

## Greystar — the incumbent's dossier

Greystar is the largest US apartment developer and builds **vertically integrated** (its own GC). KOR is structural engineer of record on **four of their San Diego concrete towers**, all through architect **JWDA** — a proven, decade-spanning relationship to deepen.

### WHAT KOR HOLDS

| PROJECT                  | LOCATION      | SCALE                 | STATUS                         |
|--------------------------|---------------|-----------------------|--------------------------------|
| 6th & Palm               | Bankers Hill  | 20-storey · 214 units | <b>Building → 2028</b>         |
| Ancora                   | Little Italy  | 22-storey · 220 units | Delivered 2025                 |
| 525 / 6th & Olive        | Bankers Hill  | 20-storey · 204 units | Delivered 2022                 |
| Belmont Village La Jolla | 3880 Nobel Dr | 17-storey · 180 units | Delivered 2022 · senior living |

Belmont Village is Greystar's senior-living brand (they acquired it in 2022) — a second product line KOR has already delivered for them.

### HOW THE STRUCTURAL SEAT IS ACTUALLY WON

- **The architect of record assembles the team.** On Greystar SD work that's **JWDA** — they pick the structural engineer, then Greystar's in-house GC builds it. Keep JWDA warm in parallel; they're the real gate.
- **The seat goes by building type, not loyalty.** KOR wins the **concrete high-rise towers**. Greystar's SDSU student-housing job (Accolade Campanile) went to **VCA Structural** — same architect, same GC — because it's Type III **wood-frame-over-podium**, VCA's specialty. So the pitch is precise: "*We're your concrete-high-rise team,*" not "your SD structural firm."
- **If KOR wants the podium lane too**, that's a separate, deliberate capability sell against VCA — worth deciding before the trip.

### THE BC LEVER — REAL, AND ONE QUESTION UNLOCKS IT

Greystar has a live Vancouver pipeline, all **DIALOG**-designed: **1527 Main St** (371 rental units, 22+18-storey) and **1770 West 12th Ave** (264 units), both through rezoning; plus **University Heights** in Saanich (~593 units, building). Same city as KOR — a natural extension of the SD relationship.

**The one question for John Wilbeck (MD Canada):** "*On 1527 Main and 1770 W 12th, are you engaging an outside structural engineer, or is DIALOG self-performing structural?*" DIALOG has in-house structural, so this single answer decides whether there's a seat to pursue — turn the assumption into a fact before pitching.

### WHO TO TALK TO (emails Apollo-verified)

|                |                                                                                                                                                                    |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Adam Covington | Sr Director, Development — <b>San Diego</b> · adam.covington@greystar.com · the primary; runs Bankers Hill / Little Italy, quoted at the 6th & Palm groundbreaking |
| John Wilbeck   | Managing Director, <b>Canada</b> (Vancouver) · john.wilbeck@greystar.com · warmest door, same city — the BC fact-finder                                            |
| Raul Tamez     | Sr Director, Development — SoCal & Hawai'i (LA) · raul.tamez@greystar.com · reach beyond SD                                                                        |
| Jerry Brand    | Executive Director — Western Region · jbrand@greystar.com · senior lever above the SD team                                                                         |

## THE PLAY

---

- **Walk in as the incumbent.** Four SD towers are KOR's structural through JWDA — ask Covington what the next San Diego tower is and when the design team forms.
  - **Put the concrete-high-rise line on the record** so KOR is top-of-mind when the next tower (not a podium job) comes up.
  - **Open the BC thread with Wilbeck** using the single question above.
  - **Keep JWDA close** — they assemble every Greystar SD design team.
