KOR STRUCTURAL · FINANCIALS

CAD vs Revit — what the books say

How much CAD we still do, and whether it makes money. Measured from Deltek, weighted by hours and dollars, not by counting folders.

As of 14 October 2026
Billings posted through October 2026
2,328 jobs with production hours

The short version

- **CAD is 23% of the firm's drafting hours this year**, down from 54% in 2019. Residential alone is 24%. The shift to Revit happened in 2020–2021 and has held since.
- **Counting jobs overstates CAD.** In residential, CAD is 63% of jobs with hours but 39% of billings. The median CAD job is $50K of fee; the median Revit job is $175K.
- **Billed to completion, residential margins are level overall**: 23% CAD against 25% Revit, fee-weighted. On the typical job Revit is ahead, 33% against 10%.
- **The level figure is the old book.** Jobs started 2019 or earlier: CAD 31%, Revit 37%. Jobs started 2020 on and billed to completion: CAD -14% on 44 jobs, Revit 13% on 39.
- **Year by year it is plainer.** Calendar 2020–2025, residential CAD jobs billed $9.4M against $11.6M of labour (-23%), below zero in 5 of 6 years; Revit billed $21.6M against $19.9M (8%), below zero in 2. In 2025: CAD -24%, Revit 8%.
- **Size, not tool, explains part of it.** In the $100K–$300K band across all cohorts CAD runs 38% at $220 billed per production hour and Revit 33% at $159; the CAD losses sit in the under-$100K band, where most recent CAD jobs are.
- **Coverage:** 1,281 of 2,328 jobs with hours carry Deltek's drafting-type tag. Untagged residential jobs billed $3.8M; nothing here can split them.

DRAFTING HOURS ON CAD JOBS

23% of CAD + Revit, 2026 to date

Firm-wide, from timesheets. It was 54% in 2019. Residential alone is 24% this year.

RESIDENTIAL BILLINGS ON CAD JOBS

39% of CAD + Revit billings

Across 540 residential jobs with hours. By job count CAD is 63%: more jobs, smaller ones.

MARGIN ON RESIDENTIAL JOBS BILLED TO COMPLETION

23% CAD · **25%** Revit

Billed minus labour cost at the rates of the time, partners at $250, 162 CAD and 89 Revit jobs billed to completion. Typical job: 10% CAD, 33% Revit.

HOW MUCH CAD WE DO — DRAFTING HOURS BY YEAR

Every drafting hour on a timesheet, grouped by the drafting type Deltek records on the job. "Other" is General plus jobs with no tag.

CAD share = CAD ÷ (CAD + Revit). Source: tkDetail labour code 20, rejected lines excluded.

YEAR BY YEAR — BILLINGS AGAINST LABOUR COST, BY DRAFTING TYPE

Calendar years. Billed = what was posted in the year on jobs carrying each tag; cost = the labour posted that year on those jobs, at the rates of the time, partners at $250. Billing and hours do not land in the same month, so read the trend, not one year alone. Billings posted before 2019 on jobs that still logged hours from 2019 on are outside the window: $7.7M on 148 CAD jobs and $5.9M on 78 Revit jobs, which weighs on the early CAD years. General and untagged are in the workbook.

838 of 1,316 residential jobs carry a drafting-type tag in Deltek. Fee and billed in CAD; US jobs at 1.36.

PROFITABILITY — RESIDENTIAL JOBS BILLED TO COMPLETION, BY THE YEAR THEY STARTED

Completed = billed at least 90% of the fee. Margin = billed minus labour cost. Cost = the payroll amount Deltek posted on each timesheet line, at the rate in effect at the time, with partner hours at the firm's imputed $250 instead of their nominal payroll figure. Cohort = year of the first timesheet.

STARTED	TYPE	JOBS	MEDIAN FEE	BILLED	MARGIN	MEDIAN JOB MARGIN	BILLED / PROD HR	COST / PROD HR	BILLED / DRAFT HR	DRAFT COST ÷ BILLED

Where every number comes from

- Deltek Vantagepoint over the same ODBC route the Financials module uses. Top-level regular projects only.
- Hours: tkDetail. Engineering = labour codes 10 and 30, Drafting = 20. Rejected lines excluded.
- Billed: PRSummaryMain, posted through October 2026. Fee: PR.Fee. US jobs converted at 1.36.
- Cost: Deltek's posted labour amounts (tkDetail RegAmt + OvtAmt + SpecialOvtAmt), the rate in effect when the hours were posted, the same figure Firm Health uses. Partner hours at the app's imputed $250/hr, which is 75% of all labour cost here. With partners at their posted payroll amount instead, completed residential margins would read 70% CAD and 63% Revit.
- Drafting type: the Deltek custom field CustDraftingType (RV, CAD, General). Sector: PR.ProjectType.
- Reproduced the app's cost and margin to the dollar on six projects before anything was written. Two independent pulls of drafting hours agree to the hour on every year and type. The Historical screen, filtered to Has Hours + Fee, shows 1,152 projects and $99.1M of fee; 1,146 of them are this report's population and the rest are 6 hourly-billed jobs with no fixed fee, which the screen counts through their hourly revenue. On the screen's fee measure (fixed fee plus hourly revenue) those 1,146 jobs are $99.0M; this report counts the fixed fee alone, $98.2M.

What this does not say

- Only 1,281 of 2,328 jobs with hours carry a drafting-type tag. The untagged line is real work that cannot be split.
- Partner hours are a third of all billable hours and carry a policy rate, not a payroll rate. It moves CAD and Revit margins by about the same amount; the workbook carries the posted-payroll figure beside it.
- A "CAD job" is the tag on the job, not every hour. A job that moved to Revit mid-way counts where Deltek put it.
- In-flight jobs are excluded from margin: cost lands before billing does. Closed jobs that never billed 90% of their fee are excluded too; including them changes no comparison by more than two points.
- Assumptions, stated so they can be challenged: US jobs at a flat 1.36, not the year's rate; margin is before subconsultants and anything not in Deltek's cost rate; 4,037 of 457,850 billable hours (1%) carry no posted amount and cost nothing here, all of them 2019–2021; "completed" means billed at least 90% of fee.
- Counting folders with a .dwg or .rvt in them counts jobs, not work. Of 31 jobs on one such sheet, Deltek tagged 18 and the sheet agreed with 15 of them; on 13 Deltek had no tag, and the folder check found CAD files on 5.
