

KOR Edmonton Trip Pack — July 10, 2026

For the travelling engineers · Compiled + verified 2026-07-01 · Companions: DIALOG Walk-In Card (one-pager) + full DIALOG brief

Every claim below is [V] verified (primary source, checked 2026-06-30/07-01) or [H] hypothesis to test in the room. Confidence noted where it matters.

1. Trip at a glance

- **Anchor:** DIALOG Edmonton (Georg Josi), July 10 — relationship meeting; no open seat to pitch. Use the Walk-In Card.
- **Stack:** 2–3 additional meetings below. All three ranked meetings are Edmonton-local and complement the DIALOG conversation (Clark and GEC are DIALOG's own project partners — natural bridges).
- **Trip goal:** come home with (1) DIALOG knowing exactly what KOR is *for*, (2) one live prequalification path started (Enoch), (3) one roster/relationship opened (Clark or GEC), (4) a first-hand read on Edmonton capacity pressure.

2. Ranked meeting list

#1 — Enoch Cree Nation (Infrastructure & Capital Projects) — the live open program [V 0.85–0.95]

- **Who:** **Craig McDonald** — Manager, Infrastructure — craig.mcdonald@enochnation.ca, **780-470-4505** (phone verified against enochnation.ca) + **Ryan Morin** — Capital Projects — same line. Their senior: **Troy McDonald**, Senior Manager, Infrastructure & Capital Projects (site lists **780-984-2662** — our older number is stale; verify before dialing). Political level: Chief **Cody Thomas** (also Grand Chief, Treaty 6) — sign-off, not working-level.
- **The hook [V 0.9]:** **Northeast Development** — 256 acres, **\$100M CIB loan (closed) + \$194M First Nations Finance Authority financing**. Civil/enabling works **under construction now** (Nation-owned Enoch Civil Construction LP), completion target 2027. The **vertical builds** — **Elders lodge, cultural centre, health facility, office/retail** — **are separately financed and their structural seats are plausibly still open**. Architect on the program side: **Tawaw Architecture Collective** (AOR on the Interpretive Centre; wrote Enoch's design guidelines/master plan) — **Tawaw has no in-house structural** [V 0.85]. Also live: maskekosihk Recovery Community (\$30M) opens this summer.
- **The ask:** *"Prequalify KOR as structural consultant for the Northeast Development vertical builds — and we'd welcome supporting Tawaw as their structural partner."* Health facility = KOR's core.
- **Fit note:** owner-direct Indigenous development is a KOR strike zone (te'tuxwtun pattern); engineers talking directly to an infrastructure manager is the right altitude.

#2 — Clark Builders (Turner) — best decision-maker access [V 0.85–0.95]

- **Who:** **Steve Lenarduzzi** — **President** (Edmonton, promoted 2022) — slenarduzzi@tcco.com · **Jay Harding** — Preconstruction Services lead (Edmonton) — jharding@tcco.com. *Caveat: some directories list @clarkbuilders.com — confirm working domain on first contact.* **Scott Benoit is in Clark's Vancouver office — meet him at home, not on this trip.**
- **Context [V]:** HQ Edmonton (5555 Calgary Trail SW); Turner has held 51% since 2011. Live work: **Red Deer Regional Hospital (~\$1.8B, Clark CM, DIALOG architect — in detailed design; SE effectively locked → shared context, not an opening)** and **YEG North Tower (~63k sqft; Clark builds under Edmonton Airports' CM Avatex Group; no structural sub named in any public source — unknown, not "open")**. Clark partners with external design firms; no in-house structural found [Inferred 0.6].
- **The ask:** *"Put KOR on Clark's structural design-partner roster for upcoming Alberta design-build/CM pursuits"* — with RDRHC/DIALOG as the shared story.

#3 — GEC Architecture (Edmonton studio) — the architecture-only channel [V 0.85–0.95]

- **Who:** **Peter Osborne** — Partner, established/leads the Edmonton studio — peter.osborne@gecarchitecture.com, **780-421-8060** (verified against his GEC bio); past president, Alberta Association of Architects; ECA board.
- **The hook [V 0.85]:** **NorQuest College Career Skills Centre (~\$240–250M)** — GEC architect; Alberta Budget 2025 gave only **\$4M planning/design money; the main capital grant is NOT yet approved**; construction 2027 at earliest, opening 2029+. **No structural engineer publicly engaged**. Position now, before funding lands. Second bridge: GEC is **co-architect with DIALOG on NAIT ASC** — natural segue from the anchor meeting.
- **The ask:** *"When the NorQuest grant lands, KOR wants to be your structural partner — and on future GEC Edmonton institutional pursuits."* GEC is architecture-only (no in-house SE).

Fillers / swap-ins (book only if schedule allows)

- **Group2 Architecture** (Craig Webber, 780-447-2990) — Edmonton institutional/K-12; **pre-call first** (Webber may split time with IPDA). No hard live hook.

- **Reimagine Architects** (ex-Manasc Isaac, Edmonton) — viable but cold (no contact on file); strong swap-in if a warm intro appears (Royal Alberta Museum redevelopment context).

Do NOT book

- **School boards (EPSB/ECSD):** accelerator-program schools procure SEs via **Alberta Infrastructure delivery consortiums, not the boards** [V]. John Fiacco (ECSD) is educational planning, not facilities.
- **Misericordia tower:** no architect named, planning-money only, no findable working contact — watch from home.
- **Edmonton Public Library:** our on-file contacts were corrupt (now cleaned) — nothing actionable.

3. Edmonton market brief (the macro picture)

- **Size & momentum [V 0.9]:** **\$37.2B in major projects (2025), #1 in Alberta, +6.1% YoY** (provincial Regional Dashboard — use this figure; the “\$43.3B/167 projects” number floating around is a trade-association quote, retire it). Edmonton led **all Canadian CMAs in population growth** Jul 2024–25 (+3.0%); back-to-back record housing starts 2024/2025.
- **The three demand drivers for institutional structural [V]:**
 1. **Post-secondary:** NAIT ASC — \$384M provincial / **~\$560M total**, DIALOG+GEC, PCL, major construction 2027, complete 2030. NorQuest CSC (~\$240M) behind it awaiting its grant.
 2. **Healthcare:** Acute Care Action Plan — **up to 700 new Edmonton beds** (Grey Nuns + Misericordia towers; **no construction timeline published** — explicitly criticized gap). Stollery standalone hospital is long-lead (planning funded; budget lines of \$38M planning / \$76M construction-directed exist across cycles — treat as sequential data points, not a near-term project).
 3. **K-12: \$8.6B provincewide School Construction Accelerator** with multiple Edmonton schools underway — but SE selection runs through Alberta Infrastructure consortiums/architects, not boards.
- **Capacity read [H — test with DIALOG]:** no direct “turning down work” evidence, but two independent Edmonton structural boutiques were absorbed within 5 years (**Protostatix → Englobe 2021; BPTEC → McElhanney 2024**) and 95% of AEC firms raised fees 2022–25. Ask Josi where *his* bandwidth is tightest — that’s the primary intel target of the trip.
- **SE competitive landscape [V]:** **RJC** — the incumbent to displace; **2 Alberta offices** (Calgary + Edmonton — not 4; Frank Cavaliere leads Edmonton structural). **DIALOG** — in-house. **Entuitive** — Edmonton since 2016 (institutional, no AB acute-care record). **Krahn** — Edmonton HQ, group model. **Protostatix/Englobe, BPTEC/McElhanney** — platform-backed incumbents. **Fast+Epp** — Edmonton since 2012. **Stantec** — Edmonton-HQ’d multidiscipline. (WSP: unresearched — don’t assume either way.)
- **Market-entry playbook for KOR [V unless noted]:**
 1. **APEGA Permit to Practice** — mandatory; mechanism: Service Alberta extra-provincial registration → APEGA consent letter (name contains “engineering” ... n/a for KOR) → Permit application with an APEGA-licensed **Responsible Member**.
 2. **Local presence is market norm, not law** [Inferred 0.3-0.6]: the **Fast+Epp precedent** (Vancouver HQ, durable Edmonton branch since Nov 2012) proves the organic-branch model; **McElhanney’s BPTEC acquisition** shows the buy-in model. Test the fly-in/local-associate question directly with DIALOG/GEC.
 3. **Register on Alberta Purchasing Connection** (purchasing.alberta.ca) — the front door to provincial RFQ/prequalification rosters; low cost, real visibility. (Many institutional SE seats still flow via the architect’s own sub selection — both channels matter.)
- **Headwind to acknowledge:** the capital plan is oil-price/fiscally sensitive; the healthcare towers have funding but no timelines. Don’t build the Edmonton case on any single project.

4. KOR prerequisites — close BEFORE the flight

1. **APEGA Permit to Practice status** — confirmed, in progress, or not started? (Blocks all AB work; not needed for BC scope like UHNBC.)
2. **2–3 nameable BC hospital / post-disaster structural references** — the healthcare wedge is hollow without them.
3. **The embodied-carbon / LCA story** — one slide/paragraph; DIALOG (B Corp, SE 2050) will expect it.
4. **Confirm Clark email domain** (tcco.com vs clarkbuilders.com) and **Troy McDonald’s current phone** before outreach.
5. Print: this pack + the Walk-In Card + the full DIALOG brief (reference copy).

5. Debrief capture — within 24h of landing home

For **each** meeting, record (a voice memo is fine — it all gets filed into KOR’s business-development database):

1. **DIALOG:** Is UHNBC structural in-house at DIALOG BC or open to a partner? Who do they reach for on the next Kaye-scale co-SE? Where is Edmonton structural bandwidth tightest (sectors, months)? Any names mentioned (partners, competitors, projects)?
2. **Enoch:** Status + procurement route for each vertical build (Elders lodge / cultural centre / health facility); Tawaw’s structural arrangement; prequalification process and timing.

3. **Clark:** How the design-partner roster works, who owns it, next pursuit where a structural partner is needed; YEG North Tower SE status.
1. **GEC:** NorQuest grant timing expectation; how GEC picks SEs; other GEC Edmonton pursuits 2026-27.
2. **Everything:** every firm/person/project named in any room — even in passing. These become platform records; they're how the next trip starts warmer than this one.

Hand the notes to Ian — they get fact-checked and filed into the BD database, the same way this pack was built. Every name and project you catch makes the next trip start warmer.

Verification: built first from KOR's existing research database (295 prior Alberta/Edmonton records reviewed), then two targeted research passes (meeting candidates; market picture), every claim checked against a primary source. Figures corrected along the way: \$43.3B→\$37.2B (sourced provincial number); RJC has 2 AB offices not 4; Scott Benoit is Vancouver-based; school boards don't hire the structural engineers. Sources: enochnation.ca, cib-bic.ca, gecarchitecture.com, norquest.ca, majorprojects.alberta.ca, clarkbuilders.com, alberta.ca, apega.ca, purchasing.alberta.ca, rjc.ca, englobecorp.com, mcelhanney.com, intuitive.com, CBC/CTV. All firm and contact details in this pack were filed into KOR's BD database on 2026-07-01.
