the permit file rather than by research*. Building-science and envelope consultants, employee-owned, founded 2020, 23 staff, explicitly expanding in the BC market. They appear as the applicant's engineer on a Victoria application. Adjacent to us rather than head-on — envelope and energy, not structural — but they are in the room early, which is the position we want.

DISCIPLINE

Architects

Reordered by **measured activity** — how many live Victoria applications each firm is currently named on. v2's ordering was by reputation; this one is by what they are doing this month.

- ♦ **D'Ambrosio Architecture + Urbanism (DAU Studio)** — Victoria. **4 live applications, the most of any architect**. 14 staff. Erica Sangster and Michael Barros both file. Architecture and urban design for public and private sectors. In Deltek with no job yet — the single largest gap between activity and relationship on this page.
- ♦ **Cascadia Architects** — Victoria, 804 Broughton St. **3 live applications**. 15 staff, ~\$29.9M revenue. Founded 2012 by Peter Johannknecht and **Gregory Damant** (greg@cascadiaarchitects.ca), who is the named filer. **Passive House specialists**, including large affordable-housing projects.

- ♦ **CHA — Colin Harper Architect** — Victoria. **3 live applications.** Small (2 staff, founded 2020) but filing at the rate of a much larger practice. Adaptive reuse — converted the historic Powerhouse Building into Ecologyst's HQ. Works with Lida Construction and Marking Developments. *v2 listed this firm in a footnote of "smaller practices". That was wrong.*
- ♦ **MJM Architect Inc.** — Victoria, 531 Yates St. **2 live applications. Not in v2 at all, and arguably the best single fit on this page.** Principal **Michael Moody**. The firm's own positioning is *adaptive re-use and building modernization*, and its stated capabilities lead with **seismic upgrades** and heritage buildings. Two contacts filing: michael@mjmarchitect.ca and office@mjmarchitect.ca.
- ♦ **Wiser Projects** — Victoria, 415 Dunedin St. **2 live applications. Not in v2.** Registered planners, not architects — which is exactly why they matter: they are the **gatekeeper to Indigenous and non-market housing**, working with Indigenous governments, non-profits, CMHC and BC Housing on Housing First projects on community-held land. **Kaeley Wiseman** (kaeley@wiserprojects.com) is filing the three-tower mixed-use rezoning at 829–899 Fort St / 846–856 Broughton St.
- ♦ **Studio 531 Architects** — Victoria, 531 Herald St. 1 live application. Founded 2012 by **Tom Moore** (tmoore@studio531.ca) and Jesse Garlick. **Mass timber**, institutional, healthcare, heritage. Works with the Capital Regional District; teamed with Stantec on a transportation terminal. **Headcount up 75% in twelve months** — the fastest-growing architect in this set.
- ♦ **Fold Architects** — Victoria, 738 Fort St. 1 live application (a 12-unit strata residential development, filed 27 Aug 2026 — the newest application on the file). **Melanie Wilson**, mwilson@foldarchitects.com. Passive House certified, net-zero, First Nations housing.
- ♦ **Christine Lintott Architects** — Victoria. 1 live application. 12 staff, founded 2009. Regenerative and ecological design, LEED, BIM.
- ♦ **Finlayson Bonet Architecture** — Saanichton. 1 live application. Founded 2000, 8 staff. **Supportive, transitional and affordable housing**, public facilities, First Nation-inspired design, BC Step Code, Passive House. **Kyle Shick**, permits@finlaysonbonet.ca.
- ♦ **Kilo Architecture** — Victoria. 1 live application. Principal **Keith Tetlow**, keith@kiloarchitecture.com.

- ◆ **Barefoot Planning + Design** — Saanich. 1 live application. Community and Indigenous planning, rezoning, treaty advisory. **Evan Peterson**, evan@barefootplanning.com.
- ◆ **Alan Lowe Architect** — Victoria. 1 live application. **Alan Lowe** is a former Mayor of Victoria and a practising architect — an unusual combination of design authority and civic reach.

► CARRIED FROM V2, NOT CONTRADICTED, BUT NOT CURRENTLY FILING IN VICTORIA

Low Hammond Rowe · Checkwitch Poiron (Nanaimo) · dHKarchitects (our one architect client, 1 job Jul 2025) · Continuum Architecture · Waymark · Raymond de Beeld (Nanaimo) · AR Architecture (Nanaimo). Their absence from the Victoria permit file means they are not filing *in the City of Victoria* right now — Saanich, Langford, Colwood and Nanaimo are separate files, and only Nanaimo is wired.

DISCIPLINE

Developers

- ◆ **Islandview Group** — Victoria. **4 live applications — the most active single applicant in the city, and completely absent from v2.** **Niall Paltiel**, niall@islandviewgroup.ca. Filing a two- and four-storey vehicle sales, service, cafe and office centre at 202 Harbour Rd. **No Deltek relationship. This is the coldest high-value target on the page.**
- ◆ **Aryze Developments** — Victoria, 398 Harbour Rd. **4 live applications.** 54 staff, founded 2011, **Certified B Corp**, headcount up 27% in twelve months and 53% in twenty-four. Two people filing: **Kieran Lynch** (kieran@aryze.ca) and **Dan Kwak** (dkwak@aryze.ca). v2 named Ryan Goodman as Principal/GM — still true, but Lynch and Kwak are who the city hears from. Projects include Telus Ocean and The Abbey.
- ◆ **Bayview Place** — Victoria, 80 Saghalie Rd. **Not in v2.** The **Roundhouse at Bayview Place** master plan in Victoria West — a spectrum of housing plus a cultural centre, one of the largest multi-phase plans in the city. **Peter de Hoog**, pdehoog@bayviewplace.com.

- ♦ **M'Akola Development Services** — Island-wide, and a KOR client. 3 live applications including a **22-storey residential with ground-floor commercial at 3075 Douglas St.** Indigenous-led affordable housing. v2 named Mackenzie Godfrey; the filers are **Holly Pridie** and **Bronwyn McLean**.
- ♦ **Sakura Developments** — Victoria. 3 live applications, and a KOR client whose last job was November 2024. **Dan Robbins**, dan@sakuradevelopments.com.
- ♦ **Urban Thrive Developments** — Victoria. 1 live application. **Julian West**, julian@urbanthrive.ca. Social-enterprise housing: car-free, intergenerational, zero-emissions, attainably priced. Small, but the ideology is a strong match for the timber/Passive House thread above.
- ♦ **TIR Properties · Gustavson Capital · Kors Development Services · Ready Management Services** — Victoria, one live application each. Ready Management is filing **covered padel courts and a two-level Dockside BETA building at 356 Harbour Rd** — an unusual structure and a good conversation opener.
- ♦ **Institutional owners filing their own work** — **Glenlyon Norfolk School**, the **BC Muslim Association**, the **Anglican Diocese of BC**, and **Chabad of Vancouver Island** (a 2-storey, 3-classroom school expansion at 2936 Quadra St). These are owners, not developers — they buy design directly, and none has a KOR relationship.

Carried from v2, not currently on the Victoria file: Petroglyph Development Group (still the best cold target in Nanaimo — te'tuxwtun, 102.7 acres, approved 9 May 2026) · Abstract Developments · Chard Development · Jawl Properties · Seacliff · Greater Victoria Housing Society · Capital Region Housing Corporation.

DISCIPLINE

General contractors

- ♦ **Mike Geric Construction** — Saanich, 4520 W Saanich Rd. **2 live applications.** Family-owned since 1968, ~\$42.1M revenue, **1,500+ homes built in Greater Victoria.** Both a builder and a developer. info@gericconstruction.com.

- ♦ **Città Group** — Victoria, 1763 Verling Ave. 1 live application. Founded 1985, design-build, **heritage restoration and conversions**, custom millwork, multi-family and hospitality. Built Green Canada.
- ♦ **Hutchinson Contracting** — Victoria. 1 live application (a 3-storey, 7-unit townhouse complex). Heritage restoration, **structural repairs**, second-storey additions. **Devin Hutchinson**, devin@hutchinsoncontracting.ca.
- ♦ **Blend Projects** — Victoria. 1 live application (subdividing and building a 7-unit townhouse with a relocation). Design-build, **prefabricated and modular**, founded 2018 by Simon Fyall and Richard Egli.
- ♦ **Ledcor Construction** — a Deltek client with no job yet, now filing in Victoria. **Maria Pawluczuk**, maria.pawluczuk@ledcor.com. Second-largest multi-disciplinary contractor in Canada.
- ♦ **Casman Group** — 1 live application. *Flagged for verification*: our match resolves to Casman Group, whose head office is Fort McMurray, but the contact phone is a 250 (Saanich) number. Confirm which entity before an approach.

Carried from v2: Knappett Projects (engineer-led — their PMs are all engineers or EITs, which should shape how a structural pitch sounds) · Knappett Industries (Nanaimo, separate company — do not merge) · Westmark Construction (KOR client, but Herold is the structural incumbent) · Farmer · Durwest · Ralmax · Kinetic · Campbell · Windley · Hazelwood · Verity · Brenric · CMF · Tectonica · Island Heights.

WHERE THE MONEY IS

The institutional pipeline

Unchanged from v2 — these are public-sector programmes, not permit-file entries.

- ♦ **Nanaimo Regional General Hospital** — concept planning for a new patient tower plus cardiac and acute expansion, and a new Nanaimo Cancer Centre. Concept plan due summer 2027, so **consultant selection is ahead of us, not behind**.

- ♦ **Victoria General Hospital energy centre** — \$75.6M (Island Health \$52.9M, Capital Regional Hospital District \$22.7M), building summer 2026 to 2029. Island Health frames it as resilience against power outages, earthquakes and flooding — **a seismic brief in all but name.**
- ♦ **Camosun Lansdowne** — 423 beds, six storeys, mass timber, LEED Platinum, \$154.7M, ready early 2029.
- ♦ **VIU Nanaimo** — 266 beds, 10 storeys, hybrid CLT, summer 2027. hcma architect, Fast + Epp structural.
- ♦ **te'tuxwtun, Nanaimo** — 102.7 acres, Snuneymuxw-led via Petroglyph, approved 9 May 2026. The largest single land play in the Nanaimo market.
- ♦ **BC Housing, Nanaimo** — 564 Fifth Street with M'akola (34 replacement homes plus ~165 new, construction 2028) and 250 Terminal Avenue.

Market backdrop: Q1 2026 housing starts — Saanich 195, Langford 171, Colwood 143, City of Victoria 117. March starts fell 64% year over year while missing-middle activity doubled on the back of Bill 44. Roughly 118 active pre-construction developments across Greater Victoria.

ADDENDUM A • EMPIRICAL

The live application register

Everything above is derived from this. These are real applications open with the City of Victoria, newest first, with the agent acting and whether we already bill their firm.

Nothing here is inferred.

FILED	SITE	WHAT IS PROPOSED	ACTING
27 Aug 2026	1778–1782 Adanac St	12-unit strata residential, two separate buildings	Melanie Wilson · Fold Architects
20 Aug 2026	1252 Gladstone Ave	Four-storey mixed-use building	Tonny Kiptoo
14 Aug 2026	3106 Balfour Ave	3-storey, 10-unit townhouse	Noah Mullin
29 Jun 2026	251 Esquimalt Rd	22-storey designated-affordable residential tower	Dylan Baird
22 May 2026	356 Harbour Rd	Covered padel courts + two-level Dockside BETA building	Miguel Morales · Ready Management
15 May 2026	350 Douglas St	~Six-storey multiple dwelling, heritage retained	David Woo · Starlight Investments
20 Mar 2026	639 Foul Bay Rd	Subdivide + 7-unit townhouse, with relocation	Blend Projects

8 Oct 2025	202 Harbour Rd	Two- and four-storey vehicle sales, service, cafe and office centre	Niall Paltiel · Islandview Group

FILED	SITE	WHAT IS PROPOSED	ACTING
6 Aug 2025	829–899 Fort St / 846–856 Broughton St	Three mixed-use towers, residential over commercial	Kaeley Wiseman · Wiser Projects

► HOW TO WORK THIS LIST

A development application is filed **months to years before a tender**. By the time a structural RFP appears, the engineer was chosen at roughly the stage these rows represent. Two rows on this page are 22-storey towers; one is three towers at once. The agent named beside each is the person who can say who holds the structural seat — and, on the ten firms in section 02, we are already a supplier in good standing.

ADDENDUM B · EMPIRICAL

Nanaimo

Nanaimo publishes its own application file — **877 applications ingested**, current, and new to v3. It is a different shape from Victoria's and the difference matters.

WHAT NANAIMO FILES	COUNT
Commercial / multi-family / industrial	217
Commercial / multi-res alteration	205
Single / two-family alteration	235
Single / two-family dwelling	111
Subdivision	55
Development permit	45
Rezoning application	33

Nanaimo's descriptions are **richer than Victoria's** — they name the occupant and describe the structure. Two real examples from the current file:

- ♦ **750 Jackson Road** — "ABC Recycling Ltd., Steel Recycling Facility, consists of 3 buildings, includes site servicing & works, site designed for large truck movement."
- ♦ **981 Maughan Rd** — "(Convertus Canada) Addition of 593m² of Group F2 processing plant. Work includes removing exterior wall of pre-engineered steel building, installation of **4 pre-cast concrete composting tunnels** and expansion to treatment system."

× TWO HONEST GAPS IN THE NANAIMO DATA

No applicant contacts. Nanaimo publishes no per-application detail page, so there is no equivalent of Victoria's named agent. The Nanaimo rows tell you *what* and *where*, never *who*. Closing that gap needs a different route — the planning department's own agendas.

No application date. The feed carries no date field, so Nanaimo rows cannot be sorted or aged. File numbers rise over time and are the only ordering available.

METHOD

How this document was produced

v2 was assembled by research. v3 was assembled by a pipeline that now runs on its own. This section exists so you can judge how much to trust each number — and so the next person can reproduce it.

1

Read the city's own file

Victoria publishes its development applications as a live map service. We read it directly — **258 rows that resolve to 146 real applications**, because a rezoning spanning nine parcels is published as nine rows.

2

Filter to buildings

A relevance gate drops sign variances, fences and awnings. It had to be taught planning vocabulary first — it spoke tender language, and was discarding six-storey hotels because nobody had told it "storey" meant a building.

3

Open every application

Each surviving application links to the city's tracker, which names the **applicant's own agent**. All 116 were opened and read. That is where every email in this document comes from.

4

Identify the firms

Agent email domains were enriched against Apollo for authoritative company names, size and location — **31 of 42 matched**. The remaining 11 are named from the applicant string itself and are marked as such.

5

Match against our ledger

Each firm was resolved against our existing client records by exact website domain, then exact name. **24 of 42 were already in our system**; 10 carry Deltek client IDs. That match is what produced section 02.

6

Bank it

47 people, 47 firm affiliations and 42 typed org facts were written into the BD platform. The next pass starts from here, and the pipeline keeps updating whether or not anyone asks it to.

► WHAT IS NOW RUNNING BY ITSELF

Four municipal application feeds are live and refresh daily: **Victoria** (116), **Nanaimo** (877), **Coquitlam** (389) and **Maple Ridge** (120). Adding another municipality that publishes the same way is a configuration row, not a new build. Coquitlam's feed also publishes the applicant's name directly, which is how we know Ledingham McAllister is filing three 6–7 storey wood-frame buildings there.

METHOD

Honest labels

- ◆ **The permit data is the city's, and it is exact.** Application numbers, sites, scope text, agent names and agent emails are published by the City of Victoria. We copied them; we did not interpret them. Currency: **27 August 2026**.
- ◆ **KOR history is ours and reliable** — job counts, last-job dates and Deltek client links from our own records.
- ◆ **Firm size, revenue and founding dates are Apollo's**, current as at September 2026, and not individually confirmed. Treat them as scale indicators, not as due diligence. Revenue figures in particular are modelled.
- ◆ **Two records are explicitly flagged for verification:** Casman Group (Alberta head office against a Saanich phone number) and the eleven firms Apollo could not match, whose names come from the applicant string.
- ◆ **"Live" means an open application, not a funded project.** Applications are withdrawn, stalled and refused. Section 02's Deltek history is a much stronger signal than any single row in Addendum A.
- ◆ **Coverage is the City of Victoria and the City of Nanaimo only.** Saanich, Langford, Colwood, Esquimalt, Oak Bay, Sidney and the West Shore are separate files and are not wired. A firm's absence here means it is not filing in these two cities — not that it is inactive.
- ◆ **v2's corrections stand.** The Starlight distinction, the Knappett split, the Omicron self-perform caution and the dropped "\$103M RCMP detachment" all carry forward unchanged.
- ◆ **Where a tool and our own ledger disagree, the ledger wins.** An external tool called this market "completely greenfield — zero worked-with". It is not; it reflects that Apollo's CRM is not populated by KOR.

Built from live municipal application data and our own client ledger. Every firm, person and fact in this document is banked in the BD platform as typed org facts and person affiliations, so the next pass starts here rather than from scratch — and the four feeds behind it keep running.
