

Perkins&Will

What we have actually done with them, who is actually in the Vancouver studio today, and what the firm is chasing in its other 31. **Every project number here is billed work, not a proposal**, and every name has been checked against Perkins&Will's own site this morning.

THE RELATIONSHIP

What we have actually done together

Ten project records name Perkins&Will. **Seven were billed, for \$536,544** — and four of those seven are 98% of the money.

PROJECT	DEVELOPER	FEE	BILLED
River District Parcel 16.2	Wesgroup	\$235,000	\$236,125
600 Robson St	Bonnis Properties	\$140,000	\$120,460
900 Granville St	Bonnis Properties	\$92,500	\$91,770
5696 Alberta St	Nicola Wealth	\$90,000	\$76,146
Harry Jerome Phase 1 — Bldg M4	Darwin Properties	\$97,000	\$9,840

PROJECT	DEVELOPER	FEE	BILLED
357–475 West 41st Ave	Coromandel	\$142,000	\$1,700
Harry Jerome Phase 1 — signage	Darwin Properties	\$500	\$500

Lead with River District, 600 Robson and 900 Granville. Those are complete, substantial jobs where we carried the structure and they carried the design. Two Bonnis projects back to back says the pairing worked.

► HARRY JEROME IS A QUESTION, NOT A CREDENTIAL

Phases 2 and 3 for Darwin Properties carry **\$430,000 of signed contract between them and have billed nothing at all** — no invoices, no time charged. Phase 1 billed \$9,840 against a \$97,000 fee, about a tenth.

So do **not** say "we did Harry Jerome". **Ask** what happened to it. Either it stalled, or it is still ahead of us — and either answer is worth the conversation. It is the single largest piece of unstarted work we hold with them.

× TWO THINGS NOT TO SAY

They have never been our paying client. All seven billed jobs were invoiced to the *developer*. The one record under Perkins&Will's own account — ICBC Head Office, North Vancouver — has no fee, no time and no invoice against it. The line is "*we've worked alongside you*", never "*you've been our client*".

It has been a while. Every one of these was opened in 2018–19. If asked what we have done together lately, the honest answer is nothing since.

The Vancouver studio today

Taken from Perkins&Will's own studio page this morning, because our own records were a decade out of date on the top job.

NAME	ROLE
Derek Newby	Managing Director — Vancouver and Calgary, and Regional Managing Director for Canada
Peter Busby	Principal — the founder-level sustainability name
Jana Foit	Operations Director
Adrian Watson	Design Director
Ryan Bragg	Corporate and Commercial
Shauna Bryce	Cultural and Civic
Jeff Doble	Transportation
Kerri Henderson	Advisory Services
Jason LeBlanc	Urban Design
Max Richter	Sports, Recreation and Entertainment
Rufina Wu	Interior Design Director
Kathy Wardle	Regional Director of Regenerative Design
Alex Minard	Principal; Technical Director, Vancouver and Calgary

Studio: **1075 West Georgia St, Suite 2200** · +1 604 684 5446. Stated strengths are higher education, cultural and civic, transportation and commercial.

× THREE NAMES IN OUR SYSTEM YOU SHOULD NOT USE AS TITLED

Our records still show **Susan Gushe** and **David Dove** as "Managing Director, Vancouver". **They are not** — Derek Newby is, and has been for some time. Susan Gushe held it after Peter Busby moved to San Francisco, and that was 2012. **Jim Huffman** is likewise carried at an old title.

All three may well still be at the firm; none appears on the current studio leadership page. Greet them by name, not by title.

Shauna Bryce, Jeff Doble and Kerri Henderson are new to us entirely — cultural and civic, transportation, and advisory. Worth collecting tonight.

THE OPENING

The mass timber opening — and who holds that seat

This is the most useful thing on the page, and it points at exactly what KOR does.

In **February 2026** Perkins&Will published a study proposing a **prefabricated modular mass-timber system for Canadian housing**, backed by **\$250,000** of co-investment from DIGITAL's Housing Growth Innovation programme.

× THE STRUCTURAL SEAT WENT TO A COMPETITOR

The named partners are **ASPECT Structural Engineers**, Introba, and SFU's School of Interactive Arts & Technology. A funded Canadian mass-timber housing programme, with someone else in the structural chair.

It is not a side interest for them. When **Derek Newby was elevated to the RAIC College of Fellows on 27 May 2026**, the citation was for "*advancing lower-carbon construction, mass timber innovation, and climate leadership*". He is quoted on the housing study itself — "*We can do much better. We can start today.*" — alongside Kathy Wardle. They are also designing **BCIT's zero-carbon tall timber student housing**, announced in January.

The question to ask: who carries structure on the timber work. Two of the three people quoted on that study are people we already have contacts for, and Peter Busby — still a Principal in the Vancouver studio — is the name most associated with tall wood in this city.

STRATEGY

Where the firm is betting, outside BC

Three moves in the last twelve months, all from their own announcements.

- ♦ **A global retail practice, built from nothing.** In January they hired **five principals at once**, all out of the same Amsterdam design and engineering firm: Matt Billerbeck in Seattle as Practice Leader, Sophie Bramall in Dallas, Erich Dohrer in Chicago, Sarah Holstedt in Seattle, James Mellor in San Diego. CEO Phil Harrison's words: "*to build the most sought-after retail practice in the world.*" Their stated territory is shopping-centre repositioning, stadium neighbourhoods, airports, transit-oriented development.
- ♦ **Science and technology, pivoting to applied science.** In December they made **Jeff Zynda** firmwide Science & Technology Practice Leader, explicitly for "*robotics and automation, energy systems and storage, artificial intelligence, quantum computing, and machine learning*" — working across all **32 studios**.
- ♦ **They bought into New York.** Merged with **A+I (Architecture Plus Information)**, effective September 2025.

Underneath that, a steady leadership build-out: a firmwide **Director of Research and Development** hired in April from running an MIT accelerator; a new **Chief Marketing Officer**; and new managing directors in **Boston, Miami, Seattle**, and **Toronto and Ottawa**. CEO Phil Harrison has held the job since 2006, from Atlanta.

► READ IT THIS WAY

Retail, applied science and a New York acquisition are all **sector and geography expansion, not core-market defence**. A firm doing that is hiring capacity and looking for consultants who can move with it. The Canadian leadership sits with Derek Newby, in Vancouver — which is the door we already stand closest to.

THE WORK

What they are building

Canada, outside BC

- ♦ **University of Calgary — Interdisciplinary Science and Innovation Centre**, transforming the east campus gateway. Our own awards data shows they took the architectural services contract for it. Ask where it has got to.
- ♦ **Toronto Metropolitan University — Daphne Cockwell Health Sciences Complex**, a **28-storey** health education tower they hold up as their model for dense urban campus design.
- ♦ Their **Calgary studio** now sits in the historic Glenbow building at 822 11th Ave SW, in the Beltline — deliberately public-facing, pitched on adaptive reuse.

United States

- ♦ **University of Louisville — Health Sciences Center** with Champlin | EOP: public health, medicine, dentistry and nursing in one building.
- ♦ **University of Houston — RAD Center**, 2026 AIA Design Excellence Award for Education Facilities.
- ♦ **LSU Health Shreveport — Emerging Viral Threats Lab**, 2026 Lab Design Excellence Award.
- ♦ **UVA Health** emergency department expansion, recognised by IIDA.

- ◆ A **mall-to-college-campus conversion** honoured by ULI Americas in July — the adaptive-reuse story they are telling hardest.

International

- ◆ A **science and technology museum in Suzhou, China**, unveiled in March.
- ◆ **Triple winner at the 2026 RIBA International Awards**; their **London studio was Studio of the Year** at Clerkenwell Design Week; and **two AIA National Awards** in June.

PEOPLE

Contacts outside BC

We hold **35 people** at Perkins&Will. These are the ones outside British Columbia.

NAME	ROLE	STUDIO
Cecily Eckhardt	Principal & Managing Director, Ontario	Toronto
Safdar Abidi	Principal, Higher Education	Toronto
Kaz Bremner	Senior Associate, Studio Co-Lead	Calgary
Marc Haberli	Associate, Studio Co-Leader	Calgary
Trevor Abramson	Managing Director, Southern California	San Diego + LA
Kay Kornovich	Managing Principal — science & technology	San Diego
Ryan Bussard	Design Principal	San Diego
Marco Marraccini	Design Director	Southern California
Michael Williams	Operations Director	Southern California
Gabrielle Bullock	Principal, Chief Diversity Officer	Los Angeles

NAME	ROLE	STUDIO
Peter Pfau	Design Principal	San Francisco
Matt Covall	Senior Project Manager	San Francisco
Brad Hinthorne	Managing Principal	Firmwide
William Schmalz	Principal	Firmwide

All carry a `firstname.lastname@perkinswill.com` address in the BD platform. ⚠ These titles come from our own enrichment, refreshed June–July 2026, and have **not** been re-checked against the firm's site the way the Vancouver list above has — so treat them as a guide to who to ask for, not as titles to use out loud.

PROVENANCE

What is verified, and what is not

- ♦ **Verified this morning against Perkins&Will's own site:** the Vancouver studio leadership list, the studio address and phone, Peter Busby's current title, and Derek Newby's RAIC College of Fellows elevation on 27 May 2026 with its exact citation.
- ♦ **From our own project and billing records, and reliable:** the seven billed jobs, their fees and billed amounts, the \$430,000 of unstarted Harry Jerome contract, and that no work has ever been billed under Perkins&Will's own account. Only one Perkins entity exists in our Deltek — there is no chance of confusion with Perkins Eastman in these figures.
- ♦ **From Perkins&Will's published news, December 2025 to September 2026:** everything in sections 04 and 05, and the mass-timber study. That is their own framing of themselves — which is the right register for an event, but it is not independent.
- ♦ ⚠ **Not verified:** the out-of-BC contact titles in section 06; the current status of the University of Calgary project; and the firm's ownership, which is **not** in this document — if it comes up, do not assert it.

- ◆ ⚠ **The firm publishes no headcount.** "32 studios" is from their own release and is safe. A staff number is not.
 - ◆ ⚡ **Perkins Eastman is a different firm.** We hold both. Do not blend them in conversation.
-

KOR Structural — Confidential / Internal · Prepared for Omar Alcazar · 10 September 2026

Project figures are billed work only, tested the same way as the Vancouver Island file: a project record is not a job unless money or time moved against it.
