KOR STRUCTURAL · BUSINESS DEVELOPMENT · 21 OCTOBER 2026

Business Development Quick Start

Find it. Grab it. Work it. Close it. Everything below is in the KOR Operations app.

NEW IN THIS VERSION

It opens on Today: what needs you, your list with dates, and pursuits waiting for a next step. **One Grab button** for tenders and for projects years out. **The documents arrive by themselves**, and Claude's review of the RFP lands on the pursuit. **People by name** everywhere. `My Pursuits` shows yours (turn off `Mine` for everyone's), each marked **No RFP yet**, **Out for bid**, **Submitted**, **Won** or **Lost**.

TWO KINDS OF OPPORTUNITY

Early: a project years out, or a permit

A project announced, a rezoning or a permit, long before any tender. The structural engineer is usually not chosen yet. Find who is behind it and phone them.

A bid: somebody asking for prices

A tender with a deadline. The engineer is often chosen already, so decide quickly whether to bid.

THE STEPS

1 · OPEN IT

Home › `Business Development`. It opens on `Today`. Everything else is in the left menu; `More ▾` holds the rest.

2 · FIND IT

`Opportunities`: **Signals** (permits, rezonings) and **Bids** (tenders, structural work only). `Future Projects`: projects years out, KOR's kind of work only.

3 · GRAB IT

Select the row and press `Grab`; the same button on Future Projects. It is now yours and moves to `My Pursuits`. Ian sees what is grabbed and may hand one on; you get an email when one is given to you. Not for KOR? `Not for us…`

4 · WHEN THE RFP POSTS

If you hold a future project and its tender is posted, the tender **joins your pursuit**, whoever pressed Grab. Today asks once: `Yes, it's this project` or `Not this project` (then it is theirs).

5 · LOG IT, SET THE NEXT STEP

In `Activity log` pick **Call**, **Meeting** or **Email out**, one line, `Log`. Then `Next step…`: what and by when. A future project with no next step and nothing done for 14 days goes back to the pool; the morning email warns you four days before.

6 · DOCUMENTS AND THE REVIEW

For Bids&Tenders and Alberta Purchasing tenders the bid documents appear in `Files` minutes after you grab, and addenda daily until it closes. When Claude has read the RFP, `Open review` shows bid or not and why, the questions for the buyer, and the checklist.

7 · CHECK IT AND PUT A FEE ON IT

Write it as you do now; tick it off against `More ▾` › `Checklist…` (every RFP requirement). Put one rough number in `Edit…` › `Proposed fee`. **Coming:** one standard KOR proposal, built in the app.

8 · SUBMIT, THEN WIN OR LOSE

`Set stage` › `Submitted`, then `Browse…` to the PDF you sent. When it is decided: `Won` or `Lost`, one line on why, and for a loss who won.

EVERY WEEK: IAN'S TO-DO LIST

An email from Ian with a numbered list: who to call, what to send, by when. **Reply with one line per number**; a new date moves your next step, the same as `Next step…`.

```
1. done    2. moved to Fri 30 Oct    3. dropped, went with RJC
```

START HERE

Open Today, then My Pursuits.

Log your last real contact on each pursuit, give every one a next step, and close out anything already won, lost or dead. Then grab one new project or signal in your region this week.
