

Vancouver Coastal Health — Do We Need to Get on Their List?

Procurement-access briefing · KOR Structural — Business Development · 24 Jun 2026 · INTERNAL · Confidence: HIGH (verified against the live RFPQ26-PE list, eff. 29 May 2026)

Executive summary

- **YES — there is a real, current list, KOR is not on it, and we should apply.** The Lower Mainland Facilities Management (LMFM) shared-procurement arm for VCH + Fraser Health + PHSA + Providence runs a recurring Request for Pre-Qualification (RFPQ) that produces a “Pre-Qualified Professional Engineers” roster **with an explicit Structural discipline**. The current list is **RFPQ26-PE, effective 29 May 2026** — live, not the dead 2021 file our prior dossier flagged.
- **Passive BC Bid watching (what the platform does today) is NOT enough.** The platform already sees every public VCH tender, but that is visibility only. Getting *invited* to the formal small/mid non-alliance work requires being on the LMFM roster — a separate, proactive application via BC Bid + Bonfire. This is the net-new action.
- **Every named BC competitor is already on it — KOR is the gap.** Structural-tagged firms on the current roster include Glotman Simpson, Bush Bohlman, RJC, Fast+Epp, Entuitive, DIALOG, CWMM, Stantec and WSP (~19 structural firms). No KOR entry.
- **The roster does NOT win the marquee hospital towers.** Richmond Yurkovich (\$1.96B), VGH and Lions Gate run through Infrastructure BC’s competitive-alliance model, where structural is a sub inside the winning design-builder / architect team (Graham + HDR on Richmond). You cannot register directly with the owner for those — that track is architect/GC teaming, exactly as the existing VCH dossier already plays it.

ACT NOW

#	Action	Owner / channel	Timing
1	Set BC Bid + Bonfire alerts NOW for the “2026 RFPQ Annual Pre-Qualification Refresh” — the annual window is the entry point and is expected to post ~Sept–Oct 2026	BD / Ian	Now — watch weekly
2	Email LMFM to confirm the exact 2026 refresh posting/closing dates for the Engineers category	FMP@fraserhealth.ca	This week
3	Register a vendor account on the Fraser Health Bonfire portal (fraserhealth.bonfirehub.ca)	BD / Ian	This week
4	Assemble the Structural prequal package targeting NON-ACUTE + lower fee bands first: EGBC Accredited Employer proof, P.Eng roster, strongest high-importance (IE=1.5) seismic references	BD + Principals	Before window opens
5	Keep the marquee-tower track separate: continue architect/GC teaming (HDR, Kasian, Graham) per the VCH dossier — the roster does not apply there	BD	Ongoing

Good news on timing: this is an ANNUAL window, not a one-shot. The 2025 refresh closed 31 Oct 2025 and produced the current list (eff. 29 May 2026); the 2026 refresh should open this fall. Don’t miss it — it is also when listed firms must re-apply, so it is the universal entry point.

1. The list exists and is current (not the dead 2021 doc)

- **Owner of the mechanism:** Lower Mainland Facilities Management (LMFM) / the Facilities Management Procurement (FMP) division — shared procurement acting on behalf of Fraser Health, PHSA, Providence Health Care and Vancouver Coastal Health. Contact FMP@fraserhealth.ca.
- **What it produces:** 16 category-specific pre-qualified rosters, one of which is “Engineers,” which carries an explicit Structural discipline alongside Civil, Mechanical, Electrical, Geotechnical, Acoustical, Commissioning, Communication, Energy, Environmental, Technology and Transportation.
- **Proof it is current, not lapsed:** the live engineers list is RFPQ26-PE, **effective 29 May 2026**; the companion mechanical list is dated effective 1 Apr 2026. This supersedes the corrupted “Prequal_Engineers_Aug2021” artifact our prior research could not open. Fraser Health’s business-opportunities page (last updated 22 Jun 2026) states the lists are “refreshed on an annual basis.”
- **KOR is not on it.** The structural-tagged firms on the current roster include Bush Bohlman, Glotman Simpson, RJC, Fast+Epp, DIALOG, Entuitive, CWMM, Stantec, WSP and ~10 others — and no KOR Structural entry.

2. Where to register — the “anything other than what we’re doing” answer

We already see every public VCH tender via BC Bid — that is passive visibility. Being *invited* to formal/larger non-alliance work requires being on the roster, applied for separately:

- **Apply through BC Bid + Bonfire together.** Once a year a Notice of Intent (NOI) is posted on BC Bid inviting new suppliers to begin the pre-qualified application process; the RFPQ submission itself runs through the Fraser Health Bonfire portal at fraserhealth.bonfirehub.ca.
- Being prequalified gates invitations to formal/larger solicitations and raises the direct-award threshold (~\$50k vs ~\$25k for non-listed firms).
- It is not one-and-done: at each annual refresh, currently-listed firms must re-apply or be removed from the list.
- **Scope nuance (verified):** non-prequalified firms can still receive small direct awards (under ~\$25k); and Bonfire is not the sole portal — it is BC Bid + Bonfire together, with the BC Bid NOI giving the application/submission details.

3. The two tracks — keep them separate

Track	Delivery mechanism	How KOR gets in	Status
Small / mid + non-acute (LTC, OR renewals, seismic assessments, community health centres, facilities)	LMFM “Pre-Qualified Engineers” roster — Structural discipline	APPLY to the roster via BC Bid NOI + Bonfire at the next refresh	NET-NEW ACTION — not currently doing this
Marquee acute-care towers (Richmond Yurkovich, VGH Campus, Lions Gate)	Infrastructure BC competitive-alliance / Single-TOC	Teaming with the architect / design-builder (HDR, Kasian, Graham) — structural is a sub on the winning team	Already the VCH dossier strategy; roster does NOT apply

4. Why the list is irrelevant for the marquee towers

Confirmed 3-0 against Infrastructure BC primary sources: VCH's flagship acute-care projects are delivered via a project-specific Single Target Outturn Cost (TOC) Alliance Selection Process (RFQ then RFP), not a standing roster. Richmond Hospital Phases 2 & 3 (\$1.96B, VCH-owned) lists its Alliance Partners as Vancouver Coastal Health, Infrastructure BC, Graham Design Builders LP and HDR Architecture — one integrated team. The RFQ mandates a Respondent team with at least one construction NOP and one design NOP as distinct legal entities. A structural firm cannot register directly with the owner for these; it participates only inside a proponent team. So for the towers, the lever is the HDR / Graham / Kasian relationship — exactly as KOR-VCH-Deep-Analysis-2026-06-23 already lays out — and being on any VCH/LMFM list does nothing for them.

5. Eligibility + the tier structure (how the roster actually works)

The live list is not a flat yes/no roster — firms are pre-qualified cell-by-cell across two tiers, based on demonstrated reference experience:

- **Care type:** Acute Care Projects vs Non-Acute Care Projects (separate columns).
- **Consulting-fee band:** under \$150K | \$150K–\$1M | \$1M–\$5M | over \$5M.
- **Hard gate:** EGBC licensure (KOR clears this as an EGBC Accredited Employer since Jul 2023). References are then checked to assign which cells a firm is qualified for.
- **Strategic read:** KOR does NOT need acute-care credit to get listed. Small structural firms appear in only 1–2 cells (Equilibrium Consulting, Sense Engineering, Wicke Herfst Maver, C.Y. Loh) — proof you get listed at the band your references support. KOR’s realistic entry is Non-Acute + lower fee bands, which is exactly the “first healthcare credit” play; acute / >\$5M cells come later.

6. The current Structural roster — KOR confirmed absent (eff. 29 May 2026)

The 19 structural-tagged firms on the live RFPQ26-PE list. KOR Structural does not appear (no evidence it was ever listed and dropped — this is a never-applied gap). The healthcare heavyweights are qualified through Acute Care, over-\$5M.

Firm	Top tier qualified	Note
Bush, Bohlman & Partners LLP	Acute, all bands incl. >\$5M	Healthcare SE incumbent
Read Jones Christoffersen (RJC)	Acute, all bands incl. >\$5M	Healthcare SE incumbent
DIALOG BC	Acute, all bands incl. >\$5M	Multi-disc. incumbent
Entuitive Corporation	Acute, all bands incl. >\$5M	Holds Richmond Yurkovich
Stantec Consulting Ltd.	Acute, all bands incl. >\$5M	Multi-disc. major
Glotman Simpson	Acute + Non-acute, to \$5M	VCH acute history
Fast + Epp Structural Engineers	Acute + Non-acute, to \$5M	Timber/civic
WSP Canada Inc.	Acute + Non-acute, to \$5M	Multi-disc. major
Salas O'Brien Canada	Acute + Non-acute, to \$5M	
AtkinsRéalis Canada Inc.	Acute, to \$1M	
CWMM / CIMA / C.Y. Loh / Weiler Smith Bowers	Mixed mid bands	Mid-size structural
Associated Eng / Equilibrium / Sense / Wicke Herfst Maver / RDH	1–2 cells only	Small-band entrants
KOR Structural	NOT ON THE LIST	The gap this briefing addresses

7. Residual unknowns (minor)

- Exact 2026 refresh posting/closing dates — confirm with FMP@fraserhealth.ca (pattern points to a ~Oct close, list effective ~late May 2027).
- Whether VCH or PHSA maintain any separate engineering vendor-of-record outside the shared LMFM roster (PHSA's generic "pre-qualified consulting organizations" list scope for structural is unconfirmed — the LMFM Engineers list above is the relevant one).

8. Key sources (primary unless noted)

- **LMFM Pre-Qualified Professional Engineers list** — PRIMARY, eff. 29 May 2026 (the live roster; tier structure + full structural firm set; KOR-absence confirmed here): fraserhealth.ca/.../professional_Engineers_List.pdf
- Fraser Health — Business opportunities (16 rosters incl. Engineers; annual refresh; apply via BC Bid + Bonfire; FMP@fraserhealth.ca): fraserhealth.ca/about-us/business-opportunities
- 2025 RFPQ Annual Pre-Qualification Refresh — closed 31 Oct 2025 (establishes the annual fall cadence that produced the May-2026 list)
- RFPQ24-PE Request for Pre-Qualification for Professional Engineers (prior cycle; EGBC licensure requirement; Structural discipline)
- Fraser Health Bonfire portal (where RFPQ submissions are made): fraserhealth.bonfirehub.ca
- CanadaBuys RFPQ notices bc156485 / bc157001 (mechanism; “re-apply or be removed”; Bonfire submission)
- Infrastructure BC — Richmond Hospital Phases 2 & 3 + Competitive Alliance publication + RFQ-Conformed PDF (alliance delivery; team-only entry)

Companion detail: KOR-VCH-Deep-Analysis-2026-06-23 (pipeline, decision-makers, teaming strategy). This briefing resolves that dossier’s one open item — the LMFM prequalification list.
