

Ledcor — Structural Engineering Opportunity Dossier

KOR Structural · Prepared 2026-07-01 · Updated 2026-07-02 (invoiced revenue from the ledger; every pursuit status re-verified against Deltek; US development arm added) · Every claim carries a source; anything unverified is labeled, and internal figures can be checked directly in Deltek

How to read this: claims are [V] (verified against a primary source — the URL is in the source list), [I] (inferred — the basis is stated), or [KOR books] (from KOR's own Deltek/CRM records — check them yourself). Where the evidence is thin or negative, this document says so. Section 7 lists what we could NOT verify.

1. Executive summary

- Ledcor is not a prospect — it is an active KOR client.** KOR has **5 won fee proposals (\$560k) since April 2024** with the Ledcor family, the latest February 2026, and the ledger shows **\$103,600 invoiced to date, with three of the five projects billing as recently as June 2026**. The full record, stated plainly: of eight decided fee proposals KOR **won five and lost three** (Trinity 354 E 10th \$175k; Hemlock Kingsway \$125k; Trinity Triangle — Deltek stage LOST on all three; the winning firm was not recorded). One proposal is live (**Steveston Richmond, \$61k, submitted**) and one pursuit is open (Deep Cove). [KOR books — Deltek project stages wDEF/InPursuit/LOST and LedgerAR account 4001; check them directly]
- The relationship sits with **Ledcor's development arm** (Ledcor Property Investments — “LPI”), largely on the **Telus Living rental program** in Vancouver. **Three of its four rezonings were approved between Nov 2025 and May 2026** — the program is converting toward development permits, with structural mobilization to follow over the next 12–24 months [I — typical permit-conversion timing]. No structural engineer is publicly identified on any of the four [I]; KOR's own books answer half of that question: **KOR holds W 10th/Arbutus and Chester, and lost the E 10th and Kingsway proposals to a competitor whose identity was not recorded** — the program's structural seats are split, not KOR's outright.
- Ledcor's construction arm buys structural engineering only on design-build / early-contractor-involvement work** — the current flagship is BC Children's Centre for Health Complexity (Fast+Epp, completing Dec 2027); the previous one, BCIT Tall Timber (also Fast+Epp), opened Aug 2025. On its ordinary GC/CM work the *owner or architect* holds the structural seat [I — synthesized from the verified project set and standard delivery practice; no single source states it as a rule]. No prequalification roster was found — entry appears relationship-based. [I]
- The expansion paths, in order of realism: **(A)** close Steveston, debrief the two Telus Living losses, and contest the rest of the program from the half KOR holds; **(B)** the design-build institutional lane via Ledcor's preconstruction/BD people; **(C)** Alberta — KOR's own CRM already holds two open Alberta-region Ledcor engagements; **(D)** mass-timber-adjacent institutional (differentiated from Fast+Epp, who hold the flagship); **(E)** Ledcor's US development arm — building right now in San Diego, inside KOR's own US market, with a family precedent already in KOR's books (Section 5E).
- This dossier includes an honest **risk section** (a federal labour-board adverse finding, a 2025 court case, soft financial figures) — the case for Ledcor stands *with* those facts on the table, not by omitting them.

2. What KOR's own books show [KOR books — verifiable in Deltek]

Project	Status	Fee	Date
730 Raymur Ave, Vancouver	Won (AP = accepted proposal)	\$260,000	Jun 2025
2212 W 10th Ave, Vancouver	Won (AP)	\$130,000	Apr 2024
6486 Chester St, Vancouver	Won (AP)	\$75,000	Oct 2024
14780 North Bluff Rd, White Rock	Won (AP)	\$55,000	Feb 2026
Telus Co Building W 10th, Vancouver	Won (AP)	\$40,000	Jul 2025
Steveston No 2 Rd, Richmond	Submitted (Deltek stage: InPursuit)	\$61,000	pending
Deep Cove North Vancouver	Pursuing (Deltek stage: InPursuit)	—	open
Trinity 354 E 10th Ave	Lost (Deltek stage: LOST)	\$175,000	winner not recorded
Hemlock Kingsway	Lost (Deltek stage: LOST)	\$125,000	winner not recorded
Trinity Triangle E 10th	Lost (Deltek stage: LOST)	—	winner not recorded

- Buyer of record: **Ledcor Property Investments Ltd.** (18 of 20 pursuit records) and TELUS-c/o-Ledcor (2). Ledcor Construction Ltd. is also a Deltek client (**CL00238**), but the pursuit thread there is thin — that’s the expansion gap, not the base.
- **Invoiced to date [Deltek LedgerAR, revenue account 4001]: \$103,600 across five projects** — 6486 Chester St (31162) \$30,000 (billing Nov 2024 – Jun 2026), Telus CO Regent (70063) \$27,600 (Aug 2025 – Jun 2026), 730 Raymur (31196) \$25,000 (Jul 2025 – Jan 2026), Telus CO White Rock (70065) \$11,000 (Feb – Jun 2026), Regent 2212 W 10th (31141) \$10,000 (Jul 2024 – Jan 2025). These are invoiced dollars, not proposal values — and three of the five projects issued invoices in June 2026. Project numbers are given so every figure can be pulled up in Deltek directly.
- The ledger also carries the **older Ledcor Construction relationship**: Parksville Civic and Technology Centre, the RockRidge Canyon Club Room, West Vancouver residential consultations — and the **Lede Residence in La Jolla, California**. KOR has already done work for the Lede family in Southern California (relevant to Section 5E).
- KOR’s CRM also holds **two open Alberta-region Ledcor engagements** (early-stage, owners on file). The Alberta angle is already open in our own system.
- *Data note*: the pursuit list contains sync duplicates (same project at several stages). The table above uses **Deltek’s current project stage as the source of truth** (_{WDEF} = won; InPursuit = live; LOST = lost) — re-verified directly against Deltek on 2026-07-02, and checkable there by project number. The two “Trinity E 10th” entries are **not** duplicates: Deltek carries Trinity 354 E 10th (20159) and Trinity Triangle East 10th (20476) as separate projects — both, honestly, lost.

3. Who Ledcor is [V unless noted]

- **Private, family-owned group**, founded 1947 in Leduc, AB by Bill Lede. Head offices: **Vancouver** (1055 W Hastings) and San Diego (US). Edmonton is a branch office — the old “dual-HQ” description is outdated.
- **Eight divisions** on the current ledcor.com: Building, Communications (LTS), Electricity, Energy, Infrastructure, Mining, Properties, Transportation. Building work in BC/AB runs through **Ledcor Construction Limited**; development through **Ledcor Properties / LPI**.
- **Leadership**: **Dave Lede** — **Chairman and CEO** (active, not emeritus). **Jeff Watt** — **President, Ledcor Group of Companies** (since Jan 13, 2025). **Russell Zirnelt** — **EVP, Ledcor Construction Ltd** (heads building construction Canada-wide). Development: **Andrew Voysey** — **EVP, Ledcor Properties** (the top Properties seat on Ledcor’s current pages; the previously-cited “Pat Patterson, President” traces to a 2020 release and no longer appears on their rosters — dropped on re-check).
- **Scale [I — estimates only, no audited figures]**: roughly **\$5B revenue** (aggregator estimates \$5–5.8B), **~7,000 employees** (LinkedIn band 5,000–10,000), historically a **top-3–5 Canadian contractor** (On-Site Magazine rankings; table gated). Treat all three as estimates.
- **Direction 2024–26**: no M&A; growth is megaproject JVs (Surrey Langley SkyTrain, Edmonton Capital Line LRT, Cedar LNG, **BC Children’s Centre for Health Complexity**) plus real mass-timber delivery (BCIT Tall Timber). A “data centre” push exists in marketing only — no built work found. [V]

4. How Ledcor buys structural engineering (the core analysis)

The rule [I — synthesized from the verified project set below; no single source states it]: on Ledcor’s ordinary GC / construction-management work, the **owner or architect** procures the structural engineer — Ledcor doesn’t hold that decision. Ledcor picks the structural engineer only where it owns the design: **design-build, P3, and early-contractor-involvement** work — roughly one flagship at a time.

The verified evidence:

Project	Delivery	Structural engineer	Status
BC Children’s — Centre for Health Complexity	Ledcor Design-Build (selected Jul 2024)	Fast+Epp	Under construction; complete Dec 2027 [V]
BCIT Tall Timber Student Housing (12-st CLT)	Ledcor GC, early contractor involvement	Fast+Epp	Opened Aug 25, 2025 [V]
Northern Lights College Trades Centre, Dawson Creek	Ledcor builder	Equilibrium Consulting (design/consulting credit)	Complete 2018 [V]
James Cowan Theatre, Burnaby	Ledcor Design-Build	Not publicly named — no source; do not repeat the Glotman rumour	In delivery [V — contractor confirmed; SE not named]
Brock Commons UBC	—	<i>Not a Ledcor project</i> (built by Urban One; F+E structural) — a common misattribution, corrected here	[V]

Who decides [V for the named people; I for the process]: design-team selection sits with the **preconstruction/estimating and business-development function** at pursuit stage. Verified people in those seats: **Aaron Grenier** (Director, Estimating & Preconstruction — title independently confirmed twice) and **Barry Murphy** (Director of Business Development). No “Design Manager, Building Construction” is publicly named — this dossier does not invent one. There is **no public design-partner roster or portal** — the way in is the relationship. [I — absence-of-evidence]

Honest boundary [V]: Ledcor’s healthcare-buildings record is thin — Cowichan, Royal Columbian, the new Surrey hospital, and Calgary Cancer Centre all went to EllisDon/Bird/PCL. Its healthcare anchor is the PHSA/BC Children’s campus. Don’t pitch Ledcor as a healthcare volume channel; pitch the *design-build lane* wherever it points.

5. Expansion paths, ranked

A. Telus Living program — converting, with the structural seats split and KOR holding half. [V + KOR books] Four LPI/TELUS rental projects in Vancouver; **no structural engineer publicly identified on any** [I — absence-of-evidence; see Section 7]; three rezonings **approved** (Chester St — 6-storey, Nov 2025; W 10th/Arbutus Walk — 25-st, Mar 2026; E 10th — 25-st, May 2026), Kingsway (25-st, 233 units) still pre-hearing (public Q&A runs July 15–28, 2026). Approvals now convert through development and building permits — structural mobilization typically follows over 12–24 months, so the window is real but not a sprint. KOR’s books answer what the public record can’t: **KOR won W 10th/Arbutus and Chester** (program invoicing ran as recently as June 2026), and **lost the E 10th (\$175k) and Kingsway (\$125k) proposals** — Deltek stage LOST on both, winning firm not recorded. **Steveston Richmond (\$61k) remains live**, and Deep Cove is in pursuit. Competitive reality: LPI has used **John Bryson & Partners (now BMZ)** on a past tower (The Charleson), Fast+Epp holds the construction arm’s flagships, and an unidentified competitor has taken program towers off KOR — per the Deltek record stamps, Trinity 354 was marked lost by Sep 2024, Kingsway by Nov 2025, and **Trinity Triangle on June 18, 2026 — two weeks ago**. Finding out who and why is a live question, not history. The earlier “Trinity” bookkeeping question is resolved: Deltek carries Trinity 354 E 10th and Trinity Triangle E 10th as **two separate projects** (20159, 20476) — both lost. Action: close Steveston; get the loss debrief from LPI (Lorne Wolinsky, VP Development, Vancouver) — who won E 10th and Kingsway, and on what basis — and contest the program’s remaining structural work from the two projects KOR holds. **B. The design-build institutional lane. [V]** James-Cowan-type municipal design-builds are where Ledcor Construction picks structural partners. Route: Grenier (precon) + Murphy (BD) + Boyce (SVP BC). *Watch item — re-set June 30, 2026: Surrey City Centre Arena* changed the day before this dossier was first issued: Surrey announced an agreement in principle with **Wesgroup Properties** — a \$116.6M land swap relocating the arena to 10355 King George Blvd, now a **~\$360M, 10,000-seat “City Centre Arena and Cultural Event Centre”** (Vancouver Giants anchor tenant), **construction ~2027, completion 2030**. No design-builder, architect, or structural engineer is named (Wesgroup is the land-swap counterparty, not a confirmed builder). The design seat is likely still ahead of procurement — but on a 2027 clock, not an August one. Monitor; no evidence Ledcor is involved. (A July 2 political dispute over the land-swap price — a former mayor alleging overpayment, the current mayor denying it — does not change the announced deal terms or timeline.) **C. Alberta. [KOR books + V]** Two Alberta CRM engagements already open in KOR’s system; Grenier appears Edmonton-based [I]; Ledcor Construction won a **\$16.6M institutional-buildings contract in Dec 2025** [KOR platform awards data]. Modest, real, and adjacent to KOR’s Edmonton push. **D. Mass-timber-adjacent institutional. [V]** Ledcor delivers mass timber (BCIT) but **Fast+Epp holds the flagship relationship** (BC Children’s + BCIT). Don’t contest that lane head-on; position for the *next tier* of institutional timber (the Northern Lights/Equilibrium precedent shows they use specialist SEs project-by-project). **E. The US development arm — in KOR’s own backyard. [V — added 2026-07-02, independently fact-checked]** Ledcor **sold its California general-contracting business in 2019** (Napa operation to davisReed, by its own press release, to refocus on property development and telecom) — so its real US buildings play is **Ledcor Development LP, US head office in San Diego** (6405 Mira Mesa Blvd, per its own contact page): a steady, modest developer with **seven identified projects — six in California, one in Redmond, WA — since 2016**. What’s live now:

Project	Where	Scale	Status
ALARA	Golden Hill, San Diego	8-storey, 213 units, \$107M; partners Qualico US + Tokyu Land US	Broke ground Apr 2025; delivery targeted Q1 2027 per the groundbreaking announcement — under construction, so its design team is set: background intel, not a pursuit
Hercules Bayfront “The Village”	Hercules, CA (Bay Area)	171 townhomes approved Sept 2025 (council vote per trade coverage); plus a 207-key hotel application and ~330 further townhomes in rezoning	Design work ahead — pursuit-shaped
Sunny Creek (next phases)	Carlsbad, CA	~330 townhomes being entitled beyond the built 212 apartments	Entitlement — pursuit-shaped

Competitive reality, stated plainly: the only US project with a publicly documented structural engineer is their Long Beach flagship **Shoreline Gateway (35-storey) — Englekirk**, a major SoCal firm. On the other six projects the engineer of record wasn’t publicly findable (city permit lookups would resolve it). A KOR pitch in the US is therefore **displacing or supplementing an established incumbent, not filling a vacuum** — but three things travel in KOR’s favour: **Andrew Voysey’s EVP Properties mandate is explicitly North-America-wide**; the senior US

operating executive is **John Santry, SVP US Mainland** (quoted at the ALARA groundbreaking; confirmed active in 2026 via independent profiles, though he does not appear on ledcor.com’s executive page — noted for accuracy); and KOR’s own ledger already holds a Southern California precedent for the family (the **Lede Residence, La Jolla** — Section 2). The realistic move is not chasing ALARA (designed and building) but being introduced — through the live Vancouver relationship — before the **Hercules and Sunny Creek** phases pick their design teams.

6. People (verified only)

Person	Title	Where	Contact
Russell Zirnhelt	EVP, Ledcor Construction Ltd (buildings, Canada-wide)	Vancouver	russell.zirnhelt@ledcor.com (inferred pattern, unconfirmed)
Jonathan Boyce	SVP, British Columbia, Construction (early 2025)	Vancouver	jonathan.boyce@ledcor.com
Aaron Grenier	Director, Estimating & Preconstruction	Edmonton [I]	aaron.grenier@ledcor.com (verified)
Barry Murphy	Director of Business Development	—	barry.murphy@ledcor.com (verified)
Jeff Thompson	SVP, Corporate Development & National Accounts, Construction	—	jeff.thompson@ledcor.com (verified)
Lorne Wolinsky	VP, Development (Ledcor Properties)	Vancouver	via KOR’s active LPI projects
Andrew Voysey	EVP, Ledcor Properties (top Properties seat on current rosters; mandate is North-America-wide)	Vancouver	via LPI
John Santry	SVP, US Mainland, Ledcor Properties (active 2026 per independent profiles + ALARA press; not on ledcor.com’s exec page)	San Diego, CA	via the LPI relationship / US intro
Jeff Watt	President, Ledcor Group of Companies (Jan 2025)	Vancouver	jeff.watt@ledcor.com (inferred pattern, unconfirmed)
Dave Lede	Chairman and CEO	Vancouver	relationship level

Dropped after verification (do not cite): Billy O’Donovan (likely departed — his LinkedIn signals another firm), “Mike Roper, VP Northern Alberta” (aggregator-only, no primary source), and **Pat Patterson as Properties President** (traces to a 2020 release; absent from Ledcor’s current executive and Properties team pages — re-checked 2026-07-02). Development-arm working contacts are best reached through KOR’s live LPI projects — our PMs already know them.

7. The skeptic’s section — risks, weaknesses, and what we could not verify

Adverse findings on the record [V]:

- **CIRB (two orders):** the Board unanimously found **LTS Solutions — Ledcor’s telecom-services subsidiary, not the Building division KOR would contract with** — bargained in bad faith with IBEW Local 213 (finding dated **Nov 10, 2022**: “makes a mockery of the collective bargaining process”), then imposed a two-year first collective agreement by a **separate order, June 22, 2023** — reported in the trade press as the first successful Canada Labour Code first-agreement imposition since 1986. The dispute ran from the union’s Aug 2017 certification. A formal federal adverse finding against a group company, disclosed here for completeness and scoped accurately.
- **DMS v. Ledcor Construction, 2025 ONSC 5100:** Ledcor’s termination of a subcontractor was **upheld** (chronic understaffing, repeated warnings), but the court cut Ledcor’s back-charges from \$5.55M claimed to \$2.45M awarded and rejected its delay claim entirely for lack of critical-path analysis. The judicial criticism ran in both directions — read it as a caution on documentation discipline, not a scandal. A companion ruling, **2026 ONSC 188**, later awarded Ledcor **\$415K in costs** against DMS — on balance the litigation record favours Ledcor. **Soft numbers [I]:** revenue/headcount/ranking figures are aggregator estimates — Ledcor publishes no audited financials. Nothing in this dossier hangs on them. **Thin spots [V]:** healthcare-buildings record beyond the PHSA campus is thin (Section 4); no data-centre building work found despite marketing; the “Telus Living — no SE named” finding is absence-of-evidence across public coverage (the rezoning booklets themselves returned errors on direct fetch). **Could not be checked by machine (open items):** WorkSafeBC and US OSHA penalty databases (require manual queries); BC Bid / Alberta

Purchasing Connection postings (not indexable — a live pursuit could exist there without appearing in this document); confirmation of who leads Ledcor's Edmonton buildings office; the structural engineer of record on six of the seven US projects (city permit-portal lookups would resolve); the US portfolio's total value (the "8 projects / \$2B+" figure dates from a 2020 release — treat as directional only).

8. Recommended actions (dated)

1. **Now:** close **Steveston (\$61k — the one live proposal)** and progress Deep Cove. Get the **loss debrief** on E 10th and Kingsway (both Deltek stage LOST, winner not recorded — Trinity Triangle's loss was recorded June 18, 2026): who won, and on fee or relationship? The answer likely names the competitor for the rest of the program.
2. **July:** ask Wolinsky/LPI for a program-level conversation from inside the active relationship — KOR invoiced three LPI projects in June. The honest pitch: KOR holds W 10th and Chester; make the case to consolidate the program's remaining structural work, and use the conversation to learn who took E 10th and Kingsway.
3. **July–August:** introduce KOR to Ledcor Construction's precon/BD (Grenier, Murphy; Boyce at the relationship level) — goal: be on the call list for the next design-build pursuit's structural seat. Reference the live LPI work as the family credential.
4. **Monitor:** the re-set Surrey City Centre Arena (June 30 Wesgroup land-swap; ~\$360M, new King George Blvd site, construction ~2027) — watch for the design-team procurement; the clock is 2027, not August.
5. **Q3 (US):** brief KOR's San Diego office on Ledcor Development LP — its US head office is in San Diego, ALARA is building there now (delivery targeted Q1 2027 — background), and the pursuit-shaped work is the **Hercules "Village" townhomes (approved Sept 2025) and the Sunny Creek Carlsbad phases**. The introduction can travel through the live Vancouver relationship: Voysey's mandate covers North America, and KOR's ledger already holds the Lede Residence, La Jolla. Target: John Santry (SVP, US Mainland, San Diego).
6. **Ongoing:** progress the two Alberta CRM engagements already in KOR's system; verify Ledcor's Edmonton buildings leadership before any AB outreach.

Appendix — source list (primary)

ledcor.com (executive profiles, locations, newsroom incl. Patterson-2020 and davisReed-2019 releases, US pages, project galleries) · ledcordevelopment.com (team; contact page — US head office; Sunny Creek project page) · businesswire.com (ALARA groundbreaking, Apr 2025) · pacific-structures.com + buildgc.com (Shoreline Gateway design team incl. Englekirk) · Hercules, CA council coverage (The Village approval, Sept 2025) · news.gov.bc.ca (BC Children's DB selection; BCIT opening) · fastepp.com (BC Children's + BCIT structural credits) · equilibrium-eq.com (Northern Lights College) · facilities.ubc.ca (Brock Commons — Urban One) · council.vancouver.ca (E 10th May 5 2026 + Chester Nov 13 2025 approvals) · shapeyourcity.ca + Daily Hive (3696 Kingsway) · CityHallWatch (Arbutus Walk approval) · surrey.ca + Daily Hive (City Centre Arena procurement) · ellisdon.com / bird.ca / pcl.com (healthcare counter-record) · canada.constructconnect.com (CIRB ruling; James Cowan) · CanLII via Singleton Reynolds (2025 ONSC 5100) · burnaby.ca (James Cowan) · KOR Deltek/CRM (pursuit and engagement records; check the project stages and fee-proposal statuses directly by the project numbers given in Section 2). *Research method: KOR's internal records first, then three independent research passes, then two independent fact-checking passes that corrected or removed every claim that failed (Brock Commons misattribution removed; two people dropped; tower statuses updated to the current approvals; one structural-engineer rumour cut). Prepared 2026-07-01. Independent re-review 2026-07-02: Patterson dropped (stale — Voysey holds the Properties seat), Surrey Arena watch re-set to the June 30 Wesgroup land-swap announcement, CIRB dates made precise (Nov 2022 finding; Jun 2023 imposition; telecom subsidiary scoped), 2026 ONSC 188 costs award added, BCIT date corrected, and absence-of-evidence findings retagged [1]. Every other load-bearing claim — the verified project set, the remaining named people, the court figures to the dollar, all four tower statuses — survived fresh primary-source re-checks. Update 2026-07-02: invoiced-revenue figures pulled directly from the Deltek ledger (account 4001); every pursuit status re-verified against Deltek's current project stages, which corrected the earlier "pending" list — the E 10th and Kingsway proposals are lost, not pending (this document reports the win/loss record as Deltek shows it); the Trinity bookkeeping question resolved (two separate projects, both lost); and a US-development section added after its own research pass plus an independent fact-check (six claims tested: five confirmed, one corrected — the check found an additional approved Bay Area project the first pass had missed). Final same-day review pair (19 external claims re-fetched; full internal-consistency audit): one factual error caught and fixed (Ledcor Development's US head office is San Diego, not Irvine — per its own contact page), evidence tags tightened, and every figure re-cross-checked against Deltek and the source list.*
