

Alberta is open — the leads, the plays, the contacts

KOR now holds **APEGA Permit to Practice No. 13755** (JM & Jim registered) — the gate on all Alberta work is down. This is the actionable picture: two live channel firms, three Edmonton relationship leads, the honest read on Highstreet's Alberta footprint, and the one event to attend — every contact Apollo-verified, every "seat" honestly calibrated.

PREPARED 2026-07-28 · CONTACTS APOLLO-VERIFIED · LEADS ADVERSARIALLY RE-VERIFIED · ALL BANKED TO THE BD BRAIN

Read the seats honestly (up front). None of these are "grab an open chair" plays — they're *relationship* and *channel* plays. The school-P3 work is won by being Bird's/BR2's structural sub on the *next* bundle (not the one that just closed). Enoch and NorQuest are real but **too early** (pre-team / pre-grant) — no confirmed open structural seat. Highstreet has **no new Alberta project** in its pipeline. The value now is getting in front of the right people *before* the teams form.

CHANNEL FIRMS — THE MOST ACTIONABLE (STRUCTURAL-SUB ROUTE)

BR2 Architecture — the Concert-Bird schools architect

Edmonton architecture firm (~24 staff, ex-Barr Ryder), **architect on the Concert-Bird 7-school Alberta P3**. Small, growing fast, does Alberta institutional/schools — a natural structural-sub channel now that KOR can work AB. Line 780-423-6606.

Steve Bushnell	Principal — <i>education / schools focus</i>	sbushnell@br2architecture.com
Jim Carey	Senior Partner (founder-level)	jcarey@br2architecture.com
Shaun Visser	Partner	svisser@br2architecture.com
Derek Sampson	Partner (engineering-adjacent background)	dsampson@br2architecture.com

PLAY Position KOR as their structural sub **before the next school bundle**. Lead with Steve Bushnell (education). Angle: local-calibre wood-frame/institutional structural, now APEGA-permitted, ready to slot into their P3 teams.

Bird Construction — Edmonton preconstruction

The GC on the Concert-Bird schools (and Alberta IPD/collaborative work generally). To get on a *future* Bird Alberta P3, KOR needs to be named their structural sub at preconstruction.

Barry Pfau	Director, Preconstruction Services (ex-Pagnotta VP, ex-Ledcor) — the team-assembly contact	barry.pfau@bird.ca
Bill Hefford	Director, Business Development — relationship entry	bill.hefford@bird.ca
Julian Kuczera	Chief Estimator (<i>verify still current — Apollo shows a concurrent role</i>)	julian.kuczera@bird.ca

PLAY Open through **Bill Hefford (BD)** for the relationship; convert with **Barry Pfau (Precon)** when a fitting Alberta pursuit forms. This is a "be on the bench for the next one," not a live bid.

EDMONTON RELATIONSHIP LEADS (REAL, BUT EARLY — BUILD THE RELATIONSHIP NOW)

Clark Builders — IPDA-active GC

Edmonton GC (~770 staff), genuinely IPDA-active (collaborative/IPD is core to how they work). Currently leading preconstruction on NorQuest CSC. Strong Alberta collaborative-delivery relationship for KOR. Line 780-395-3300.

Steve Lenarduzzi	President (civil-engineering background)	steve.lenarduzzi@clarkbuilders.com
Jay Harding	VP, Preconstruction & Procurement — the team-assembly contact	jay.harding@clarkbuilders.com
Kim Connell	SVP, Development & Strategy (Calgary; IPD spokesperson)	kim.connell@clarkbuilders.com

PLAY RELATIONSHIP Get KOR onto Clark's structural bench for their collaborative Alberta work. Jay Harding (precon) is the operational door; Kim Connell carries the IPD strategy.

GEC Architecture & NorQuest Career Skills Centre too early

NorQuest CSC — ~\$245M, 35,000 m², downtown Edmonton — is real but **still pre-capital-grant** (only ~\$4M design money appropriated; ~\$188M provincial grant pending). Architect **GEC Architecture**, preconstruction by **Clark Builders**. Structural is *not* a confirmed open seat — the project isn't funded and the SE below the architect isn't disclosed. Construction earliest 2027.

Peter Osborne	Partner, Edmonton studio lead, GEC Architecture	peter.osborne@gecarchitecture.com
---------------	---	-----------------------------------

PLAY RELATIONSHIP Introduce KOR to GEC (Osborne) and Clark now, so we're a known quantity if/when the grant lands and the team forms. Not a bid — a positioning call.

Enoch Cree Nation — Northeast Development too early

256-acre development west of Edmonton. The **\$100M CIB loan funds enabling infrastructure only** (roads/water, ~2027); the buildings (Elders lodge, cultural centre, health facility) are **separately privately financed and not yet at design-team stage**. The earlier "their architect has no structural engineer = an opening" read was **premature** — there's no assembled building team to have a seat on yet.

Craig McDonald	Manager, Capital Projects (Infrastructure branch)	craig.mcdonald@enochnation.ca · 780-470-4505
Ryan Morin	Capital Projects Coordinator	Ryan.morin@enochnation.ca · 780-470-4505

PLAY RELATIONSHIP These are the owner-side capital-projects contacts — the right people to know for when the vertical buildings go to design/tender. A relationship-and-credentials call, not a pursuit.

Highstreet Ventures — Alberta thin

Honest read: **no new Highstreet Alberta project in the pipeline**. Brooklyn (NW Calgary, 200 units) is **complete and leasing**; Willowbrook (Grande Prairie) is operating; all four of their "coming soon" properties are **in BC**. Correction to an earlier note: their BC incumbent **R+A Engineering is not BC-locked** (they have APEGA-registered staff) — but R+A has **zero Alberta track record**, and no SE is publicly named on the Alberta assets, so the AB structural relationship is **undecided, not a confirmed opening**.

PLAY Low near-term priority. Worth a light touch to Highstreet's Calgary/AB team so KOR is in the frame for their *next* Alberta land deal — but there's nothing live to bid today.

THE EVENT TO ATTEND — IPDA NATIONAL CONFERENCE

Calgary · Fairmont Palliser · November 3–4, 2026 (+ optional Pre-Conference Learning Day, Nov 2). The highest-value Integrated-Project-Delivery room in the country, in Alberta this cycle — exactly the GCs and architects who pick structural subs on collaborative jobs. Sponsors include **WSP, Bird, Chandos, Stantec, Delnor, RJC, GEC, PCL, Colliers**.

How to attend: register via Eventbrite ("2026 IPDA Conference — Best for Project, Best for All"); book the Fairmont room block early (limited). **Registration pricing isn't posted yet** — email info@ipda.ca for the fee schedule and IPDA membership (membership likely unlocks a discounted rate). Sponsorship contacts if we want visibility: Jeffrey Tyson (AltaPro) & Holly Watson (Bird). *Note: WSP's Patrick Taylor (Senior Director, Structures Alberta) sits as IPDA Treasurer — a structural peer already embedded in that world.*

WHY KOR — THE PITCH, AND RECOMMENDED NEXT MOVES

- **We already engineer this building type in the Interior** (wood-frame-over-podium multifamily/rental — Sutton Crescent, Mill Site, Petterson Rd, Kamloops) and now hold **APEGA #13755** to do it in Alberta.
 - **Recommended sequence:** (1) book the IPDA conference + confirm membership; (2) intro emails to **BR2 (Bushnell)** and **Bird (Hefford)** — the structural-sub channel for the next school P3; (3) relationship calls to **Clark (Harding), GEC (Osborne), Enoch (McDonald)**; (4) light touch to Highstreet's Calgary team.
-

KOR Structural — Internal · Prepared 2026-07-28 for the team. 13 contacts Apollo-verified (email confidence ~95) and deduped/banked to the BD Brain (9 already on file from the July Edmonton-trip ingestion — honed with verified emails; 4 new). Leads adversarially re-verified: Enoch & NorQuest recategorized TOO-EARLY (not open seats); Highstreet-AB pipeline confirmed empty; R+A-not-BC-locked correction applied. Org facts banked on BR2 (68762), Bird (54928), Clark (4922), GEC (1), Enoch (72347), NorQuest (870), IPDA (113051), Highstreet (71236). Sources per fact on file.
