

BD Meeting — Vancouver Lower Mainland — Actionables & Verified Targets

Source: “Business Development – Vancouver Lower Mainland” meeting recording, 19 Jun 2026 (2h 35m).

Prepared by: Ian — names cross-referenced against the BD brain (canonical orgs + Deltek client IDs + KOR project counts) and web-verified where internal data was thin. **Verified & updated 2026-06-20** — all canonical org IDs, KOR project counts, CRM engagement numbers and the De Cotiis family structure re-confirmed against the live DB (post the De Cotiis enrichment + dedup merges + CRM remap). Changes flagged inline.

Brain hardened + re-verified 2026-06-21 — a full module clean-up ran since the meeting; the graph these targets live in is now production-grade:

- **Culled 50k → 17.8k warm orgs** (32k orphan commodity-vendor rows cold-archived; fully reversible — any resurfaces on a real pursuit). The pursuit targets below were untouched (all have KOR projects/relationships).
- **100+ duplicate clusters merged** (incl. the BC health-authority cluster 32→9 clean entities), **81 mis-classified Kinds corrected** (e.g. AECOM/RJC/SMP now correctly tagged **Competitor**), MPI structural-engineer/GC foreign keys completed, and the **duplicate-creation cycle closed** at the resolver (safe fuzzy-match before create) so the brain stays clean going forward.
- **Every org + person ID in this doc re-verified against the cleaned graph 2026-06-21 — all resolve correctly** (Pinnacle #53665, Onni #38949, Amacon #169/#71060, Emerge #111, Evantra #203, RBI #14, Lark #53694/#72260, Kerkhoff, Yellowridge, + the full De Cotiis person directory #1399/#1406/#3757/#9303-9305/#901/#902/#903/#1940/#1941). The Lark “Unknown” stray rows (#55097/#27243) are confirmed already-merged.
- **Targeted, cost-controlled enrichment — priority targets first.** The indiscriminate always-on enrichment of the full ~10k-org base was retired (it was the main cost driver); enrichment now prioritises the high-value pursuit targets and runs in controlled, verified passes. The \$5 targets sit on the cleaned graph with web-verified narrative + people + signals; lower-priority orgs are enriched only as they become relevant.

How to read this:

- **kp=N** — number of KOR projects on record with that org (warmth signal). Deltek = linked Deltek client.
- **[conf: High/Med/Low]** — confidence in the *name resolution* (the meeting audio garbled many names).
- Names in **bold** are the corrected/confirmed spellings.

Already actioned & verified (live CRM engagement IDs as of 2026-06-20): the meeting’s pursuits are **live in the CRM** — RBI #4, Pinnacle International #11, M’Akola #12/#19, Purpose Driven #15, Mundi #61, Bosa Development #70, Graham/Richmond Hospital #91, Open Form #92, Squamish/Nch’kaŷ #93, plus Rory’s modular pair **Emerge Modular (Greg Zemrau) #95** and **Evantra Developments #97**. (*RBI moved from #90 → #4 when the session’s dedup remapped the org to canonical #14.*) Names were also cleaned in the Biz Brain (dedup merges, reclassify, aliases, contacts). Full detail in §10 (Brain) and §11 (CRM).

0. Ian's tasks — status tracker (added 2026-06-21)

Your action items pulled out of §1/§2/§4/§5 with current status.

#	Your task (source §)	Status	Note
A	Awards — brain finds AEC awards to apply for (§4)	DONE	Industry Awards Finder built + deployed; auto-discovers KOR-enterable award programs; surfaces in the app. Auto- <i>apply</i> still human-review by design.
B	Scout John's 5 California developer cos (§5 USA)	DONE (Greystar)	KOR-Greystar-Scout + California dossier/field-guide/call-sheet delivered. Other 4 await John naming them.
C	Design-build / "big-fee" qualification research (§1#5, §5)	DONE	Prime-Consultant channel mapped: KOR wins public/design-build work as the architect's structural sub on the prime team — target architects <i>before</i> the RFP. + CA field guide.
D	Biz Brain build-out — clean data, dedup, CRM (§2)	DONE + ongoing	50k→17.8k cull, 100+ dup merges (incl. HA cluster), 81 Kind fixes, MPI FKs, dup-creation cycle closed; CRM pursuits loaded (§11). Enrichment now targeted + cost-controlled (priority targets first; the always-on full-base pass was retired).
E	Social-media automation — LinkedIn auto-post + Instagram (§4)	In progress	LinkedIn app-setup checklist done 2026-06-20; Instagram + the every-2-days auto-post still to wire.
F	Meeting synopsis + action sheet (3–4 packages, 2–3 people each) (§2)	Pending	The "intel by Tuesday" deliverable.
G	Ad-hoc enrichment in the app	EXISTS (orgs)	Org Dossier has a "Refresh Intel" button (→ queues a FirmNarrative research trigger the Worker drains). People don't have it yet — gap to close.
H	Name the tool (§2)	Open	Biz Brain / KIA / KSA / ICE / Frank.

#	Your task (source \$)	Status	Note
I	Plug GIS contact + Broadway/SkyTrain rezoning list into brain (§2)	Blocked	Awaiting Omar's contact + list.
J	Confirm EGBC SRG course details (JM takes the course) (§1#1)	Open	
K	Stage the broader \$5 reach-out list as CRM engagements (§11)	Your call	Say the word.

1. Firm-level actionables (lists, qualifications, proposals)

#	Action	Owner	Notes
1	Get on the K-12 School Seismic (SMP) qualified-suppliers list — requires EGBC SRG (Seismic Retrofit Guidelines) training by a registered engineer	JM takes the course; Ian confirms details	412 seismic-retrofit gov't jobs / ~400 projects in their DB. Course offered ~once a year; EGBC mails continuing-ed notices (Kevin: no need to phone EGBC). Kevin declined to be the engineer. Was supposed to be done last year (Chelsea). On qualifying → sign NDA → ingest their project DB into the brain.
2	Get on the Fraser Health list	John (has a Fraser Health contact to phone)	One opportunity/year, window-based; they send a "list is coming" notice.
3	Get on the BC Ferries list	TBD	Continuous workload, strong gov't fees, lots of seismic-retrofit work. Open Q: marine qualification required?
4	TransLink introductions	TBD	"Huge, right in our backyard." Same marine/qualification question.
5	Ministry / big design-build (Graham-style) qualification requirements	Ian to research	Rory's Q: what list/quals to play on big-fee design-build? Can a client/ministry contact sponsor us in?
6	Add an "additional services" appendix to Canadian proposals (already on US proposals)	Jim/John	Out-of-scope items (crane footings, water-meter vaults, core-hole review, seismic instrumentation, supplementary schedules) at pre-agreed fees → negotiating leverage + upsell. Maintain two templates (US/Canada).

2. The “Biz Brain” + CRM + process

- **Name the tool** — undecided (candidates: “Biz Brain,” KIA, KSA, ICE, Frank).
- **Ian to deliver:** meeting synopsis + an **action sheet broken into 3–4 “packages”** (e.g. *reconnect existing clients, think-outside-the-box new sectors, regional pushes*); assign 2–3 people per package. Intel promised “by Tuesday.”
- **CRM build-out over the weekend;** assign each lead to an owner and **lock it** so two people don’t call the same contact.
- **Plug into the brain:** the GIS contact’s company (Omar → Ian), the Broadway/SkyTrain rezoning+DP list, and all corrected companies/people below.

3. Website overhaul — decision at Monday partnership meeting

- Make it **less people-centric, more work/projects/breadth**.
- **Address the “JB issue”** that surfaces in web searches and is hurting pursuits (came up with Shape Properties + others) — likely remove some/all partners; decided at partnership level.
- **A dedicated page per region** (Vancouver LM, Island, Okanagan, Alberta, US) highlighting that region’s experience.
- Reframe “Partners/Principals” → **“Leadership,”** featuring **client-facing/regional leaders** (Omar, Conor, Islam, Jason, Kevin, Rory...) rather than every partner.
- Lots of project images; populate it; speed it up; map at the bottom. **Staff section still live — needs fixing.**

4. Marketing / promotion

- **Social media automation (Ian to build):** LinkedIn auto-post a project every ~2 days (give Ian access); **get on Instagram** (architects/developers are active there — KOR has none). Benchmark: *Toshiro*, head of BD at WSP, who posts constantly.
 - **Awards:** have the brain find awards to apply for and auto-apply (Henry used to win awards).
 - **Lunch-and-learns** at developers/architects — most effective name-recognition tool (Henry ran these).
 - **Client appreciation events** — consider.
 - **Marketing capacity:** 1-day course, or hire a **BCIT marketing intern** (2-week placement); or use the brain as “VP of Marketing.”
 - **Signage — Griffin owns it** (with Tyler/Kenny). New-site sign opportunities: **West 10th “Nexus”** (UBC corridor, starts next week) and **10th & Highbury “Sightline”** (if Haber agrees). Rory wants roll-ups (fabric ones exist; Rory also has a sign-maker buddy) → coordinate with Griffin. Field crews + contractors are happy with Griffin’s field system — keep it responsive.
-

5. Target lists by region (corrected names → owner → action)

Vancouver Lower Mainland — Omar (lead), John, Jim

- **Pinnacle International** [conf: High] — kp=8, CL00333. Work in Alberta, new San Diego properties, Vancouver business; warm but stale. → John + Omar meet **Michael De Cotiis**, President/owner. See Pinnacle/Onni note in §7.
- **Bosa Development** [High] — kp=78, CL00047. Reconnect **Matt Patzer** (VP Construction, mpatzer@thinkbosa.com); meet **Paul Lamme**, VP Development **Bosa San Diego**, in California.
- **Bosa Properties** [High] — kp=44, CL00048 (separate entity). **JB** to set up lunch (“we got zero from Bosa Properties”).
- **Intergulf Development Group** [High] — kp=8, CL00204. One job under construction; John knows the “top dog”; an **Axiom** contact intro’d a PM.
- **Ledcor** [High] — kp=10. Soft intro via existing **TELUS** work (the **Telus-via-Ledcor** link is a real record in our data); backdoor connection in Edmonton; partner up.
- **Omicron Development Inc.** [High] — kp=4, CL00305. Soft intro, already doing TI; chase light-civil/infrastructure (Conor via **Bruno**).
- **Graham (Construction)** [High] — **AJ** (rebar) intro’d; Graham is GC on **Richmond Hospital** (likely phase 2 & 3). Set up meeting w/ Graham + **Bert**. Graham knows someone at **Ellison** who’ll intro to **Bird**.
- **“BD”** (developer w/ a farm/light-industrial division; did light industrial on “Ramer,” TI at Station Square) — via **Rick**; pursue another division (leasing/light industrial). [*name not yet resolved — verify with Omar*]
- **UBC ecosystem** — **Manit’s** wife teaches a UBC course; ~100 UBC buildings coming; Omar meeting **Emma** next week. **JM** to work the UBC development side (an engineer there had major issues → opening). **Jack** (from Potem) intro to **SFU** and **UBC Trust** — lunch w/ UBC Trust in July.
- **ANH** — Omar teaming ANH with **AJ** (a placer w/ his own company) so ANH can compete with **LMS** on development work.
- **Mundi Hotel Enterprises** [High company / Low person] — Kamloops; President **Ron Mundi**. (In the brain as #70864 — reclassified Unknown→Developer; CRM eng #61.) **Rory Allen** there (ex-“CDA” → Tim Properties [folded] → Mundi). KOR did a hotel for them; hotels across the interior, expanding to Vancouver/Burnaby, lots in Alberta; **big downtown Vancouver tower** floated. Omar intro’d **Adrian (EGC)**. Sent a rental/wood-frame proposal (with Conor). **Alan** willing to share competitor fee data (KOR fees ran low in Edmonton).
- **Squamish Nation → Nch’kay Development Corp** [High] — **Jacob Lewis III (Xayil)**, Director of Community Development. Omar coffee **July 8** (relationship only, no work talk); then meet the dev team.
- **M’akola Development Services** [High] — KorClient, Deltek (Indigenous housing, Victoria, office here). Target the dev lead (no “VP Development” title; closest is **Kaela Schramm**, Dir. Projects & Planning — the “McCullough girl” Omar met at ULI). Also a **City Spaces** contact (didn’t return call).
- **GIS consultant** (met at ULI) — does property/“open quake” studies for City of Vancouver + City of Victoria; can tip where cities plan to build (residential/industrial/schools/hospital/fire/police). → Omar to give Ian the contact; plug into brain.
- **PCI Developments** [High] — Cambie & Broadway tower. Omar has contact via **Brad Howard** + a PM + site super + VP-Dev phone (via **Jacob of Urban One**); door not shut, not answering → phone Brad again.
- **Onni Group** [High] — #38949. **Jason** setting up a meeting; reconnect with **Mr. Morris / the Morrises** = **Morris De Cotiis** (Onni principal, construction & property mgmt; #9303). Onni is run by the late

founder Inno's sons — **Rossano** (President, #1406), **Morris, Giulio, Paolo**. *Distinct from "Bonnis Properties" (#70958, kp=30) — don't conflate.* (Onni is the De Cotiis-family sibling firm to Pinnacle — see §7.)

- **Shape Properties** [High] — Deltek. "Nothing moving, don't want to meet"; Omar will phone anyway. (JB issue surfaced here.)
- **RBI Group of Companies** [High] — kp=6, Deltek. New-ish client, cash-rich, buying property, heavy **WSP** user. KOR building **Richmond Hotel**; got **137th St**; likely **Cobalt Hotel**; **Edmonton hotel** drawings coming; lots in interior. → pitch re-engineering his WSP projects for profitability.
- **VGM Group / BMZ / Gary / Suki** (*spellings unverified*) — cash-rich developer network bidding low on receivership deals; **Bonnie** bought Hudson's Bay + Atmosphere. Relationship intel.
- **McAllister** — tougher revisit. **Beto** — go meet (Resident is their biggest tower). **Charmaine** — arrange a visit re: their biggest tower. [*Beto/Charmaine unresolved — verify with Omar*]
- **Axiom Builders** [High] — kp=12, CL00527. Argentina contact helping; set up Axiom Calgary meeting; team on Vancouver Island work.
- Omar in contact with many **unknown Vancouver-office architects** — broaden the net.

Vancouver Island — Rory (lead)

- **Merrick Architecture** [High] — Deltek; has an Island office. John knows someone; get warm intro to Victoria; Rory + John go.
- **Wensley Architecture** [High] — Victoria office; principal **Neil Jacobsen** (*verify — not in DB; Neil Banik retired, was him + Barry Way*). Rory did a Wensley job in Duncan (**Paddle Road**).
- **Kerkhoff Construction** (kerkhoff.ca) [High] — already in brain: KorClient #186 (Kerkhoff Development) + Developer #70544 (Kerkhoff Construction). Was GC on the Paddle Road job; KOR got paid out when Kerkhoff didn't pay. The new owner Rory called "*Ridge/Bridge North America*" = **North American Development Group** (#54449, already linked to Kerkhoff in the brain).
- **The Lark Group** [High] — Surrey; CEO **Kirk Fisher**. **In the brain but duplicated** — #53694 "The Lark Group" (Developer), #72260 "Lark Projects Ltd." (GC, BC Housing-confirmed), plus #55097/#27243 ("Unknown"). Needs **merge + reclassify**, not a new record. Reconnect; **Jason** works with them (Abbotsford); KOR did **Legion Veterans Village** (2nd tower "Lucent" sold to **Landa Global**). **Verified**: founder **Larry Fisher** died Feb 2023; his son **Kirk Fisher** is now CEO — so Rory's founder-death recollection was right, but the *live* contact is **Kirk**, not Larry.
- **City of Nanaimo** — municipal-direct work (steady stream).
- **Farmer Construction Ltd.** (Victoria, since 1951) [High] — biggest Southern-Island GC; approach. (**Campbell Construction Ltd.** also big.)
- **Dino** (*co. = "Moniz"? — JB has long Moniz relationship; John designed Dino's brother **Gab Carrie's** house*) — flagship tower (architect **Perkins + Will**) being sold; selling Granville + Kingsway sites; reducing portfolio; seeking partners. Keep warm. [*Dino's surname/company unresolved — verify with Rory/JB*]
- **Modular push (Rory's headline)**:
 - **Greg Zemrau — Emerge Modular** [High] — **existing KOR client (#111)**; KOR ≈ his prime consultant. (**Rory's update — now in CRM as engagement #95.**) Live: White Rock Marine Dr (2 fourplexes), Vancouver fourplex (in shop), **Duncan ~4-storey by the university (proposal owed)**, retrofit Greg's warehouse, plant on mainland/island, upgrade Alberta plant. **Simon** learning **Autodesk Advanced Steel** → charge for shop drawings. Greg wants developer partners with sites+funding; he supplies modules. CMHC change: **5% down** on modular (even >\$1M, transfers to homeowner) — lean in.

- **Evantra Developments** [High] — #203, **existing KOR client** (eng #97). The Langford/Victoria developer that several of Greg's KOR jobs come in through — the developer-partner side of the modular pipeline. Rory's lead; keep Emerge ↔ Evantra linked.
- **Yellowridge Construction Ltd.** [High] — **existing KOR client (#115)** + Yellowridge Design Build (#70585); Port Moody design-builder, leading the **Defence Canada** design-build bid (off-site/modular/panelized). (We have a relationship here already — not a cold approach.) Rory met twice; rubric rewards 2 projects where the whole team worked together; Defence Canada prioritizes off-site methods.
- **WHB Group** [Med] — New Westminster formwork/rebar; principal **John Wu** (Chinese-group modular connections; ≠ the BC Housing "John Wu" in our DB).
- **Wilson Chang** (vs. "Wilson Shen") [Low] — Island modular operator. Our DB has a **Wilson Chang (architect)** — may be a *different* person; don't merge. The **Thind** developers project could be a large modular tower in Burnaby (steel modules from China, Canada Builds funding) — see Thind note in §7.
- **Website:** add modular capability (carefully — proprietary).
- **Island sites:** Parksville (out of ground), Duncan (pouring L1 next week), **Langford** (keep KOR name off until it's a go — Denbrook/liability sensitivity).

Okanagan & Interior — Conor (lead)

- Most active BD; big pipeline if it moves. Goes to Kelowna (took Simon last time).
- **Orchard Park Properties** [High] — principal **Apriano Meola** (ex-Pinnacle/Onni; co-founder with Anthony Beyrouti). Built **Water Street by the Park**, Kelowna (3 towers). John met him pre-Jeremy → introduce Conor.
- **Losing the Penticton office space** — decided to let it go (confirmed).
- Conor to give Ian his Vancouver/Interior contact list; co-pitched the Mundi/RBI rental with Omar.

Andrea — get more front-facing (explicit ask)

- **Arno Matis Architecture (AMA)** [High] — the transcript's "*Amy/Aromatis/Larno/Mattis*" are **all one firm / one person: Arno Matis** (founder; ex-Bing Thom). Does heavy rezoning + some design/construction; works with clients who also use **RJC**. Amy/AMA gave KOR's name to such a client → go meet AMA. (Andrea building rapport — helped Arno with a kitchen reno.)
- **"Griffin" (architect)** — *distinct from Griffin the field lead*. Wanted to wait (Marcelo left, overloaded) but would meet; Andrea + others. *[surname unresolved]*
- **Marcela/Marsa** — left, "resurrected herself," from Chile; may bring something.
- **Purpose Driven Development** [High] — Deltek; founder **Carla Guerrero**; contact **Annelise van der Veen**. All-women consultant teams. Reviewed/awarded KOR the **Church of Epiphany** project (KOR has it per the meeting; not externally findable — internal record stands).

USA / California — John (lead), Jim

- John to California in ~2 weeks; gave Ian **5 existing-relationship developer companies** to scout for pipeline before meetings (only **Greystar** named — San Diego, key people **Bob Faith** [Founder/CEO], **John Wilbeck** [MD Development, Canada]).
 - Jim → a **California qualified-leads report** from the brain.
-

6. New-sector / “outside the box” ideas to chase

- **Light industrial, light/small civil infrastructure** (KOR has the technical chops).
 - **Steel-stud / suspended-ceiling / TI add-on engineering** — high margin, “rinse & repeat”; offer as a proposal tick-box. JB, Kevin, Rory already do some. Garth at **Anthem** → TI in RJC’s building (~\$10k, ~\$8k profit). **Decide who owns this line.**
 - **Water features / pools** — underserved niche (old **Rockingham** did the whole package incl. Dept. of Health approvals); good fees.
 - **Utilities/telecom: GS / Jerry Sayers** (cell-site work for Rogers); **BC Gas / Fortis** ministry work.
 - **Marine:** BC Ferries, TransLink (qualification TBD).
 - **Modular/off-site** (Defence Canada signal via Yellowridge).
-

7. Intel flags (read before acting)

1. **Pinnacle vs Onni vs Amacon — the boardroom confusion explained (verified, now fully in the brain).** Three De Cotiis brothers split from the family holding company (**Viam Holdings**) in the 1990s into **three sibling firms**:
 - **Pinnacle International** (#53665) — **Michael De Cotiis** (President & CEO, #1399), the last surviving founding brother, **alive/active**. (*Also the BC-licence “Person Responsible” at Mondiale Development #20962.*)
 - **Onni Group** (#38949) — founded by **Innocenzo “Inno” De Cotiis (1937–2020)** (#3757); now run by **his sons: Rossano** (President, #1406), **Morris** (#9303 = the meeting’s “Mr. Morris”), **Giulio** (#9304), **Paolo** (#9305).
 - **Amacon** (Developments #169 / Construction #71060) — the third brother (**Amalio**) branch: **Marcello** (CEO/President, #901), **Marc** (President, #1941), **Donato** (Owner/VP, #902), **Italo** (Chairman, #1940), **Lilliana** (Hospitality, #903). Michael is **uncle** to the Onni/Amacon next-gen. That’s why the room said “*his dad died... that’s his brother... it’s not Pinnacle*” — they were half-remembering Inno’s 2020 death and the cousin firms. **No recent (2024–26) De Cotiis death**. Treat all three as adjacent — a strong Pinnacle (Michael) relationship sits next to Onni + Amacon decision-makers.
 2. **Thind Properties is distressed.** kp=17 historically, but **Eclipse Brentwood is under creditor protection (~\$189M owed to KingSett), 2024-25**. The “biggest modular tower in Vancouver” floated with the “*old Thind developers*” is real but **high-risk** — pursue with eyes open; the steel-modules-from-China / Canada Builds angle is unverified.
 3. **“Amy at AMA / Aromatis / Larno / Mattis” is one person — Arno Matis**. Don’t create four contacts.
 4. **Lark Group is already in the brain — and duplicated** (Developer #53694 + GC #72260 + two “Unknown” rows). This is a **merge/reclassify** job, not an add.
 5. **Onni ≠ Bonnis Properties** (kp=30) — two different orgs in our data; keep separate.
 6. **Yellowridge & Kerkhoff are existing KOR clients** (#115, #186) — the Defence Canada modular bid and the Paddle Road story both run through relationships we already have, not cold contacts.
-

8. Confirmed people directory

Person	Role / org	Status
Michael De Cotiis	President/owner, Pinnacle International	web-confirmed
Matt Patzer	VP Construction, Bosa Development — mpatzer@thinkbosa.com	in DB
Paul Lamme	VP Development, Bosa San Diego (@thinkbosa.com)	web-confirmed
Jason Turcotte	VP Dev Cressey / Pres Darwin / Principal OpenForm — jturcotte@cressey.com	in DB
Chris Wilkinson	left Darwin (~1 mo ago) → development at OpenForm	transcript/web
Bob Faith	Founder/CEO, Greystar	in DB
John Wilbeck	MD Development (Canada), Greystar	in DB
Annelise van der Veen	Mgr Strategic Projects, Purpose Driven Development (founder Carla Guerrero)	web-confirmed
Jacob Lewis III (Xayil)	Director of Community Development, Nch'kay Development Corp (Squamish)	web-confirmed
Apriano Meola	Co-founder, Orchard Park Properties	web-confirmed
John Wu	WHB Group / Lower Mainland Forming (formwork/rebar)	web (Med)
Kaela Schramm	Dir. Projects & Planning, M'akola Development Services	web (Med)
Greg Zemrau	Emerge Modular (modular fabricator, KOR client #111) — <i>the meeting's "Gregg"</i>	in DB (eng #95)
Morris De Cotiis	Principal, Onni Group (#9303) — <i>the meeting's "Mr. Morris"</i>	in DB
Rossano De Cotiis	President, Onni Group (#1406)	in DB
Marcello De Cotiis	CEO/President, Amacon (#901)	in DB

9. Verify directly (don't guess further)

- **Chris Hall** (Polygon) — Rory's real retiring contact, but no public footprint (Polygon CEO is Neil Chrystal). Confirm with Rory.
 - **Rory Allen** (Mundi Hotel Enterprises) — no public trace; confirm with Omar.
 - **Neil Jacobsen / Neil Banik / Barry Way** (Wensley Victoria) — not in DB; confirm with Rory.
 - **"BD" developer, Beto, Charmaine, Dino's surname/company, the GIS consultant's firm, VGM/BMZ/Gary/Suki** — confirm spellings/identities with Omar/Rory before brain ingest.
 - **Gregg** (modular) — **RESOLVED 2026-06-20: Greg Zemrau, Emerge Modular (#111)**; developer side = Evantra Developments (#203). Both live in CRM (eng #95/#97).
 - **Wilson Chang** — confirm whether the Island modular operator is the same as our DB architect (likely not).
-

10. Biz Brain ingest (applied & verified 2026-06-19)

The brain already held ~all of these orgs (often duplicated), so the meeting yielded little net-new. Batch **applied & verified** (details + audit trail in output/brain-ingest-2026-06-19/):

- **3 dedup merges** — Lark ×2 (stray “Unknown” rows folded into Developer #53694 / GC #72260, arms kept separate), Nch’kay #70915 → #54983. Allowlist override + post-audit done.
- **1 reclassify** — Mundi #70864 Unknown → Developer.
- **4 aliases** — “Mundai Group”, “Yellow Ridge”, “Open Forum”, “Open RD” → their canonicals (all resolve).
- **2 contacts** — Annelise van der Veen (#13816 → Purpose Driven), Jacob Lewis III (#13817 → Nch’kay), affiliations wired.
- **De Cotiis family fully enriched (2026-06-20)** — Michael (#1399, Pinnacle) plus the Onni branch (Inno 1937–2020 #3757; sons Rossano #1406, Morris #9303, Giulio #9304, Paolo #9305) and the Amacon branch (Marcello #901, Marc #1941, Donato #902, Italo #1940, Lilliana #903) are all in the brain with affiliations wired; duplicate person rows (Don/Mike/Donato dups) retired. See §7 #1.
- **WHB Group / John Wu — skipped** (IntelPerson key is name-only → would fuse with the existing BC-Housing “John Wu”). *(Note: the M1 identity-anchor re-key shipped 2026-06-20 now keys people by email→LinkedIn→name+org, so this is safer to revisit.)*

Brain-wide hardening since the meeting (2026-06-21): beyond these meeting-specific writes, the whole module was cleaned — 50k→17.8k warm orgs (commodity-vendor cull, reversible), 100+ dup clusters merged incl. the BC health-authority cluster (32→9), 81 Kind corrections, MPI FK completion, and the resolver dup-creation cycle closed (fuzzy pre-create match). Enrichment is now **targeted and cost-controlled** — the high-value pursuit targets are enriched on the cleaned graph; the indiscriminate always-on full-base pass was retired. Net effect for these pursuits: the targets sit in a deduped, correctly-typed, FK-sound graph with verified intel. All IDs in this doc re-verified 2026-06-21.

11. CRM — pursuits loaded this session (applied & verified 2026-06-19)

The meeting's active pursuits were loaded into the CRM, **deduped against the existing engagements** already imported from Jim's tracking spreadsheet (so nothing was duplicated). Stage 1 = *Drafting/active*. These are live records now — pick them up under each owner.

New engagements created (org had none):

Eng #	Org	Owner	Region	What / next step
#4	RBI Group of Companies (org #14)	Omar	Van/LM	(was #90; org remapped to canonical #14 in the dedup.) Hot active client, kp=6 (last 2026-03-03). Richmond Hotel (u/c), 137th St (awarded), Cobalt Hotel (likely), Edmonton hotel (drawings incoming). Pitch re-engineering their WSP work.
#11	Pinnacle International (org #53665)	Jim	Van/LM	kp=8 (last 2026-01-27), CL00333. John + Omar to meet Michael De Cotiis (President & CEO). De Cotiis family fully mapped — see §7 #1.
#91	Graham Construction	Omar	Van/LM	Intro via AJ (rebar). Pursue Richmond Hospital Ph2 & Ph3 ; meet Graham + Bert; Ellison → Bird intro.
#92	Open Form Properties	Jim	Van/LM	3 existing projects (kp=3, last 2026-04-13). Jim → lunch Jason Turcotte (next month), Kevin to join; chase the Open RD (auto/commercial) division. <i>Contact: Jason Turcotte, jturcotte@cressey.com.</i>
#93	Nch'kaŷ Development Corp (Squamish)	Omar	Van/LM	Coffee with Jacob Lewis III on 2026-07-08 (relationship-build), then meet dev team. <i>Contact: Jacob Lewis III, Dir. Community Development.</i>

Eng #	Org	Owner	Region	What / next step
#95	Emerge Modular (org #111)	Rory	Island	Rory's update — "Gregg" = Greg Zemrau, Emerge Modular (KOR client). Modular pipeline: White Rock, Vancouver fourplex, Duncan 4-storey (proposal owed), warehouse retrofit, plant upgrades. Simon on Advanced Steel shop drawings.
#97	Evantra Developments (org #203)	Rory	Island	Langford/Victoria developer; the developer partner several of Greg Zemrau's KOR jobs come in through. Keep Emerge ↔ Evantra linked.

Activities logged on existing engagements (no duplicates created):

Eng #	Org	Owner	Meeting note added
#61	Mundi Hotel Enterprises	Omar	Rental wood-frame proposal sent (with Conor); expanding to Vancouver/Burnaby; contact Rory Allen; Alan to share competitor fees.
#15	Purpose Driven Development	Conor	Church of Epiphany awarded to KOR (Andrea); more in pipeline (all-women teams).
#70	Bosa Development	Jim	Reconnect Matt Patzer (VP Construction); meet Paul Lamme (VP Dev, San Diego).

Not yet loaded (need an owner/decision first): the broader reach-out list in §5 (Merrick, Greystar/California, Polygon/Chris Hall, Apriano/Orchard Park, Lark, BC Ferries/TransLink lists, etc.) and the Duncan modular proposal (no clear buyer canonical org — it's Gregg's fabrication shop). Say the word and I'll stage these as engagements too.

Generated from the meeting recording; corrected names sourced from the BD brain (canonical orgs / Deltek) and web verification. Brain + CRM writes applied 2026-06-19 with post-audit; low-confidence names flagged for human confirmation rather than auto-ingested.
