

Who's who: Greater Victoria & Nanaimo

v2 was researched. v3 was measured in two cities. **v4 reads five Island municipalities' own application files** — Victoria, Saanich, Langford, Colwood and Nanaimo — **2,335 applications**, and for the first time it can see two things v3 could not: **what the work is worth**, and **which competitor is already holding the structural seat**. Prepared for Rory Beirne, Principal, Vancouver Island.

START HERE

What v4 adds — and the one finding that matters most

v3 read Victoria and Nanaimo. v4 reads **Saanich, Langford and Colwood as well** — the three municipalities that, with Victoria, account for most of Greater Victoria's housing starts. That took the file from the 997 Victoria and Nanaimo applications v3 could see to **2,335**, of which **1,626 are BD-relevant** once single-lot house permits are set aside, and **837 were filed in the last twelve months**.

► THE FINDING

Saanich publishes the applicant's firm name — and our two closest competitors are in it. RJC Engineers is named as the applicant on **four Saanich commercial permits**.

Sense Engineering — a Victoria-headquartered structural firm with 130 staff that v2 missed entirely — is on another. So are WSP, Stantec, Arcadis, Herold, EVOKE, LIA and McCuaig.

This is the first time we have been able to see, from a public record rather than from inference, **who is sitting in the engineering seat on a specific Island building**. It is also a warning: RJC and Sense are not visiting the Island, they are filing in it.

Four things are new and none of them existed in v3:

- ♦ **A price on the work.** Langford publishes a construction valuation with every permit. **293 priced applications totalling \$326,163,279**, including eight at \$10M or more. No other Island city publishes this, and it is the first hard dollar figure this programme has produced.
- ♦ **Competitors visible as applicants** — the section immediately below. Saanich's file names the professional who filed, not just the owner.
- ♦ **Saanich is the largest single file on the Island** — 960 applications, more than Victoria, Langford and Colwood put together, and current to today.
- ♦ **Depth on the firms.** 75 firms from the permit file are now decomposed in the BD platform with **1,821 named people** attached — 479 across 26 architecture practices, 271 across the three competitor firms, 425 inside eight existing KOR clients.

× A V3 CLAIM THIS SUPERSEDES

v3 said dHKarchitects was "*our one architect client*." With Saanich and Colwood added, the ledger shows **three: Mallen Gowing Berzins** (CL00257, six KOR projects, last August 2025), **dHKarchitects** (one job, July 2025) and **D'Ambrosio / DAU Studio** (in Deltek, no job yet). The correction runs in our favour.

COMPETITIVE · NEW IN V4

Caught in the act: competitors filing as the applicant

Saanich requires the applicant of record on a commercial permit, and publishes it. Where the applicant is an engineering firm, that firm is the professional of record on the building. This is the closest thing to a scoreboard this market produces.

- ♦ **RJC Engineers — 4 applications, Feb to Jul 2025. Our most direct competitor.** 770 staff, 311 of them engineers, employee-owned, founded 1948, with a Nanaimo office. Their own published capability list leads with structural, **seismic**, structural restoration, **heritage restoration** and **mass timber** — that is KOR's list, in KOR's order.
- ♦ **Sense Engineering — 1 application, Apr 2025. A second direct structural competitor, headquartered in Victoria, and absent from v2 entirely.** Founded 2014 by Brennan Vollering and Ted Denniston. 130 staff, headcount up 29% over 24 months. Structural, envelope, restoration, seismic assessment, capital planning. Ten offices, Victoria listed first.
- ♦ **Herold Engineering — 1 application, Dec 2025.** Nanaimo civil and structural, the recurring structural partner on Westmark projects — and now filing in Saanich as well.
- ♦ **McCuaig & Associates — 1 application, Sep 2022.** Building science, concrete restoration and **heritage restoration**. 42 staff, +39% over 24 months. Overlaps our heritage lane rather than our new-build one.
- ♦ **EVOKE Buildings Engineering — 1 application, May 2025.** Envelope and building science, employee-owned, founded 2020. Adjacent to us rather than head-on — but in the room early, which is the position we want.

- ◆ **WSP Canada (Apr 2025) and Stantec (Dec 2024)** — 1 application each. National multi-disciplinaries: present on the Island, not resident on it. Stantec has also teamed with Studio 531 on a transportation terminal.
- ◆ **Arcadis Architects Canada — 1 application, Jun 2025.** Filed as the *architect*, not the engineer — worth noting because it means the engineering seat on 2410 Lee Ave was open, and RJC took it three weeks earlier.
- ◆ **LIA Engineering — 1 application, Mar 2025.** Small local practice, no Apollo record; named from the city's own file.

► HOW TO READ THIS TABLE

Nine engineering firms filed a Saanich commercial permit in the window we can see; **KOR filed none**. That is not evidence we are losing work we bid — it is evidence of who is embedded with the Saanich commercial owner base. The four RJC rows are the ones to take seriously: 104-81 Gorge Rd W, 2410 Lee Ave, 2971 Qu'Appelle St and 4461 Interurban Rd.

THE DOOR LIST

Where we already have a door

Ranked by our own ledger, not by prominence. Every row is a firm named in an Island application file *and* carrying a Deltek client record or KOR project history.

FIRM	KOR HISTORY	DELTEK	PEOPLE HELD
Northland Properties	369 projects · last 26 Aug 2026	CL00299	116
Reliance Properties	82 projects · last 19 Jan 2026	CL00356	—
Intracorp Projects	46 projects · last 25 Jun 2026	CL00205	61
Townline	36 projects · last 5 Feb 2026	7A3C11F3	67

FIRM	KOR HISTORY	DELTEK	PEOPLE HELD
Primex Investments	9 projects · last 25 Jul 2025	CL00337	—
Mallen Gowing Berzins architect	6 projects · last 7 Aug 2025	CL00257	46
Aragon Properties	5 projects · last 29 Nov 2021	CL00015	—
Sakura Developments	3 projects · last 24 Nov 2024	42B07C0E	—
Greystar Development West	2 projects · last 24 Feb 2026	25F5A4E6	104
GWL Realty Advisors	2 projects · last 11 Oct 2023	CL00167	—
dHKarchitects architect	1 project · last 31 Jul 2025	D5BE2C6A	—
M'Akola Development Services	1 project · last 20 Oct 2025	ce787f97	—
D'Ambrosio / DAU Studio architect	In Deltek, no job yet	f147c32b	41
SHAPE Properties	In Deltek, no job yet	B74CEF4B	—
Ledcor Construction	In Deltek, no job yet	CL00238	112

The three at the bottom are the sharpest opportunity on this page. D'Ambrosio, SHAPE and Ledcor are all set up as clients, all filing on the Island, and all have never been billed. There is no introduction to make and no credentials to establish — only a call.

× CARRIED FORWARD FROM V2 AND V3 — STILL TRUE

Starlight. David Woo is filing the six-storey heritage-retention building at 350 Douglas St for **Starlight Investments**, the Toronto REIT behind Harris Green — **not** our client Starlight Development, the luxury-retreat fund. Same first word, unrelated firms. We now hold 101 people at the REIT, which makes the distinction more important, not less.

The money: Langford prices its permits

Every previous version of this document could say what was proposed and where, but never what it was worth. Langford publishes a construction valuation on each building permit. **293 of its 349 applications carry a price, totalling \$326,163,279.**

VALUE BAND	APPLICATIONS	TOTAL VALUE
\$10M and over	8	\$141,532,034
\$2M – \$10M	5	\$17,954,453
\$500k – \$2M	147	\$155,663,595
Under \$500k	133	\$11,013,197
Total priced	293	\$326,163,279

All eight of the \$10M-and-over permits, newest first:

- ♦ **\$10,000,000 — 3014 Glen Lake Rd**, filed 3 Mar 2026. **The only \$10M-plus permit filed in 2026**, and the freshest large job on the file.
- ♦ **\$20,480,616 — 2350 City Gate Blvd** (3 Jun 2025) and **\$23,019,014 — 2360 City Gate Blvd** (2 Jun 2025). **Two adjacent permits worth \$43.5M, filed one day apart** — one owner, one site, almost certainly one structural engagement.
- ♦ **\$26,832,404 — 837 Hockley Ave** (1 May 2025) and **\$12,200,000 — 814 Hockley Ave** (4 Mar 2025). Same street, \$39.0M combined. 837 Hockley is the largest single permit on the Langford file.
- ♦ **\$22,000,000 — 2868 Rita Rd**, 28 Apr 2025.
- ♦ **\$10,000,000 — 2995 Sooke Lake Rd**, 6 Mar 2025.
- ♦ **\$17,000,000 — 830 Goldstream Ave**, 20 Jan 2025.

Below them, the \$2M–\$10M band is thin — five applications — while **147 permits sit between \$500k and \$2M and account for \$155.7M, more than the eight largest combined.** Langford's volume is in the mid-market, not the towers.

× THE HONEST LIMIT ON THIS SECTION

Langford publishes the price but not the applicant. All 349 Langford rows have an empty applicant field — the city's feed carries no name, agent or contact. So this section tells you *what* and *how much*, and never *who*. Closing that needs the same route as Nanaimo: the council and committee agendas, which name the applicant on rezonings and development permits.

Valuation is the owner's declared construction cost for permit-fee purposes, not a contract value and not a fee base. Use it to rank, not to quote.

THE THREAD

The thread: timber, seismic, and existing buildings

v2 and v3 both identified mass timber as the Island's institutional pattern. That still holds — **both flagship post-secondary projects on the Island are timber**: VIU Nanaimo's 266-bed 10-storey hybrid CLT (opens summer 2027) and Camosun Lansdowne's 423-bed six-storey mass-timber build, \$154.7M, LEED Platinum, ready early 2029.

What v4 adds is that **the competition has organised around the same three words we would use**. RJC's published capability list leads with structural, seismic, structural restoration, heritage restoration and mass timber. Sense Engineering's leads with structural, envelope, restoration and seismic assessment. McCuaig's leads with heritage restoration and existing-building assessment. Three of the four engineering firms filing on the Island are selling *seismic work on existing buildings*, which is the same market the Victoria General Hospital energy centre and the Island's heritage stock create.

On the design side the pattern is unchanged and corroborated: **Low Hammond Rowe** (Saanich, 23 staff, Passive House and hybrid mass timber, headcount **+58% over 24 months**), **Cascadia** and **Fold** as Passive House practices, **Studio 531** at +75%, **dHKarchitects** at +62%.

The Island's design bench is being rebuilt around performance and timber, and the firms doing it are growing fast enough to need consultants they have not used before.

DISCIPLINE

Architects

Ordered by **measured activity across all five city files**, with spelling variants folded.

"Apps" is the number of applications the firm is named on.

- ♦ **NES Architecture — 7 apps, the most of any architect on the Island file, and named in neither v2 nor v3.** Filing Saanich commercial permits at 205-3749 Shelbourne St, 3169 Tillicum Rd and 3293 Douglas St, most recently 2 Sep 2026. No Apollo record and no KOR relationship — the largest single gap between measured activity and what we know about a firm on this page.
- ♦ **D'Ambrosio Architecture + Urbanism (DAU Studio)** — Victoria, 14 staff. 4 live Victoria applications, plus Saanich. **In Deltek with no job yet.** Erica Sangster and Michael Barros both file. We hold 41 people here.
- ♦ **Alan Lowe Architect** — 4 apps across three spellings, most recently the **5166 Cordova Bay Rd rezoning, 26 Aug 2026.** Alan Lowe is a former Mayor of Victoria and a practising architect — design authority and civic reach in one person.
- ♦ **Cascadia Architects** — Victoria, 15 staff, founded 2012. 3 live Victoria applications. **Passive House specialists**, including large affordable housing. Gregory Damant is the named filer. We hold 44 people.
- ♦ **CHA — Colin Harper Architect** — Victoria, 2 staff, founded 2020. 3 apps, filing at the rate of a much larger practice. Adaptive reuse — converted the historic Powerhouse Building into Ecologyst's HQ.
- ♦ **Continuum Architecture** — Victoria, 519 Pandora Ave, 13 staff. 3 apps including the **1514 Cedar Hill Cross Rd rezoning and development permit filed the same day, 9 Jul 2026.** **Victoria's oldest practice, founded 1910** (rebranded from KPL James in 2020). Healthcare, seniors care, advanced education, industrial. LEED Platinum, certified living-wage employer.

- ♦ **dHKarchitects (de Hoog & Kierulf)** — Victoria and Nanaimo, 14 staff, founded 2001. 3 apps. **A KOR client** (1 job, Jul 2025) and growing at **+62% over 24 months**. Their own positioning is Vancouver Island logistics and complex municipal codes — multi-family, affordable, seniors and complex care, institutional, marina.
- ♦ **DYS Architecture** — 3 apps to Jul 2025.
- ♦ **Karen Hillel Architect / Hillel Architecture** — 3 apps across three spellings, incl. the 3318 Oak St commercial permit. Small Victoria practice, no Apollo record.
- ♦ **MJM Architect Inc.** — Victoria, 531 Yates St. 2 apps, and arguably the best single fit on this page: the firm leads its capabilities with **seismic upgrades**, adaptive re-use and heritage. Principal Michael Moody files across two cities.
- ♦ **Low Hammond Rowe Architects** — Saanich, 300-1590 Cedar Hill Cross Rd, 23 staff, founded 1985. 2 apps. Partners Jackson Low, Paul Hammond, Christopher Rowe. **Passive House, hybrid mass timber**, university buildings, libraries, non-market multi-family, seniors housing and care. **+58% over 24 months**. v2 called this the closest fit to KOR's strengths from research alone; the permit file confirms it.
- ♦ **hcma architecture + design** — 210 staff, Vancouver with a **Victoria studio**, Certified B Corp. 2 apps incl. **1705 Lansdowne Rd, filed 10 Aug 2026** — a Saanich development permit on the Camosun Lansdowne doorstep. *Contested*: hcma is the VIU 266-bed CLT architect and Fast + Epp holds that structural seat. We hold 82 people here.
- ♦ **Wiser Projects** — Victoria, 415 Dunedin St. 2 apps. Registered planners, not architects, which is exactly why they matter: the **gatekeeper to Indigenous and non-market housing**, working with Indigenous governments, non-profits, CMHC and BC Housing. Kaeley Wiseman is filing the three-tower rezoning at 829–899 Fort St.
- ♦ **Christine Lintott Architects** — Victoria, 12 staff, founded 2009. 2 apps. Regenerative and ecological design, LEED, BIM.
- ♦ **Studio 531 Architects** — Victoria, 531 Herald St, founded 2012 by Tom Moore and Jesse Garlick. **Mass timber**, institutional, healthcare, heritage. Works with the CRD; teamed with Stantec. **Headcount up 75% in twelve months**.
- ♦ **Fold Architects** — Victoria, 738 Fort St. Passive House certified, net-zero, First Nations housing. Melanie Wilson filing a 12-unit strata development.

- ◆ **ABBARCH, Number TEN, Franci, OEM, Merrick, Urban West, Etta, Ziegler, One Seed, Brian Morris, James Kerr, Finlayson Bonet, Kilo, Barefoot Planning** — one application each across the five files. Franci's is a **4088/4094 Lochside Dr development permit filed 14 Aug 2026**; OEM's is 981 Kentwood Terr, 28 Jul 2026. Number TEN is an 83-staff Winnipeg practice; we hold 63 people there.

► THE APPROVALS GATEKEEPERS – NOT ARCHITECTS, BUT THEY DECIDE WHO IS IN THE ROOM

CitySpaces Consulting (Vancouver and Victoria, 29 staff, founded 1985) — 4 apps. Forty years of community planning; wrote View Royal's Official Community Plan. Affordable housing, Indigenous planning, feasibility.

Westplan Consulting Group (Victoria, founded 2022) — 3 apps. Mark Holland RPP FCIP and Teunesha Evertse RPP MCIP, 40 years combined. Development approvals, OCP and zoning amendments, reconciliation lands. Two people, and they sit at the gate.

Strongitharm Consulting — 7 apps across three spellings, the busiest planning consultant in Saanich. **JRTW Planning Services** — 2 apps. Neither has an Apollo record.

DISCIPLINE

Developers and owners

- ◆ **Islandview Group** — Victoria. **4 live Victoria applications; Niall Paltiel now files in two cities.** Absent from v2. Filing a two- and four-storey vehicle sales, service, cafe and office centre at 202 Harbour Rd. **No Deltek relationship — still the coldest high-value target on the page.**
- ◆ **Aryze Developments** — Victoria, 398 Harbour Rd. 4 live applications. 54 staff, Certified B Corp, +27% in twelve months and +53% in twenty-four. Kieran Lynch and Dan Kwak file. Telus Ocean, The Abbey. We hold 43 people.
- ◆ **Gillespie Land Management** — **6 apps, second-busiest applicant in Saanich**, incl. 4551 Viewmont Ave and 540 Linnet Lane on the same day, 20 Jul 2026. New in v4.

- ◆ **Amica Senior Lifestyles** — owned by the **Ontario Teachers' Pension Plan**, 1,700 staff, 34 luxury seniors residences. Filing *Amica on the Gorge* in Saanich. **Seniors housing and care is a KOR lane and this is a pension-backed institutional owner buying design directly.** We hold 102 people. No relationship. This is the strongest new owner target in v4.
- ◆ **Abstract Developments** — filed a development permit amendment at **3839 Quadra St on 31 Aug 2026**, the newest Saanich development application on the file. v2 named the firm; v4 can now see it filing.
- ◆ **Island View Land Management** — Brentwood Bay. 3 apps incl. the **4410 West Saanich Rd rezoning, 13 Jul 2026.**
- ◆ **Bayview Place** — Victoria, 80 Saghalie Rd. The **Roundhouse at Bayview Place** master plan in Victoria West, one of the largest multi-phase plans in the city. Peter de Hoog files.
- ◆ **M'Akola Development Services** — Island-wide, a KOR client, 3 apps including a **22-storey residential with ground-floor commercial at 3075 Douglas St.** Indigenous-led affordable housing. Holly Pridie and Bronwyn McLean file.
- ◆ **Kors Development Services** — 3 apps across two cities, incl. 738 Miller Ave, 6 Jul 2026.
- ◆ **Aragon Properties** — a KOR client (5 projects, last 2021) filing as *Aragon (Cordova Bay) Properties* on 3 Saanich applications. **A dormant client active on the file — a call with a reason attached.**
- ◆ **SHAPE** — 210 staff, in Deltek with no job, filing the 3440 Saanich Rd commercial permit.
- ◆ **Maxcellent Group, Enclave Developments, BAMM Developments, Rajpur Developments, Kang Corp, Gur Kirpa Development, Woodsmere Holdings** — 3 to 5 applications each, all Saanich, none with a KOR relationship. The mid-tier residential developer bench.
- ◆ **Institutional owners filing their own work** — **Capital Regional District** (950 staff), **Habitat for Humanity Victoria** (Langford), **Glenlyon Norfolk School** (66 people held), the **BC Muslim Association**, the **Anglican Diocese of BC**, and **Chabad of Vancouver Island**. These are owners, not developers — they buy design directly, and none has a KOR relationship.

Carried from v2, not currently on any of the five files: Petroglyph Development Group (still the best cold target in Nanaimo — te'tuxwtun, 102.7 acres, approved 9 May 2026) · Chard

DISCIPLINE

General contractors

- ♦ **Patriot Homes** — **12 applications, the single most active applicant on the entire Island file**, most recently 18 Jul 2026. Absent from v2 and v3. Residential volume builder; no Apollo record and no KOR relationship.
- ♦ **White Wolf Homes** — **9 applications**, most recently 27 Aug 2026. Also new.
- ♦ **Seba Construction** — Victoria. 4 applications to Dec 2025.
- ♦ **GT Mann Contracting** — 4 applications. **Logic Homes, Pentagon Homes, Mac Reno Design Build, Impact Home Design, Modern Home Design, Tyko Design, KnotInABox Design** — 3 to 5 each. This is Saanich's residential builder-designer tier: high volume, low value per job, but they file constantly and they all need a structural stamp.
- ♦ **Mike Geric Construction** — Saanich, 4520 W Saanich Rd. Family-owned since 1968, ~\$42.1M revenue, **1,500+ homes built in Greater Victoria**. Both builder and developer.
- ♦ **Ledcor Construction** — a Deltek client with no job yet, filing in Victoria. Second-largest multi-disciplinary contractor in Canada; we hold 112 people.
- ♦ **Città Group** (design-build, heritage restoration and conversions, founded 1985) · **Hutchinson Contracting** (heritage restoration, **structural repairs**, second-storey additions) · **Blend Projects** (design-build, prefabricated and modular, founded 2018) · **Rob Sharples Contracting** · **HHS Drilling and Blasting** (3 apps — worth knowing on any rock-cut site) · **Hausen Projects** (Victoria, founded 2022).
- ♦ **Casman Group** — 1 application. *Flagged for verification*: our match resolves to Casman Group of Fort McMurray, but the contact phone is a 250 number. Confirm which entity before an approach.

Carried from v2: Knappett Projects (engineer-led — their PMs are engineers or EITs, which should shape how a structural pitch sounds) · Knappett Industries (Nanaimo, separate company

— do not merge) · Westmark Construction (KOR client, but Herold is the structural incumbent) · Farmer · Durwest · Ralmax · Kinetic · Campbell · Windley · Hazelwood · Verity · Brenric · CMF · Tectonica · Island Heights.

WHERE THE MONEY IS

The institutional pipeline

Public-sector programmes, not permit-file entries. Unchanged from v2 and v3 except where noted.

- ♦ **Nanaimo Regional General Hospital** — concept planning for a new patient tower plus cardiac and acute expansion, and a new Nanaimo Cancer Centre. Concept plan due summer 2027, so **consultant selection is ahead of us, not behind**. *New in v4*: the Nanaimo file shows permits already being filed at 1200 Dufferin Crescent under the NRGH address.
- ♦ **Victoria General Hospital energy centre** — \$75.6M (Island Health \$52.9M, Capital Regional Hospital District \$22.7M), building summer 2026 to 2029. Island Health frames it as resilience against power outages, earthquakes and flooding — **a seismic brief in all but name**.
- ♦ **Camosun Lansdowne** — 423 beds, six storeys, mass timber, LEED Platinum, \$154.7M, ready early 2029. *New in v4*: hcma filed a development permit at 1705 Lansdowne Rd on 10 Aug 2026.
- ♦ **VIU Nanaimo** — 266 beds, 10 storeys, hybrid CLT, summer 2027. hcma architect, **Fast + Epp structural**.
- ♦ **te'tuxwtun, Nanaimo** — 102.7 acres, Snuneymuxw-led via Petroglyph, approved 9 May 2026. The largest single land play in the Nanaimo market.
- ♦ **BC Housing, Nanaimo** — 564 Fifth Street with M'akola (34 replacement homes plus ~165 new, construction 2028) and 250 Terminal Avenue. *New in v4*: 1850 Boxwood Rd, **22 units of complex care housing** with commercial kitchen, is on the Nanaimo file now.

Market backdrop: Q1 2026 housing starts — Saanich 195, Langford 171, Colwood 143, City of Victoria 117. **v4's coverage now matches that ranking**, which v3's did not: the two busiest

start markets on the Island were the two v3 could not see.

COVERAGE · READ THIS BEFORE USING ANY NUMBER

What each city's file gives you — and what it does not

The five files are not the same shape. A firm's absence from one of them means the city does not publish that field — not that the firm is inactive.

CITY	APPS	NAMES THE APPLICANT	DATES	PRICES
Saanich	960	Yes — 901 of 960	to 4 Sep 2026	No
Nanaimo	876	No	None at all	No
Langford	349	No — 0 of 349	to 25 Aug 2026	Yes — 293 priced
Victoria	121	Yes — 94 of 121	to 2 Sep 2026	No
Colwood	29	Role words only	to 25 Aug 2026	No

- ◆ **Saanich is the deepest file and the shallowest per row.** 535 of its 960 rows are single-lot residential building permits. Set those aside and **251 remain** — 91 commercial, industrial or institutional, 47 rezonings, 64 development permits, 15 subdivisions. Those 251 are the ones worth working.
- ◆ **Colwood names nobody.** All 29 rows read "AUTHORIZED AGENT/OWNER" or "N/A". The file is still useful — it tells you 7 rezonings and 17 development permits are open, and where — but it will never tell you who.
- ◆ **Across all five files, of 2,335 applications: 532 carry a named party, 489 carry a role word only, and 1,314 carry nothing.** Everything in the firm sections above rests on those 532.
- ◆ **Island total, BD-relevant: 1,626 of 2,335.** Filed in the last twelve months: 837.

Victoria's live register

Real applications open with the City of Victoria, newest first, with the agent acting.

Nothing here is inferred.

12 Nov 2025	512 Pembroke St	Rezoning — marine industrial mixed use	Evan Peterson · Barefoot

FILED	SITE	PROPOSED	ACTING
8 Oct 2025	202 Harbour Rd	Vehicle sales, service, cafe, office	Niall Paltiel · Islandview
6 Aug 2025	829–899 Fort St	Three mixed-use towers	Kaeley Wiseman · Wiser

► HOW TO WORK THIS LIST

A development application is filed **months to years before a tender**. By the time a structural RFP appears, the engineer was chosen at roughly the stage these rows represent. Two rows here are 22-storey towers; one is three towers at once. The agent named beside each is the person who can say who holds the structural seat — and on the fifteen firms in section 03, we are already a supplier in good standing.

ADDENDUM B · EMPIRICAL · NEW IN V4

Saanich, the biggest file on the Island

960 applications, current to today, and the only Island file that names the professional who filed. Rezoning and development permits first — these are the early-stage rows.

FILED	APPLICANT	SITE AND TYPE
31 Aug 2026	Abstract Developments	3839 Quadra St — DP amendment
26 Aug 2026	Alan Lowe Architect	5166 Cordova Bay Rd — rezoning

ADDENDUM C · EMPIRICAL

Nanaimo

876 applications. A different shape from the Greater Victoria files, and the difference matters.

WHAT NANAIMO IS BUILDING	APPLICATIONS
Multi-family or mixed-use	147
Single-family	137
Commercial, industrial or institutional	81
Rezoning	30
Subdivision	9
Total on file	876

Nanaimo's descriptions are **richer than any other Island city's** — they name the occupant and describe the structure. Current examples:

- ♦ **1850 Boxwood Rd** — "New construction of **22 units of complex care housing**. Common amenities and commercial NFPA 96 kitchen on the first floor."
- ♦ **521 Third St (Phase 4, Bldg E)** — "Construction of a **31 strata unit residential apartment building** with 1 commercial unit."
- ♦ **1400 Wingrove St** — "Construction of a **3 storey mixed use building**, 12 residential apartments on 2 & 3 floor with 3 commercial CRUs on main."

- ♦ **668 Pine St** — "renovation and occupancy change of a **2 storey industrial building**" to clear a Do Not Occupy order.
- ♦ **2253 Wilgress Rd** — "**Remediation and repair to existing 2 storey commercial building** to address do not occupy and illegal construction." *A structural remediation job, described as one, in a public file.*
- ♦ **505 Eighth St** — Salvation Army CFS Nanaimo, commercial alteration and horizontal addition.

× TWO GAPS IN THE NANAIMO DATA, UNCHANGED FROM V3

No applicant contacts. Nanaimo publishes no per-application detail page, so there is no equivalent of Saanich's or Victoria's named agent. The Nanaimo rows tell you *what* and *where*, never *who*.

No application date. All 876 rows are undated — the feed carries no date field, so Nanaimo rows cannot be sorted or aged. File numbers rise over time and are the only ordering available. **Nanaimo is therefore excluded from every "last twelve months" figure in this document.**

METHOD

How this document was produced

v2 was assembled by research. v3 and v4 were assembled by a pipeline that runs on its own. This section exists so you can judge how much to trust each number — and so the next person can reproduce it.

1

Read each city's own file

All five publish their development applications as machine-readable services.

We read them directly. **A rezoning spanning nine parcels is published as nine rows**, so rows are collapsed to real applications before anything is counted — 2,335 applications from a considerably larger row count.

2

Filter to buildings

A relevance gate drops sign variances, fences and awnings. **It was tightened during this build:** plumbing, tree, boulevard, sign and woodstove permits were being admitted because they mentioned a dwelling. 439 such rows were identified and removed. Every count in this document is post-purge.

3

Open every application that has a detail page

Victoria's tracker names the applicant's own agent; Saanich publishes the applicant firm in the feed itself. Langford, Colwood and Nanaimo publish neither. That asymmetry is the coverage table in section 10, and it is stated rather than smoothed over.

4

Identify the firms

Applicant names and agent email domains were enriched against Apollo for authoritative company names, size, location and headcount growth, then topped up with Hunter for roster depth. **15 firms had no Apollo record** and are named from the city's own applicant string — they are marked as such wherever they appear.

5

Match against our ledger

Each firm was resolved against our client records by exact website domain, then exact name — never by substring, which once matched "Chard" to *Richard & Co.* That match produced section 03: **15 firms with a Deltek record or KOR job history.**

6

Bank it

75 firms and 1,821 person-affiliations were written into the BD platform as typed org facts and affiliations. The next pass starts from here, and the five feeds keep running whether or not anyone asks them to.

► WHAT IS NOW RUNNING BY ITSELF

Five Island application feeds are live and refresh daily: **Saanich** (960), **Nanaimo** (876), **Langford** (349), **Victoria** (121) and **Colwood** (29). Adding another municipality that publishes the same way is a configuration row, not a new build — Saanich, Langford and Colwood were each added in a day. **Esquimalt, Oak Bay, Sidney, North Saanich, Central Saanich, View Royal, Sooke and the Cowichan Valley are the obvious next ones.**

► ONE THING THIS EXERCISE FOUND ABOUT OUR OWN DATA

The 532 named applicants resolve to **372 distinct strings but only 345 real parties** — **50 of those strings sit in a group that is one company spelled more than one way.** "READ JONES CHRISTOFFERSEN LTD", "READ JONES CHRISTOFFERSEN LTD." and "READ JONES CHRISTOFFERSEN" are three strings and one firm. So are "NES ARCHITECTURE" and "NES ARCHITECTURE LTD.", and three spellings of Alan Lowe. This is the same duplicate class that had **RJC itself split across two canonical records** in our platform until it was merged during this build. A separate sweep of the whole database is queued.

METHOD

Honest labels

- ◆ **The permit data is the cities', and it is exact.** Application numbers, sites, scope text, applicant names, agent emails and Langford's valuations are published by the municipalities. We copied them; we did not interpret them. Currency: **4 September 2026** for Saanich, 2 September for Victoria, 25 August for Langford and Colwood, undated for Nanaimo.
- ◆ **KOR history is ours and reliable** — job counts, last-job dates and Deltek client links from our own records.
- ◆ **Firm size, revenue, founding dates and growth rates are Apollo's**, current as at September 2026, and not individually confirmed. Treat them as scale indicators, not as due diligence. Revenue figures in particular are modelled.

- ♦ **Langford's valuation is the owner's declared construction cost** for permit-fee purposes — not a contract value, not a fee base, and not adjusted for the 56 unpriced applications.
- ♦ **Where a competitor is named as applicant, that means they filed the application** — it is strong evidence they are the professional of record, and it is not a signed contract. Nine such firms appear; RJC accounts for four of the rows.
- ♦ **Records flagged for verification:** Casman Group (Alberta head office against a 250 phone number), and the 15 firms Apollo could not match, whose names come from the applicant string alone — including NES Architecture, the busiest architect on the file.
- ♦ **"Live" means an open application, not a funded project.** Applications are withdrawn, stalled and refused. Section 03's Deltek history is a much stronger signal than any single row in the addenda.
- ♦ **Coverage is Victoria, Saanich, Langford, Colwood and Nanaimo.** Esquimalt, Oak Bay, Sidney, the Saanich Peninsula, View Royal, Sooke, the Cowichan Valley and everything north of Nanaimo are not wired. A firm's absence here means it is not filing in these five cities — not that it is inactive.
- ♦ **Scope is Vancouver Island.** The same platform also reads Coquitlam and Maple Ridge; those are deliberately excluded from this document because they are not this market.
- ♦ **v2's corrections stand.** The Starlight distinction, the Knappett split, the Omicron self-perform caution and the dropped "\$103M RCMP detachment" all carry forward unchanged.
- ♦ **Where a tool and our own ledger disagree, the ledger wins.** An external tool called this market "completely greenfield — zero worked-with". It is not; it reflects that Apollo's CRM is not populated by KOR.

Built from five live municipal application files and our own client ledger. Every firm, person and fact in this document is banked in the BD platform as typed org facts and person affiliations, so the next pass starts here rather than from scratch — and the five feeds behind it keep running.
