

Maple Ridge 'Recreation Ready' - BD Dossier

Hammond Aquatics + Albion Arena + Ballpark | KOR Structural - Business Development | 19 Jun 2026 | INTERNAL

Bottom line

- A \$393M, referendum-gated municipal program - not a live RFP. HCMA is the prime architect, and their go-to aquatic-centre SE is Fast + Epp (KOR's main civic/timber rival), so the seat is contestable but defended. KOR's hand is stronger than it looks: Deltek shows a real rec/aquatic/arena resume (POCO Rec Centre, Parkinson Kelowna, Burnaby Lake Aquatic, Nelson Arena) - a genuine counter to Fast + Epp. The play is relationship-led positioning over the next 12-18 months: get on HCMA's team (we already hold 23 HCMA contacts incl. the Recreation director) and watch the October 2026 referendum that gates the whole thing. Detailed-design SE selection is ~2027 - there is time, and entry is the constraint, not capability.

1. The program (3 projects, \$393M)

Project	Est. cost	Construction start	Notes
Hammond Aquatics & Recreation Centre	\$227M	2029	The prize - heavy SE scope
Albion Arena Expansion (twin ice rinks)	\$143M	2028	Arena = timber; a parallel SE target
Golf Course -> Ballpark (Phase 1)	\$23M	2027	Minimal structural; enables Hammond site

Funding: borrow up to \$393M over 25 years - 60% taxpayer (3%/yr tax increase 2027-2030), 40% developer Amenity Cost Charges (~\$19K/unit). GATED by a referendum at the October 2026 municipal election. Council committee June 23, 2026; Council approval of designs + funding strategy June 30, 2026.

2. Hammond Aquatics - the target (deep detail)

- 122,000 sq ft over two storeys; aquatic hall ~65,000 sq ft. Site: Larry Walker / Hammond Stadium ball fields at Hammond Community Park (after the golf-course -> ballpark land swap).
- Aquatics: 37.5 m, 8-lane lap pool (movable bulkhead -> 25 m / 12.5 m), climbing wall + diving platforms; leisure pool w/ lazy river, play features, waterslide; 2 hot pools, cold plunge, steam, sauna.
- Community: full gymnasium, fitness/cardio/weights, fitness studios, multipurpose + arts/culture rooms, children's play, cafe; above- and below-ground parking (structurally significant).
- Structural character: long-span aquatic roof over a corrosive natatorium + below-grade parking + pool-tank structures - the specialized aquatic-SE problem set where the incumbent's typology advantage lives.

3. Competitive reality - HCMA + Fast + Epp

- Architect: HCMA Architecture + Design (Vancouver) - Canada's premier aquatic/rec architect (Grandview Heights, tememsew'txw New West, Rosemary Brown, Maple Ridge Leisure Centre). They own this typology.

- Incumbent SE: Fast + Epp. HCMA's signature aquatic centres are Fast + Epp structural with mass-timber/CLT hybrid roofs (Kalesnikoff CLT). Per our competitor map, Fast + Epp = the BC timber/civic+K12 dominator - this is their home turf.
- Implication: Fast + Epp is the presumptive structural partner on HCMA's schematic work now. But the formal detailed-design SE selection is post-referendum (~2027), and the City (not just HCMA) has procurement say on a \$227M public project.

4. KOR's credential case (the counter - from Deltek)

- POCO Recreation Centre (Port Coquitlam) - Phases A/B/C + pool/fitness. A Lower-Mainland municipal rec-centre-with-aquatics - the single most on-point reference.
- Parkinson Recreation Centre, Kelowna (active) - major municipal rec centre.
- Burnaby Lake aquatic pursuit + the delivered Burnaby Lake Recreation Centre (public/institutional).
- Arena work: Nelson Arena, Rogers Arena South Tower, preliminary arena structural - relevant to the Albion twin-rink parallel.
- The pitch: 'We're the available, principal-led SE that has actually delivered Lower-Mainland municipal recreation + aquatics (POCO, Burnaby Lake, Parkinson) and arenas - bring us onto the Hammond / Albion team.'

5. Honest gaps & risks

- No existing City of Maple Ridge or HCMA Deltek relationship - KOR is cold to both (mitigated: 23 HCMA contacts already in our graph).
- Fast + Epp's HCMA lock + timber-aquatic typology ownership - the hardest barrier. KOR must match the mass-timber aquatic story or win on availability/responsiveness + municipal-rec record + cost.
- Referendum risk (Oct 2026): the entire \$393M program is contingent on the public vote. Tax-increase optics (\$90 -> \$385/yr) are a real failure risk. Don't over-invest before the vote signals.
- Long horizon: Hammond construction 2029 -> detailed-design SE selection ~2027. A positioning pursuit, not near-term revenue.

6. Contacts

HCMA (prime architect - already in our graph, verified emails)

Name	Role	Email
Tracy Liu	Director, Community + Recreation - THE target	t.liu@hcma.ca
Darryl Condon	Managing Principal	d.condon@hcma.ca
Joshua Potvin	Project Director	j.potvin@hcma.ca
Maeve Counihan	Project Director	m.counihan@hcma.ca

City of Maple Ridge (owner): Mayor Dan Ruimy (program champion - political will = referendum) | Stephane Labonne, GM Parks, Recreation & Culture (per 2022 hire - verify current) | RecFacilityStudy@MapleRidge.ca, 604-467-7310.

7. The play (sequenced to the gates)

1. **Now -> mid-2026: warm HCMA.** Open with Tracy Liu - lead with POCO Rec Centre + Burnaby Lake + Parkinson. Be HCMA's known, credible rec/aquatic SE in time for the post-referendum team.
2. **Watch the gates.** June 23 / June 30, 2026 Council decisions and the Oct 2026 referendum gate everything. Don't commit pursuit cost before the vote signals favorably.
3. **Run Albion Arena (2028) as a parallel.** Also timber, slightly earlier, arguably more contestable than the flagship aquatic; KOR's arena credentials apply.
4. **Build the City relationship independently.** Maple Ridge has a \$115.6M/yr capital plan, 99 projects (Fire Hall No.3 \$35M, Protective Services Building) - a City relationship compounds beyond this program.
5. **Decide the mass-timber position.** To contest Fast + Epp's aquatic typology, KOR needs a credible CLT/hybrid-aquatic story (ties to the open BC/CA mass-timber question).
