Where the money stands today

The numbers your results will be judged against, read from Deltek and the CRM on the day you took this on. From tomorrow the morning brief records them **every day**; each month shows **what changed in dollars**.

The baseline

Eleven numbers, each one something you can move. They are recorded every morning from 19 October; the change from these values is your record.

MEASURE	18 OCT 2026	WHAT MOVES IT
Owed to KOR (AR)	$2,224,993	Collections calls, earlier invoicing
Owed over 60 days	$1,562,177	70% of AR. A weekly chase list by partner
Owed over 90 days	$1,417,771	64% of AR. Stop work at 90 days unpaid?
Owed on projects outside the active list	$808,429	31103-01 alone is $502k, last invoiced Feb 2024
Days to collect (DSO)	159 days	Everything above

MEASURE	18 OCT 2026	WHAT MOVES IT
Critical projects	72 of 812	Change orders on the worst ten
Projects over hours budget	272 of 812	Fee recovery, scope control
Pursuits won, CRM total	305 · $43.4M fees	Closing out open fees, the inner-circle clients
Pursuits lost, CRM total	327	Knowing why: the close-out calls
BD actions closed	0 of 31	The quickies and the monthly
Meetings held	1	The cadence: 2 monthlies, 6 quickies every two weeks

THE "BEFORE" LINE

The last twelve months

Collections have already been running ahead of invoicing: AR fell from **$2.99M in March** to **$2.41M at the end of September**, and $2.22M today. The worry is the other column: invoicing fell from **$622k a year ago** to **$289k in September**, the lowest month of the year. AR is shrinking partly because less is being billed.

✕ DO NOT SUBTRACT THE COLUMNS

Collected is cash received and includes GST; invoiced is fee revenue without it. Each column is right on its own, but the difference between them is not a profit or a loss.

PROPOSED · YOU DECIDE

Targets to 31 March 2027

The firm invoiced **$5.10M** in the last twelve months, about **$14,000 a day**. Every day taken off DSO is that much cash in the bank instead of in clients' hands.

- **DSO from 159 to 120 days.** 39 days × $14,000 ≈ **$545,000 of cash**, without billing a dollar more.
- **Over 90 days from $1.42M to under $700k.** A partner owns each invoice over 90 days and reports at the quickie.
- **31103-01's $502k settled one way or the other**: collected, settled, or written off with JM's decision recorded.
- **Invoicing back above $400k a month.** September's $289k is the number that matters most for next year.
- **Every fee older than 90 days closed**: won, or who won and why.

- **The cadence kept:** 2 monthlies and 6 quickies every two weeks, and the action list moving (closed > opened).

How each number is measured

- **Invoiced and collected:** Deltek LedgerAR. Invoiced = invoice lines on the revenue accounts (the ones the Financials screen's DSO uses); collected = cash receipts applied to the AR account. US jobs converted at 1.36. Check: September's $289,348 matches the Financials engine's own billing figure exactly.
- **AR at month end:** today's AR walked back through each month's change on the AR account. **DSO** = AR ÷ twelve months' invoicing × 365, the Financials screen's formula. Today's 159 days is that screen's figure.
- **Aging, critical and over-budget projects:** the Financials engine's own drilldowns, recorded once a day.
- **CRM wins and losses:** running totals, so a month's change is that month's decisions. Older wins and losses carry no close date, so there is no reliable BD history before today.
