Santa Clara Medical Center (new flagship hospital)

Santa Clara, CA · Healthcare · USD 2,800,000,000 @1.36 (2026-06-02)

ARCHITECT HGA

CONTACT see firm page

CHANNEL **architect-subconsultant** — already underway — West campus (Phase 2) in design/construction now, opening targeted 2027; structural engineer (Buehler Engineering) already engaged by HGA on the East campus phase

Sutter uses IPD-IFOA (Integrated Form of Agreement) with HGA as architect-of-record; HGA/DPR assembled the trade team including structural (Buehler) directly — pitch HGA/DPR, not a public owner RFP.

Emeryville Medical Center (new flagship East Bay hospital)

Emeryville, CA · Healthcare · USD 1,000,000,000 @1.36 (2026-06-02)

ARCHITECT SmithGroup

CONTACT Daniel Cusick, AIA Health Studio Leader / Principal, Los Angeles · daniel.cusick@smithgroup.com
Rosa Sheng, AIA Vice President, Higher Education Studio Leader (San Francisco / Northern California); Director of Justice, Equity, Diversity & Inclusion · rosa.sheng@smithgroup.com

CHANNEL **architect-subconsultant** — very early — construction not slated to start until 2029, opening 2033; design team (led by SmithGroup) still forming, structural engagement likely 2027-2028

SmithGroup is architect for the \$1B Emeryville flagship campus (Building 8 tower); Sutter's prior projects (e.g. Santa Clara) used IPD with architect/CM assembling structural — expect the same pattern once entitlements clear, so target SmithGroup/likely CM directly rather than a public bid.

Red Deer Regional Hospital Centre Redevelopment

, AB · Healthcare · 1000000000

ARCHITECT DIALOG

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **design-build** — ambulatory building: proponent teams forming now after province cancelled the P3 and re-launched as design-build (2026); patient tower/renovation: already under construction via traditional CM delivery led by DIALOG's design team

Two-track project — the new patient tower uses traditional Construction-Management delivery with DIALOG as architect (structural already on that team); the separate ambulatory building was re-procured as design-build after AHS scrapped the P3, so for that piece pitch the DB contractor/proponent team, not AHS directly.

Dawson Creek and District Hospital Replacement

Dawson Creek, BC · health · \$590M

ARCHITECT HDR Architecture

CONTACT Troy Ransdell Health Principal, co-leader of HDR healthcare sector · troy.ransdell@hdrinc.com
Jim Aalders Western Canada Civic Director, VP, HDR · jim.aalders@hdrinc.com

CHANNEL **architect-subconsultant** — design team already assembled and past design development; project is in procurement for construction delivery now (per Northern Health 'next step in procurement' update, 2025-2026) — structural engagement already happened at design phase

Reported project team already includes NORR Architects & Engineers, R.V. Anderson and Sener SES Canada under PM Colliers Project Leaders — structural was engaged as an architect/engineering sub during design; the current procurement milestone concerns the construction contractor, not a fresh SE opportunity.

VGH & UBC Hospital Foundation — West 12th Avenue Two-Tower Redevelopment (Phase 1 West Tower)

Vancouver, BC · Healthcare · ~\$400 million (Phase 1 west tower); full two-tower project ~\$885M total floor area

ARCHITECT Musson Cattell Mackey Partnership / PFS Studio (landscape)

CONTACT Mark Thompson Partner, Mark E. B. Thompson Architect Ltd. (Partner-in-Charge)
Mark Whitehead Partner, Mark Whitehead Architect Ltd.

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Glotman Simpson (dominant)

CHANNEL **architect-subconsultant** — early planning — two-tower redevelopment (Phase 1 West Tower) has development-permit/rezoning approval but no public construction procurement yet; structural engagement expected as MCMP scales up design development, no firm date announced

Musson Cattell Mackey Partnership (MCMP) is lead architect for the Foundation-driven redevelopment; no P3/design-build or owner-direct SE procurement notice found — approach is via the architect's consultant team as design development proceeds.

La Jolla Outpatient Pavilion

La Jolla, San Diego, CA · Healthcare · USD 250,000,000 @1.36 (2026-06-02)

ARCHITECT HGA Architects

CONTACT see firm page

CHANNEL **design-build** — Construction start spring 2026, operations fall 2028; contractor (Tutor Perini) leads design-build team and procures design-assist/design-build subconsultants including structural now through pre-construction phase

UC San Diego capital project using design-build delivery — pitch the contractor (Tutor Perini), not the architect of record, for structural sub-consultant slot; UC Regents docs (regmeet/aug24 h1.pdf) confirm project scope/budget but not SE selection.

Burnaby Hospital Redevelopment and BC Cancer Centre Phase 2

Burnaby, BC · health

ARCHITECT Parkin Architects Western (with PCL)

CONTACT Kyle Basilius Principal / Senior Healthcare Planner · basilius@parkin.ca
Shane Czpyha Principal, Architect AIBC · czpyha@parkin.ca

CHANNEL **design-build** — On-hold pending provincial funding release; Alliance non-owner participants (PCL Constructors Westcoast + Parkin Architects Western) already selected via RFQ in 2024 — SE engagement will follow as an alliance team member once Phase 2 funding/construction is confirmed (Burnaby Board of Trade pushing gov't to restart, Mar 2026)

Procured as a Single TOC Alliance (risk-share, not classic DB/DBB); structural engineer will be brought in by the PCL/Parkin alliance team, not procured directly by Fraser Health/Infrastructure BC — watch for alliance restart announcement, not a standalone SE RFP.

Burnaby Hospital Phase 2

Burnaby, BC · health

ARCHITECT Parkin Architects Western Ltd.

CONTACT Kyle Basilius Principal / Senior Healthcare Planner · basilius@parkin.ca
Shane Czypyha Principal, Architect AIBC · czypyha@parkin.ca

CHANNEL **design-build** — Same as #4361 — on-hold pending funding restart; Alliance team (PCL + Parkin) already in place from 2024 RFQ, SE joins as alliance subconsultant once project resumes

Duplicate/near-duplicate record of #4361 (Burnaby Hospital Redevelopment and BC Cancer Centre Phase 2) — same Alliance procurement, same on-hold status; treat as one pursuit target.

Vancouver General Hospital Campus Redevelopment — Building 1 (Phases 1 & 2)

, BC · Healthcare

ARCHITECT Kasian Architecture, Interior Design and Planning

CONTACT Ian Sinclair Principal, VP Healthcare & National Healthcare Lead (MHA, CHE) · ian.sinclair@kasian.com

Christine Weber Principal, Interior Design — Senior Living & Healthcare specialist (RID, CHID, NCIDQ, Eden Associate) · Christine.Weber@kasian.com

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Bush, Bohlman & Partners LLP (frequent)

CHANNEL **architect-subconsultant** — Pre-design architecture + engineering services RFP already issued (Building 1 / Emergency Department Expansion, In-Patient Tower) requiring pre-qualified structural sub-consultants under the prime design team — active now

Structural engineer is procured as a sub-consultant within the architect-led design team (Kasian led the RFP for pre-design A+E services); pitch through the architect/prime consultant response, not directly to VCH.

Vancouver General Hospital Campus Master Plan Redevelopment (10-Phase)

Vancouver, BC · Healthcare

ARCHITECT Kasian Architecture Interior Design and Planning Ltd. (master plan); Durante Kreuk (landscape)

CONTACT Ian Sinclair Principal, VP Healthcare & National Healthcare Lead (MHA, CHE) · ian.sinclair@kasian.com

Christine Weber Principal, Interior Design — Senior Living & Healthcare specialist (RID, CHID, NCIDQ, Eden Associate) · Christine.Weber@kasian.com

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Bush, Bohlman & Partners LLP (frequent)

CHANNEL **unknown** — Still at concept/rezoning stage (30+ year, 10-phase master plan; rezoning application filed with City of Vancouver); individual phase design teams — and any structural engineer procurement — not yet formed

This is the campus-wide master plan umbrella (Kasian masterplanner + Durante Kreuk landscape) that #6494 Building 1 sits under; too early to call delivery model for individual future phases — watch for phase-specific RFPs as rezoning advances.

Lions Gate Hospital — Health Vision Future Redevelopment (Phase 4+)

North Vancouver, BC · Healthcare

ARCHITECT IBI Group (master plan); dys architecture (Phase 3)

CONTACT David Wood Principal, Practice Group Manager, Healthcare — Arcadis (formerly IBI Group)
Titka Seddighi Principal, Arcadis (Toronto)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL **architect-subconsultant** — still at concept/master-plan stage; formal design-team RFP for Phase 4 not yet issued as of mid-2026

IBI Group holds the master plan; Phase 3 (Paul Myers Tower) opened 2025, Phase 4 scope/timeline not yet formalized — watch VCH/Infrastructure BC for the next design-team procurement, expect architect-led team assembly (IBI or successor) when it launches.

New Surrey Hospital and BC Cancer Centre

Surrey, BC · health

ARCHITECT ZGF Architects + Parkin Architects (JV)

CONTACT see firm page

CHANNEL **design-build** — proponent team (EllisDon/PCL) engaged since award; structural already locked in, targeted completion/opening 2030

Delivered via Design-Build; EllisDon Design Build and PCL Construction are the DB proponents — structural engineer was selected as part of the DB team, not procured separately by Fraser Health.

Clinical Support and Research Centre

Vancouver, BC · health

ARCHITECT Diamond Schmitt Architects (with Kirsten Reite Architecture, co-architect)

CONTACT Ana Maria Llanos Principal & Vancouver Studio Leader, Diamond Schmitt
Donald (Don) Schmitt Principal & Co-Founder, Diamond Schmitt

CHANNEL **architect-subconsultant** — prime consultant team (Diamond Schmitt + Kirsten Reite) selected Feb 2024; PCL is CM; structural sub-consultant slot likely already filled under Diamond Schmitt, occupancy targeted 2029

Diamond Schmitt/Kirsten Reite is the Prime Consultant (design) team under a Construction-Manager (PCL) delivery model — structural was pitched to the architect team in 2024, not procured directly by Providence.

St. Vincent's Heather Long-Term Care Home

Vancouver, BC · health · 207

ARCHITECT DYS Architecture

CONTACT Laurie Mackintosh Principal, dys architecture (Architect AIBC, MRAIC)
Darcy Imada Principal, dys architecture (Architect AIBC, Certified Passive House Consultant)

CHANNEL **architect-subconsultant** — construction manager (Urban One Builders) confirmed and construction started Aug 2025 — structural team already locked; opening targeted late 2028

DYS Architecture is the design lead under a CM (Urban One Builders) delivery model; structural was engaged as DYS's subconsultant well before the Aug 2025 construction start — record's 'Procurement' stage is stale, this window has closed.

Cottonwoods Care Centre Redevelopment (Kelowna)

, BC · health · 186870000

ARCHITECT Stantec Architecture Ltd. (contract cancelled 2026)

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) ·
tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **unknown** — on hold — province cancelled Stantec prime-consultant and Bird Construction CM contracts in 2026, citing fiscal pressure; re-procurement timing not announced

Both the prime consultant (Stantec) and CM (Bird) contracts were cancelled; Ministry says project 'will move forward' but has not stated a re-procurement path or timeline, so channel is genuinely unclear until a new RFP is issued.

Cottonwoods Care Centre

Kelowna, BC · health · 186870000

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — design team already engaged (Stantec awarded prime consultant contract ~Mar 2025); construction started fall 2025 — SE seat likely filled, monitor for late add/expansion phases

Interior Health procured Stantec directly as prime consultant (with Bird Construction as CM); Stantec assembles the sub-consultant team, so pitch Stantec, not Interior Health.

Southern Alberta Compassionate Intervention Centre (Spyhill, Calgary)

, AB · Healthcare · 159000000

ARCHITECT B+H Architects

CONTACT Michele Cohen National Principal, Healthcare — B+H Architects
Warren Schmidt Principal, Vancouver Studio — B+H Architects

CHANNEL **architect-subconsultant** — design phase now, funded via Budget 2026 (\$291M over 2026-29); B+H already named as architect — pitch for SE seat immediately

Alberta Infrastructure owns the program but B+H Architects is already the named design lead for the Calgary Spyhill facility; SE would join as B+H's subconsultant.

Foothills Medical Centre NICU Expansion

Calgary, AB · Healthcare · \$66M govt + additional foundation funding; total ~\$152M

ARCHITECT Kasian Architecture Interior Design and Planning Ltd.

CONTACT Ian Sinclair Principal, VP Healthcare & National Healthcare Lead (MHA, CHE) · ian.sinclair@kasian.com

Christine Weber Principal, Interior Design — Senior Living & Healthcare specialist (RID, CHID, NCIDQ, Eden Associate) · Christine.Weber@kasian.com

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Bush, Bohlman & Partners LLP (frequent)

CHANNEL **architect-subconsultant** — design underway now (funded by \$152M Newborns Need collaboration between AHS/Alberta Health/Calgary Health Foundation)

Kasian Architecture is the named design firm for AHS/Alberta Infrastructure; SE engagement flows through Kasian as subconsultant, not a separate owner tender.

New Long-Term Care Home — Campbell River

, BC · health · 134000000

ARCHITECT Stantec

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — on-hold per project stage; Stantec was selected via RFP in 2024 as sole consultant for all 3 Island LTC homes (incl. Campbell River) — re-engage Stantec once project resumes

Island Health ran the consultant RFP once and picked Stantec to design all three homes; SE seat is Stantec's to fill, not a per-project owner procurement.

Calgary Radiopharmaceutical Centre — Foothills Medical Campus (reference — seats closed)

Calgary, AB · Healthcare · \$70M total (\$48.4M Budget 2024 contribution)

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — under construction, permits/CNSC Stage 3 approval obtained, Stage 4 commissioning anticipated 2027 — seats closed, reference only

Stantec engaged directly by Alberta Infrastructure for design/permitting on this cyclotron facility; construction already underway so this is a closed-seat reference project, not an active pursuit.

UWMC-Northwest — OPMC OSC Operating-Room Expansion

Seattle, WA · Healthcare · USD 40,900,000 @1.36 (2026-06-02)

ARCHITECT NBBJ

CONTACT see firm page

CHANNEL **design-build** — Design-build team already selected — Lease Crutcher Lewis (contractor) + NBBJ (architect); OR expansion in design now, SE joins as sub to the DB team, no separate SE procurement expected

UW procured via RFQ for Design-Build Services; team (Lewis/NBBJ) already selected, so SE is a sub-consultant to that DB team, not a separate bid.

Edmonton Recovery Community (Alberta Hospital Edmonton Campus)

Edmonton, AB · Healthcare

ARCHITECT Kasian Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Construction start targeted 2026; design team (incl. SE) likely already engaged under Kasian or nearing completion — watch Alberta Infrastructure / Recovery Alberta for any residual consultant RFP

Kasian is named lead architect for AHE campus work; Alberta Infrastructure typically retains prime consultant (architect) who then subcontracts SE — no evidence of a separate owner-direct SE procurement or DB/P3 structure for this project.

Southern Alberta Forensic Psychiatry Centre Phase 2 Redevelopment

Calgary, AB · Healthcare

ARCHITECT Altus Planning Inc. (business case lead)

CONTACT see firm page

CHANNEL **unknown** — Business case stage (Proposed – Planning) as of 2026-07; design/consultant team and delivery model not yet determined — no RFP timing published

Only a business case (led by Altus Planning, a planning/cost consultant, not the eventual design architect) exists; delivery model and SE engagement path won't be set until the business case is approved and a design team procurement begins — too early to call channel.

Stollery Children's Hospital – New Standalone Facility (Edmonton)

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Planning/design phase funded through 2026 (Budget 2025, \$11M over 3 yrs); design team RFP for full design consultant team plausible as planning concludes in 2026, construction is 5-8 years out

Stantec Architecture is named lead architect for the planning/design phase; Alberta Infrastructure's standard model retains a prime architect who assembles the consultant team (incl. SE) — no P3/DB signal found yet given how early-stage this is.

In-Patient Towers at Grey Nuns Community Hospital (Edmonton) – Planning

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Proposed – Planning stage; no published RFP timing found — monitor Alberta Infrastructure health-facility project list and Covenant Health for design-team procurement updates

Stantec Architecture is named lead architect for this planning-stage project under Covenant Health/Alberta Infrastructure; standard Alberta model has SE engaged as architect's sub-consultant, but this couldn't be confirmed with a project-specific source beyond the architect assignment.

Stollery Children's Hospital — New Standalone Facility (Planning)

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Planning phase underway through 2026 (Budget 2025 committed \$11M over 3 yrs for design/planning); structural sub-consultant selection expected once Stantec's team moves from planning into schematic design, no firm date announced

Alberta Infrastructure has already retained Stantec Architecture directly as architect of record; SE will almost certainly be brought on as Stantec's sub-consultant, not procured separately by the owner — pitch Stantec, not Alberta Infrastructure

Grey Nuns Community Hospital — New Inpatient Tower (Planning)

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Planning-only funding confirmed (\$7.22M over 2 yrs for Grey Nuns + Misericordia tower planning); no construction budget yet, so design team buildout beyond Stantec (incl. structural) likely mid-late 2026 into 2027

Same Stantec-led planning mandate as the Stollery entries (appears to be a duplicate/near-duplicate listing of #7065) — pitch Stantec for structural sub-consultant role

New Stand-Alone Stollery Children's Hospital — South Campus Site

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — South Campus site selected Nov 2025; planning anticipated to conclude in 2026; delivery method (traditional vs. P3/AFP) not yet announced by Alberta Infrastructure, which would affect timing of SE engagement

Duplicate/updated record of #7042 (same Stollery project, site now confirmed) — Stantec is architect of record, structural role expected as Stantec sub-consultant; watch for delivery-model announcement which could shift this to design-build

In-Patient Towers at Grey Nuns Community Hospital – Planning

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Preliminary planning funded through 2026-27 (\$7.22M for Grey Nuns + Misericordia); no construction funding or design-team RFP yet, scope/timeline for design-tender-construction still TBD per Alberta govt budget documents

Stantec already engaged as architect of record by Alberta Infrastructure; structural engagement will follow via Stantec once planning converts to design — no owner-run SE procurement identified

In-Patient Towers at Misericordia Community Hospital – Planning

Edmonton, AB · Healthcare

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **unknown** — Bundled with Grey Nuns under the same \$7.22M planning allocation; Misericordia-specific project page/architect confirmation not found — treat timing as tied to Grey Nuns planning progress through 2026-27

Could not independently verify Stantec's role or a dedicated Misericordia in-patient tower project page (only found the unrelated, already-complete \$85M ED expansion) — confirm architect/delivery model before assuming architect-subconsultant channel applies here too

BC Children's and BC Women's Hospitals — Redevelopment Phase 3 (Maternity Suites and Renovation)

Vancouver, BC · Healthcare · Not publicly disclosed
(Phase 3 of phased campus redevelopment)

ARCHITECT Not publicly identified

CONTACT see firm page

CHANNEL **owner-direct** — Phase 3 in planning; PHSA/Infrastructure BC has historically run separate consultant procurements for each redevelopment phase (Phase 1/2 used IBI Group and Parkin/HDR-led teams under owner-managed contracts); no public design-team RFP identified yet for the maternity-suites Phase 3 scope as of mid-2026

PHSA confirms Phase 3 scope (Sunny Hill relocation, maternity suites) is defined but no architect or structural consultant has been publicly named; PHSA project pages point to Fact Sheets/Project Update sections for team-selection timing not yet published

Kitimat Dementia Long-Term Care

Kitimat, BC · health

ARCHITECT Boni Maddison Architects

CONTACT see firm page

CHANNEL **architect-subconsultant** — Design team already assembled at Approved stage; construction was expected to start fall 2024, so structural engineer engagement by Boni Maddison's team should already be underway/complete by now

Boni Maddison Architects developed the design for Kitimat Valley Housing Society; standard small-scale LTC delivery has the architect assembling the consultant team, though no structural firm is named in public releases

Comox — Providence Living Place, Together by the Sea (2137 Comox Ave.)

Comox, BC · health

ARCHITECT de Hoog & Kierulf architects (dHKA)

CONTACT Charles Kierulf Partner & Principal Architect, AIBC, MRAIC · crk@dhk.ca

Rob Whetter Partner & Principal Architect, AIBC · raw@dhk.ca

CHANNEL **architect-subconsultant** — Structural engagement already occurred years ago — construction on this 156-bed facility began March 2022 and reached substantial completion around 2024, so the structural scope was procured by de Hoog & Kierulf's team well before now

dHKA served as architect of record; Field & Marten Associates and Hyland Precast appear as project partners, indicating an architect-led consultant team; note the 'Design' stage tag in the source list appears stale versus public reporting showing this project already built

Royal Columbian Hospital Redevelopment — Phase 3 (Existing Building Upgrades)

New Westminster, BC · Healthcare · Included in ~\$2B Phases 2 & 3 envelope

ARCHITECT Not separately identified

CONTACT see firm page

CHANNEL **owner-direct** — Fraser Health issued a consultant-services RFP naming a Managing Consultant (Architect) alongside directly listed disciplines including Structural and Seismic — procurement was run via MERX (tender ref 189294); Phase 3 construction/consultant work window spans roughly 2023–2029 per Infrastructure BC

Fraser Health's Phase 3 RFP structured structural engineering as a directly-listed discipline within the overall consultant-team RFP (Managing Consultant/Architect coordinates, but Fraser Health as owner ran the procurement) — a hybrid, closer to owner-direct than a pure architect-assembled team; Phase 2 used a Design-Build Agreement while Phase 3 uses a Construction Management Agreement

West Tower (new inpatient/medical-support tower), main campus

Los Angeles, CA · Healthcare

ARCHITECT CO Architects

CONTACT see firm page

CHANNEL **architect-subconsultant** — Project cleared LA City Council approval (EIR/SEIR process complete); construction/design-team buildout by CO Architects would follow standard institutional practice of architect assembling consultants, though no structural firm has been publicly named as of the last available reporting

CO Architects is architect of record for Cedars-Sinai's West Tower; no structural engineering firm identified in public sources — Cedars-Sinai has used firms like Insight Structural Engineers on other towers (e.g., Saperstein Critical Care Tower), suggesting the hospital's institutional pattern is architect-led consultant assembly, but this is inferred, not confirmed for West Tower specifically

New hospital wing at Beverly & San Vicente Blvds

Los Angeles, CA · Healthcare

ARCHITECT CO Architects

CONTACT see firm page

CHANNEL **architect-subconsultant** — Entitlements/EIR already complete (Final SEIR published) — design team assembly by CO Architects is likely already underway or imminent; pitch CO Architects directly rather than waiting on a public RFP

Private academic medical center project; CO Architects assembles its own consultant team (no public procurement expected) — SE gets engaged as architect's subconsultant, not via owner bid

San Francisco / Geary corridor hospital

San Francisco, CA · Healthcare

ARCHITECT Perkins & Will

CONTACT Derek Newby Principal, Managing Director (Vancouver & Calgary Studios); Regional Managing Director, Canada; Firmwide Board of Directors (2026)

Cecily Eckhardt Principal and Managing Director, Ontario (Toronto & Ottawa Studios)

INCUMBENT Rutherford + Chekene (San Francisco) (occasional), Holmes (San Francisco) (occasional)

CHANNEL **architect-subconsultant** — Design in progress now under Perkins & Will; SE likely being finalized concurrently with schematic design

CAUTION: the record's owner (Sutter Health) does not match what's findable — the only active Geary-corridor SF hospital project with Perkins & Will as architect is Kaiser Permanente's proposed 14-story hospital at Geary/Divisadero; verify owner before pitching, but delivery model (private owner, architect-led consultant team) is architect-subconsultant either way

Doernbecher Children's Hospital Addition (Women's & Children's / NICU)

Portland, OR · Healthcare

ARCHITECT ZGF Architects

CONTACT Solvei Neiger Managing Partner, ZGF Portland Office (Healthcare Architect, AIA, ACHA) · solvei.neiger@zgf.com

Sharron van der Meulen Managing Partner (firm-wide), ZGF Architects · sharron.vandermeulen@zgf.com

CHANNEL **architect-subconsultant** — Project paused indefinitely (OHSU shelved funding in 2025 for adult bed priorities) — no active procurement; watch for OHSU announcing funding restoration before re-engaging

Design was already approved (City of Portland Design Commission) under ZGF/Andersen Construction before OHSU put the project on hold citing lack of funding; when revived, engagement will run through ZGF as before

Schnitzer Campus (South Waterfront) — future research blocks

Portland, OR · Healthcare

ARCHITECT SRG Partnership

CONTACT see firm page

CHANNEL **unknown** — No active procurement — 6 developable blocks remain on the 15-acre Schnitzer Campus with no announced project or timeline for the 'future research blocks'

This is a long-range campus master-plan land bank, not a funded project yet; too early to identify a channel — monitor OHSU campus planning updates for when a specific building is announced (likely to follow the SRG/architect-led pattern of prior Schnitzer buildings)

Alberta Children's Hospital Inpatient Capacity Expansion

Calgary, AB · Healthcare · TBD — \$4M for planning (\$2M govt + \$2M foundation); business case in progress

ARCHITECT DIALOG (prime consultant), partnering with HDR

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **owner-direct** — Concept stage — Government of Alberta budgeted initial planning money (Feb 2025); no design-team RFP identified yet for the inpatient capacity piece specifically

Two distinct workstreams: the adjacent Centre for Research & Innovative Care has DIALOG (prime)/HDR already engaged, but the Inpatient Capacity Expansion itself is being led by Colliers Canada/Altus Group as project/cost managers for Alberta Infrastructure — treat as owner-direct government procurement, watch Alberta Purchasing Connection / majorprojects.alberta.ca for a design-team RFP

AHS Central Drug Production Facility Calgary — Alternate (South Zone Cardiac ICU Functional Program)

Calgary, AB · Healthcare · TBD — functional programming stage

ARCHITECT START Architecture Inc.

CONTACT see firm page

CHANNEL **architect-subconsultant** — Concept stage — no structural procurement signal yet; SE would follow once Alberta Infrastructure approves a business case and START Architecture Inc. (named prime) staffs its consultant team

Alberta Infrastructure capital projects are standard design-bid-build with a prime architect who subcontracts engineering disciplines; project scope/timeline still not firmed publicly beyond the original \$66M provincial drug-production program, so structural engagement timing is unconfirmed.

AHS Alberta Children's Hospital — Centre for Research and Innovative Care

Calgary, AB · Healthcare · TBD — part of Children's Hospital expansion business case

ARCHITECT DIALOG (prime consultant for research centre planning)

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **architect-subconsultant** — Business-case development underway (as of 2025 Alberta budget funding); SE engagement expected once business case sets scope/budget, likely FY2026-27+

DIALOG confirmed as prime consultant (partnering with HDR on design) for the Centre for Research & Innovative Care; DIALOG/HDR will assemble the structural sub once business case defines scope — no separate owner-led structural RFP identified.

New Stollery Children's Hospital — South Edmonton (Secondary Priority)

Edmonton, AB · Healthcare · TBD — one of Alberta's largest future healthcare projects

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Planning phase targeted to complete in 2026; design team (incl. structural) assembly likely follows planning completion, with construction 5-8 years out

Stantec Architecture Ltd. named for planning; site (U of A South Campus) selected Nov 2025. Standard Alberta Infrastructure model has the prime architect (Stantec) pull in structural once planning/business case advances — no P3/design-build model announced.

**Covenant Wellness Community — Southeast Edmonton
(Secondary Priority)**

Edmonton, AB · Healthcare · TBD — provincial capital approved

ARCHITECT HSEA Architecture Inc. (named on Covenant Health Community Health Centre component)

CONTACT see firm page

CHANNEL **architect-subconsultant** — Already in delivery — Phase 1 construction began 2022 (complete ~2024); HSEA's Community Health Centre component would have engaged its structural sub already or imminently for subsequent phases

Private/joint-venture delivery (Covenant Health + Rohit Group of Companies), not a public P3; HSEA Architecture Inc. is prime for the Community Health Centre building and would carry the structural subconsultant, not Covenant Health directly.

Related Bristol, Santa Ana, Orange County

Santa Ana, CA · Healthcare

ARCHITECT Robert A.M. Stern Architects and Elkus Manfredi Architects (design services for the mixed-use project)

CONTACT see firm page

CHANNEL **architect-subconsultant** — Entitlements approved by Santa Ana City Council; groundbreaking targeted early 2026, so design team (incl. structural) should already be engaging now or very soon

Private developer-led mixed-use project (Related California); Robert A.M. Stern Architects and Elkus Manfredi Architects are named design architects who will pull in a structural subconsultant — no owner-direct or design-build procurement involved (this is not actually a healthcare project despite the sector tag).

NAIT Advanced Skills Centre

Edmonton, AB · Education - Post-Secondary · \$560M

ARCHITECT Dialog + GEC Architecture

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca

Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **architect-subconsultant** — Design team (GEC Architecture + DIALOG) already assembled; PCL Construction named builder ~May 2026, early construction activity starting spring 2026 — structural engagement window has likely already passed/is active now, not a future RFP

\$384M provincial funding confirmed May 2026; GEC+DIALOG lead design team, PCL Construction is builder (looks CM-led, not DB) — pitch would go through GEC/DIALOG if structural not yet locked, but team appears far along

UCLA 901 Levering Student Housing

Los Angeles, CA · Education · USD 351,000,000 @1.36 (2026-06-02)

ARCHITECT Mithun

CONTACT Tonyel Stewart Principal, Mithun (Los Angeles studio)

Walter Schacht, FAIA Partner, Mithun

CHANNEL **design-build** — UC Regents approved project funding/schematic design March 2026; design team forming now (SD phase) ahead of anticipated 2026 construction start

Mithun (architect) and PCL Construction described as 'collaborating' — pattern typical of UC progressive design-build; structural likely joins PCL's DB team rather than pure architect-led sub, but not fully confirmed

**Center for Advanced Materials and Clean Energy Technologies
(CAMCET) / Research Test Beds**

Seattle, WA · Education · USD 263,100,000 @1.36 (2026-06-02)

ARCHITECT CannonDesign

CONTACT see firm page

CHANNEL **unknown** — Project on hold — no active procurement window; watch for state legislature re-funding before any consultant RFP

CannonDesign did predesign renderings only; WA legislature funded \$20M initial planning, project since stalled — no evidence of structural engagement or active team

Cal State LA Classroom & Faculty Office Building Replacement (replaces King Hall)

Los Angeles, CA · Education · USD 262,300,000
@1.36 (2026-06-02)

ARCHITECT SmithGroup

CONTACT Daniel Cusick, AIA Health Studio Leader / Principal, Los Angeles · daniel.cusick@smithgroup.com
Rosa Sheng, AIA Vice President, Higher Education Studio Leader (San Francisco / Northern California); Director of Justice, Equity, Diversity & Inclusion · rosa.sheng@smithgroup.com

CHANNEL **architect-subconsultant** — Currently in Needs Assessment with SmithGroup; structural subconsultant engagement expected once project moves to schematic design (not yet scheduled per CSU capital planning norms)

CSU Chancellor's Office capital projects standardly procure structural as SmithGroup's subconsultant; project still in early Needs Assessment phase, too early for SD-level structural RFP

808 Royal — Academic and Student Housing Building

New Westminster, BC · education · \$292.5M

ARCHITECT Stantec / DSRA Architecture Inc.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Already engaged — RJC Engineering confirmed as structural engineer under Stantec-led design team; project under construction, targeting summer 2026/2027 occupancy

No open opportunity: RJC already holds the structural scope, Graham Construction is CM; this pursuit window has closed

CSU Long Beach Peterson Hall 1 Replacement (Seismic)

Long Beach, CA · Education · USD 190,900,000 @1.36 (2026-06-02)

ARCHITECT Cannon Design

CONTACT see firm page

CHANNEL **architect-subconsultant** — schematic design underway now; CannonDesign assembling engineering team for PH1 Replacement (Seismic)

CSU capital project delivered via traditional owner-architect-consultant model (CPBG-approved); Cannon Design is prime, pitch them directly for structural sub-consultant role.

NorQuest College Career Skills Centre — Full Campus Expansion

Edmonton, AB · Education - Post-Secondary

ARCHITECT GEC Architecture

CONTACT Peter Osborne Partner (Managing Partner; founder of GEC's Edmonton studio)
Gary Mundy Partner (transportation/infrastructure sector lead)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL **architect-subconsultant** — Prime Consultant RFP live now (planning/design stage funded by \$4M Budget 2025); design-ready target ~2027 construction start

NorQuest is running a Prime Consultant RFP (GEC Architecture team) — structural role will be a sub-consultant under whichever firm/team wins Prime Consultant; also watch the parallel PM RFP for team-formation signals.

North Langford Secondary – New Secondary School

Langford, BC · K-12

ARCHITECT Station One Architects

CONTACT Justin Dyck Principal & CEO, Architect AIBC
Heather Honeycutt Principal, Architect AIBC

INCUMBENT Bush, Bohlman & Partners LLP (frequent), CWMM Consulting Engineers Ltd. (occasional)

CHANNEL **architect-subconsultant** — pre-design/planning stage now, opening targeted 2030 — design team (incl. structural) procurement expected over next 1-2 years

Province-funded BC K-12 new school; Sooke SD62 procures via standard MOE capital process with Station One Architects as prime — structural will be subconsultant to Station One; monitor SD62 procurement/BC Bid postings for the formal design-team RFP.

Smith Secondary School

Langley, BC · education · \$203M

ARCHITECT Thinkspace Architecture

CONTACT Henk Kampman Principal, ALEP
Todd Dust Principal (Kelowna office)

INCUMBENT Bush, Bohlman & Partners LLP (dominant), ASPECT Structural Engineers (occasional)

CHANNEL **architect-subconsultant** — design ran through winter 2025, construction underway now, occupancy fall 2027 — structural consultant (Jarvis Engineering) already engaged

Thinkspace Architecture holds the \$200M Smith Campus (middle+secondary) design-build-adjacent contract; Jarvis Engineering is confirmed as structural sub-consultant already — this seat is filled, track for future campus phases only.

New Elementary at Roberts (Lord Roberts) Annex Site

Vancouver, BC · Education · 194160000

ARCHITECT McFarland Marceau Architects

CONTACT Marie-Odile Marceau Principal / Owner
Larry McFarland President / Principal

CHANNEL **architect-subconsultant** — development permit application submitted now (coordinated with BC Hydro substation); design team already assembled, construction timing TBD pending DP approval

VSBC new elementary replacing Lord Roberts Annex; McFarland Marceau is prime architect with full consultant team (incl. structural) already named per DP filing — verify current structural firm via DP application before pitching, seat may already be filled.

CBE New High School in Cornerstone NE Calgary

Cornerstone, NE Calgary, AB · K-12 · \$151.7M (Alberta Major Projects confirmed)

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com
Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — P3 contractor/proponent selection underway now (2025-2026); SE joins winning DB team's consultant roster once contractor selected

CBE Cornerstone HS delivered by Alberta Infrastructure as a P3/DB bundle (paired with Redstone K-4); next step is contractor selection, so pitch the DB proponent team (likely via Stantec or the successful contractor's design partner), not CBE directly.

Olympic Village Elementary School — New School

Vancouver, BC · Education · Over \$150M provincial funding

ARCHITECT McFarland Marceau Architects

CONTACT Marie-Odile Marceau Principal / Owner
Larry McFarland President / Principal

CHANNEL **architect-subconsultant** — design team already engaged; construction targeted to start spring 2027 so structural sub-consultant selection by McFarland Marceau should already be in progress or imminent

VSBC selected McFarland Marceau Architects via competitive RFP to lead design; McFarland Marceau will assemble the consultant team including the structural engineer — pitch the architect directly.

Prince Rupert Middle School Seismic Replacement

Prince Rupert, BC · education · \$126.8M

ARCHITECT KMBR Architects Planners

CONTACT Bassem Tawfik Principal, Architect AIBC, MRAIC, LEED AP, REFP
Kate Lemon Principal, Architect AIBC, MRAIC

CHANNEL **architect-subconsultant** — already engaged — construction is underway (groundbreaking April 2025, completion targeted Sept 2027), so structural engagement happened in the design phase that preceded groundbreaking

KMBR Architects Planners leads design for SD52 with VSBC Operations as project manager; mass-timber structure implies SE already retained as KMBR sub-consultant — this project is largely past the pitch window since it broke ground.

New Housing Building (Park Blocks)

Portland, OR · Education · USD 85,000,000 @1.36 (2026-06-02)

ARCHITECT GBD Architects

CONTACT see firm page

CHANNEL **architect-subconsultant** — design underway now; construction begins winter 2027, so structural sub-consultant selection by GBD Architects should already be locked in or finalizing shortly

PSU retained GBD Architects (design review already approved) with Fortis Construction as GC; GBD assembles the structural engineering sub-consultant team — pitch GBD, but window may already be closing given design-review approval.

Smith Middle School

Langley, BC · education · \$103M

ARCHITECT Thinkspace Architecture Planning Interior Design Ltd.

CONTACT Ray Wolfe Partner/Principal, Architect
Todd Dust Principal, Architect (Kelowna)

CHANNEL **architect-subconsultant** — design phase targeted to run to winter 2025 per Thinkspace, with construction into occupancy Sept 2027 — structural sub-consultant likely already selected, but worth confirming given the two-campus scope

Thinkspace Architecture holds the \$200M design contract for SD35's Smith Campus (middle + secondary schools) with Make Projects as PM; Thinkspace assembles the structural sub-consultant — pitch Thinkspace, though design window may be largely closed.

Smith Middle School — New School (Smith Campus)

Langley (Willoughby), BC · Education · \$103M provincial investment (part of \$306M joint Smith Campus)

ARCHITECT Thinkspace Architecture Planning and Interior Design

CONTACT Ray Wolfe Partner/Principal, Architect
Todd Dust Principal, Architect (Kelowna)

CHANNEL **architect-subconsultant** — SE already engaged; under construction, occupancy Sept 2027 — no open window, track for future Langley SD35 work

BC Ministry-funded K-12 capital project; Thinkspace holds the design contract for the \$200M Smith Campus (now named statlaw Middle School + Emery Dosdall Secondary) and assembles its consultant team including the SE; project is already under construction (occupancy Sept 2027), so the structural engineer is almost certainly already engaged — this is a relationship/backfill target, not an open pitch window.

UC Santa Barbara KITP House

Santa Barbara, CA · Education · USD 70,000,000 @1.36 (2026-06-02)

ARCHITECT ZGF Architects

CONTACT Solvei Neiger Managing Partner, ZGF Portland Office (Healthcare Architect, AIA, ACHA) · solvei.neiger@zgf.com

Sharron van der Meulen Managing Partner (firm-wide), ZGF Architects · sharron.vandermeulen@zgf.com

CHANNEL **architect-subconsultant** — Still in planning/conceptual design — pitch window open now via ZGF LA before SE selection locks in

UC capital projects use architect-led design teams; ZGF Architects (LA office) holds conceptual design for KITP House/Residence at UCSB; SE would be a ZGF subconsultant, not separately procured by UC in the design phase.

West Edmonton 7-12 Catholic & Public (French)

Edmonton, AB · Education · 91000000

ARCHITECT Workun Garrick Partnership

CONTACT Dave MacGregor Partner
Robert Rabinovitch Partner

CHANNEL **architect-subconsultant** — Proposed-Design stage — design team consultant selection likely still forming; pitch window open now via Workun Garrick

Alberta Infrastructure/Edmonton Catholic Schools funded new 7-12 Catholic/French high school; Workun Garrick Partnership is the architect of record on prior ECSD schools and is the named designer here; Alberta K-12 capital delivery is architect-led design team model, SE as sub. No SE named yet in public sources.

Clayton Heights Secondary — 41-Classroom Addition

Surrey, BC · Education · \$90.4M

ARCHITECT KMBR Architects

CONTACT Bassem Tawfik Principal, Architect AIBC, MRAIC, LEED AP, REFP
Kate Lemon Principal, Architect AIBC, MRAIC

INCUMBENT Herold Engineering Limited (Nanaimo/Vancouver Island, BC) (dominant)

CHANNEL **architect-subconsultant** — Design stage, board presentation already made by KMBR — pitch window open now/closing soon via KMBR before consultant team locks

Province committed ~\$90.4M for the 41-classroom Clayton Heights Secondary addition; KMBR Architects (principal Bassem Tawfik) presented the design to Surrey School Board, confirming KMBR as architect of record assembling the consultant team including SE.

Guildford Park Secondary Addition

Surrey, BC · education · \$64.9M

ARCHITECT Station One Architects

CONTACT Justin Dyck Principal & CEO, Architect AIBC
Heather Honeycutt Principal, Architect AIBC

INCUMBENT Bush, Bohlman & Partners LLP (frequent), CWMM Consulting Engineers Ltd. (occasional)

CHANNEL **architect-subconsultant** — Design/early construction — verify with Station One whether SE already locked; if design docs are recent, pitch window may still be open

Province/Surrey SD36 funding \$59.5M+\$5.36M for Guildford Park Secondary addition (18 classrooms, 450 seats); Station One Architects listed as project architect per Surrey Schools Learning by Design; BC K-12 capital delivery is architect-led team, SE would be a Station One subconsultant. Construction noted as underway per district page.

Cloverley Elementary School

North Vancouver, BC · education · \$64M

ARCHITECT DA Architects + Planners

CONTACT Mark Ehman Principal (Design Lead / Principal-in-Charge)

James Kao Principal / Partner

INCUMBENT Glotman•Simpson Consulting Engineers (frequent), RJC Engineers (Read Jones Christoffersen) (occasional)

CHANNEL **architect-subconsultant** — already engaged — design team assembled under 2023 Prime Consultant RFP, project now under construction (opening 2026/2027)

SD44 ran a 'Prime Consultant Architectural Services' tender won by DA Architects + Planners, who sub-contract the structural engineer; pitch DA directly, opportunity is largely past for this project.

Carson Elementary School Replacement

Quesnel, BC · education · \$61.2M

ARCHITECT Station One Architects Ltd. (SOA)

CONTACT Justin Dyck Principal & CEO, Architect AIBC

Heather Honeycutt Principal, Architect AIBC

INCUMBENT Bush, Bohlman & Partners LLP (frequent), CWMM Consulting Engineers Ltd. (occasional)

CHANNEL **architect-subconsultant** — past — Station One Architects' team was engaged post-2023 Ministry approval; construction targeted for 2024/2025 completion

Ministry-funded SD28 replacement; architect (Station One) leads consultant team procurement, no separate SE tender found; likely too late to enter this specific project.

Vancouver, BC · education

ARCHITECT HCMA Architecture + Design

CONTACT Darryl Condon Managing Principal · d.condon@hcma.ca

Susan Ockwell Senior Director, Learning Environments · s.ockwell@hcma.ca

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Fast + Epp (frequent)

CHANNEL **architect-subconsultant** — past — HCMA's team engaged years ago; building now largely complete/opened (2025 Ministry release cites completion)

VSF (SD39) seismic replacement/addition; HCMA is prime consultant and holds the SE subcontract; project is at/near completion, not an open pursuit.

Qayqayt Elementary Addition

New Westminster, BC · education

ARCHITECT Thinkspace Architecture

CONTACT Henk Kampman Principal, ALEP

Todd Dust Principal (Kelowna office)

INCUMBENT Bush, Bohlman & Partners LLP (dominant), ASPECT Structural Engineers (occasional)

CHANNEL **architect-subconsultant** — past — project completed/opened; Thinkspace's consultant team (incl. SE) already engaged

SD40 Ministry-funded project; Thinkspace was prime consultant, school has already opened, no remaining SE opportunity.

Edgehill Elementary Addition

Powell River, BC · education

ARCHITECT M3A Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — past — construction underway/near completion, expected ready spring 2026

SD47 Ministry-funded addition; M3A Architecture is prime consultant assembling the SE sub; ground already broken, target completion spring 2026, so pursuit window has closed.

École élémentaire francophone de Burnaby

Burnaby, BC · education

ARCHITECT KMBR Architects

CONTACT Bassem Tawfik Principal, Architect AIBC, MRAIC, LEED AP, REFP
Kate Lemon Principal, Architect AIBC, MRAIC

INCUMBENT Herold Engineering Limited (Nanaimo/Vancouver Island, BC) (dominant)

CHANNEL **architect-subconsultant** — construction underway (ceremonial start Sept 2025) - structural consultant already engaged by KMBR's design team; watch CSF's next BC school announcements for future rounds

\$40M CSF/SD93 school funded Jan 2024, construction kicked off Sept 2025; standard BC K-12 model has the architect (KMBR) assemble the structural/MEP subconsultant team, not owner-direct procurement

Yale Secondary seismic upgrade

Langley, BC · Education

ARCHITECT Station One Architects

CONTACT Justin Dyck Principal & CEO, Architect AIBC
Heather Honeycutt Principal, Architect AIBC

INCUMBENT Bush, Bohlman & Partners LLP (frequent), CWMM Consulting Engineers Ltd. (occasional)

CHANNEL **unknown** — unknown - could not confirm current status

Could not verify a live Yale Secondary/SD35/Station One Architects seismic project in current sources - a past Yale Secondary seismic upgrade (SD34 Abbotsford, Craven Huston Powers Architects, completed 2016) is the only verifiable match, suggesting this record may be stale or misattributed; do not guess channel/timing without re-confirming the project against SD35's current capital plan

UBC Student Housing

Vancouver, BC · education

ARCHITECT Ryder Architecture / 3XN GXN

CONTACT see firm page

CHANNEL **architect-subconsultant** — construction starts fall 2026, phased occupancy fall 2028-2029 - structural consultant is embedded in the Ryder/3XN GXN design team now (selected Nov 2024), so engagement is already underway, not a future window

\$560M UBC Lower Mall Precinct Phase One (1,500 beds, 5 buildings incl. 18-storey tower + 8-storey mass timber); Ryder/3XN GXN selected via design competition/RFP and lead the consultant team including structural

KPU Student Housing

Surrey, BC · education

ARCHITECT DA Architects + Planners

CONTACT Mark Ehman Principal (Design Lead / Principal-in-Charge)
James Kao Principal / Partner

INCUMBENT Glotman•Simpson Consulting Engineers (frequent), RJC Engineers (Read Jones Christoffersen) (occasional)

CHANNEL **architect-subconsultant** — construction expected to start early 2027 - design team (DA Architects-led) forming/engaging structural consultants now through 2026

\$144M KPU Surrey campus housing (350+ beds), funded \$119M province/\$25M KPU; DA Architects has the long-standing KPU Surrey campus master-plan/design role, standard model is architect-led consultant team rather than owner-direct SE procurement

Pitt Meadows Secondary School

Pitt Meadows, BC · education · 144

ARCHITECT Public Architecture + Design Inc.

CONTACT Robert Drew Principal

Shane O'Neill Associate Principal / Director of Design

CHANNEL **architect-subconsultant** — project timeline 2025-2030, design/community engagement underway (open house Oct 2025) - structural consultant already retained on Public Architecture's design team

\$90M SD42 seismic replacement of Pitt Meadows Secondary (1,100 students); Public Architecture + Design Inc. is leading the design team per BC K-12 seismic-mitigation program norms, so structural engagement runs through the architect, not a separate owner tender

Clayton Heights Secondary School

James Kao Principal / Partner

INCUMBENT Glotman•Simpson Consulting Engineers (frequent), RJC Engineers (Read Jones Christoffersen) (occasional)

CHANNEL **architect-subconsultant** — design approved, addition scheduled to open 2027 — engage DA Architects now while structural scope is being finalized

Surrey School District capital addition; DA Architects + Planners (Mark Ehman) leads design team and assembles structural sub-consultant.

RVS New K-8 School in Heartland Cochrane

Cochrane, AB · K-12 · \$53.4M (Alberta Major Projects confirmed)

ARCHITECT Workun Garrick Partnership Architecture and Interior Design Inc.

CONTACT Dave MacGregor Partner

Robert Rabinovitch Partner

CHANNEL **design-build** — P3 Bundle #6 at financial close/construction start 2026; SE engaged now by Concert-Bird Partners consortium design team

Cochrane K-8 is part of Alberta P3 School Bundle #6; Concert-Bird Partners consortium delivers design-build, architect is Workun Garrick — pitch the consortium/architect, not RVS directly.

New K-5 School in Redstone (NE)

Calgary, AB · Education · 46600000

ARCHITECT ACI Architects Inc.

CONTACT Darryl Rewniak Principal, Architect

Alexis Finlay Principal, Architect

CHANNEL **design-build** — Bridging design complete Apr 17 2026; DB delivery confirmed for all Bundle #6 schools, design team assembling now

CBE Redstone elementary (ACI Architects) confirmed DB delivery via P3 Bundle #6 (Concert-Bird Partners); SE joins via ACI/consortium team, not a separate CBE procurement.

New K-4 School in Evanston (NW)

Calgary, AB · Education · 31600000

ARCHITECT Workun Garrick Partnership

CONTACT Dave MacGregor Partner

Robert Rabinovitch Partner

CHANNEL **design-build** — P3 partner selected Mar 18 2026, design complete — SE engagement window has likely already passed/is with consortium team now

CBE Evanston K-4: P3 partner selected Mar 18 2026 and design already complete under Concert-Bird Partners/Workun Garrick team — likely too late to newly pitch unless replacing an existing sub.

CBE New K-4 Elementary School in Evanston NW Calgary

Evanston, NW Calgary, AB · K-12 · \$31.6M (Alberta Major Projects confirmed)

ARCHITECT Workun Garrick Partnership Architecture and Interior Design Inc.

CONTACT Dave MacGregor Partner
Robert Rabinovitch Partner

CHANNEL **design-build** — Same project as #4091 (CBE Evanston K-4) — design already complete as of Mar 2026 under Bundle #6 consortium

Duplicate listing of CBE Evanston K-4 school; Concert-Bird Partners/Workun Garrick DB team, design complete — pitch would be to consortium for any late-stage sub work.

Puyallup Animal Disease Diagnostic Lab

Puyallup, WA · Education · USD 23,000,000 @1.36 (2026-06-02)

ARCHITECT Flad Architects

CONTACT see firm page

CHANNEL **design-build** — Design-build team (Absher | Flad) already selected Dec 11 2025; SE would be engaged now by Absher (builder) or Flad as part of that proponent team

WSU Puyallup WADDL facility is Progressive Design-Build; Absher|Flad team selected Dec 2025 — pitch Absher (contractor) or Flad directly for structural sub-consultant role, not WSU.

New K-6 School in Redstone (NE)

Calgary, AB · Education · 25400000

ARCHITECT ACI Architects Inc.

CONTACT Darryl Rewniak Principal, Architect
Alexis Finlay Principal, Architect

CHANNEL **design-build** — Bridging design (by ACI Architects, hired directly by Alberta Infrastructure) is complete; project bundled with other AB schools into a P3/DB package now in design-builder procurement (RFQ/RFP to select DB proponent, expected through 2026)

Same project as #7135; Alberta Infrastructure confirmed all bundled schools delivered via DB — pitch the winning design-build contractor's team, not ACI directly, since ACI's bridging-design role ends at RFP issuance

CCSD New K-6 Catholic School in Redstone NE Calgary

Redstone, NE Calgary, AB · K-12 · \$25.4M (Alberta Major Projects confirmed)

ARCHITECT ACI Architects Inc.

CONTACT Darryl Rewniak Principal, Architect
Alexis Finlay Principal, Architect

CHANNEL **design-build** — Design-builder procurement underway in 2026 (bundled ASAP-style P3/DB package); construction not yet started

Duplicate/refined entry for #4099 — Alberta Infrastructure's standard model bundles new schools into DB packages after a province-hired architect (ACI) completes bridging design; the SE is engaged by the DB contractor post-award

TRU Indigenous Education Centre

Kamloops, BC · education · \$22M

ARCHITECT Stantec / Patrick R. Stewart Architect

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) ·
tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Design team (Stantec as project architect, Patrick R. Stewart Architect for Indigenous design) already engaged; project broke ground in 2024 and is targeting 2026 completion — too late to pitch, structural sub already locked in

TRU procured Stantec directly as prime design consultant; any structural engineer was engaged as Stantec's subconsultant well before groundbreaking, so this is a closed/past opportunity, not an open window

Howard DeBeck Elementary Seismic Upgrade

Richmond, BC · education · \$18.5M

ARCHITECT Thinkspace Architecture Planning Interior Design Ltd.

CONTACT Ray Wolfe Partner/Principal, Architect
Todd Dust Principal, Architect (Kelowna)

CHANNEL **architect-subconsultant** — Design team already engaged and construction underway in phases (Phase 2 completed ~March 2025, later phases through 2025); no open procurement window found

BC Seismic Mitigation Program projects are typically delivered with the district hiring a prime architect (Thinkspace) who subcontracts the structural engineer; project is already mid-construction so the SE seat is likely filled — verify via SD38 Facilities before pursuing

Lethbridge School Division New K-5 School — SW Lethbridge (Garry Station South)

Lethbridge, AB · K-12 · ~\$18M (media estimate); province not confirmed

ARCHITECT FWBA Architects

CONTACT Christopher Babits Partner / Principal Architect, AAA, MRAIC
David Cocks Partner / Principal Architect, AAA, MRAIC, LEED AP

CHANNEL **design-build** — Proposed-Planning stage as of mid-2026; no design-builder selected yet — expect Alberta Infrastructure to follow its standard bundled DB/P3 procurement pattern (as used for the adjacent, already-built Garry Station K-5 school, delivered via Ward Bros. Construction as DB contractor with FWBA leading the design team)

This is a distinct, newer project from the completed Garry Station Elementary; Alberta Infrastructure's precedent strongly suggests DB delivery, but the DB proponent/contractor for this specific project has not yet been named — watch for RFQ/RFP issuance

Henry Hudson Elementary — Addition

Vancouver, BC · education · 15000000

École Alpha Secondary Addition

Burnaby, BC · education · \$12M

ARCHITECT Thinkspace Architecture

CONTACT Henk Kampman Principal, ALEP
Todd Dust Principal (Kelowna office)

INCUMBENT Bush, Bohlman & Partners LLP (dominant), ASPECT Structural Engineers (occasional)

CHANNEL **architect-subconsultant** — complete — addition occupied, no active opportunity

SD41 seismic upgrade + addition delivered via Thinkspace-led design-bid-build team; structural (Jarvis Engineering per project listing) already retained, project complete.

Hans Helgesen Elementary

Sooke, BC · education · 5000000

ARCHITECT Public Architecture + Design Inc.

CONTACT Robert Drew Principal
Shane O'Neill Associate Principal / Director of Design

CHANNEL **owner-direct** — unclear/early — no capital addition confirmed beyond standalone child-care building

Search only turned up a separate standalone child-care building on the Hans Helgesen site by Public Architecture; no confirmed 'addition' capital project or SE engagement found — verify scope before pursuing.

Ladysmith Primary School Addition

Ladysmith, BC · K-12 · \$15,000,000

ARCHITECT KMBR Architects Planners Inc.

CONTACT Bassem Tawfik Principal, Architect AIBC, MRAIC, LEED AP, REFP
Kate Lemon Principal, Architect AIBC, MRAIC

INCUMBENT Herold Engineering Limited (Nanaimo/Vancouver Island, BC) (dominant)

CHANNEL **architect-subconsultant** — design underway now, construction targeted 2027 (prefab)

SD68 trustees retained KMBR Architects (Nov 2023) for the 10-classroom addition; \$15M province-funded; KMBR will assemble structural sub-consultant team now — pitch KMBR directly, not SD68.

SD62 North Langford Middle School (Site Secured)

Langford, BC · K-12

ARCHITECT Station One Architects

CONTACT Justin Dyck Principal & CEO, Architect AIBC
Heather Honeycutt Principal, Architect AIBC

INCUMBENT Bush, Bohlman & Partners LLP (frequent), CWMM Consulting Engineers Ltd. (occasional)

CHANNEL **unknown** — pre-design — site just secured; business case/architect selection still pending, watch for Ministry approval then design-team RFP

Only land acquisition (7.2 acres, North Langford) confirmed as of announcement; no architect of record confirmed for this school despite 'Station One Architects' tag — Ministry business-case approval needed before design team (and thus SE) is engaged, 3-5 yr build horizon.

Outma Sqilx'w School Addition (955 m²)

Penticton, BC · education

ARCHITECT Iredale Architecture (designed original school)

CONTACT see firm page

CHANNEL **architect-subconsultant** — already in design; SE (O'M Engineering) already engaged as Iredale's subconsultant — no open opportunity

Band-funded/ISC-reviewed addition to existing Iredale-designed school; Iredale assembled the consultant team and O'M Engineering (Vancouver/Kelowna) is already the structural engineer of record — this seat is filled.

Camosun College Student Housing

Victoria, BC · education

ARCHITECT Dialog / Thinkspace

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **architect-subconsultant** — past — team assembled years ago; construction already underway (targeting early 2029 completion), too late to pitch

Dialog/Thinkspace are prime consultants who assembled the design team; project is now in construction (Kinetic as CM) on a six-storey light wood-frame structure — structural consultant already selected, no open window.

UVic Student Housing

Saanich, BC · education

ARCHITECT Diamond Schmitt Architects

CONTACT Ana Maria Llanos Principal & Vancouver Studio Leader, Diamond Schmitt
Donald (Don) Schmitt Principal & Co-Founder, Diamond Schmitt

CHANNEL **unknown** — on indefinite hold — BC pulled 2026 budget funding; UVic says next ~4 years is prep work, actual construction delayed to ~2034

Diamond Schmitt is architect of record but province deferred the \$178M funding in Budget 2026; unclear whether existing design consultants (incl. any structural sub) carry through to a restart or get re-procured whenever funding is reinstated — treat as dormant, revisit if funding news breaks.

Catholic K-9 in Oxford (Palisades)

Edmonton, AB · Education

ARCHITECT ACI Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — planning-funding phase now (approved Mar 19 2025, reprioritized #4 in ECSD's capital plan); design-team RFP/subconsultant selection likely follows once Alberta Infrastructure issues bridging-consultant RFP — watch through 2026-2027

Alberta Infrastructure + ECSD + ACI Architecture are named as the early-planning team; Alberta school projects like this are typically delivered via a prime-consultant (architect) RFP from Alberta Infrastructure, with the architect then retaining structural as subconsultant — an RFP for bridging consultant services has already been posted on Alberta Purchasing Connection (AB-2025-06031), so pitch ACI Architecture now.

New K-6 School in Livingston (N)

Calgary, AB · Education

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **unknown** — in initial design stage now, targeting completion 2029-2030; unclear if this is standard design-bid-build (architect-led, Stantec assembles subs) or bundled under an ASAP-style P3 (design-build proponent team)

CBE lists Livingston as Alberta Infrastructure-funded, capacity 890-900, K-6, design stage now; Stantec's own site references a bundled 'ASAP III' new-Alberta-schools program which would imply a design-build/P3 proponent-team channel instead of a straight architect-subconsultant RFP — could not confirm from primary sources whether Livingston specifically sits inside ASAP III or is a standalone traditional-delivery project, so flagging as unknown pending direct confirmation from Alberta Infrastructure or CBE.

New K-5 School in Sage Hill (NW)

Calgary, AB · Education

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Alberta Infrastructure completed bridging design Apr 17 2026; school is in a 5-school DB bundle now moving into design-builder procurement — proponent teams (which assemble SE) expected to form/bid through 2026

Owner delivery model shifted from architect-led to DB; SE will be engaged by the winning design-builder, not pitched via Stantec directly, once RFP for design-builder is issued

New K-4 School in Nolan Hill (NW)

Calgary, AB · Education

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Same Alberta Infrastructure DB bundling decision (bridging complete Apr 17 2026, five bundles); Nolan Hill CBE school targets 2029-2030 completion, still early design-stage moving to design-builder procurement

Same province-wide DB policy as Sage Hill applies; watch for the design-builder RFP (not a direct architect/SE pitch) — note a separate CCSD K-9 school also exists on the same Nolan Hill site under P3 Bundle #5

Annie Gale School (NE)

Calgary, AB · Education

ARCHITECT START Architecture Inc.

CONTACT see firm page

CHANNEL **owner-direct** — Design/tender documents near complete; CBE awaiting Construction funding approval from Alberta Government before tendering GC — consultant (structural) engagement would already be with CBE's design team by this stage, and remaining procurements (commissioning, environmental) are being posted directly by CBE via Bonfire/MERX now

This is a CBE board-managed modernization (not an Alberta Infrastructure DB bundle) — CBE procures individual consultants directly on its Bonfire portal; structural was likely engaged under START's design team already, but any remaining specialty consultant slots would post to cbe-ab.bonfirehub.ca

Corvallis Campus Housing & Dining Vision Phase 1

Corvallis, OR · Education

ARCHITECT Rowell Brokaw

CONTACT see firm page

CHANNEL **architect-subconsultant** — Rowell Brokaw + Mithun already selected as design team for Phase 1 (prototype + first residence hall); OSU capital project is board-approved (BOT items filed Apr/Jun 2025) — structural sub-consultant would have been engaged by Rowell Brokaw/Mithun already or via near-term subconsultant RFQ as design progresses toward the 650-700 bed hall

OSU procured the architect team (Rowell Brokaw+Mithun) via its own bid portal; structural engineer will be a sub to that architect team, not procured separately by OSU — check bid.oregonstate.edu for any open subconsultant listings if pitching now

SDSU Life Sciences Building Phase 2

San Diego, CA · Education

ARCHITECT SmithGroup (Phase 1)

CONTACT Daniel Cusick, AIA Health Studio Leader / Principal, Los Angeles · daniel.cusick@smithgroup.com
Rosa Sheng, AIA Vice President, Higher Education Studio Leader (San Francisco / Northern California); Director of Justice, Equity, Diversity & Inclusion · rosa.sheng@smithgroup.com

CHANNEL **design-build** — Hensel Phelps/SmithGroup DB team already selected and construction underway (Phase covered by SmithGroup topped out May 2026, opening 2027) — if project 4184 refers to a distinct 'Phase 2' scope beyond the SmithGroup/Hensel Phelps building, no separate procurement found; treat as unknown for a true Phase 2 unless CSU Chancellor's Office issues a new capital outlay item

Confirmed: SDSU Life Sciences (STEM) Building is delivered Design-Build via Hensel Phelps as builder with SmithGroup as architect-of-record on the team — SE was engaged by Hensel Phelps at team formation, already closed; no distinct 'Phase 2' scope/RFP was found in CSU Board of Trustees or SDSU PDC records, so channel/window should be treated as provisional pending confirmation of what 'Phase 2' denotes

Conseil scolaire FrancoSud Junior High — Calgary

Calgary, AB · K-12 · TBD — provincially funded, Budget 2026

ARCHITECT Iwanski Architecture Inc.

CONTACT see firm page

CHANNEL **architect-subconsultant** — Design team formation stage — Alberta Infrastructure's Feb 2024/2026 capital plan advanced planning funding for new FrancoSud complexes (Silverado/Airdrie/Harvest Hills/Hampsons); prime architect not firmly confirmed as Iwanski in public sources found, pitch architect once named as prime consultant

Alberta K-12 capital projects run via a prime-consultant (architect) design contract with Alberta Infrastructure; architect then engages structural sub-consultant — could not verify Iwanski specifically as the named prime architect for this FrancoSud project in current sources, treat as pending confirmation

Lethbridge School Division Galbraith School Modernization and Addition

Lethbridge, AB · K-12 · TBD — provincially funded

ARCHITECT Group2 Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Design phase now (advanced in Feb 2024 provincial budget; schematic design/preconstruction drawings underway as of 2024-2025) — structural sub-consultant likely already being assembled or engaged

Group2 Architecture is prime consultant (prepared the visioning report to Alberta Education); pitch Group2 directly for the structural sub-consultant role

Edmonton Catholic School District New Schools (Secondary Priority)

Edmonton, AB · K-12 · TBD — provincial funded

ARCHITECT BR2 Architecture

CONTACT see firm page

CHANNEL **design-build** — Proponent team already selected — Concert-Bird Partners consortium is the preferred DBFM proponent for these new Edmonton Catholic schools; structural engagement runs through the builder/consortium, not a separate architect RFP

BR2 Architecture is a design-team member inside the Concert-Bird DBFM consortium; pitch Bird Construction / the consortium lead, not BR2 alone, for structural engagement

Prairie Rose Public Schools Parkside Jr High — Redcliff (New Build)

Redcliff, AB · K-12 · TBD — changed from modernization to new build 2025

ARCHITECT GEC Architecture

CONTACT Peter Osborne Partner (Managing Partner; founder of GEC's Edmonton studio)
Gary Mundy Partner (transportation/infrastructure sector lead)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL **architect-subconsultant** — Design underway since design funding approved March 2023 and GEC Architecture awarded the project September 2023; project re-scoped Nov 2024 to a new school (not modernization) in Redcliff's Eastside Subdivision — re-confirm design-team consultant list post-rescope

GEC Architecture is prime consultant; pitch GEC for structural sub-consultant role, especially given the late-2024 scope change to a new-build

Wild Rose School Division Breton K-12 Modernization

Breton, AB · K-12 · TBD — design funding approved 2023

ARCHITECT Start Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Past design-team formation — construction startup meeting held March 7, 2025 with Alberta Infrastructure, consultants and contractor (Shunda Consulting and Construction Management); structural consultant likely already engaged under Start Architecture's design team

Start Architecture is prime consultant; if KOR isn't already on this team the window has likely closed for design, though CA/field-review structural support could still be pursued via Start Architecture

Grasslands Public Schools Brooks Composite High School Modernization

Brooks, AB · K-12 · TBD — planning stage

ARCHITECT FWBA Architects

CONTACT Christopher Babits Partner / Principal Architect, AAA, MRAIC
David Cocks Partner / Principal Architect, AAA, MRAIC, LEED AP

CHANNEL **architect-subconsultant** — design underway now (design funding already granted for CTS space modernization); FWBA already engaged as architect, would sub structural

Alberta Infrastructure/Grasslands PSD funded design phase for CTS modernization; FWBA Architects is prime design consultant and will assemble the consultant team (traditional AB school procurement, not P3).

Holy Spirit Catholic — Future West Lethbridge Elementary (Next School)

Lethbridge, AB · K-12 · TBD — forward pipeline following St. Kateri opening 2026

ARCHITECT FWBA Architects

CONTACT Christopher Babits Partner / Principal Architect, AAA, MRAIC
David Cocks Partner / Principal Architect, AAA, MRAIC, LEED AP

CHANNEL **architect-subconsultant** — unclear — Holy Spirit's current 'next school' (St. Kateri Elementary, West Lethbridge/The Piers) is already under construction, opening Jan 2027; a genuinely 'future' next elementary beyond that has no confirmed design-team RFP date yet

FWBA Architects has done other Holy Spirit/southern-AB school work; traditional Alberta school capital-plan delivery (architect-led team) applies, but could not confirm this specific record is distinct from the already-underway St. Kateri project — treat with caution.

Foothills School Division — 3-Year Capital Plan Next Schools

Okotoks, AB · K-12 · TBD — capital plan pending provincial approval

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — design team already forming — new Okotoks high school (1,020 seats, grades 10-12) received construction funding notice Feb 15, 2025; division working with Alberta Infrastructure and Town of Okotoks on site planning now

Traditional (non-P3) Alberta school capital-plan delivery: Foothills SD + Alberta Infrastructure procure the design consultant team; Stantec listed as architect of record, would sub structural directly.

CCSD Four New Schools — Opening Fall 2027 (Currently in Design)

Calgary, AB · K-12 · TBD — provincial funded, in design now

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — proponent/DB team already selected and in design — EllisDon Infrastructure reached financial close on Alberta P3 Schools Bundle #5 in March 2025 (DBFM); schools (incl. CCSD's Nolan Hill and Chestermere K-9s) targeted to open fall 2027

Two of CCSD's four 'Fall 2027' schools (Nolan Hill, Chestermere) are confirmed part of EllisDon's DBFM P3 bundle — structural engineer joins EllisDon's proponent team, not procured by CCSD/architect directly; the other two (Rangeview, West Calgary HS) delivery model not separately confirmed, likely same bundle or a parallel traditional track — verify before pitching.

Cordova Bay Elementary — Classroom Addition

, BC · K-12

ARCHITECT Iredale Architecture

CONTACT James Emery Principal · architect@iredale.ca
Graham Coleman Principal · architect@iredale.ca

CHANNEL **architect-subconsultant** — not yet approved as of mid-2024 — addition was 'being resubmitted' in SD63's capital plan and had not received provincial capital approval; watch for capital-plan approval before a design-team RFP would issue

SD63/Iredale Architecture (incumbent firm from the school's 2016 seismic upgrade/addition) is the likely path once funded, but the addition itself was still unapproved/awaiting funding as of the last confirmed capital-plan cycle found — timing is not yet locked.

Cornerstone High School

, AB · K-12

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Bridging design complete; P3 proponent procurement underway now, with Alberta Infrastructure confirming (Apr 2026) all Calgary/Edmonton P3 school bundles will use DB delivery, grouped into ~5 bundles phased through 2026-2027

Cornerstone HS is part of Alberta Infrastructure's P3/DB school bundle program (Redstone/Cornerstone announced Feb 2025); SE will be engaged by the winning DB proponent team, not hired directly by CBE — pitch the contractor/proponent consortium, not Stantec directly.

Annie Gale Middle School Modernization

, AB · K-12

ARCHITECT START Architecture Inc.

CONTACT see firm page

CHANNEL **architect-subconsultant** — Detailed design already near-complete with permit applications submitted (per Alberta Major Projects listing); project was one of 16 fast-tracked by the province (announced July 9 2026), pulling ~9 months off the construction schedule

This is a design-funded traditional modernization (not P3/DB) with START Architecture already retained by CBE; any remaining structural scope runs through START as prime consultant — SE opportunity here is largely already locked in, watch for late add/peer-review scope only.

École Beausoleil Permanent K-12 School

Saanich, BC · K-12 · ~\$73,000,000

ARCHITECT HCMA Architecture + Design

CONTACT Darryl Condon Managing Principal · d.condon@hcma.ca
Susan Ockwell Senior Director, Learning Environments · s.ockwell@hcma.ca

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Fast + Epp (frequent)

CHANNEL **architect-subconsultant** — Design team in place now; construction targeted to start fall 2027 (\$73M provincial funding announced Dec 2025)

CSF/SD93 procured a CM-at-Risk (CCDC5B moving to CCDC2) for construction, but the design consultant team (architecture + structural) was assembled by the prime architect — MERX listing shows a live CM solicitation, and note our source data lists HCMA as architect though independent search turned up Principle Architecture, so verify the current architect of record before approaching.

Edmonton Catholic Schools – Four New K-9 Schools (Our Lady of Hope, St. Michael, St. Genevieve, St. Patrick) Edmonton, AB · Education - K12

ARCHITECT Workun Garrick Partnership Architecture and Interior Design Inc. (confirmed for Our Lady of Hope and

CONTACT see firm page

CHANNEL **architect-subconsultant** — Design underway per-school on staggered timelines: St. Genevieve construction tentatively spring 2026 (most advanced), Our Lady of Hope and St. Patrick targeting Fall 2028 openings — design consultant selection for the remaining schools likely still active through 2026

ECSD's 2026-2029 Capital Plan funds these as traditional (non-P3) new-school builds; Workun Garrick is confirmed architect for at least Our Lady of Hope, meaning structural gets engaged as their subconsultant — track each of the 4 schools individually since they're on different design/construction schedules.

CBE New High School in Cornerstone NE Calgary — 6-9 Junior High Companion Cornerstone, NE Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Same Alberta Infrastructure P3 bundle as Cornerstone High School (#6596) — bridging design complete, DB proponent procurement ongoing through 2026

Companion 6-9 junior high to Cornerstone HS, delivered by Alberta Infrastructure as DB; Stantec is listed as architect on the pre-design/bridging phase only — the actual construction-phase SE will be picked by whichever DB proponent/contractor wins the bundle, so BD target is the proponent team, not the architect.

CBE New 6-9 Junior High School in Mahogany SE Calgary Mahogany, SE Calgary, AB · K-12 · Cost TBD; Budget 2026 design funding announced Feb 27 2026

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Design complete; DB proponent/construction procurement starting mid-2026, target completion 2029-2030

Mahogany 7-9 JH: Stantec did bridging/preliminary design under Alberta Infrastructure; on completion of bridging design (Apr 2026) province confirmed all 10 bundled schools move to design-build delivery, so the construction-phase SE is procured via the winning DB contractor's team, not hired directly by Stantec or CBE.

CBE New K-5 Elementary School in Sage Hill NW Calgary Sage Hill, NW Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Bridging design complete Apr 2026; DB procurement underway, target completion 2029-2030

Sage Hill K-5: same Alberta Infrastructure DB bundle program as the other four CBE schools; pitch the design-build contractor once selected, not Stantec directly for structural.

CBE New 6-9 Junior High School in Sage Hill / Kincora NW Calgary

Sage Hill / Kincora, NW Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — DB proponent (design-builder) procurement starting now (as of mid-2026); target completion 2029-2030

Sage Hill/Kincora 6-9 JH: CBE page states design development is complete and 'construction procurement is starting' under a design-build approach managed by Alberta Infrastructure.

CBE New 5-9 Junior High School in Sherwood / Nolan Hill NW Calgary

Sherwood / Nolan Hill, NW Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Bridging design complete Apr 2026; DB procurement phase underway, phased completion

Sherwood/Nolan Hill 5-9 JH: part of the same Alberta Infrastructure 10-project/5-bundle design-build program confirmed Apr 17 2026; SE joins whichever DB contractor wins that bundle.

CBE New K-4 Elementary School in Nolan Hill NW Calgary

Nolan Hill, NW Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — DB proponent procurement underway mid-2026; target completion 2029-2030

Nolan Hill K-4 Elementary: Alberta Infrastructure-managed, targeting 2029-2030 completion; confirmed delivered via design-build with all ten bundled projects ready for design-builder procurement as of Apr 17 2026.

CBE New 5-9 School in Aspen Woods SW Calgary

Aspen Woods, SW Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Bridging design complete; DB proponent procurement underway now (2026), phased in bundles

Alberta Infrastructure confirmed (Apr 17, 2026) all 10 new CBE schools including Aspen Woods move to DB delivery in 5 bundles; Stantec did bridging design only, structural engineer will join the design-builder's team during DB proposal stage - pitch the contractor/proponent, not Stantec.

CBE New K-6 Elementary School in Livingston N Calgary

Livingston, N Calgary, AB · K-12 · Cost TBD; Budget 2025 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Bridging design stage complete (Stantec); DB contractor procurement in progress 2026, phased bundles

Listed 'Proposed - Design' with Stantec as bridging architect; per CBE status report all new schools including Livingston go to design-build delivery, so SE is engaged via the winning design-build contractor, not Stantec directly.

CBE New 6-9 Junior High School in Cityscape NE Calgary

Cityscape, NE Calgary, AB · K-12 · Cost TBD; Budget 2026 design funding

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **design-build** — Bridging design complete; DB proponent teams forming/procurement underway now (2026)

Cityscape elementary/junior high is among the 10 CBE projects confirmed for DB delivery bundled with other sites; structural engineer joins via the design-build proponent team, not Stantec (bridging architect only).

WalterFedy (fmr. Riddell Kurczaba) — Calgary Academy Second Addition

Calgary, AB · K-12 · Not publicly disclosed

ARCHITECT WalterFedy Architecture (formerly Riddell Kurczaba)

CONTACT see firm page

CHANNEL **unknown** — Southwest Addition phase already completed (opened Sept 2024); status/timeline of a further 'second addition' unconfirmed

Only a completed Southwest Addition (7,500 sf, opened Sept 3 2024) is documented; no public source confirms a separate active 'second addition' project, architect of record, or delivery model - could not verify engagement channel.

Concordia University of Edmonton New Academic Building

Edmonton, AB · Education - Post-Secondary

ARCHITECT Najfeldt Architects (Prime Consultant) / Reimagine Architects (Design Architect)

CONTACT see firm page

CHANNEL **unknown** — Project already complete - Braaksma Hall opened Fall 2024, \$40M building finished construction

This is a completed project (Braaksma Hall, opened Fall 2024, Najfeldt Architects prime/Reimagine design architect, contractor Chandos) - not an active pursuit; no current structural engineering opportunity exists here.

Concordia University of Edmonton Student Residence

Edmonton, AB · Education - Post-Secondary

ARCHITECT Metafor Architecture Inc.

CONTACT see firm page

CHANNEL **architect-subconsultant** — design team assembling now (planning stage) — pitch Metafor Architecture directly for structural sub-consultant

Private university residence, conventional architect-led delivery; Metafor Architecture is prime, will select structural sub-consultant.

The King's University Centre for Excellence in Sciences

Edmonton, AB · Education - Post-Secondary

ARCHITECT Motiv Architects

CONTACT see firm page

CHANNEL **architect-subconsultant** — structural engineer already engaged under Motiv Architects; project in late construction (Grand Opening Oct 3, 2026) — window largely closed, watch for next King's phase

Donor-funded (\$20M) building already built out under Motiv's team; too late to enter this project, but King's campus revitalization has further phases to watch.

NorQuest College Career Skills Centre

Edmonton, AB · Education - Post-Secondary

ARCHITECT GEC Architecture

CONTACT Peter Osborne Partner (Managing Partner; founder of GEC's Edmonton studio)
Gary Mundy Partner (transportation/infrastructure sector lead)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL **architect-subconsultant** — design/costing/planning advancing now under GEC Architecture; construction anticipated to start ~2027

GEC Architecture is leading design team with Clark Builders as preconstruction/CM partner; structural sub-consultant selection is happening now as design is made construction-ready.

Maskwacis Cultural College – New Campus Complex

Maskwacis, AB · Education - Post-Secondary

ARCHITECT Workun Garrick (confirmed for feasibility study)

CONTACT Dave MacGregor Partner
Robert Rabinovitch Partner

CHANNEL **architect-subconsultant** — feasibility study phase complete under Workun Garrick; college now moving into Master Campus Plan / new complex over next ~3 years — design team RFP/expansion likely within that window

Workun Garrick confirmed for feasibility; as project advances to design, they will likely retain or expand consultant team including structural.

SDCCD Saville Theatre Replacement — San Diego City College

San Diego, CA, CA · Higher Education / Performing Arts

ARCHITECT RNT Architects

CONTACT see firm page

CHANNEL **design-build** — design-build team (RNT Architects/Sundt Construction) already selected 2025; project now in schematic design phase (as of April 2026) — pitch Sundt as DB proponent for structural sub

Awarded under Measure HH design-build program; RNT Architects/Sundt Construction is the winning DB team, so structural engagement runs through Sundt, not a separate owner procurement.

International Plaza

Richmond, BC · Commercial · 4000

ARCHITECT Arcadis IBI Group

CONTACT David Wood Principal, Practice Group Manager, Healthcare — Arcadis (formerly IBI Group)
Titka Seddighi Principal, Arcadis (Toronto)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL **architect-subconsultant** — Rezoning approved spring 2024, but site under court-ordered sale/foreclosure as of 2026 — design team likely won't be assembled/expanded until ownership and financing are resolved; watch for Arcadis IBI Group to staff up structural once a buyer closes.

Private master-plan development; Arcadis IBI Group is lead architect, so SE would be pitched as their subconsultant, but the \$90M foreclosure on Duck Island puts near-term design activity on hold.

Union Bay Estates

Union Bay, BC · Commercial · 2000

ARCHITECT Blue Sky Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Uncertain — conditional foreclosure orders filed against Kensington Union Bay Properties entities are clouding the project; no active design-team RFP; monitor for refinancing/ownership resolution before expecting new consultant engagement.

Blue Sky Architecture has handled permitting/design work for the developer to date, so channel is architect-led, but foreclosure proceedings against Kensington Union Bay Properties make near-term SE engagement unlikely until financial/ownership issues resolve.

Richmond Hospital Redevelopment - Later Phases (3-4)

Richmond, BC · Hospital · 1960000000

ARCHITECT HDR Architecture Associates Inc.

CONTACT see firm page

CHANNEL **design-build** — Phase 3-4 scope and schedule are contingent on Phase 2 outcomes; Phase 2 alliance (Graham Design Builders LP + HDR Architecture Associates) was selected via the ADA RFP and is now in the alliance-development phase — Phase 3-4 structural engagement would follow through the same alliance vehicle once its scope is confirmed, likely 2026-2027.

VCH/Infrastructure BC procured this via a competitive Alliance model — Graham Design Builders and HDR Architecture Associates were selected as the alliance's builder/architect for Phases 2 & 3, so structural engagement runs through that alliance team, not a separate owner tender.

Northeast False Creek and Viaduct Replacement Plan

Vancouver, BC · Residential · 1700

ARCHITECT Civitas Urban Design & Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Still at concept/rezoning stage — Concord Pacific unveiled its 12-tower Concord Landing concept in early 2025 and city approvals/viaduct removal negotiations are ongoing; no formal structural consultant RFP yet, expect engagement to follow rezoning approval and phasing decisions (likely 2026-2027 for first towers).

This is really two tracks: the City of Vancouver's public viaduct-removal/road infrastructure (owner-direct, City-procured) and Concord Pacific's private Concord Landing towers (architect-led via Civitas); SE for the towers would be pitched through Concord's design team once individual building permits proceed.

University Hospital of Northern British Columbia (UHNBC) Patient Care Tower (Phase 2)

Prince George, BC · Institutional · 1579

ARCHITECT DIALOG BC

CONTACT see firm page

CHANNEL **design-build** — EllisDon (construction) and DIALOG (design) were announced as preferred proponent in an Alliance Contract with Northern Health/Infrastructure BC; full alliance formed, relocation of Northern Interior Health Unit slated spring 2026 and tower construction starting fall 2026 — structural engineer would already be engaging now as part of the EllisDon/DIALOG alliance team.

Delivered as an Alliance (progressive design-build) with EllisDon and DIALOG as preferred proponent — structural engagement happens through that alliance team now, not a separate owner tender; PML (mechanical) and Houle (electrical) are already named, structural should be pursued via EllisDon/DIALOG directly.

Mission Waterfront Project

Mission, BC · Residential · 1500

ARCHITECT O2 Design (master planning/landscape)

CONTACT see firm page

CHANNEL unknown — Waterfront Revitalization Master Plan completed 2022; no active building-permit design team yet

O2-led master plan is a municipal planning exercise for a large public/mixed riverfront site; actual SE procurement will happen later, project by project (some parcels city-led infrastructure, others private redevelopment) once implementation phasing/land disposition is set — no confirmed channel yet

Hemlock Valley Mountain Ski Resort Expansion

Agassiz, BC · Commercial · 1500

ARCHITECT Jordan Kutev Architect Inc.

CONTACT see firm page

CHANNEL architect-subconsultant — OCP/blueprint adopted (FVRD, ~2022-2023) for 15-20yr, 5-phase build-out; Phase 1 (Hemlock West, ~\$500M) design team forming as building permits are pursued, timing not yet fixed publicly

Private resort proponent (Berezan) with named project architect Jordan Kutev Architect Inc.; architect-led consultant team is the standard channel for individual building/lift-base packages as OCP phases proceed

Sage Hills University and Residential Community

Union Bay, BC · Institutional · 1500

ARCHITECT Hotson Bakker Architects

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL architect-subconsultant — Union Bay Estates (Kensington Island Properties/Independent Academies) MDA revised Dec 2017; higher-education campus + housing are future phases, no confirmed construction timing found

Private master-planned community with a Master Development Agreement with CVRD; university/residential buildings will be procured by the developer through its architect (Hotson Bakker/DIALOG) team as each phase advances — could not confirm current design-team activation timing, treat as directional

Britannia South Mixed-use Development

Squamish, BC · Residential · 1000

ARCHITECT Folio Architecture (Ron Lea)

CONTACT see firm page

CHANNEL architect-subconsultant — SLRD adopted final rezoning/OCP bylaws for Tiger Bay (formerly Taicheng) South Britannia on May 28, 2025; design team procurement/building permits expected to follow through 2026 as phases (surf park, town centre, ~1,050 homes) advance to construction

Private developer (Tiger Bay Developments Ltd., formerly Taicheng) now has final zoning; structural engineering will be engaged by project architect/developer team per building phase, not by SLRD

New Monaco Mixed-Use Development

Peachland, BC · Residential · 1000

ARCHITECT HDR Architecture; Aplin Martin

CONTACT Troy Ransdell Health Principal, co-leader of HDR healthcare sector · troy.ransdell@hdrinc.com
Jim Aalders Western Canada Civic Director, VP, HDR · jim.aalders@hdrinc.com

CHANNEL **unknown** — Final municipal approvals obtained 2014; project has sat undeveloped and is now (2025-2026) listed by Colliers Canada seeking a buyer or development partners — no active design/construction team assembled

AMC Developments acts as development manager for owner New Monaco LP, but with the site actively being marketed for sale/partnership, the entity that will ultimately procure the SE (existing AMC team vs. a new buyer's team) is unresolved until a transaction closes

Valemount Glacier Destination Resort

Valemount, BC · Commercial · 800

ARCHITECT Pheidias Project Management Corp. & Oberti Resort Design

CONTACT see firm page

CHANNEL **architect-subconsultant** — stalled pending financing — no active RFP; construction start unclear, engage Pheidias/Oberti when financing closes

Pheidias Project Management Corp is prime consultant and already has McElhanney and Golder Associates as lead project engineers; project has been stalled on financing since at least 2023 with no confirmed construction timeline, so any new/replacement structural engagement would flow through Pheidias as prime consultant, not a separate owner RFP.

Village at Fraser Mills

Coquitlam, BC · Residential · 600

ARCHITECT Hotson Bakker Boniface Haden Architects

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **architect-subconsultant** — ongoing, phase-by-phase — new building-permit consultant teams assembled as each residential/commercial phase (e.g. Chapter) proceeds to design/presale

Beedie Living is developer/owner; Perkins+Will leads masterplan architecture with Perry + Associates and Bunt & Associates as planning/engineering partners — individual building phases (e.g., the timber Presentation Centre used StructureCraft) get structural engineers assembled by the architect/developer team per phase, not a single central SE RFP.

UBC Student Housing Complex

Vancouver, BC · Institutional · 560

ARCHITECT Ryder Architecture (architect of record) with 3XN GXN

CONTACT see firm page

CHANNEL **architect-subconsultant** — design team already selected (Ryder Architecture + 3XN GXN, announced Nov 2024); structural subconsultant engagement would already be underway now, construction starts fall 2026

UBC selected the architect-led team (Ryder + 3XN GXN) for the Lower Mall Precinct Phase One via its design-excellence process; UBC's model is for the winning architect to assemble/lead engineering subconsultants (mass-timber 18-storey tower + 8-storey hybrid), so pitch happens through the architect team, and with construction slated for fall 2026 the structural engineer is very likely already engaged — could not confirm the specific firm from public sources.

Vicarro Ranch Residential Development

Abbotsford, BC · Residential · 560

ARCHITECT New Town Planning and Architecture Services

CONTACT see firm page

CHANNEL **unknown** — unclear — Phase A (Vicarro Skyline, 50 homes) already sold to Pacific Peak Homes; later phases/sub-areas not yet on a public design-team timeline

Diverse Properties/Seraphim Investments is the master developer and New Town Planning and Architecture Services (New Town) is architect, but public sources do not show whether structural engineering is procured directly by the developer, by New Town as prime consultant, or independently by each phase purchaser (e.g., Pacific Peak Homes for Skyline) — genuinely unclear without direct contact with Diverse Properties or New Town.

Simon Fraser University - Medical School

Surrey, BC · Institutional · 521

ARCHITECT Hariri Pontarini Architects and Adamson Architects (with SCDC)

CONTACT David Pontarini Founding Partner

Michael Attard Partner

CHANNEL **owner-direct** — design/construction contract awarded to Stantec Oct 2025 (\$10.8M, Surrey/SFU joint venture); PCL Constructors awarded construction-manager pre-construction services Apr 2026; construction expected to start late 2026, complete 2030

This is a City of Surrey / SFU Joint Venture Agreement (SCDC leading) procuring design services directly via a competitive council-approved contract — Stantec holds the \$10.8M design contract for Centre Block Phase One (which houses the medical school), and PCL was separately engaged as construction manager for pre-construction; structural engineering would flow through Stantec's design team or PCL's CM trade-partner process, i.e., pitch the owner/CM channel, not Hariri Pontarini directly (Hariri Pontarini/Adamson appear to be concept/design architects, with Stantec holding the executing design contract).

Centre Block – SFU/Provincial Office Tower

Surrey, BC · Civic / Institutional · \$520M total (Province/SFU share); City of Surrey office component cost TBD

ARCHITECT Hariri Pontarini Architects and Adamson Associates Architects (master plan w/ Urban Strategies); dev

CONTACT see firm page

CHANNEL **architect-subconsultant** — design team consultants being finalized now; PCL awarded CM pre-construction services Apr 2026, RCP Global as development manager Nov 2025 — structural likely joins Hariri Pontarini/Adamson design team through 2026-2027 as design develops toward the 47-storey East Tower/SFU medical school building

Master-planned by Urban Strategies; PCL now CM for pre-con services — SE most likely brought on as architect's structural subconsultant, not yet publicly announced.

Inglewood Care Centre Redevelopment

West Vancouver, BC · Residential · 500

ARCHITECT ZGF Architects (schematic design phase noted)

CONTACT Solvei Neiger Managing Partner, ZGF Portland Office (Healthcare Architect, AIA, ACHA) · solvei.neiger@zgf.com

Sharron van der Meulen Managing Partner (firm-wide), ZGF Architects · sharron.vandermeulen@zgf.com

CHANNEL **architect-subconsultant** — rezoning bylaws given third reading June 29, 2026 by West Vancouver council; design team (incl. structural) likely finalized through detailed design over the next 6-12 months as the project moves to permitting

Baptist Housing (non-profit developer) engaging ZGF as architect; standard private-developer model — SE pitched via the architect once schematic/DD phase resumes.

District Northwest Towers

Surrey, BC · Residential · 500

ARCHITECT IBI Group

CONTACT David Wood Principal, Practice Group Manager, Healthcare — Arcadis (formerly IBI Group)
Titka Seddighi Principal, Arcadis (Toronto)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL unknown — stalled — project placed under receivership Nov 2026 (\$85.7M owed to KingSett Capital); a \$86M stalking-horse bid is in a court-supervised sales process, so any consultant re-engagement (including structural) depends on the receivership outcome

Do not pitch until receivership/sale resolves and a new owner or the receiver confirms a go-forward design team; IBI Group was original architect.

Sinclair Centre Redevelopment

Vancouver, BC · Institutional · 500

ARCHITECT Chernoff Thompson Architects (Prime Consultant); Local Practice (sustainable design advisor); Franci Architecture

CONTACT Russell Chernoff Principal (Founder)
Naomi Gross Principal

CHANNEL design-build — P3 proponent teams formed/selected through 2025 bid process, contract awarded 2025; detailed design phase now underway with construction slated to start 2026 (completion 2030-2031)

PSPC structured this as a P3 with Colliers/Tiree as commercial advisor — structural engineer joins via the winning P3 proponent/builder team, not a direct architect pitch.

Vancouver Jewish Community Centre Redevelopment

Vancouver, BC · Residential · 427

ARCHITECT Acton Ostry Architects

CONTACT see firm page

CHANNEL architect-subconsultant — construction manager (Urban One Builders) selected Feb 2026; structural likely already engaged or being finalized on Acton Ostry's design team as the project (JWest, 950 W 41st Ave) advances through DD/CD toward a construction start

CM-led delivery with Acton Ostry as architect of record — pitch through the architect's consultant team; no evidence SE separately procured by the owner.

KPU Langley campus master plan redevelopment

Langley, BC · Academic

ARCHITECT DIALOG

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL architect-subconsultant — No individual building project or design-team RFP launched yet — DIALOG is completing the KPU2050 campus master plan/vision study; watch for a building-specific design-team RFP (likely issued by DIALOG or successor architect) once a phase is funded, plausibly 2027+

Still at campus master-plan stage; DIALOG has the planning contract, no discrete building/SE procurement yet — too early to pitch, monitor KPU2050 plan releases.

Student Housing Phase 4 (Burnaby)

Burnaby, BC · StudentHousing

ARCHITECT PUBLIC Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Phase 3 (445-bed, PUBLIC Architecture) is already under construction, completing Fall 2027; a Phase 4 design team would not likely be assembled/RFP'd until Phase 3 nears completion, i.e. 2026-2027

Public reporting only confirms Phase 3 (PUBLIC Architecture, opening 2027); no confirmed 'Phase 4' project or architect found — treat as speculative/early, SE would be subconsultant to whichever architect SFU selects.

UBC Lower Mall Precinct — Future Housing Phases (Campus Vision 2050)

Vancouver, BC · Post-Secondary · TBD (part of Campus Vision 2050; Phase 1 is \$560M)

ARCHITECT 3XN (design architect, Copenhagen) with Ryder Architecture (architect of record, Vancouver)

CONTACT see firm page

CHANNEL **architect-subconsultant** — Design team (Ryder Architecture + 3XN GXN) already selected Nov 2024; construction of new buildings begins Fall 2026, so structural engagement (as sub to Ryder/3XN) should already be underway or imminent now

UBC Properties Trust selected Ryder+3XN GXN as design architect team for the \$560M Lower Mall Precinct; SE will be a subconsultant to that team — pitch Ryder/3XN directly, not UBC.

Langara College — Campus Redevelopment Phase 1 (A Building Replacement and New Buildings)

Vancouver, BC · Post-Secondary · Not publicly disclosed (part of 25-30 year master plan; first phase funding TBD)

ARCHITECT Teeple Architects (with Hancock Bruckner Eng + Wright Architects)

CONTACT see firm page

CHANNEL **unknown** — No active RFP found; Building A replacement is named priority in Langara's master plan (Teeple Architects authored 2005 plan) but no funded project, architect selection, or SE procurement has surfaced publicly as of mid-2026

Langara's redevelopment is still at master-plan/priority-setting stage for Building A; insufficient public detail to call channel with confidence — watch Langara capital planning and BC PSFS announcements.

Foothills Multisport Fieldhouse

Calgary, AB · Civic · 380000000

ARCHITECT GGA Architecture (early amenity study 2023); design consultant selected via 2024 RFP — name not publicly disclosed

CONTACT see firm page

CHANNEL **owner-direct** — City of Calgary ran its own consultant RFP in 2024 for the pre-design master plan/consultant team; project now in detailed design phase (concluding ~fall 2025), with construction funding (\$109M allocated) still being assembled — watch City of Calgary procurement portal for the next-stage detailed-design/construction RFP

City of Calgary procured the design consultant team directly via public RFP (not GGA, whose 2023 amenity study predates this); the 2024-selected consultant name is not publicly disclosed — monitor City of Calgary bid portal for the next RFP wave as funding closes.

Renaissance Development Plan

Whistler, BC · Commercial · 345

ARCHITECT BOS Studio Architecture Ltd. (Architect of Record); Ecosign Mountain Resort Planners (masterplan)

CONTACT see firm page

CHANNEL **architect-subconsultant** — still Preliminary/Feasibility — no design-team RFP dated yet; Phase 1 (Watershed + lift) is furthest along, watch for consultant team announcements as Phase 1 moves to permitting

Private resort capital project; BOS Studio (AOR) + Ecosign will assemble the consultant team, no public SE tender expected.

Smith Area Middle Secondary School

Langley, BC · Institutional · 306

ARCHITECT Thinkspace Architecture

CONTACT Henk Kampman Principal, ALEP
Todd Dust Principal (Kelowna office)

INCUMBENT Bush, Bohlman & Partners LLP (dominant), ASPECT Structural Engineers (occasional)

CHANNEL **architect-subconsultant** — design underway now (started under prior contract award), design phase ran to winter 2025/26, construction starting shortly after; occupancy targeted Sept 2027 — SE almost certainly already engaged under Thinkspace's team

SD35 awarded design contract directly to Thinkspace as prime; Thinkspace/Make Projects assembles engineering subconsultants — likely too late to pitch SE seat, but confirm via Thinkspace if any consultant gaps remain.

Flavelle Mill Master Planned Community

Port Moody, BC · Residential · 300

ARCHITECT Wensley Architecture (WA Architects)

CONTACT Neil Banich Principal / Design Director
David Echaiz-McGrath Principal

CHANNEL **architect-subconsultant** — master plan approved by Port Moody Council (2018); project now moving toward rezoning/subdivision and phased building permits — SE engagement likely phase-by-phase as towers are designed, watch WA Architects team announcements per tower

Flavelle Oceanfront Development (private) with WA Architects as master plan/building architect; SE brought on by architect per building phase, not owner-direct.

Lions Gate Hospital Redevelopment - Future Phases (Health Vision LGH)

North Vancouver, BC · Hospital

ARCHITECT dys Architecture

CONTACT Laurie Mackintosh Principal, dys architecture (Architect AIBC, MRAIC)
Darcy Imada Principal, dys architecture (Architect AIBC, Certified Passive House Consultant)

CHANNEL **owner-direct** — Phase 3 (Paul Myers Tower) delivered via Infrastructure BC RFP; future phases beyond Phase 3 not yet at procurement — watch Infrastructure BC project page and VCH capital projects page for next RFP issuance

Public hospital capital project procured via Infrastructure BC competitive RFP for design-build/design team, not architect-led private engagement; dys Architecture listed as AOR for current/next phase but structural likely bundled into IBC-led procurement.

Nanaimo Long-term Care Facility

Nanaimo, BC · Institutional · 286

ARCHITECT Stantec

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) ·
tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — Stantec selected as prime consultant (design services) following RFP; project in procurement/design phase now, construction targeted to begin 2025 (per release) — SE seat under Stantec's team, likely already filled or in active assembly

Island Health selected Stantec as sole prime consultant (architecture+engineering) for 3 LTC homes incl. Nanaimo/Lantzville; SE engaged as Stantec subconsultant/in-house, not a separate owner tender.

Crystal Pool Replacement

Victoria, BC · Commercial · 233

ARCHITECT hcma Architecture + Design

CONTACT Darryl Condon Managing Principal · d.condon@hcma.ca
Susan Ockwell Senior Director, Learning Environments · s.ockwell@hcma.ca

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Fast + Epp (frequent)

CHANNEL **architect-subconsultant** — design underway now through 2026, construction targeted to start ~2027 for 2030 opening — SE would be engaged by HCMA now/already engaged as design advances

HCMA holds the \$3.3M architecture+engineering design contract for the \$209.2M replacement; construction manager (Etro-Durwest) named June 2026 for cost/constructability input, but consultant team (incl. structural) is assembled under HCMA, not tendered separately by the City.

GEC Education Mega Centre

Surrey, BC · Commercial · 225

ARCHITECT Chris Dikeakos Architects

CONTACT Chris Dikeakos Founding and Managing Principal
Mike Alivojvodic Principal

INCUMBENT Glotman Simpson Consulting Engineers (frequent)

CHANNEL **architect-subconsultant** — project approved by Surrey council (Feb 2021) and in planned/permitting stage; SE engagement would already be underway with Chris Dikeakos Architects' team as working drawings progress toward the \$330M build

Private developer (WestStone/CIBT) project with architect-led design team; no public tender channel — pitch Chris Dikeakos Architects/Urban Solutions directly for the structural sub-consultant role.

Okanagan Centre for the Performing Arts

, BC · civic · 220000000

ARCHITECT Revery Architecture

CONTACT Venelin Kokalov Design Principal / Design Lead, Revery Architecture

INCUMBENT Fast + Epp (dominant), WSP Canada Inc. (occasional)

CHANNEL **unknown** — still in early planning/costing stage as of Dec 2025 council report; formal design-team RFP not yet confirmed — funding for continued planning allocated in 2026 city budget

Revery Architecture has done preliminary siting/costing work for the City of Kelowna, but a formal delivery model (architect-led vs. separate City procurement) has not yet been announced; monitor City of Kelowna council agendas for the next procurement step.

101 Font Bl, San Francisco - 14-storey apartments (471 units)

San Francisco, CA · Building Permit · 219015000.0

ARCHITECT Kohn Pedersen Fox (KPF)

CONTACT Jill N. Lerner Principal, FAIA
Claudia Cusumano Principal

CHANNEL **architect-subconsultant** — building permit stage (filed) — structural engineer would already be retained by KPF's project team for permit drawings; watch SF DBI permit record for named SE of record

Private San Francisco residential highrise with KPF as architect of record; SE is typically engaged directly by the architect/developer team pre-permit — could not confirm specific project details or named SE via public search, verify via SF DBI permit lookup.

University of Alberta LIFT Centre (Biological Sciences Building Redevelopment) – Phase 1

, AB · Post-secondary · 218700000

ARCHITECT START Architecture

CONTACT see firm page

CHANNEL **owner-direct** — Phase 1 construction funded (\$100M provincial investment, total \$218.7M) with design underway now (2025-2026); institutional capital project likely follows University of Alberta Facilities & Operations procurement process for consultants

START Architecture is engaged for architectural design of the Zoology Wing renewal; as a public university capital project the structural engineer sub-consultant is typically named on the same design-team RFP/contract led by the university, but could also be architect-selected — treat as owner-direct via U of A Infrastructure procurement until team roster confirmed.

Crystal Pool Replacement (Crystal Pool and Wellness Centre)

, BC · recreation · 209200000

ARCHITECT HCMA Architecture + Design

CONTACT Darryl Condon Managing Principal · d.condon@hcma.ca

Susan Ockwell Senior Director, Learning Environments · s.ockwell@hcma.ca

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant), Fast + Epp (frequent)

CHANNEL **architect-subconsultant** — detailed design underway now (2026); construction start targeted ~2027-28 for 2030 opening

City of Victoria awarded HCMA a \$3.3M design/engineering contract; HCMA assembles its consultant team (SE included) while Etro-Durwest JV is separately engaged as construction manager — pitch HCMA now, CM for trade/GC-adjacent scopes later.

1 Avenue Of The Palms, San Francisco - 31-storey apartments (265 units)

San Francisco, CA · Building Permit · 207100000.0

ARCHITECT Handel Architects

CONTACT Harriet Chang, RA Principal, San Francisco office

James (Jim) Hakes, AIA, NCARB Managing Principal

INCUMBENT DeSimone Consulting Engineering (dominant), Magnusson Klemencic Associates (MKA) (occasional)

CHANNEL **architect-subconsultant** — permit filed/in plan-check now; SE likely already engaged by Handel's team at filing

Private SF residential tower at Building Permit/filed stage — Handel Architects (design architect) assembles the consultant team including structural for the permit set; approach the architect, not a public portal.

Chateau Blanc Resort Hotel

Big White, BC · Commercial · 200

ARCHITECT DA Architects + Planners

CONTACT Mark Ehman Principal (Design Lead / Principal-in-Charge)

James Kao Principal / Partner

INCUMBENT Glotman•Simpson Consulting Engineers (frequent), RJC Engineers (Read Jones Christoffersen) (occasional)

CHANNEL **unknown** — on hold indefinitely; no active procurement signal found

Long-stalled Berezan project (halted since 2008-09 recession, briefly revived 2015 with no firm construction dates); found no evidence of current activity or a live consultant team as of this research — do not pursue until a restart signal appears.

395 03rd St, San Francisco - 35-storey apartments (524 units)

San Francisco, CA · Building Permit · 200000000.0

ARCHITECT Henning Larsen (design architect) / Multistudio (architect of record)

CONTACT Greg Johnson Managing Principal, San Francisco Studio
Matthew Pauly, AIA, NCARB Associate Principal, San Francisco Studio

CHANNEL **architect-subconsultant** — already in plan-check/filed (city approved design Aug 2023); SE engaged since design development, pitch for any remaining scopes now

Private developer Strada Investment Group; design team is Henning Larsen (design architect) + Multistudio (architect of record) — architect of record typically holds the SE relationship for a project this far along in permitting.

City Centre 10,000-seat indoor arena (mixed-use)

Surrey, BC · Civic · 200000000

ARCHITECT Perkins&Will

CONTACT Derek Newby Principal, Managing Director (Vancouver & Calgary Studios); Regional Managing Director, Canada; Firmwide Board of Directors (2026)

Cecily Eckhardt Principal and Managing Director, Ontario (Toronto & Ottawa Studios)

INCUMBENT Rutherford + Chekene (San Francisco) (occasional), Holmes (San Francisco) (occasional)

CHANNEL **design-build** — proponent bidding closed late May 2026; agreement in principle announced with Surrey City Development Corp/Vancouver Giants team, detailed design phase starting imminently, construction possibly as early as 2027

City of Surrey ran a design-develop-construct-finance-operate competitive bid; the winning proponent team (not the City directly) will engage the structural engineer — pitch the selected developer/proponent, not City Hall, and move fast since detailed design is starting now.

Yorkton Twin Towers

Edmonton, AB · Residential · \$200000000.00

ARCHITECT Gardner Architecture

CONTACT see firm page

CHANNEL **architect-subconsultant** — Development already rezoned (approved 2014); design team assembly/building permit stage — pitch Gardner Architecture now as they finalize working drawings for the towers/mall.

Private condo/mall development by Yorkton Group; Gardner Architecture leads design applications, will select structural sub-consultant directly — no public procurement.

The Grove Apartments

Burnaby, BC · Residential · 200

ARCHITECT IBI Group (with Integra Architecture on Phase 1; PWL Landscape Architects for landscape)

CONTACT Jeffrey Gyzen Principal, Global Practice Group Director — Mission Critical & Industrial Facilities, Arcadis

Jennifer Cone Sr. Pursuit Specialist – Education, Arcadis

CHANNEL **architect-subconsultant** — Phase 1 (948 units, ~5 towers) rezoning in progress/approved circa 2022-2024; structural sub likely already engaged for permit set — pitch IBI Group/Integra Architecture for later phases now.

Private multi-phase Aoyuan/Anthem residential development in Burnaby's Brentwood area; architect team (IBI Group with Integra on Phase 1) assembles consultants including structural, not a public bid.

Mayfair West

Vancouver, BC · Residential · 200

ARCHITECT Hariri Pontarini Architects (with Arcadis, formerly IBI, as architect of record)

CONTACT Doron Meinhard Partner
Nazia Aftab Associate Partner, OAA, LEED AP

CHANNEL **architect-subconsultant** — Phase 1 (The Mews, 2 towers 20-23 storeys) moving to permit stage per Grosvenor's 2024-2025 unveiling; approach Hariri Pontarini/Arcadis now for structural sub-consultant scope on Phase 1 and future phases of the 14-acre master plan.

Private master-planned redevelopment led by Grosvenor with capital partners Transca/Modern Green (MOMC); architect of record Arcadis (formerly IBI) with Hariri Pontarini as design architect select structural engineer directly.

Whitgift Gardens Condos

Coquitlam, BC · Residential · 200

ARCHITECT Rafii Architects Inc.

CONTACT Foad Rafii Principal

CHANNEL **architect-subconsultant** — Phase 1 (two high-rise towers) had first rezoning reading circa 2023; subsequent phases (remaining 6 towers of the 8-tower master plan) will follow over the coming years as land-exchange/rezoning with City of Coquitlam and YMCA proceeds — pitch Rafii Architects Inc. for Phase 1 structural scope and Raymond Letkeman Architects/Endall Elliott for overall master plan phases.

Private redevelopment by Concert Properties (with City of Coquitlam/YMCA land exchange); architect of record for each phase assembles the structural consultant, not an owner-run public bid despite municipal land-swap involvement.

200 Main St, San Francisco - 47-storey apartments (491 units)

San Francisco, CA · Building Permit · 195299100.0

ARCHITECT Solomon Cordwell Buenz (SCB)

CONTACT Chris Pemberton President and CEO · chris.pemberton@scb.com
Benjamin Wrigley Principal · ben.wrigley@scb.com

CHANNEL **architect-subconsultant** — Project already has Planning Department approval (2022) and is in building-permit filing stage per SF DBI records; owner Hines filed a height-increase amendment — structural engagement would already be locked in for the permit set filed by SCB's team; confirm current permit status via SF DBI records.

Private Hines-led Transbay Block 4 tower; architect Solomon Cordwell Buenz assembles the structural engineer as sub-consultant for the building permit application, no public procurement channel.

Cottonwoods Care Centre Redevelopment

Kelowna, BC · long-term care

ARCHITECT Stantec Architecture Ltd.

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com

Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **architect-subconsultant** — consultant team already forming under Stantec now; construction underway fall 2025-2027, so structural sub-consultant likely already engaged — pitch Stantec directly for any remaining scope or Phase 2

Interior Health awarded prime consultant contract to Stantec Architecture and CM contract to Bird Construction (traditional design-bid-build via prime consultant); structural engagement flows through Stantec's team, not a separate IH tender.

655 04th St, San Francisco - 40-storey apartments (501 units)

San Francisco, CA · Building Permit · 182951076.0

ARCHITECT Solomon Cordwell Buenz (with IwamotoScott Architecture)**CONTACT** Chris Pemberton President, SCB

Tim M. Stevens, AIA, LEED AP Principal, San Francisco (Campus Environments)

INCUMBENT DCI Engineers (dominant), Tipping Structural Engineers (Tipping.com) (frequent)**CHANNEL** **architect-subconsultant** — already at filed Building Permit stage, so SE was engaged during entitlement/design (likely 2022-2023); any remaining pursuit window is for permit-set revisions or the next phase of construction documents — approach SCB/IwamotoScott now

Private developer (Tishman Speyer) project delivered via architect-led design team (SCB + IwamotoScott); structural engineer would be an architect's sub-consultant, not a separate owner procurement — no public SE listed yet in sources reviewed.

95 Hawthorne St, San Francisco - 42-storey apartments (412 units)

San Francisco, CA · Building Permit · 180000000.0

ARCHITECT Skidmore, Owings & Merrill (SOM)**CONTACT** Carrie Byles Partner, SOM (San Francisco) — formerly Executive Committee member (termed out 2025)

Jose Luis Palacios, AIA Principal, SOM Los Angeles (Design Studio leadership)

CHANNEL **architect-subconsultant** — permits filed 2020, project has since been approved and moved toward construction (pre-construction underway with Turner Construction); if not already locked in, window was pre-2020 design phase — for new work, approach SOM or Turner Construction directly

Client John Hancock/developer used architect (SOM)-led design team for entitlement; Turner Construction handling pre-construction/GC services suggests a design-build/CM-at-risk hybrid — Interface Engineering (MEP) already listed as sub-consultant to SOM, implying structural was procured the same way (architect-subconsultant), though this could not be fully confirmed.

New Student Housing - 510-bed residence

Victoria, BC · StudentHousing · 178000000

ARCHITECT Diamond Schmitt Architects**CONTACT** Ana Maria Llanos Principal & Vancouver Studio Leader, Diamond Schmitt

Donald (Don) Schmitt Principal & Co-Founder, Diamond Schmitt

CHANNEL **owner-direct** — design team RFP/RFQ likely to follow provincial funding commitment (announced ~Sept 2025, \$120M+ from Province); design phase now underway toward 2029 completion — watch UVic Campus Planning and BC Bid for consultant team RFP, expected within the next 6-12 months if not already issued

UVic is a public post-secondary institution procuring via its own Campus Planning office and BC Bid; Diamond Schmitt is architect of record but public institution capital projects typically run a separate/joint consultant team RFP — verify via UVic Campus Planning procurement postings.

Richmond Long-term Care Home

Richmond, BC · Institutional · 178

ARCHITECT Zeidler Architecture**CONTACT** Lucas Gallardo Managing Principal, Vancouver

Margo Smith Senior Associate / Interior Design Studio Lead, Vancouver

CHANNEL **architect-subconsultant** — design team (Zeidler + Eitaro Hirota Architecture + MAKE Projects) already assembled and in active design/planning session phase; structural sub-consultant selection likely concurrent or already done — pitch Zeidler/Eitaro Hirota now if not yet engaged

Named 'Richmond Lions Manor-Fentiman' — VCH working with a multi-firm architect team (Zeidler + Eitaro Hirota + MAKE Projects); structural engagement follows the architect-led design team model typical of VCH capital projects, not a separate owner tender.

151 Humboldt St, San Francisco - 13-storey apartments (348 units)

San Francisco, CA · Building Permit · 175000000.0

ARCHITECT Foster + Partners

CONTACT see firm page

CHANNEL **architect-subconsultant** — permit already filed (building permit stage) — team already assembled; watch for any late structural sub swap during plan-check revisions

Private SF developer project, Foster + Partners as design architect at filed/permit stage; architect assembles full consultant team on private US developments — no separate SE tender found.

725 Harrison St, San Francisco - 15-storey office

San Francisco, CA · Building Permit · 167103000.0

ARCHITECT HOK

CONTACT see firm page

CHANNEL **architect-subconsultant** — permit filed 2019, approved by SF Planning Commission; team locked at filed stage — monitor plan-check revisions/modifications (mods proposed 2022)

Boston Properties developer, HOK design architect, 725 Harrison St office — private development, architect holds the consultant team; no independent owner-direct SE procurement identified.

655 04th St, San Francisco - 40-storey apartments (494 units)

San Francisco, CA · Building Permit · 166585635.0

ARCHITECT Solomon Cordwell Buenz + IwamotoScott Architecture (joint design team)

CONTACT see firm page

CHANNEL **architect-subconsultant** — permit filed; design team (SCB + IwamotoScott) already public as of 2022-2023 renderings — structural sub likely already engaged by architect

Tishman Speyer developer, SCB+IwamotoScott joint design team, 1,105-unit twin towers — private development, architect-led consultant team, no separate owner SE bid found.

Times Mirror Square

, CA · Residential High-Rise · USD 120,000,000 @1.36 (2026-06-16)

ARCHITECT Solomon Cordwell Buenz (SCB)

CONTACT Chris Pemberton President and CEO · chris.pemberton@scb.com
Benjamin Wrigley Principal · ben.wrigley@scb.com

CHANNEL **architect-subconsultant** — project approved by LA City Council; design underway with SCB as design architect — pitch SCB now for structural sub role if not already engaged

Onni Group (private developer) with SCB as design architect for 1,127-unit twin-tower LA project; Onni/SCB typically assemble consultant team including SE — no public owner-direct procurement channel identified.

Calgary Northeast Athletic Complex — Saddle Ridge

Calgary, AB · Recreation · \$162M total (\$105M construction budget)

ARCHITECT GEC Architecture

CONTACT Peter Osborne Partner (Managing Partner; founder of GEC's Edmonton studio)
Gary Mundy Partner (transportation/infrastructure sector lead)

INCUMBENT RJC Engineers (Read Jones Christoffersen) (dominant)

CHANNEL **architect-subconsultant** — design underway since summer 2025 (GEC hired to complete design), development permit already submitted — structural sub likely already engaged by GEC; contractor selection process starting next, separate from design consultants

City of Calgary capital project; City hired GEC Architecture directly in summer 2025 to lead design (DP submitted) — SE almost certainly a GEC subconsultant, though City could still separately tender; treat as moderate-confidence architect-subconsultant, not confirmed owner-direct SE RFP.

Brentwood / Willingdon Community Centre (Grosvenor partnership)

Burnaby, BC · Civic · 161500000

ARCHITECT Perkins&Will**CONTACT** Derek Newby Principal, Managing Director (Vancouver & Calgary Studios); Regional Managing Director, Canada; Firmwide Board of Directors (2026)

Cecily Eckhardt Principal and Managing Director, Ontario (Toronto & Ottawa Studios)

INCUMBENT Rutherford + Chekene (San Francisco) (occasional), Holmes (San Francisco) (occasional)**CHANNEL** **design-build** — Design team engaged now; construction start Q3 2027

Community centre is embedded in Grosvenor's private Brentwood redevelopment; Grosvenor manages construction and will hand the finished facility to the City, so the SE will be pulled into Grosvenor's/Perkins&Will's project team rather than tendered separately by the City — pitch Grosvenor's design-build team, not a City RFP portal.

Piano Condominium

Surrey, BC · Residential · 160

ARCHITECT IBI Group**CONTACT** David Wood Principal, Practice Group Manager, Healthcare — Arcadis (formerly IBI Group)
Titka Seddighi Principal, Arcadis (Toronto)**INCUMBENT** RJC Engineers (Read Jones Christoffersen) (dominant)**CHANNEL** **architect-subconsultant** — Consultant team already assembled — SE already engaged (Glotman Simpson) per project team page, currently in consultation/approvals

Private Concord Pacific tower; IBI Group as architect of record already retained Glotman Simpson as structural — engagement channel confirmed, window has effectively closed for this specific project.

Ash Crescent Condos

Vancouver, BC · Residential · 160

ARCHITECT James KM Cheng Architects**CONTACT** James K. M. Cheng Principal, James K.M. Cheng Architects Inc.**INCUMBENT** Glotman Simpson Consulting Engineers (frequent), Jones Kwong Kishi Consulting (frequent)**CHANNEL** **architect-subconsultant** — Rezoning approved Feb 2026 (council doc dated 2026-02-12); SE selection/confirmation expected now as project moves into development-permit design

Concert Properties/Peterson Group private residential project (Langara Gardens); James KM Cheng Architects leads design team and will select/confirm the structural sub as DP drawings advance — no public procurement, pitch the architect directly.

400 02nd St, San Francisco - 27-storey office

San Francisco, CA · Building Permit · 160000000.0

ARCHITECT Skidmore, Owings & Merrill (SOM)**CONTACT** Carrie Byles Partner, SOM (San Francisco) — formerly Executive Committee member (termed out 2025)

Jose Luis Palacios, AIA Principal, SOM Los Angeles (Design Studio leadership)

CHANNEL **architect-subconsultant** — Permit already approved for the SOM-designed scheme; structural consultant would have been engaged by SOM/developer during permit design (pre-2026)

Private SF office tower designed by SOM (which also does in-house structural on many of its own towers) — could not confirm the external SE of record for 400 2nd St specifically; if SOM used its internal structural group the channel is effectively closed, otherwise treat as architect-subconsultant and approach SOM's SF studio.

1500 Market St, San Francisco - 40-storey apartments (300 units)

San Francisco, CA · Building Permit · 156880000.0

ARCHITECT Solomon Cordwell Buenz (SCB)

CONTACT Chris Pemberton President and CEO · chris.pemberton@scb.com
Benjamin Wrigley Principal · ben.wrigley@scb.com

CHANNEL **architect-subconsultant** — Project revised/approved 2022, now at filed building-permit stage; construction-documents-phase structural sub likely already retained by SCB/developer (Build Inc.)

Private residential tower (One Oak, 1500 Market) by developer Build Inc. with SCB as architect; structural engagement channel is via the architect/developer design team, not a public bid — no SE name confirmed in sources found.

Long-term Care Facility

Cranbrook, BC · Institutional · 156

ARCHITECT Zeidler Architecture

CONTACT Lucas Gallardo Managing Principal, Vancouver
Margo Smith Senior Associate / Interior Design Studio Lead, Vancouver

CHANNEL **architect-subconsultant** — design team assembled ~2023-2024; construction underway now (Bird Construction CM, spring 2025 start), Phase 1 opening 2027, full completion 2029 — structural likely already engaged under Zeidler's team

Interior Health/KERHD named Zeidler Architecture for 'architectural and engineering services' and Bird Construction as CM — Zeidler assembles the consultant team, so pitch (or verify current) SE is a Zeidler subconsultant; project may already be structurally staffed given construction is underway.

Camosun Student Housing

Victoria, BC · Institutional · 155

ARCHITECT DIALOG + Thinkspace Architecture

CONTACT Vance Harris Partner, Architect, Vancouver Studio Chair · vharris@dialogdesign.ca
Martin Nielsen Partner, Architect and Mechanical Engineer · mnielsen@dialogdesign.ca

INCUMBENT DIALOG (in-house structural — via 2018 Jones Kwong Kishi Engineering merger) (dominant), Glotman Simpson Consulting Engineers (occasional)

CHANNEL **architect-subconsultant** — design phase now, construction anticipated to start spring 2026 — SE subconsultant likely already engaged by DIALOG/Thinkspace

DIALOG + Thinkspace are prime consultants leading design (BTY = PM, Kinetic = construction manager); no public RFP for SE — engagement is via the architect team, and with construction slated for spring 2026 the structural sub is likely already locked in.

Composting Facility, Shepard Landfill

Calgary, AB · Agriculture / Forestry and Related · \$154000000.00

ARCHITECT Stantec

CONTACT Tariq Amlani, P.Eng. Vice President, Buildings, Health Sector Lead (Canada) · tariq.amlani@stantec.com
Shaun Gill Senior Principal, Regional Leader (British Columbia) · shaun.gill@stantec.com

INCUMBENT Bush, Bohlman & Partners (occasional), RJC Engineers (occasional)

CHANNEL **unknown** — n/a — project completed and operating since 2017

This is a historical/completed City of Calgary P3 (DBF-OM) facility built 2015-2017 with Stantec as multidisciplinary lead (incl. structural); not a live pursuit — flag as stale/no current opportunity rather than 'Announced'.

Olympic Village Elementary School

Vancouver, BC · Institutional · 151

ARCHITECT McFarland Marceau Architects

CONTACT Marie-Odile Marceau Principal / Owner
Larry McFarland President / Principal

CHANNEL **architect-subconsultant** — design underway now; construction targeted to start spring 2027, opening fall 2029 — SE subconsultant engagement expected via McFarland Marceau in the next design phase

VSb selected McFarland Marceau Architects via competitive RFP to lead design; SD39/VSb procures the architect who then assembles consultants, so pitch MMA directly as the school moves from preliminary/feasibility into full design.

First Canadian Centre East Tower

Calgary, AB · Commercial / Retail · \$146000000.00

ARCHITECT NORR Architects

CONTACT see firm page

CHANNEL **unknown** — no confirmed development timeline; revival announced Dec 2024/2025 by new owner, no RFP or proponent-team activity reported yet

Ownership changed — G2S2 Capital/Armco Alberta bought the site Nov 2024 from GWL Realty Advisors and is exploring reviving the second tower (now framed as residential, not the original NORR office tower); GWL/NORR data is stale, delivery model for the new owner's plan is not yet public.

Appendix B — Competitor load map (top 25 SE firms)

RJC Engineers

19 known seats in our data

RECENT TD Terrace (47-storey office tower, Toronto); One Bloor West (85-storey supertall, Toronto — Canada's first supertall); The Well (mixed-use, Toronto, 1.2M sf office + 1,700 residential units); CIBC SQUARE Phase 2 (141 Bay St, 50-storey, 1.5M sf office, Toronto)

CAPACITY Visibly STRETCHED / hiring, not hungry. RJC shows sustained expansion signals across the last 24 months: new offices (Halifax, PEI/Stratford, Ottawa relocation-for-growth, Kelowna expansion, Nanaimo relocation), an active US acquisition (Kordt Engineering Group, Las Vegas + Reno NV), and two consecutive annual waves of new Principals/Associates (3 Principals + 4 Associates Jan 2025; 3 Principals + 9 Associates Jan 2026) — the second wave nearly doubling associate promotions year-over-year, a classic sign of a firm growing headcount and backfilling leadership under load. It is concurrently carrying multiple flagship, multi-year megaprojects (One Bloor West supertall, TD Terrace, The Well, CIBC SQUARE Phase 2, FORMA, BMO Centre) plus a steady stream of institutional/mass-timber work (UBC Gateway, Royal Roads, UVic). Careers page lists open reqs across Vancouver, Surrey, Kelowna and Victoria concurrently. No layoff/restructuring signal found anywhere in trade press or employee-review sites. Net read: RJC is running near capacity on major-project delivery teams, particularly in its Toronto tall-building practice and BC institutional/mass-timber practice — a firm this stretched is more likely to be selective/slower on RFPs than aggressively chasing every regional pursuit.

Displacement angle: RJC's visible BC institutional wins cluster around UBC/Royal Roads/UVic (Victoria/Lower Mainland academic core) and downtown Toronto supertalls — no evidence surfaced of active RJC work with Island Health, Camosun College, or Vancouver Island University specifically (only an advisory-council personal tie for one principal, not a project credit), and no confirmed RJC presence in California or Washington State despite a growing US footprint via the Nevada (Las Vegas/Reno) acquisition. This suggests two openings for KOR: (1) Island Health and VIU/Camosun-scale institutional structural work on Vancouver Island, where RJC's visible portfolio is thin relative to its Victoria office's academic-sector reputation, and (2) US West Coast (WA/CA) institutional pursuits, where RJC's US expansion is currently pointed at Nevada rather than the Pacific coast, leaving a geographic gap KOR's California/coastal relationships could exploit before RJC extends its US buildout westward.

Not yet awarded

16 known seats in our data

Could not complete this task: the target company name appears to be missing or was passed through literally as the placeholder text "Not yet awarded" rather than an actual structural engineering firm name. There is no real firm identified to research (no name, no project, no market segment beyond generic "western Canada / US west institutional"). I did not fabricate wins, sources, or a capacity signal for a firm that doesn't exist. To get a real competitor workload map, please supply the actual firm name (e.g., a specific structural engineering competitor such as Read Jones Christoffersen, Fast + Epp, Equilibrium, DIALOG, etc.) and I will run the research properly with cited sources.

Glotman Simpson

12 known seats in our data

RECENT Banff 200 Block Redevelopment (Banff, AB); 1550 Alberni (Fifteen Fifteen / Alberni, Kengo Kuma design); First Light, Seattle, WA; Canada's Earth Tower, Vancouver, BC (~120m hybrid mass-timber tower)

CAPACITY Stretched, not hungry. Public project list shows ~19+ concurrently "current" projects spanning five metros (Vancouver, Seattle, LA, Santa Monica/Beverly Hills, San Diego, Irvine) plus a marquee new competition win (Banff, partnered with Kengo Kuma) layered on top. Staff has grown from ~80 to "90+" per their own site copy within roughly a year, and they carry 3 concurrent open Vancouver postings (Structural Design Engineer, Intermediate Project Engineer, Assistant Project Coordinator) plus an evergreen "on-going recruiting" pipeline — classic signs of a firm growing to keep pace with backlog rather than one short on work. Sustainability blog cadence (SE2050/embodied-carbon tracking across 26 projects in 2025) also signals a firm with enough throughput to invest in reporting overhead, not one hunting for billable hours.

Displacement angle: Glotman Simpson's public project list is almost entirely private commercial/residential high-rise (developer-driven towers/mixed-use) concentrated in Vancouver + US West Coast gateway cities (Seattle/LA/SD/Santa Monica) — very little visible institutional/public-sector work (K-12, health authorities, transit, civic) and no BC Interior/Vancouver Island/Okanagan presence in their listings. That gap — public-sector procurement, healthcare/institutional, and secondary BC markets outside the Lower Mainland core — is where a firm like KOR could compete for share GS isn't visibly chasing; their Banff win with Kengo Kuma also shows they'll reach into new geographies when partnered with a marquee architect, so watch for them showing up opportunistically in resort/tourism markets (Whistler, Banff-adjacent) as a displacement risk in the other direction.

DCI Engineers

10 known seats in our data

RECENT The Artise; Timberview VIII (mass timber affordable housing, Portland); Bush Middle School (mass timber); Heartwood (mass timber project)

CAPACITY Signals point to a firm that is expanding/stretched, not hungry. Careers page shows ~26 concurrent open reqs (Glassdoor) spanning Seattle, Portland, Bozeman, Kalispell, Houston, Anchorage — including senior/PM-level roles (Senior Structural Project Engineer, Structural Engineering Project Manager) not just entry-level, which typically signals backlog pressure rather than a slow pipeline. The firm relocated HQ (Sept 2025), absorbed a Spokane surveying firm as a tuck-in (Oct 2024), and ran "big numbers" fall promotions (Oct 2025) plus a fresh wave of Associate/Associate Principal promotions (Mar 2026) and two new Managing Principals named as recently as July 9, 2026 — all consistent with a firm scaling leadership bench to match growing workload across 20+ offices and 400+ staff. No layoff, lost-project, or lawsuit signal surfaced in search (absence of evidence, not proof of absence — Bloomberg/ZoomInfo/LinkedIn didn't have deal-level detail).

Displacement angle: DCI's own project list and news skew heavily toward WA/OR/ID/MT/hospitality/multifamily/mass-timber/warehouse-industrial and increasingly non-West markets (Dallas, Hawaii, Wilmington DE, Houston, Anchorage, even Jakarta) — the firm reads as spreading itself across a national/even international footprint rather than deepening BC/western Canada presence. No BC project, BC office, or Canadian press hit surfaced despite explicit searches ("Vancouver," "Victoria," "British Columbia") — only a secondary claim (Modular Building Institute listing) that they're licensed in BC, with zero found built work there. That's a plausible gap: DCI appears to have BC licensure but no visible BC project pipeline or local staff presence, which is a real opening for KOR on BC institutional/health/seismic-upgrade work where DCI would be flying in cold. Could not verify a specific hospital/university seismic-upgrade project with DCI as EOR despite targeted searching — their healthcare/seismic messaging is generic marketing copy, not backed by a named case study in what I found, suggesting healthcare-seismic may be a weaker vertical for them relative to mass-timber/multifamily/industrial where they have strong, named, awarded work. Caveat: this is search-only reconnaissance (no LinkedIn post scrape, no paywalled ENR/DJC full-text, no state licensing board pull) — treat capacity and displacement reads as directional, not confirmed via primary financial/backlog data.

Fast + Epp

8 known seats in our data

RECENT Limberlost Place (George Brown College); BCIT Tall Timber Student Housing; PNE Freedom Mobile Arch (Pacific National Exhibition, Vancouver); The Hive (2150 Keith Drive, Vancouver False Creek Flats)

CAPACITY Visibly stretched, not hungry. Active hiring across multiple offices in 2026 (Structural Engineer roles opened Vancouver + Toronto Apr 15 2026; BIM Lead opened Vancouver May 29 2026; ongoing 'always hiring' careers page), plus 4 new Associates and 4 new Principals promoted Jan 2026 — classic signal of a firm expanding capacity to absorb a full pipeline rather than seeking work. They are running many concurrent flagship projects simultaneously (The Hive, PNE Arch, BCIT housing, Limberlost, UVic residences, multiple Vancouver school seismic replacements, Mannheim/NY Brunswick international work) plus R&D (NRCan-funded CLT research) and community/marketing initiatives (Design Hive Workshops, Rwanda bridge build) — bandwidth for volunteer/thought-leadership work suggests healthy margins, not desperation. Net signal: they look busy and well-capitalized, actively growing headcount to match demand, not a firm chasing scraps.

Fast + Epp's identity and marketing engine is almost entirely mass-timber/architecturally-expressive institutional work concentrated in Metro Vancouver (with satellite strength in Toronto/Ontario via Limberlost and international showcase projects in Germany/NY). Their public project pipeline shows very little visible presence in conventional concrete/steel institutional, healthcare, or industrial structural work, and their US west presence (Seattle office) surfaced almost no findable current project wins in search — the Seattle office appears thin/quiet compared to Vancouver and even Toronto. Possible displacement angles for KOR: (1) conventional (non-timber) healthcare and industrial institutional work where their niche brand is less differentiated; (2) Washington/Oregon US-west institutional pursuits, where their marketing/portfolio footprint is weak relative to their Canadian presence; (3) clients wanting fast turnaround — a firm this deep in flagship/award-chasing work, hiring to catch up, may be slower/pricier on straightforward bread-and-butter institutional jobs than a firm actively seeking volume.

Magnusson Klemencic Associates (MKA)

7 known seats in our data

RECENT Rainier Square Redevelopment; Seattle Convention Center Summit; Seattle Aquarium Ocean Pavilion; San Diego International Airport (SAN) Terminal 1 and Roadways

CAPACITY Visibly stretched, not hungry. MKA is running a deep, continuous pipeline of marquee institutional/high-rise work (airports in Nashville and San Diego, a presidential library, major hospital work at Ohio State, Seattle Aquarium, multiple towers in SF Bay Area/Austin/Chicago) with steady award wins through 2024-2026 — this is a firm operating at or near capacity on trophy projects, not scrambling for pipeline. Reinforcing signals: active recruiting posted for BOTH Seattle and a newer Chicago office (structural design engineers, mid-level and entry-level), a steady cadence of principal/associate promotions (Feb and Apr 2026) and a new hire announcement (Mar 2026) — classic signs of a firm growing headcount to service demand, not backfilling after losses. No signs of layoffs, project cancellations, or news gaps.

MKA's public project portfolio, careers pages, and news feed show essentially zero visible presence in western Canada (no BC/Vancouver/Alberta projects surfaced) and no Pacific Northwest Canada office — their footprint is Seattle HQ + Chicago + project-by-project national/international work (NYC, Ohio, Texas, California, airports). That absence is the displacement opening for KOR: MKA is a US-centric "trophy tower/airport/institutional" shop that appears to compete on signature high-rise and civic megaprojects, not on BC/western Canada institutional, seismic-retrofit, or mid-market developer-residential work — the lanes where KOR already has credibility. There's no evidence of a stumble or lost project to exploit; the displacement angle is geographic/segment whitespace (western Canada institutional and heritage/seismic work) rather than a capacity crack.

Bush, Bohlman & Partners

6 known seats in our data

RECENT Cowichan District Hospital Replacement (607,600 sf, 7-storey, targeting first Net-Zero Carbon Hospital in Canada / BC's first all-electric hospital); UBC Verve & Symphony Residences; St. Vincent Project (healthcare); City Centre Surgery (Surrey tower, 5-OR surgical facility, 5th floor)

CAPACITY Visibly stretched, not hungry. Bush, Bohlman & Partners (31 people, Vancouver-based — NOT Seattle as originally framed; their footprint is BC/Western Canada, not the US Pacific Northwest) has at least 8-10 major projects in active construction or design simultaneously across healthcare (Cowichan District Hospital, St. Vincent, City Centre Surgery), K-12 (Burke Mountain Secondary, Royal Bay Secondary), justice (Nanaimo Correctional Centre), institutional (Science World, UBC Henry Angus seismic, UBC Verve & Symphony Residences), civic (Cambie Fire Hall, YVR CORE/A-B Connector) and childcare (Riverside Princeton). Their careers page and a July 2026 LinkedIn post both flag active hiring — currently recruiting an Intermediate Structural Revit/CAD Technician and general "always looking for talented individuals" language — which at a firm this size (31 staff) against this volume of concurrent major work (including a 607,600 sf hospital and an 18-storey tower) reads as capacity strain, not slack-hunting. A March 2026 award win (Cowichan Touchstone Gold) plus near-weekly LinkedIn project posts through June-July 2026 signal a full, high-visibility pipeline rather than idle capacity.

Correction for the record: the firm is headquartered at 1500 West Georgia St, Vancouver, BC — not Seattle. No US Pacific Northwest projects, offices, or job postings surfaced in this research; their entire visible workload is Western Canada (BC).

KPFF

6 known seats in our data

RECENT Providence Cedars-Sinai Tarzana Medical Center — New Patient Wing & Main Entry Building; LACCD LA Mission College — Student Services Center / Admin Building Phase II; Clay Lacy Aviation FBO, John Wayne Airport; 631 S Vermont, Los Angeles

CAPACITY Stretched, not hungry — but signals are US-centric, not concentrated in western Canada. Evidence of stretch: KPFF opened two brand-new offices in 2025 (Denver, Columbus) on top of its existing ~25-36 office network, is simultaneously running open structural-engineer reqs in Seattle, Sacramento, LA/Orange County and elsewhere, and is picking up national trade-press rankings across multiple sectors at once (student housing #4, outpatient healthcare #5, plus a federal GSA Design Excellence port-of-entry project) — that's the profile of a firm winning broadly and staffing up to cover it, not one hunting for work. No evidence found of layoffs, project cancellations, or public complaints about overload; conversely, no direct evidence (in this pass) of major concurrent western-Canada institutional pursuits, suggesting BC/Alberta bandwidth may be comparatively thin relative to their US Pacific Coast and now Midwest/Mountain expansion.

Displacement angle: I could not find a single named active or recently-won KPFF project in British Columbia/western Canada in this pass — their Vancouver office exists (kpff.com/office/vancouver) but produced no discoverable 2024-2026 project wins, awards, or news in general web search, unlike their heavy US West Coast (LA, Seattle) and now Rocky Mountain/Midwest visibility. That's a real gap worth testing directly against KPFF's Vancouver office roster/LinkedIn and BC award lists (e.g., the 2025 BC Consulting Engineers Awards page checked here went to Associated Engineering and PBX Engineering, not KPFF) rather than treating as confirmed absence — general web search under-indexes Canadian trade press and firm portfolio sub-pages. If confirmed on a deeper pass, BC public-institutional (health authorities, higher-ed, prequalified rosters) is a plausible lane where KOR could contest KPFF's presence while KPFF's attention is visibly absorbed by US expansion (Denver/Columbus stand-ups) and California/Pacific NW healthcare and student-housing wins. Recommend a follow-up targeted deep-research pass restricted to Canadian sources (Journal of Commerce, Daily Commercial News, BC Bid, LinkedIn KPFF Vancouver posts) before acting on this as a confirmed weakness.

Paradigm Structural Engineers

6 known seats in our data

RECENT GENESIS Marina (SF Bay Area waterfront/mixed-use) — structural engineer on team w/ SOM, Webcor, BKF Engineers; first TRUE Gold-certified construction project; also named to 2024 Best of the Bay Awards list; High-stability conveyor system for a chemical production facility (transfer towers to 60m, 32m steel conveyor galleries, trestles, hybrid deep-pile/raft foundations for seismic/uplift); Jagalchi (retail/hospitality project) — double gold winner; IKEA store/warehouse portfolio — multiple builds incl. Frisco TX, East Palo Alto CA, West Sacramento CA, Portland OR, Draper UT, Round Rock TX

CAPACITY Stretched/growing, not hungry. Paradigm is actively recruiting across all three offices (San Francisco, Chicago, Dallas) simultaneously — postings open for Senior Project Engineer, Project Engineer, Staff Engineer I/II, and Interns in every office at once (careers page, checked 2026-07-13), which is a classic multi-office growth-hire pattern rather than backfill. They describe themselves as "growing and hiring talented engineers" in their own marketing copy. Headcount is reported around ~54 employees firm-wide (small-to-mid shop), so this many concurrent postings against that base is a meaningful stretch signal. They also lean into a heavy, high-value niche (Mission Critical/data centers with Fluid Viscous Dampers and Base Isolation retrofit work, a QTS podcast appearance, and Data Center Open sponsorship) — data center demand nationally is a boom sector right now, so this practice group is likely running hot and selective about new work, not scrambling for pipeline. Caveat: could not find a project count or explicit "backlog"/"record year" statement from the firm — this signal is inferred from simultaneous hiring breadth + niche market heat, not a direct capacity disclosure.

IMPORTANT SCOPE MISMATCH: paradigmse.com "PARADIGM Structural Engineers, Inc." is a San Francisco/Chicago/Dallas firm with a national US footprint (CA SBE certified, licensed in 21 states) and international conveyor/industrial work — it is NOT a western Canada firm and has no visible BC/Alberta/PNW office or project presence found in this pass. A separate, unrelated "Paradigm Engineering Inc." (Coquitlam, BC, founded by Amir Mohseni) does seismic non-structural-component work for education/healthcare/transportation in BC but is a much smaller, differently-focused shop — worth confirming with Ian which "Paradigm" was intended before treating this as a KOR competitor map. Displacement angle (for the SF/Chicago/Dallas Paradigm, as researched): their public sector focus is retail (IKEA program), mission-critical/data centers, life sciences, and higher-ed retrofit/seismic-upgrade work in California and the Midwest/Texas triangle — there is no visible west-coast-Canada, Pacific Northwest (WA/OR), or heavy-civil/institutional-public (K-12, courthouses, transit) presence in any source found. If this is genuinely the competitor of interest, the gap is geographic (no BC/Alberta/PNW footprint at all) rather than sector weakness — KOR's western Canada institutional and P3/alliance relationships are simply outside Paradigm's current operating radius, so displacement there isn't really "beating them," it's "they aren't there." If Ian instead meant the Coquitlam BC "Paradigm Engineering Inc.," that firm's public profile is narrow (seismic bracing/non-structural components) and a fresh, targeted research pass on that specific entity is recommended before using this data for BD targeting.

WHM Structural Engineers

6 known seats in our data

RECENT Squamish Fire Hall No. 1 & Emergency Operations Centre; Alcuin College (K-12 school + community hub); Kalesnikoff Plant Expansion (mass timber prefab/modular facility); Keystone Legacy

CAPACITY STRETCHED, not hungry. WHM is actively hiring multiple mid/senior structural design and project engineers in Burnaby/Vancouver (ZipRecruiter postings for "Structural Design Engineer" and "Structural Design or Project Engineer," min. 3 yrs wood/concrete experience, P.Eng/EIT with EGBC) — a classic sign of a backlog outpacing headcount. Their own site markets them as "one of the fastest-growing structural engineering firms in the country," with a two-office footprint (Burnaby HQ + Calgary) and a current portfolio spanning mass timber institutional (fire hall, school, industrial plant expansion), multi-unit residential, and commercial office simultaneously. Principal Brian Maver has recently done podcast appearances discussing firm growth strategy — messaging consistent with a firm managing growth/capacity rather than chasing work. No signs of layoffs or a quiet pipeline were found; caution flag is that no verified, large, marquee win was found for the very latest months (mid-2025 to mid-2026), so the pipeline reads busy-but-mid-size rather than a blockbuster surge.

Displacement angle: WHM's visible portfolio skews toward BC (Burnaby/Vancouver/Squamish/North Van/Castlegar) mass timber, K-12/institutional-lite, and residential/multi-unit — with a stated but thin US/international presence (past project mentions of Dubai/Cuba/Tajikistan appear historical/opportunistic, not a sustained US west institutional practice). No evidence surfaced of WHM competing on larger P3/health authority/major public-institutional or US west-coast (WA/OR/CA) public-sector work — the space KOR is positioning in. Their active hiring push plus reliance on client-relationship testimonials (e.g., HCMA architect praise) rather than published major-award wins suggests they win primarily through repeat-architect relationships in BC mass timber/residential rather than competitive institutional RFPs — a lane where KOR's public-roster and prime-consultant strategy (Island/Okanagan, US west institutional, health/seismic) is not directly contested by WHM today.

Glotman Simpson Consulting Engineers

4 known seats in our data

RECENT Banff 200 Block Redevelopment (Visitor Centre Pavilion + residential building); First Light, Seattle WA (Westbank, 48-storey mixed-use residential tower, Belltown); Senákw (Squamish Nation / Westbank, Kitsilano, Vancouver — major multi-tower residential development); Fifteen Fifteen (1515 Alberni Street), Vancouver — Kengo Kuma-designed tower

CAPACITY Visibly stretched, not hungry. Three concurrent open roles on their careers page (Structural Design Engineer, Field Engineer/Technician, Intermediate Project Engineer — glotmansimpson.com/careers/) plus a recent IT Support Technician posting indicate active hiring across engineering and support functions. Their public 'Upcoming Projects' list currently carries 12 named active jobs spanning Vancouver/Burnaby, and a California/Pacific NW cluster (LA, Santa Monica, San Diego, Irvine, Seattle) — a wide geographic footprint for a ~90-person firm. They just won a high-profile international design competition (Banff 200 Block, announced June 2026) on top of that load, and are simultaneously running an active sustainability/ESG publishing program (OnTrack series, SE2050 signatory, embodied-carbon benchmarking across 26 projects) — a sign of bandwidth being spent on brand/thought-leadership, not scarcity-driven marketing. Overall picture: a firm at or near capacity, staffing up to keep pace rather than chasing work.

Displacement angle: Glotman Simpson's entire visible book is high-end residential towers/mixed-use for name developers (Westbank, Squamish Nation, Kengo Kuma projects) plus a scattering of US west-coast luxury residential and one LA mass-timber office — essentially zero visible institutional/public-sector work (no K-12, health care, transportation, government, or industrial projects surfaced in their own project pages, news, or awards list). Their US presence is concentrated in coastal California/Seattle luxury condo/hotel towers, not west-coast public/institutional procurement. That leaves BC public-sector, health, education, and industrial/heavy-civil structural work — exactly KOR's core institutional lanes — as territory where Glotman Simpson has no visible track record or credibility to point to, and their current hiring-while-stretched posture (a 90-person firm juggling a dozen concurrent majors across three metro clusters) suggests limited spare capacity to credibly bid into those sectors even if invited.

Herold Engineering

4 known seats in our data

RECENT Serauxmen Stadium & Neck Point Park Parking Lot Redevelopments; Hammond Bay Elementary Addition; Victoria High School (seismic replacement); CVRD Administration Office Building, Comox, BC (with KMBR Architects)

CAPACITY Moderately busy but not visibly overstretched. Herold is a ~70-person Vancouver Island firm (Nanaimo HQ, offices in Victoria and Ucluelet) whose own project archive shows a fairly steady, unspectacular cadence of small-to-mid institutional/municipal/school work (roughly 1-3 named project posts per year on their news page, most recent dated Feb 2026 for a municipal parks/stadium job). No evidence of a hiring surge, no announcements of large new institutional wins, no visible "we can't take more work" signal, and no major staff-growth or new-office news since the Englobe acquisition (May 2025). The Englobe acquisition is the single biggest recent event -- Herold now operates as a division of a much larger multidisciplinary firm (Englobe), which likely gives them more back-office/bench capacity but also means integration overhead and possibly less local decision-making autonomy in the near term. Job postings found are limited (one Civil Technologist role in Victoria), suggesting steady-state staffing rather than an aggressive capacity build.

Herold's footprint is almost entirely Vancouver Island (Nanaimo/Victoria/Ucluelet/Campbell River/Comox/Port Alberni) -- they show essentially no presence in the Lower Mainland, Interior/Okanagan, Alberta, or US Pacific Northwest institutional markets, despite the research brief's "western Canada / US west" framing being their nominal category. That is the clearest displacement opening: KOR can compete directly for Island institutional/municipal/school/health work where Herold is the incumbent generalist, but has essentially no contest from Herold anywhere off-Island. Their project mix also skews toward civil/municipal/parks/bridges rather than complex seismic-retrofit or larger multi-story institutional structural work, so heavier seismic or larger-scale institutional structural pursuits on the Island (where KOR has seismic credentials) are a soft spot for them. The Englobe acquisition (2025) is worth monitoring for post-merger disruption -- staff departures or client-relationship gaps sometimes follow this kind of consolidation, which could open pursuit windows on existing Herold-held Island institutional relationships over the next 12-18 months.

KOR Structural

4 known seats in our data

RECENT Simone Little Italy (San Diego, CA) — 19-storey concrete high-rise; Sopa Square (Kelowna, BC) — 14-storey tower + 20 townhomes, 105 units, developer Aquilini, architect CEI; Evolution (Calgary, AB) — 20 & 33-storey towers + 8-storey mid-rise, 474 units; The Fellow (San Diego, CA) — 19-storey concrete high-rise, 130 units

CAPACITY Signs point to STRETCHED rather than hungry, though evidence is thin/indirect (KOR does not publish a live pipeline dashboard). Indicators: (1) firm describes itself as ~80 staff across Vancouver, Kelowna, Nanaimo, San Diego and other West Coast offices — a scale that implies a full multi-market book of work, not a lean shop looking to fill capacity; (2) portfolio page lists 1,500 completed projects across 7 provinces/5 states with concurrent live jobs in Vancouver, Calgary, Kelowna, and San Diego simultaneously — geographic spread of this kind is typically a sign of a firm running near capacity across multiple regional teams rather than idle; (3) active EGBC Accredited Employer Program participation and ongoing recruiting (Office Manager & Accounting Lead, Structural Site Inspector roles found via search, though the live careers page itself showed no postings at fetch time — openings may be rolling/short-lived, consistent with a firm backfilling rather than mass-hiring); (4) no visible BD push, RFP-chasing content, or "we have capacity" messaging on their news/LinkedIn feed — their public content skews toward awards and professional-development recognition (ACI award, Council for Tall Buildings membership, BC Housing research grant), which reads as an established firm reinforcing credibility, not a firm signaling hunger for leads. Net: moderate-to-high utilization, not a shop visibly scrambling for work.

Displacement opening: KOR's portfolio is heavily residential/mixed-use high-rise (117 of ~147 listed projects) concentrated in Vancouver/Lower Mainland, Kelowna/Okanagan, Calgary and San Diego — with only 3 institutional projects listed (Leo Wertman Residences, Belmont Village La Jolla, L'Arche Greater Vancouver, all senior-living/assisted-care, not public institutional like K-12, healthcare, or civic). This matches the internal memory note that KOR carries zero K-12 credit and no visible public-institutional (schools, hospitals, government) structural credential — a gap a competitor with a strong institutional/public-sector resume could target directly, especially in BC Housing, health authority, or school-district RFPs where KOR has no demonstrated track record. Geographically, their Okanagan/Kelowna presence looks thin relative to Vancouver/Calgary/San Diego (single flagship project, Sopa Square, surfaced), suggesting Interior BC public/institutional work is an underexploited flank.

Miyamoto International

4 known seats in our data

RECENT The Lombardi (mixed-use, 89 units, 1717 N. Bronson, Los Angeles CA — structural engineer); San Jose City College Career Education Complex — 3 DBIA-WPR awards (Distinction, Small Business Engagement & Growth, Virtual Design & Construction); Channel 24 (Sacramento) — Award of Excellence New Construction (SEAOCC, NCSEA), Sacramento Business Journal Best Real Estate Project; MiraCosta College Oceanside Campus Chemistry & Biotechnology Building

CAPACITY Moderately stretched but not maxed out — signals point to steady growth rather than crisis-level overload. Miyamoto ranked #122 on Inc.'s 2025 "Fastest Growing Private Companies in the Pacific" list and was named to ENR's 2025 Top 225 International Design Firms, both indicating sustained expansion. Current open postings (checked July 2026) show only 8 active roles, all concentrated in California/Nevada (Pleasanton, LA x2, West Sacramento, Ontario, La Mesa/San Diego, Las Vegas) — a modest, steady-state hiring pace (mostly Sr. Project Engineer level) rather than an aggressive hiring sprint, suggesting they are backfilling/scaling deliberately, not in an overload crisis. Their award list shows a dense, continuous flow of mid-size institutional/commercial wins (education, healthcare, mixed-use, historic rehab) concentrated almost entirely in California (Sacramento, LA, San Diego, Riverside, Ontario) plus one Las Vegas project — this is a firm running a full but manageable pipeline of \$20-80M-class projects, not chasing scarce work.

Displacement opportunity: Miyamoto's US footprint is almost entirely California/Nevada/Southwest-centric (Sacramento, SF, Pleasanton, San Jose, LA, Orange County, San Diego, Las Vegas, Phoenix, Reno, DC, Puerto Rico) — no listed offices in the Pacific Northwest (Seattle/Portland) or Canada, and no evidence found of active British Columbia or western-Canada seismic/institutional projects despite searches. Their brand is built on earthquake/seismic retrofit expertise, but their win list skews toward education, mixed-use/residential, and healthcare in California rather than heavy industrial, transportation, or large public-infrastructure work. For KOR, the clearest wedge is western Canada (BC/Alberta) institutional and seismic-retrofit work, where Miyamoto has visibility/reputation (earthquake engineering pedigree) but apparently no physical presence, local delivery team, or recent project record — a credibility gap KOR's regional presence could exploit, especially on Island/Okanagan and BC public institutional pursuits where an out-of-region US firm would be a weaker local-team story.

Thornton Tomasetti

4 known seats in our data

RECENT Jeddah Tower (Saudi Arabia) - now ~100 floors, on track to exceed 1,000m, becoming tallest building ever built; Nu Stadium at Miami Freedom Park (new home of Inter Miami CF) - opened April 2026, largest canopy in MLS; Ryan Field redevelopment, Northwestern University, Evanston IL - topped out Nov 2025, opening 2026; Athletics (MLB) future Las Vegas ballpark - first 200-ton roof truss segment installed June 2026

CAPACITY Stretched, not hungry. TT is running several concurrent marquee majors simultaneously (Jeddah Tower topping 100 floors, Ryan Field topping out, Las Vegas A's ballpark roof erection, Nu Stadium delivery, multiple FIFA 2026 stadium commitments) plus a heavy institutional/healthcare pipeline (UW Medical Center award). Job postings show ~144 open roles as of July 2026 (Zippia), consistent with active growth-mode hiring rather than a slowdown, but Glassdoor/Indeed reviews flag high turnover in the 5-10 yr experience band and "moderate" morale — a sign the stretch is real internally even as the firm keeps winning trophy work. No evidence of layoffs or pullback.

Displacement angle: TT's western-Canada footprint is thin and centralized — their Canadian operation runs out of a single Toronto office (opened as part of a 2023-era Canada expansion), and the only two BC/Alberta-licensed engineers surfaced in search are based there, not in a BC office. Rogers Place (Edmonton) remains their headline western-Canada credential with no visible newer BC win in the last 24 months — i.e., no active BC office, no recent BC project news despite having BC-licensed staff on paper. That's a real gap: KOR has an Island/Okanagan and BC-institutional presence TT doesn't have locally, and TT's engineering bandwidth is visibly consumed by trophy US majors (supertall, stadiums, arenas) rather than BC mid-market institutional/developer-resi work — the lanes KOR already plays in. Worth flagging as a displacement opening on any BC public/institutional pursuit where TT is a nominal but non-local competitor.

Fast+Epp

3 known seats in our data

RECENT PNE Freedom Mobile Arch (long-span timber arch roof); Limberlost Place (George Brown College, Toronto — 10-storey mass timber); BCIT Tall Timber Student Housing; New Brunswick Museum Revitalization (134,000 sq ft, hybrid mass timber/steel, with Diamond Schmitt + EXP)

CAPACITY Moderately busy but not maxed out / opportunistically hungry. Signals: only 2 open roles posted on their careers page as of Jul 2026 (Vancouver-only: BIM Lead posted May 29 2026, Structural Engineer posted Apr 15 2026) — a modest, steady-state hiring pace, not a hiring sprint. Jan 2026 they promoted 4 new principals + 4 new associates (internal capacity-building/succession, suggests senior bench depth being reinforced rather than desperate scaling). They opened a Toronto office in Mar 2024 (expansion appetite) and relocated their Vancouver office (~20 staff) in Aug 2025. Active project load skews toward marquee award-winning mass timber/hybrid work (Limberlost Place, BCIT, PNE Arch, New Brunswick Museum) plus pro-bono/passion projects (Rwanda bridge, Ngayake Trail Bridge) — pro-bono bandwidth being available is itself a signal they are not overwhelmed with fee work right now. Overall: comfortably occupied with signature institutional/timber work and building out leadership bench, but not visibly overstretched (no mass hiring, no public delay/overrun complaints found) — a firm curating prestige work rather than one drowning in backlog. This reads closer to "selectively hungry for the right high-profile jobs" than "stretched thin."

Fast+Epp's confirmed footprint is Vancouver, Edmonton, Calgary, New York, Seattle, and Darmstadt (Germany) — no California office and no evidence of an active US West Coast expansion beyond Seattle, despite claiming a "flourishing" US project base since 2016. Their brand is heavily concentrated on architecturally expressive mass-timber/hybrid institutional and cultural work (museums, arenas, university buildings, community centres) — this is their strength and likely where they compete hardest and win awards, meaning head-to-head bids there are tough. The displacement opening is elsewhere: conventional/utilitarian institutional, healthcare, industrial, and P3/alliance structural work in BC/Alberta and the US Pacific Northwest/California where timber-expressive design isn't the differentiator — sectors where KOR's practical delivery and regional relationship depth can beat a firm optimized for signature-architecture projects. No public evidence of stumbles, cost overruns, or lost bids was found (their PR/news output is entirely award/win-oriented, as expected), so this displacement thesis is based on portfolio-gap and geography-gap inference rather than a documented failure.

IDA Structural Engineers

3 known seats in our data

RECENT Cilker School of Art and Design – Visual Arts Building, West Valley College (Saratoga, CA); Lightfighter Village – veterans affordable housing (71 units), Marina, CA (former Fort Ord), developer EAH Housing / Veterans Transition Center; City of Tracy Aquatic Park – multi-use Pavilion, Tracy, CA; Girls Inc. of Alameda County HQ renovation, Oakland, CA

CAPACITY Moderately stretched but not overheated. IDA is actively hiring "entry-level to senior" structural engineers across both its Oakland, CA and Portland, OR offices (hybrid model), which reads as steady/expansionary headcount growth rather than a defensive layoff posture — but this is a standing, broad-band posting (not a burst of specialized senior hires), suggesting normal churn/backfill rather than a hiring sprint tied to a specific major win. Their own news page shows a thin, steady drip of small-to-mid institutional/civic projects (school arts building, aquatic pavilion, affordable veterans housing) — no visible megaproject, no tower, no hospital/K-12 district win, and no award announcements in trade press (ENR, Building Design+Construction, etc.) in the last 24 months turned up in search. This is a firm with continuous but modest-scale institutional workload, not one visibly slammed with concurrent majors.

IDA's visible portfolio and news output skew almost entirely to the SF Bay Area / Oakland core and secondary Portland, OR — small civic buildings, affordable/multifamily housing, K-12/community-college arts and rec facilities. There is no evidence in public sources (their own news page, trade press, SF YIMBY project archive, LinkedIn) of IDA active in Canada, Washington state, or larger institutional/healthcare/higher-ed capital projects, and no award recognitions surfaced — meaning either their marketing/PR footprint is very quiet or their pursuit win-rate on larger, publicized institutional work is low. This is a displacement opening for KOR in two directions: (1) any BC/Pacific Northwest institutional or healthcare pursuit where IDA might be teamed as an out-of-region sub has essentially zero home-market credibility or recent visible track record north of Portland; (2) within their own California/Oregon core, IDA appears confined to smaller-scale civic/education/housing work, suggesting they are not currently a credible competitor for larger seismic-retrofit, hospital, or heritage-structural work — a lane where KOR's seismic/heritage credentials could win head-to-head if the geography overlaps.

Entuitive

2 known seats in our data

RECENT UBC Brock Commons – Phase 2 (student housing, mass timber, ~1,000 beds); Frances Street redevelopment (1254/1258/1270 Frances St, Railtown mass-timber creative/office/retail conversion); Royal Inland Hospital Patient Care Tower, Kamloops BC; Baird Blackstone Supportive Housing, Surrey BC

CAPACITY Visibly stretched, not hungry. Entuitive is actively recruiting across multiple levels (Senior Structural Engineer, Intermediate Structural Engineer x3, Senior Structural Technologist, Junior Structural Designer) simultaneously in Vancouver and Toronto per current LinkedIn/CareerBeacon/Glassdoor postings, and just marked its 15th-anniversary with a network of 5 offices and 350+ staff. It also just hired a Senior Associate (Reza Hadiseraji) into the Vancouver structural team specifically, and the firm just won a national NCSEA excellence award for the Google St. John's Terminal project (NYC) and a Gardiner Expressway construction-engineering credit in Toronto — signs of a firm riding high nationally and expanding capacity to keep up with demand rather than chasing work. Their BC pipeline (Brock Commons Phase 2, Frances Street, Royal Inland Hospital tower, two Surrey civic projects, multiple Vancouver commercial buildings) is broad but thin on detail/dates on their own site, suggesting a steady-state book of mid-size regional work layered under a few marquee national/US projects.

Displacement angle: Entuitive's Vancouver office (est. 2017) shows no dedicated US West Coast footprint beyond one San Diego mixed-use project — no visible presence in Seattle, Portland, or the Bay Area, and their western Canada portfolio skews toward institutional/civic (hospitals, recreation centres, university housing) and mid-rise commercial/mass-timber rather than large P3/major-infrastructure or heavy industrial work. Their own project pages are thin on specifics (no dates, no named roles beyond generic "structural engineer"), which combined with an active multi-level BC hiring push suggests they may be absorbing more institutional/public-sector BC work than their bench can comfortably staff — a potential opening for KOR to compete directly on BC institutional/civic RFPs (hospitals, recreation, higher-ed) where Entuitive's capacity looks tightest, and on the US West Coast generally where they have essentially no established beachhead outside San Diego.

Degenkolb Engineers

2 known seats in our data

RECENT UC Davis Health California Tower (replacement hospital tower, \$3.75B, 909,000 sf); Suzzallo Library Seismic Improvements, University of Washington; 400/430 California Street Voluntary Seismic Retrofit, San Francisco; 888 Post Street Seismic Upgrade and Renovation, San Francisco

CAPACITY Mixed, leaning stretched-but-uneven. Positive-growth signals: 20-30 open positions posted concurrently on ZipRecruiter/Glassdoor across CA offices (Senior Engineer, PM, Project Accountant roles), a new CFO hire (Tricia Ruby, Jan 2026) suggesting corporate scale-up, and a brand-new international office opened in San José del Cabo, Mexico (2025-2026) marketed around Baja seismic work — all consistent with a firm expanding capacity to chase major work (UC Davis \$3.75B tower, multiple SF seismic retrofit programs running concurrently). However, Glassdoor employee reviews specifically flag 'recent layoffs and paycuts' hurting morale and non-transparent management about company troubles — suggesting real financial/utilization pressure beneath the growth narrative, not pure over-capacity. Read together: Degenkolb is not simply too-busy-to-bid; they are managing margin/cost pressure while still adding headcount in target growth areas (seismic, Mexico), which reads as a firm trying to be selective/efficient rather than uniformly slammed.

Displacement opportunity: Degenkolb has ZERO presence in Canada — no Vancouver/BC office found in any search of their own site or third-party listings; their footprint is US West (SF Bay Area HQ, Oakland, Sacramento, LA, Orange County, San Diego, Seattle, Portland) plus new Detroit/Grand Rapids and Mexico offices, i.e. they are diversifying into the US Midwest and Latin America, not north into BC/Western Canada. This is a clean lane for KOR on any BC/Pacific Northwest cross-border pursuit where a US institutional client (healthcare, higher-ed, tech campus, seismic retrofit) might otherwise default to Degenkolb's brand recognition but has no local BC delivery capacity from them. Secondary softness: Glassdoor-flagged layoffs/paycuts point to internal strain that could slow their responsiveness/pricing discipline on new pursuits, worth probing on any competitive RFP where Degenkolb is a bidder. Caveat: this is a single research pass (not adversarially cross-verified against Degenkolb's own project list or LinkedIn posts individually), so treat the layoffs claim and exact office list as directional, not confirmed via primary source.

Equilibrium Consulting

2 known seats in our data

RECENT SFASU Pineywoods Dining Hall (Stephen F. Austin State University); Gitxsan West Secondary School; University of Toronto Scarborough Campus Indigenous House; Bakers Place (residential, USA)

CAPACITY Visibly stretched / expanding, not hungry. Concrete evidence: (1) simultaneous open reqs across Vancouver AND Atlanta through 2024-2025 for Junior, Intermediate, and Senior/Associate engineers, with postings explicitly citing a backlog of named projects (two Georgia Tech projects, a large CA mass timber corporate office, the Macon GA airport terminal, plus grant-funded research) as the reason for hiring; (2) active three-office footprint (Vancouver HQ, Atlanta since 2021, Paris/France SAS since Oct 2022 with its own growing team) described by the firm itself as "a new era of growth"; (3) they moved into a new purpose-built HQ (oN5, Vancouver) in 2024, a capex/expansion signal, not a firm in retrenchment; (4) 2024-2026 project pipeline spans Canada, US (GA, TX, CA), and France concurrently — high-profile, high-complexity mass-timber institutional/corporate work (Google MT1, Georgia Tech, university/First Nations institutional projects) that ties up senior staff for long design/CA cycles. Net read: they are winning marquee mass-timber work faster than they can staff it, which is a stretched-capacity, not idle-capacity, posture.

Displacement angle: Equilibrium's identity and staffing are concentrated almost entirely in mass-timber/CLT institutional, education, and corporate-office work, radiating from Vancouver/Atlanta/Paris — with essentially zero visible presence in BC's public K-12/health capital program, seismic upgrade/retrofit work, or heavy industrial/resource-sector structural work where KOR is credentialed. Their US growth is concentrated in the Southeast (Georgia) and isolated California mass-timber jobs, not the Pacific Northwest/California institutional bread-and-butter (schools, hospitals, government buildings) that don't use timber — leaving a lane open on the west coast for conventional concrete/steel institutional and seismic-retrofit pursuits where Equilibrium either doesn't bid or isn't the incumbent. Their expansion is also stretching a mid-sized firm across three countries at once, which is a classic overextension risk on responsiveness/local-code fluency for BC public-sector RFPs that value a dedicated regional presence.

Herold Engineering Ltd

2 known seats in our data

RECENT Serauxmen Stadium & Neck Point Park Parking Lot Redevelopments; Hammond Bay Elementary Addition (Nanaimo, mass timber + steel expansion, w/ School District #68 and KMBR Architects); Victoria High School seismic upgrade & expansion (reopening/completion milestone); Acquisition/merger: Herold Engineering acquired by Englobe Corporation (national engineering/environmental firm) — becomes a division of Englobe, retains Nanaimo/Victoria/Ucluelet offices and 70+ staff

CAPACITY Mixed/stable-to-modestly-hungry, not visibly overloaded. Public project pipeline is thin for a 24-month window — their own Projects Archive lists only two dated entries newer than 2022 (Hammond Bay Elementary, Nov 2024; Serauxmen Stadium/Neck Point, Feb 2026), suggesting light or slow-updating public-facing marketing of new wins rather than a wall of concurrent majors. Careers page shows only 4 open reqs (BE Technologist, BE Engineer, Bridge/Marine Structural Engineer, Bridge/Marine Structural Technologist) with generic "always hiring" language — steady-state recruiting, not a hiring sprint. The May 2025 acquisition by Englobe (national engineering/environmental firm) is the dominant recent event: it typically signals either a capacity/succession play (aging founder, 1994-founded firm cashing out) or a bid for more capital/backing to chase bigger work — worth reading as the firm being in a transition/integration period (leadership, branding, possibly cross-selling to Englobe's national client base) rather than either "buried in work" or "starving." Net: no strong stretched signal, no strong hungry signal — capacity likely near-normal but organizationally distracted by the M&A integration.

Herold's public project record is almost entirely Vancouver Island (Nanaimo/Victoria/Ucluelet/Courtenay/Port Alberni) K-12 seismic, municipal/civil, marine/bridge, and small-to-mid multifamily/senior housing work — essentially zero visible presence in BC Mainland/Lower Mainland institutional (health authority, post-secondary) work, Alberta, or any US west coast market despite KOR's stated growth targets there. Their specialty concentration is marine/bridge and building-enclosure — a narrow structural bench for large institutional or complex seismic-retrofit work outside schools. The Englobe acquisition (May 2025) is itself a displacement window: acquired firms often see senior staff attrition, client-relationship disruption, or brand confusion during integration — worth watching for departing engineers or unhappy long-term Island clients (school districts, municipalities) over the next 12-18 months. Displacement targets: (1) BC Mainland/health-authority and post-secondary institutional work where Herold has no track record; (2) any US West Coast (WA/OR/CA) opportunities, where they are entirely absent; (3) large complex seismic retrofit/upgrade work beyond routine school seismic mitigation, where their bench looks shallow relative to firms with dedicated seismic practices.

KOR Structural Engineers

2 known seats in our data

RECENT The LUXE Richmond BC; International Hotel & Tower, Vancouver BC; W16 by Olson Kundig, Vancouver BC; The Jervis, Vancouver BC

CAPACITY Moderately busy but not visibly overstretched. No frantic hiring spree — careers page shows steady, targeted recruiting (an EIT pipeline via EGBC's Accredited Employer Program, plus one Office Manager/Accounting role and one EGBC-registered Structural Engineer/PM-track role). Company self-describes as ~40+ staff. Active concurrent work spans Vancouver/Kelowna/Victoria high-rises plus San Diego, suggesting healthy but manageable multi-region load rather than crisis-level overcommitment.

Displacement angle: near-zero public PR/trade-press/LinkedIn footprint for wins or awards — they are not visibly competing for market mindshare, which is an opening for firms that publicize awards/case studies aggressively. Also thin coverage of Alberta/Prairie institutional work (only one Saskatchewan project, Mosaic Place/Field House, Moose Jaw) and no public K-12 school district credits — consistent with known gaps (prairie public-sector and K-12 institutional) where a competitor could push in ahead of them.

Magnusson Klemencic Associates

2 known seats in our data

RECENT San Diego International Airport (SAN) Terminal 1 and Roadways; Theodore Roosevelt Presidential Library (Medora, ND, Snøhetta-designed); Seattle Aquarium Ocean Pavilion; 580 Dubuque (South San Francisco, CA)

CAPACITY Stretched, not hungry — but with a soft underbelly. MKA is running a full docket of marquee institutional/aviation/high-rise work concurrently (SAN Terminal 1 Phase 1B, Theodore Roosevelt Presidential Library, 1000M Chicago, OSU Wexner hospital, Perelman PAC, ATX Tower, 580 Dubuque, 200 Park, Chase Center) and is actively recruiting (7 open reqs incl. Seattle and Chicago mid-level structural roles, 5-7 summer interns/year) — classic signal of being busy rather than short on work. However, Glassdoor reviews describe recurring, above-industry-average layoff cycles (roughly 50% of a hiring class gone within 4 years even in good years) tied to their business model of chasing only unique/very large trophy projects rather than diversifying revenue — meaning workload is real but volatile and project-dependent, with periodic churn that a stable competitor can exploit for talent and for clients who want continuity.

MKA's visible portfolio is almost entirely US-based trophy/high-rise/aviation/institutional work concentrated in Seattle, Chicago, NYC, and California — there is no evidence of an active British Columbia or western Canada presence beyond a single unverified secondary-source mention of a Vancouver Providence Health Care project (not listed on MKA's own site). Their business model explicitly chases large, unique, headline projects and reportedly lacks revenue diversification, meaning mid-size institutional/healthcare/education work in Canada and the broader BC/Pacific Northwest region is likely underserved by them — a clear displacement lane for KOR given MKA has no apparent local BC office, relationships, or regulatory/seismic-code familiarity investment there, and their layoff-driven staffing volatility makes them a less reliable long-term partner for recurring regional clients.

McElhanney

2 known seats in our data

RECENT Tank Hill Project – BC Highway Reinstatement (279m structural viaduct realigning Highway 1 over rail/creek, Thompson River corridor); Cold Spring Creek Debris Flow Mitigation (roller-compacted concrete slot barrier, largest in Canada for debris-flow mitigation); Jasper and Banff National Parks recovery/infrastructure projects; Highway 16 2nd Ave & McBride St Intersection Improvements

CAPACITY Visibly stretched, not hungry. Multiple concurrent major structural/bridge programs (Tank Hill viaduct, Cold Spring Creek RCC barrier, Jasper/Banff post-wildfire work, Phibbs Transit Exchange, 22 ReNew Canada Top-100 projects) plus active recruiting across BC (Vancouver Bridge Engineer, Victoria Senior Marine Structural Engineer, multiple civil/structural postings statewide) and a 2024 acquisition (BPTEC) specifically to add structural/bridge capacity in Alberta. This is a firm scaling capacity to keep up with a full pipeline, not chasing new work — award-circuit visibility (ACEC-BC, CEA, CCE, ReNew Canada Platinum) also signals they're optimizing for reputation/repeat public-sector work rather than needing new-logo pursuit.

Their visible strength is BC/Alberta public infrastructure (highways, bridges, transit, disaster/debris-flow mitigation) and they're actively growing bridge/structural capacity in Alberta via acquisition — but there is no evidence in this pass of a strong US West institutional presence (K-12/healthcare/higher-ed vertical building structural work), nor of California/Washington/Oregon project wins; their portfolio skews civil/transportation/geotechnical-adjacent rather than vertical building structural design. That gap — US west institutional building structural work, and BC vertical-building sectors outside transportation/disaster-recovery — is where KOR's institutional-building specialization could displace or out-compete them, since McElhanney's current growth investment (BPTEC acquisition, Victoria/Edmonton headcount) is concentrated in bridges/civil infrastructure, not buildings.

S&P Structural Engineers

2 known seats in our data

CAPACITY No usable signal. The only firm matching the name "S&P Structural Engineers" is a small Walnut Creek, CA (Bay Area) residential/light-commercial shop (also branded "S&P Professional Engineers"), founded ~2020, listed at 1-10 employees, focused on seismic retrofit, multifamily, ADUs, custom homes and remodels. No project-win announcements, award listings, trade press coverage, or hiring/job-posting evidence surfaced for this firm in 2025-2026 searches, so no capacity signal (stretched vs hungry) can be assessed.

This firm does not match the target profile of a western Canada / US west INSTITUTIONAL structural engineering competitor to KOR Structural. It appears to be a small residential-retrofit practice unrelated to the institutional/seismic-major market space. No verifiable project wins, active-project list, or displacement-opportunity data could be sourced under this exact company name. Recommend Ian confirm the intended firm name/city (possible candidates in the actual western Canada/US west institutional space would be firms like Read Jones Christoffersen, Aspect Structural, DIALOG, KPFF, Fast + Epp, Equilibrium, or a specific Seattle/Portland firm) so a real workload map and displacement analysis can be built. No sources are cited as findable/reliable evidence because none applied to the correct target firm."
