

Your six points, and what is now open up-Island

Part one answers each point you raised — checked against Deltek, our own records, or the firm's own published material. **You were right on all six**, including one where our data had been telling us the opposite for three versions. Part two is the new project list: **every market you asked for is now reading except Duncan**, and the work there is bigger than "smaller wood-frame".

PART ONE · YOUR POINTS

Starlight — we had this wrong, and you caught it

You said David Woo works for Starlight and that invest and dev are the same or linked. **You are right. The document told you the opposite three versions running, and the cause was our own data.**

► WHAT IS ACTUALLY TRUE

- ♦ The projects we have billed that client for are **2740 Spencer Rd Langford**, 1701 Cedar Hill Rd Saanich and Quadra East and West in Victoria — urban multi-family, nothing like the retreat fund we had attached to the record.
- ♦ **Every contact we hold on that client is @starlightinvest.com**, including Daniel Drimmer, the CEO of Starlight Investments.
- ♦ Starlight Investments' own announcements name "**The District**" in Langford — that is our project at 2740 Spencer Rd.

So 350 Douglas St is being filed by our own client's VP of Development, and we described him as an unrelated party.

► HOW IT HAPPENED, AND WHY THE CORRECTION IS WORTH MORE THAN THE ERROR COST

Every firm in our system carries a website, and that website is how the system decides two records are the same company. Our Starlight client record had been given **the wrong website** — a similarly-named American retreat fund. Everything downstream then reasoned correctly from a bad premise: it compared two web addresses, saw two different companies, and told us so with confidence. Nothing errored, which is exactly why it survived three drafts.

Your flag fixed more than the line. The website is now right, the two duplicate Starlight records are merged into one with **118 contacts**, and the reasoning that produced the error is recorded against that firm so it cannot recur. **Nine other Island firms were found fragmented the same way in the same pass**. One correction fixes the instance and usually a class of them.

Sense — right, and worse than a correction

You said Sense is not our competitor yet: envelope, restoration, inspection, capital planning, lots of small jobs, on many of the same jobs as us, working existing relationships, expanding fast with money to invest. That is now what the record says.

× THEIR OWN HIRING SAYS WHERE IT GOES NEXT

Sense is recruiting a **Structural Engineering Group Lead at \$150–175k** and intermediate structural design engineers to — in their words — "*help lead the expansion of their practice into new construction*", with BC work "*focused on **mass timber and hybrid structures***".

That is not adjacent. Mass timber is the thread through every institutional project on this island.

Today a relationship threat sitting beside us on shared jobs; on a twelve-to-twenty-four month view a bid competitor in our best lane, funded, and headquartered in Victoria. The window to be the incumbent structural voice with those shared clients is now.

PART ONE • YOUR POINTS

Herold • Glotman Simpson • RJC

- ◆ **Herold was bought by Englobe in May 2025.** Separate division, structure kept — 70+ staff, Nanaimo head office plus **Victoria and Ucluelet**. The mid-Island incumbent now has a national balance sheet behind it.

But we have already taken one off them: Westmark's **Gracewood at Fairwinds, Nanoose** has been ours since December 2025, and Herold is Westmark's usual structural partner.

- ◆ **Glotman Simpson — you were right and we missed them.** Victoria office at **101-19 Dallas Road**, on their own site, and they already sit in our Deltek as CL00573. We now hold **74 contacts** there.

- ♦ **RJC fees.** Recorded as you put it and flagged as grapevine rather than fact — a pricing signal to test on the next competitive bid. It does fit the file: RJC is named as applicant on **four routine Saanich commercial permits**, which is not how a firm defending premium fees behaves.

PART ONE • YOUR POINTS

dHK and DAU — we count the wrong thing

You said we have had a good few jobs with dHK and named 31037, 31171 and 31128. The document said one. **You are right and so is the number — they count different things.**

JOB	SITE	WHO PAID US
31037	West Wave, Bagshaw, Parksville	Three Dog Ventures
31128	Rowan, 440 Island Hwy W, Parksville	Radcliffe Development
31171	611 Brunswick St, Prince George	Yellowridge Construction

dHK was the **architect** on all three; a developer paid. Our systems count **who pays us**. There is nowhere in our records that captures who else was on the team, so **every working relationship where we were not billing the architect is currently invisible** — a gap your three job numbers exposed.

Same with **DAU**: you remember one job that died, and our record shows them set up as a client with nothing billed. Both true.

► AND A NUMBER IN THE LAST DOCUMENT TO STRIKE

It claimed we have "three architect clients and seven jobs between them" and built a section on it. **That was wrong** — it counted only architects appearing in the Island permit file, then stated it as a fact about the whole practice. Across KOR the real figure is **48 architecture firms and 152 projects**, led by **NSDA Architects at 28**, JWDA at 17 and Studio One at 13.

The point survives, but only here: **on Vancouver Island our architect relationships really are thin**, and that is the opening.

PART TWO · THE NEW MARKETS

The mid-Island is not greenfield

You expected these to be mostly smaller wood-frame. On the work, largely right. On it being new ground, not — **we have 34 projects there already and eleven were opened in the last two years.**

MARKET	KOR PROJECTS	MOST RECENT
Campbell River	8	Mar 2026
Parksville	7	Jul 2026
Duncan / North Cowichan	6	Nov 2025
Qualicum Beach	5	2019
Comox	4	Jun 2026
Courtenay · Nanoose · Chemainus	4	Dec 2025

Repeat clients already there: **D Akers Property Solutions** (six, all Campbell River) · **Three Dog Ventures** (three, Parksville and Comox, most recent 22 Jul 2026) · **Zemcore** (Duncan Hub) ·

Radcliffe (Parksville) · **Ridge North America** (North Cowichan) · **Westmark** (Nanoose) · **Pennyfarthing** (Duncan) · **NSDA Architects** (Campbell River, Apr 2026).

PART TWO · THE PROJECTS

Campbell River

The most useful new file: **35 of its 36 applications name the applicant.** Only Victoria, Saanich and Parksville otherwise do.

- ♦ **WestUrban Developments — three apartment buildings, 200 units**, with a height variance from 10m to 16m. The largest single application anywhere on the mid-Island file. Campbell River-based, headcount up 14% in a year. **No relationship with us.**
 - ♦ **D Akers Property Solutions — rezoning from RM-1 to RM-2 for 27 townhouse units.** *Our own client*, six Campbell River projects, filing right now.
 - ♦ **Seymour Pacific Developments — OCP and zoning amendment at 700 Petersen Rd.** Campbell River-based, \$4.7M revenue, up 16% over two years. No relationship.
 - ♦ **Crowne Pacific Development — a six-unit commercial and light-industrial building** at 1979 Airport Dr, plus a streamside permit. Founded 2006, Campbell River.
 - ♦ **Ian Moxon Architect — two applications**, a two-storey mixed-use with five apartments, form and character plus a setback variance.
 - ♦ **Storey Creek Golf and Recreation Society — a new 3,200 sq ft restaurant.** An owner buying design directly.
 - ♦ **Bakerview Building Design — 11 townhome units** · **IGV Housing — a fourplex and a fiveplex, 9 units** · **Parkway Properties — rezoning 351 Arizona Dr** · **McElhanney — a two-storey office complex and industrial site works.**
-

PART TWO · THE PROJECTS

Parksville, Comox, Qualicum, Courtenay

Parksville — 49 of 53 name the applicant

- ♦ **Radcliffe Development Corporation** — a re-issued DP for a **79-unit condominium complex at 440 Island Hwy W**. That is *our own project 31128*, live and moving. One job billed against a 79-unit building.
- ♦ **Northland Developments Ltd.** — **rezoning 353 Moilliet St S** from RS-1 to RS-3 with an OCP amendment. The newest application on the file. **⚠ Not one of our Northland clients** — we hold six Northland companies and this is none of them, and there is no record of it in any commercial database. Worth finding out who they are before anyone assumes a connection.
- ♦ **Studio PA** — **rezoning 292 & 302 Moilliet St S** from single-family to RHD-4, with an OCP amendment.
- ♦ **Parksville Lions Housing Society with Daryoush Firouzli Architecture** — **a 36-unit non-market apartment building** at 1225 Franklin's Gull Rd.
- ♦ **Common Ground Consulting** — two at 1209 Island Highway East: a new commercial building at the Heritage Mall, and a height variance on Building C.
- ♦ **Continuum Architecture** — 1020 Herring Gull Way, four single-storey storage buildings. The Victoria practice from the last document, working up-Island.
- ♦ **Primex Investments** — a nine-project KOR client, also on this file · **Momentum Design Build** · **Timberlake-Jones Engineering** · **Ecocraft Construction**.

Comox — small file, large projects

- ♦ **Over 300 apartment and townhouse units** on one development permit at 941 Aspen Rd — form and character.
- ♦ **A rezoning and development permit for three new apartment buildings containing 223 dwelling units.**
- ♦ **A six-storey apartment with 44 units.**

- ◆ Plus a phased strata at 875 Grumman and a zoning amendment at 721 Lazo Rd for a subdivision with parkland dedication.

Qualicum Beach — no applicant names, but real scope

- ◆ **Three multi-residential buildings, 66 apartment units.**
- ◆ **A 10,405 m² care facility** at 37% lot coverage — zoning and OCP amendments already in hand.
- ◆ A rezoning to allow a health-care facility, and a multi-family building in the Uptown Commercial DPA.

Courtenay — volume, not size

410 applications with dates, 124 beyond single-lot housing, 55 commercial or industrial — but almost all are **alterations and tenant improvements** rather than new buildings. One new commercial build at 877 Cliffe Ave. Useful for tracking who is active, weaker as a project list.

PART TWO · ACT ON THESE

Who to call, with names

We pulled rosters on the firms behind these projects this week — **326 new contacts** across thirteen firms.

FIRM	WHY NOW	WHO
D Akers Property Solutions our client · 6 projects	Filing a 27-unit townhouse rezoning in Campbell River now	Glenn Blake , Director of Development · glenn@akerspropertysolutions.ca Dan Akers , Owner · dan@ Terry Perkins , Director of Construction

► THE PATTERN WORTH NOTICING

Four of those six are people we already have a relationship with and were not treating as live. The Island opportunity is at least as much about **what we already have and cannot see** as it is about new names — which is what your six corrections just demonstrated.

What each market publishes

Seven new sources are live, taking the Island file to **2,999 applications, 1,581 of them filed in the last twelve months**. The columns matter: they decide how each market can be worked.

MARKET	APPS	NAMES APPLICANT	DATED
Courtenay	410	No	Yes
Qualicum Beach	112	No	Yes
Parksville	53	Yes — 49 of 53	Yes
Campbell River	36	Yes — 35 of 36	No
Comox — building	31	No	No
Comox — planning	12	No	No
Regional District of Nanaimo	10	No	Yes
Duncan / North Cowichan	No machine-readable route		

- ♦ **Parksville and Qualicum were both written off on the first pass and both do publish.** Qualicum runs its own mapping server, so the tracker sits behind it rather than in the catalogue everyone searches. Parksville publishes a quarterly PDF and no feed at all — which is why it was missed and, as it turns out, why it is the best source up-Island.
- ♦ **The Regional District of Nanaimo** is the only route into the unincorporated areas — Nanoose, Errington, Coombs, Bowser — that no municipal file reaches.
- ♦ **Duncan and North Cowichan** genuinely publish nothing readable. They run an applications database that exposes nothing we can get at. Given we already have six projects there including the Duncan Hub with Zemcore, the relationship is the faster route than the paperwork.

Every correction here has been written back into our systems, so the next version starts from the corrected position rather than repeating it.
